which might be taken on future development and use of risk assessment methodology. This advice and information will assist the Commission in establishing policy regarding the use of risk assessment in the regulatory process. It will also clarify the achievements and limitations of the Reactor Safety Study. The Review Group will submit a report to the Commission on or before July 1, 1978.

In carrying out these assignments, it is anticipated that a number of working sessions will be scheduled at different locations, with notification to the public well in advance of each meeting. With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing 10 readily reproducible copies to the Review Group at the beginning of the meeting. Comments should be limited to areas within the Group's purview. Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than May 16, 1978, to Dr. John H. Austin, Office of Policy Evaluation, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting. Of course, comments not received in time for this meeting will be circulated to the members of the Review Group for consideration at a future meeting. Comments should pertain to the field of risk assessment methodology or should be based on the final report of the Reactor Safety Study, copies of which are available for public inspection at:

The NRC Public Document Room, 1717 H Street, NW.,Washington, D. C. 20555,

or

NRC's five Regional Offices of Inspection and Enforcement

REGION I

631 Park Avenue, King of Prussia, Pa. 19406.

REGION II

Suite 1217, 230 Peachtree Street, Atlanta, Ga. 30303.

REGION III

799 Roosevelt Road, Glen Ellyn, Ill. 60137.

REGION IV

Suite 1000, 611 Ryan Plaza Drive, Arlington, Tex. 76012.

REGION V

Suite 202, 1990 North California Boulevard, Walnut Creek, Calif. 94596.

Copies of the Final Report may be obtained from:

U.S. Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, Probabilistic Analysis Staff, Attn: Melea S. Fogle, telephone: 301-492-8377, 7735 Old Georgetown Road, Bethesda, Md. 20014.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The time allotted for such statements will be at the discretion of the Chairman. The Review Group will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on May 22, 1978, to the Office of Policy Evaluation, telephone 202-254-5184, Attn: John Austin, between 8:15 a.m. and 5 p.m. e.d.t.

(d) Questions may be asked only by members of the Review Group.

(e) Statements of views or expressions of opinion made by members of the Review Group at open meetings are not intended to represent final determinations or beliefs.

(f) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(g) A copy of the minutes of the meeting will be available for inspection on or after June 30, 1978, at the NRC Public Document Room, 1717 H Street NW., Washington, D.C. Copies may be obtained upon payment of appropriate charges.

Dated at Washington, D.C., this 27th day of April 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[7590-01]

[Docket No. 50-312]

SACRAMENTO MUNICIPAL UTILITY DISTRICT, RANCHO SECO NUCLEAR STATION, UNIT NO. 1

Order for Modification of License

I.—The Sacramento Municipal Utility District (the licensee), is the holder of Facility Operating License No. DPR-54 which authorizes the operation of the nuclear power reactor known as Rancho Seco Nuclear Station, Unit No. 1 (the facility) at steady reactor power levels not in excess of 2772 megawatts thermal (rated power). The facility consists of a Babcock & Wilcox Co. designed pressurized water reactor (PWR) located at the licensee's site in Sacramento County, Calif.

II.—In accordance with the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR 50.46, the licensee submitted on July 8, 1975, an ECCS evaluation for the facility. The ECCS performance submitted by the licensee was based upon an ECCS Evaluation Model developed by the Babcock & Wilcox Co. (B&W), the designer of the Nuclear Steam Supply System for this facility. The B&W ECCS Evaluation Model had been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR part 50.46 and appendix K. The evaluation indicated that with the limits set forth in the facility's Technical Specifications, the ECCS cooling performance for the facility would conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable-geometry, and long-term cooling.

On April 12, 1978, B&W informed the NRC that it had determined that in the event of a small break LOCA on the discharge side of a reactor coolant pump, high pressure injection (HPI) flow to the core could be reduced somewhat. Subsequent calculations indicated that in such a case the calculated peak clad temperature might exceed 2,200 F.

Previous small break analyses for B&W 177 fuel assembly (FA) lowered loop plants had identified the limiting small break to be in the suction line of the reactor coolant pump. Recent analyses have shown that the discharge line break is more limiting than the suction line break.

The Rancho Seco Nuclear Station, Unit No. 1, has an ECCS configuration which consists of Two high pressure injection (HPI) trains. Each train has a HPI pump and the train injects into two of the four reactor coolant system (RCS) cold legs on the discharge side of the RCS pump. (There is also a third HPI pump installed.) The two parallel HPI trains are connected but are kept isolated by manual valves (known as the cross-over valves) that are normally closed. Upon receiving a safety injection signal the HPI pumps are started and valves in the four injection lines are opened. Assuming loss of offsite power and the worst single failure (failure of diesel to start) only one HPI pump would be available and two of the four injection valves would fail to open.

If a small break is postulated to occur in the RCS piping between the

RCS pump discharge and the reactor vessel, the high pressure injection flow injected into this line (about half of the output of one high pressure pump) could flow out the break. Therefore, for the worst combination of break location and single failure, only one-half of the flow rate of a single high pressure ECCS pump would contribute to maintaining the coolant inventory in the reactor vessel. This situation had not been previously analyzed and B&W had indicated that the limits specified in 10 CFR 50.46 may be exceeded.

B&W has stated that they have analyzed a spectrum of small breaks in the pump discharge line and have determined that to meet the limits of 10 CFR 50.46, operator action is required to open the two manual operated crossover valves and to manually align the two motor driven isolation valves which had failed to open. This would allow the flow from the one HPI pump to feed all four reactor coolant legs. B&W has assumed that 30 percent of the flow would be lost through the break and 70 percent would refill the core. The licensee has committed to provide for the necessary operator actions within the required time frame. That is, in the event of a small break and a limiting single failure, manual action will be taken to begin opening these valves within 5 minutes and have them fully opened and an adequate flow split obtained within 10 minutes. To facilitate this operation the licensee has committed to maintain one of the series-connected, manually operated cross-over valves normally open. The analyses performed by B&W assumed that the flow split was established at 650 seconds by operator action. We conclude that the analyses are a reasonable approximation of the operator action that actually will be taken, provided specific procedures are prepared and followed to assure such action.

B&W has stated that a 0.15 ft^2 discharge line break, with the aforementioned operator actions, is the most limiting case. To arrive at this conclusion, B&W has performed analyses at break sizes of 0.3, 0.2, 0.15, 0.1, and 0.04 ft^2. The results, which were obtained using an approved appendix K model for blowdown, indicate core uncovery for about 500 seconds for the 0.15 ft^2 break. For this break size B&W has conservatively calculated the peak clad temperature to be approximately 1,760 F; well below the limits of 10 CFR 50.46(b).

B&W has indicated the manner in which the calculational methods have been revised and has indicated that their revised calculations are wholly in conformance with the requirements of 10 CFR 50.46. However, B&W has not yet had the opportunity to fully present the result of its calculations to the licensee for submittal to the NRC staff, and the staff has accordingly not had the opportunity to fully assess the new calculations. Until the licensee and the staff have an opportunity to review the B&W revised calculations, the staff has recommended and the licensee has agreed, that operating conditions be limited to a range in which ECCS performance for small break conditions is less sensitive to specific calculation inputs.

For this facility with operation up to 2,311 Mwt, ECCS performance calculations for the limiting small break does not even result in core uncovering, if appropriate operator action is properly taken (as described above), thus providing a very substantial margin on peak clad temperature below the limits of 10 CFR 50.46(b). For other reasons which are not safety-related, however, the plant is limited to a maximum power of about 2,080 megawatts thermal until approximately August 1978. At this lower power level, the safety margin on peak clad temperature will be even greater.

Therefore, until the staff has had the opportunity to fully assess the B&W revised calculations, operation of the facility at the power level specified in this Order, and in accordance with the operating procedures specified in this Order, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, such limits provide reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide the staff with B&W's reevaluation of ECCS performance applicable to the licensee's facility as promptly as possible, to submit a technical specification requiring appropriate operating procedures to assure required operator action as discussed herein, and affirmed that plant operation was limited to the maximum power level secified herein. Such procedures were described and the commitments confirmed by the licensee's letter of April 14, 1978, suplemented by letter dated April 21, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC Order. Upon satisfactory completion of our assessment of the revised evaluation, we will accordingly modify the authorization to operate the facility.

III.—Copies of the following documents are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the Sacramento City-County Library, Sacramento, Calif.

(1) Letters from J. J. Mattimoe to Mr. R. W. Reid, Chief, Operating Reactors Branch No. 4, dated April 17 and 21, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended and the Commission's rules and regulations in 10 CFR parts 2 and 50, *It is ordered*, That Facility Operating License No. DPR-54 is hereby amended by adding the following new provisions:

(1) As soon as possible, the licensee shall submit a reevaluation wholly in conformance with 10 CFR 50.46 of ECCS cooling performance calculated in accordance with the B&W Evaluation Model for operation with operating procedures described in its letters of April 14, and April 21, 1978, except that the time for completion of operator action shall be 10 minutes after initiation of the event.

(2) Until further authorization by the Commission, the power level shall not exceed 2,080 Mwt, and

(3) Until further authorization by the Commission, the licensee shall operate in accordance with the procedures described in its letter of April 14, 1978, supplemented by letters dated April 21, 1978, except that the maximum time for completion of operator action shall be 10 minutes after initiation of the event.

Dated at Bethesda, Md., this 26th day of April 1978.

For the Nuclear Regulatory Commission.

VICTOR STELLO, JR.,
Director, Division of Operating Reactors, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 14703; SR-CBOE-78-5]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Order Approving Proposed Rule Change

APRIL 25, 1978.

On February 28, 1978, the Chicago Board Options Exchange, Inc. ("CBOE"), La Salle at Jackson, Chicago Ill. 60603, filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and rule 19b-4 thereunder, copies of a proposed rule change which provides a means by which CBOE members may lease their Exchange memberships to qualified broker-dealers.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission release (Securities Exchange Act Release No. 34-14551, March 10, 1978) and by publication in the FEDERAL REGISTER (43 FR 11629, March 20,

V 43 | 86
M Y 3
7 8
UMI

1978). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public at the Commission's Public Reference Room.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-11980 Filed 5-2-78; 8:45 am]

[8010-01]

[Release No. 34-14704; File No. SR-CBOE-1978-8]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on March 31, 1978, Chicago Board Options Exchange, Inc. ("CBOE") filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Rule 7.6. A Board Broker's Duty to Report Unusual Activity.

Interpretations and Policies:

[Italics indicate new material]

.01 *To the extent unusual activity is apparent only through the inspection of trade tickets, a Board Broker is not responsible for reporting such activity unless the trade tickets are brought to his attention.*

Exchange's Statement of Basis and Purpose

The purpose of the proposed rule change is to clarify the general obligation of a Board Broker to report unusual conditions as described in CBOE Rule 7.6. This clarification of a Board Broker's general reporting obligation is required in light of planned changes in the CBOE price reporting system.

The typical method of price reporting on the floor of the CBOE calls for a seller to time stamp a price reporting ticket, and to place the ticket in a tray located at the Board Broker station. This ticket is then removed by the Board Broker or his staff, last sale information is updated on the screens on the trading floor, and the ticket is then forwarded to an Exchange price reporter for public dissemination of last sale information. Under this procedure, a Board Broker has the opportunity, which he may or may not take, to review every ticket before its dissemination; however, the system is prone to inefficiencies, especially in very active markets in which Board Brokers find it difficult to both forward price reporting tickets and to operate their book. Any delay in the forwarding of the trade tickets by the Board Broker to the price reporter causes tickets to be handed to the price reporter in large bunches, which in turn may cause late dissemination of price reports and sequencing difficulties.

In view of such possible problems resulting from the manual method of forwarding price reporting tickets, the CBOE's Board of Directors has approved the installation of a conveyor belt around each half of a trading post. The conveyor belt will accept price reporting tickets from the trading crowd, and will move these tickets directly to the end of the post where last sale information is disseminated by an Exchange employee. The use of the belt system will result in a quicker, more accurately sequenced public record of trading activity. The belt system will, however, remove from the Board Broker his opportunity to inspect every price report before it is disseminated. There are compensatory safeguards for the loss of immediate Board Broker inspections built into the price reporting system: for example, if a price reporting ticket shows a price outside the Board Broker's book, or a price which matches the bids or offers displayed by such book, a "See Board Broker" message appears on the terminal. These trade tickets are then brought to the attention of the Board Broker by Exchange staff, and require the Board Broker's approval before being entered into the system. A selective options monitor is also planned for display to the trading crowd so that a record of every reported transaction will be visible to all traders in the trading crowd, and exposes every reported transaction to self-policing by the crowd.

The proposed rule change does not relieve the Board Broker from all responsibility to report unusual activity, but rather that activity which is *only* apparent by reviewing trade tickets. It remains incumbent upon the Board Broker to monitor the crowd by all other available means, e.g., the planned selective options monitor and personal observation of traders' activity. If the Board Broker suspects unusual activity, trading tickets are available at the post for his review.

The basis of this proposed rules change is Section 6(b)(5) of the Act, for the proposal facilitates the transmission of information with respect to options transactions to the public which operates to protect investors and the public interest. Moreover, the introduction of improved means of transmitting options price information, and the clarification of existing rules so as to expedite the implementation of such improvements is consistent with the Congressional position stated in Section 11A(a)(1)(C)(iii) of the Act.

No comments were solicited from members regarding this proposed change.

The Exchange does not believe that this proposal will impose any burden upon competition.

The foregoing rule change has become effective, pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to the file number referenced in the caption above and should be submitted on or before May 23, 1978.

For the Commission by the Division of market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

APRIL 25, 1978.

[FR Doc. 78-11985 Filed 5-2-78; 8:45 am]

[8010-01]

[Release No. 20518; 70-6155]

GEORGIA POWER CO.

Proposed Acquisition of Electric Distribution System

APRIL 26, 1978.

Notice is hereby given that Georgia Power Company ("Georgia"), 270 Peachtree Street, NW., Atlanta, Ga. 30303, an electric utility subsidiary of The Southern Company, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 9(a) and 10 of the Act as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

Mississippi proposes to acquire from the United States of America, acting by and through the Administrator of General Services (the "Government"), the electrical distribution system located at and serving the area which was formerly the Glynco Naval Air Station, located near Brunswick in Glynn County, Georgia. Such electrical distribution system includes all primary and secondary overhead lines, street lights, poles with attachments, transformers, switches, easements, and rights appurtenant thereto located at the site of such naval air station, other than the airfield runway lighting and other electrical equipment directly related to the operation of the air terminal and airport facilities located upon such site.

Georgia is to pay the Government in respect of such distribution system a purchase price of $117,000 in cash, as was determined by negotiations between the parties. The original cost to the Government of such system was $1,504,904. The Government does not maintain any records as to the depreciation of such property. Georgia estimates that the current value of such distribution system is approximately $190,000.

Georgia has historically served the Glynco Naval Air Station through one metering point. When the U.S. Navy closed the air station, the distribution system was conveyed to the Government as surplus property. Georgia's purchase of such distribution system will enable Georgia to continue to service its customers upon the site of the air station without having to construct a new system.

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction. Information as to fees and expenses to be incurred in connection with the proposed transaction are to be filed by amendment.

Notice is further given that any interested person may, not later than May 25, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-11981 Filed 5-2-78; 8:45 am]

[8010-01]

[File Nos. 2-61324, 22-9576, 3-5436]

GENERAL AMERICAN TRANSPORTATION CORP.

Application and Opportunity for Hearing

MAY 1, 1978.

Notice is hereby given that General American Transportation Corp. (the "Company") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Commission that the trusteeship of Citibank, N.A. (the "Bank") under three indentures heretofore qualified under the Act, and a new indenture, which is to be qualified under the Act, is not as likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as trustee under any of the indentures.

Section 310(b) of the Act provides, in part, that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in the section), it shall within ninety days after ascertaining that it has such conflicting interest either eliminate such conflicting interest or resign. Subsection (1) of this section provides, with certain exceptions, that a trustee is deemed to have a conflicting interest if it is acting as trustee under another indenture of the same obligor. However, pursuant to clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture or indentures under which other securities of such obligor are outstanding, if the issuer shall have sustained the burden of proving on application to the Commission, and after opportunity for hearing, thereon, that trusteeship under the qualified indenture and such other indenture is not likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under any of such indentures.

The Company alleges that:

1. Applicant was incorporated in June 1975 as a wholly-owned subsidiary of GATX Corp. (formerly known as General American Transportation Corp.). On July 1, 1975, in connection with the restructuring of GATX Corp. from a combined operating and holding company to a holding company, Applicant was assigned the rights of GATX Corp. under its 17 then existing Equipment Trust Agreements (including the Series 61, 64, and 67 Equipment Trust Agreements referred to in paragraph 2 below) and assumed the obligations of GATX Corp. thereunder. Since July 1, 1975, two equipment trusts have been fully paid and terminated, and Applicant has issued equipment trust certificates under its Series 73 and Series 74 Equipment Trust Agreements.

2. It has outstanding three Equipment Trust Agreements for General American Transportation Corp. Equipment Trusts Series 61, 64, and 67 which are three of the 17 presently existing equipment trusts referred to above. Of the $40 million principal amount of Series 61 certificates issued, $14 million remains outstanding. The Series 61 Indenture was filed December 13, 1963. Of the $25 million principal amount of Series 64 certificates issued, $12.5 million remains outstanding. The Series 64 Indenture was filed July 13, 1967. Of the $60 million principal amount of Series 67 certificates issued, $42 million remains outstanding. The Series 67 Indenture was filed October 30, 1970.

3. It proposes to issue and sell approximately $60,000,000 in principal amount of General American Transportation Corp. Equipment Trust, Series 75, to be issued under an Indenture ("new indenture") which will be qualified under the Act.

4. The indenture dated as of May 15, 1978, is, and the new indenture will be,

V 43 — 86

secured by a separate lot of identified railroad cars, so that should the Bank have occasion to proceed against the security under one of these trusts, such action would not affect the security, or the use of any security, under any other trust.

5. The differences in the provision of the four indentures are not so likely to involve the Bank in a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as Trustee under any of the indentures.

The Company waives notice of hearing and waives hearing and waives any and all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice with respect to the application.

The period of notice hereinafter specified appears to be reasonable in the circumstances.

For a more detailed account of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the offices of the Commission at 500 North Captiol Street NW., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than May 10, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issued of law of fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue on order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A FITZSIMMONS,
Secretary.

[FR Doc. 78-12235 Filed 5-2-78; 8:45 am]

[8010-01]

[Release No. 20519; 54-258]

LYKES BROS., INC.

Filing of Plan for Compliance With Divestiture Order

APRIL 26, 1978.

Notice is hereby given that Lykes Bros., Inc. ("Lykes"), P.O. Box 1690, Tampa, Fla. 33601, a holding company, has filed a plan ("Plan") pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 ("Act") for the divestiture by Lykes of its interest in the common stock of Peoples Gas System, Inc. ("Peoples"), a gas utility company. All interested persons are referred to the Plan, which is summarized below, for a complete description of Lykes' proposals.

Lykes and its several nonutility subsidiaries are engaged in a diversified line of ranch and farm product operations throughout Florida and in parts of Georgia and Texas. The company also controls a major commercial bank in Florida. Lykes has issued an outstanding 18,792 shares of common stock held by approximately 177 shareholders. The stock is not actively traded.

In June 1976, Lykes acquired substantially all of the voting and nonvoting common stocks of Peoples, a retail natural gas distribution company incorporated in Florida and serving approximately 124,000 customers in two separate areas of that state. Peoples' rates and service are subject to the jurisdiction of the Florida Public Service Commission. At September 30, 1977, Peoples reported net utility plant of $35,351,031, and, for the twelve months then ended, gross revenues of $29,929, 376.

In anticipation of its acquisition of Peoples, Lykes filed with the Commission a statement under Rule 2 claiming the benefit of an exemption under Section 3 (a)(1) of the Act. The Commission terminated Lykes' exemption under Rule 2 on December 22, 1976, pursuant to Rule 6, after concluding that there was a "substantial question" as to Lykes' entitlement to such claimed exemption. In accordance with the Commission's notification, Lykes thereupon filed a formal application under Section 3(a) for an unqualified order of exemption. The Commission's Division of Corporate Regulation ("Division") contested the application. The Division and Lykes agreed to a stipulated record, and the parties filed their opposing briefs. (File No. 31-758; Administrative Proceeding File No. 3-5234).

After briefing the issues, but before a decision on the merits of the case, Lykes amended its application to request a qualified exemption under Section 3(a)(1), and to consent to the entry of an order under Section 11(b)(1) directing Lykes to dispose of its interest in Peoples. In its Memorandum Opinion and Order of April 6, 1978, the Commission approved the terms of Lykes' amended application and entered the appropriate order under Section 11(b)(1) and directed Lykes to file a plan for compliance with that order as soon as practicable. (HCAR No. 20487). Lykes has registered as a holding company pursuant to Section 5(a) of the Act for the limited purpose of complying with the divestiture order under Section 11(b)(1). Its Plan for compliance is a voluntary plan under Section 11(e). Under the Plan, Lykes proposes to distribute to its shareholders all of the common stock of Peoples now owned by Lykes, comprising 1,111,924.53 shares, or approximately 99%, of all of the issued and outstanding common stock of Peoples. In anticipation of the distribution, the articles of incorpoation of Peoples were amended to change Peoples' voting and nonvoting common stock to a single class of voting common stock. Peoples' stock will be distributed to Lykes' shareholders on the basis of 59.1701 shares of Peoples for each share of Lykes.

The Plan further provides that no more than one-third of the members of the board of directors of Peoples (to consist initially of six members) may serve concurrently as members of the board of directors of Lykes; that upon the divestiture, there will be no common operating officers of Peoples and Lykes, with the exception of one individual, who will serve as Comptroller of Lykes and Senior Vice President and Comptroller of Peoples; and that, with the exceptions noted, no person, nor any immediate member of such person's family, who has served as an officer or director of Lykes or any of its subsidiaries, shall be eligible to serve in either capacity with Peoples, until the expiration of the three year period from the date such persons ceased to serve with Lykes or any of its subsidiaries.

It is stated that no state or federal commission, other than this Commission, has jurisdiction over the distribution of Peoples stock in compliance with the Commission's Section 11(b)(1) order. A statement of the fees in connection with the Plan will be supplied by amendment.

Notice is further given that any interested person may, not later than May 15, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said Plan which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon Lykes at the above-stated address, and proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the Plan, as filed or as it may be amended, may be approved in the manner provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including notice of the date of the hearing (if ordered) or any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 20517; 70-6154]

MIDDLE SOUTH UTILITIES, INC. AND LOUISIANA POWER & LIGHT CO.

Proposal by Subsidiary Company To Issue and Sell Common Stock to Holding Company

APRIL 26, 1978.

Notice is hereby given that Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, La. 70112, a registered holding company, and its electric utility subsidiary company, Louisiana Power & Light Co. ("Louisiana"), 142 Delaronde Street, New Orleans, La. 70174, have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(a), 7, 9(a), 10, and 12(f) of the Act and Rule 43 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

Louisiana proposes to issue and sell to Middle South, and Middle South proposes to acquire 3,788,000 additional shares of its presently authorized but unissued common stock, no par value, for an aggregate cash purchase price of $25,000,000. Louisiana presently has outstanding 46,200,000 shares of common stock, no par value, having an aggregate stated value on its books of $303,900,000, all of which shares are owned by Middle South. Louisiana intends to apply the proceeds of such sale to the payment of short-term indebtedness incurred for the partial financing of Louisiana's construction program, estimated at $206,800,000 for 1978, and for other corporate purposes.

Louisiana and Middle South believe it is preferable for sales of the new common stock to be timed to coincide with Louisiana's cash needs from time to time, which are primarily determined by the nature and pace of its construction program. Accordingly, Louisiana and Middle South have requested that the Commission's order permit the sale of the new common stock to occur from time to time at any time through and including December 31, 1978, in increments to be determined by Louisiana and Middle South.

It is stated that no special or separate expenses are anticipated in connection with the proposed transaction except for the filing fee paid to this Commission and for legal fees estimated at $2,000. It is further stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than May 25, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 34-14689; File No. SR-NYSE-78-20]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on March 23, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

EXCHANGE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The rule as proposed to be amended would essentially retain existing requirements regarding training and examination but would add a new flexibility in accommodating the needs of registered representatives who intend to limit their activities to such specialized areas as investment company securities and variable contracts, real estate securities, and direct participation programs. Accordingly, such persons would qualify in accordance with the functions they will perform and the services they will afford. The rule contemplates acceptance of qualification requirements imposed by other (self) regulatory bodies.

TEXT OF PROPOSED RULE CHANGE

The text of Rule 345.15 as proposed to be amended is attached as Exhibit 1-A.

EXCHANGE'S STATEMENT OF THE PURPOSE OF THE PROPOSED RULE CHANGE

The purpose of the proposed change is to permit registered representatives to qualify with the Exchange in accordance with their activities and functions. The proposed Rule change is in harmony with the approach reflected in proposed SEC Rule 15b7-1 under the Exchange Act. Among specialized activities to be recognized are: investment company securities and variable contracts, real estate securities, and direct participation programs. In order to accommodate future developments, the Rule anticipates recognition for other specializations, subject to appropriate qualification. The provisions proposed for deletion are either redundant or unnecessary in light of the proposed revised language.

The proposed rule would continue the concept of a registered representative who would be qualified to solicit the sale or purchase of all securities or other similar instruments. The usual training requirement for such registered representative candidate, without actual experience, would continue to be four months after which passing a qualification examination acceptable to the Exchange is required.

Registered Representative candidates who intend to engage solely in specialized activities must qualify by meeting such training and examination requirements acceptable to the Exchange for the specific security or financial service involved. The Rule envisions the acceptance of qualification requirements imposed by other (self) regulatory bodies and retains the language in the existing Rule concerning training and examination waivers.

MY 3 — 78
UMI

V 43 | 86

EXCHANGE'S STATEMENT OF THE BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

(i) The proposed rule change gives the Exchange the capacity to carry out the purposes of the Act set forth in sections 6(c)(3)(A) and 6(c)(3)(B) which deal with standards of training, experience and competence. Additionally, the proposed rule change is intended to accord with Proposed SEC Rule 15b7-1 which permits qualification in accordance with specialized functions.

(ii) The proposed rule change will have the effect of widening opportunities for access by persons desiring to become associated with a member organization.

(iii) Not applicable.

(iv) Not applicable.

(v) The proposed rule is consistent with the Exchange's obligation to promote just and equitable principles of trade in that it will bring salespersons in specialized areas under the supervisory umbrella of Exchange standards. The proposed rule fosters cooperation and coordination with others engaged in regulation in that favorable consideration will be given to the training and/or examination requirements or practices of other (self) regulatory bodies, in lieu of those imposed by the Exchange.

The proposed rule removes impediments to and will aid in perfecting the mechanism of a free and open market and a national market system by the recognition of specialized functions presently permissible under NASD provisions and contemplated by proposed SEC Rule 15b7-1.

The protection of investors and of the public interest will be furthered by the proposed rule change in that these persons will be regulated under the high standards of conduct already set forth in the Exchange's rules.

(vi) Once registered, all persons to whom the Rule is applicable become subject to the Exchange's jurisdiction to impose discipline for violation of the provisions of the Act, the rules or regulations thereunder and the Constitution and Rules of the Exchange.

(vii) Not applicable.

(viii) Not applicable.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGE

While comments were not solicited in regard to this proposal, E. F. Hutton & Co., Inc. made a formal request that the Exchange adopt a change such as is now proposed to set different qualifications for persons who would engage solely in a specialized area.

BURDEN ON COMPETITION

This proposal will not impose any burden on competition and is likely to diminish any burden which would exist were the Exchange not to recognize specialized functions.

On or before June 7, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before May 24, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

APRIL 20, 1978.

New language italicized. Deleted language in [brackets].

EXHIBIT 1-A

Rule 345.15 As Proposed To Be Amended

.15 Acceptability.

(1) Each registered representative, whatever the nature or extent of his activity, must qualify by meeting the training requirement and by passing a qualification examination acceptable to the Exchange.

(2) Applications for registered representative candidates will be considered by the Exchange for those duly qualified persons whose activities are limited solely to the solicitation of the sale or purchase of: investment company securities and variable contracts, real estate securities, and direct participation programs.

(3) Additionally, the Exchange will consider applications for registered representative candidates engaged in limited activities other than those enumerated in (2) above.

(4) (a) [Training—] The usual requirement for training candidates without previous actual experience is four months. The training period may be reduced or waived by the Exchange if the candidate for registration has had some previous actual experience in the securities business as a principal or employee, or in a closely allied field (such as a bank trust officer).

[Examinations—Near the close of the training period, candidates for registration are normally required to pass a qualifying Exchange examination. A Study Outline for Registration Examination describes the qualifying examination in detail. The work of most registered representatives demands a depth of knowledge of corporate securities especially stocks. The examination is designed to meet this demand. It tests on a broad range of securities knowledge, and in depth on corporate stocks.

Any individuals who are engaged in the solicitation or handling of business in, or the sale of, commodities future contracts must demonstrate their competency by satisfying a solicitors examination requirement of a national commodities exchange, which examination is acceptable to the New York Stock Exchange. Any individual engaged in the purchase or sale of securities, or other instruments for the account of his employer must demonstrate his competency by satisfying an examination requirement acceptable to the New York Stock Exchange.

(See Rule 342.13 Para. 2342.13 for examination requirements of supervisors).]

(b) If the candidate is advanced in years, or suffers from a physical infirmity or health condition which might be seriously aggravated by a required examination, the examination requirement may be waived at the discretion of the Exchange: *Provided,* The firm certified that the candidate has been adequately trained.

(See Rule 342.13 Para. 2342.13 for examination requirements of supervisors.)

(c) Consideration will also be given to the training and/or examination requirements or practices of other (self) regulatory bodies, and satisfaction of such requirements may be accepted by the Exchange in lieu of those imposed by it.

(5) Individuals who are engaged in the solicitation or handling of business in, or the sale of, commodities futures contracts must demonstrate their competency by satisfying a solicitors examination requirement of a national commodities exchange, which examination is acceptable to the Exchange. Individuals engaged in the purchase or sale of securities, or other similar instruments for the account of their employer must demonstrate their competency by satisfying an examination requirement acceptable to the Exchange.

[Release No. 14705]

PACIFIC STOCK EXCHANGE, INC.

Applications for Unlisted Trading Privileges and of Opportunity for Hearing

APRIL 26, 1978.

The Pacific Stock Exchange, Inc. ("PSE") has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(C) of the Securities Exchange Act of 1934 (the "Act") and Rule 12f-1 thereunder for unlisted trading privileges in the securities of the companies as set forth below, which securities are registered with the Commission pursuant to Section 12 of the Act or which would be required to be so registered except for the exemption from registration provided in subsection (g)(2)(B) or (g)(2)(G) of section 12.[1]

United Canso Oil & Gas, Ltd., common stock, $1 par value (Canadian), File No. 7-5022.

Canada Southern Petroleum, Ltd., common stock, $1 par value (Canadian), File No. 7-5023.

United Canso Oil & Gas, Ltd. and Canada Southern Petroleum, Ltd. are currently listed on the PSE and the Boston Stock Exchange, Inc. ("BSE"). These companies have filed applications to withdraw from listing and registration on the PSE and BSE, which applications are currently pending before the Securities and Exchange Commission.

Upon receipt of a request, on or before May 23, 1978, from any interested person, the Commission will determine whether the applications with respect to the companies named shall be set down for hearing. Any such request should include a brief statement as to the title of the security in which the person is interested, the nature of his interest in making the request, and the position which he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on the said applications by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, not later than the date specified. If no one requests a hearing with respect to the particular applications, such applications will be determined by order of the Commission on the basis of the facts therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-11984 Filed 5-2-78; 8:45 am]

[1] These are not the first applications for unlisted trading privileges pursuant to section 12(f)(1)(C) of the Act to be filed with the Commission. The Commission currently has pending before it a PSE application for unlisted trading privileges pursuant to section 12(f)(1)(C) in the common stock of Pacific Resources, Inc. (File No. 7-4933).

[License No. 01/01-0289]

CAPITAL ASSISTANCE CORP. OF CONNECTICUT

Issuance of License to Operate as a Small Business Investment Company

On March 13, 1978, a notice was published in the FEDERAL REGISTER that Capital Assistance Corp. of Connecticut, 33 Brook Street, West Hartford, Conn. 06110, had filed an application with the Small Business Administration (SBA) pursuant to section 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1977)) for a license to operate as a small business investment company.

Interested parties were given until the close of business on March 28, 1978, to submit written comments on the application to the SBA.

Notice is hereby given that no written comments were received, and having considered the application and all other pertinent information, the SBA approved the issuance of License No. 01/01-0289 on April 24, 1978, to Capital Assistance Corp. of Connecticut pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended.

[License No. 04/04-0137]

LaBARON CAPITAL CORP.

Application for License as a Small Business Investment Company (SBIC)

Notice is hereby given of the filing of an application with the Small Business Administration (SBA), pursuant to section 107.102 of the regulations (13 CFR 107.102 (1977)), under the name of LaBaron Capital Corp., 4900 Bayou Boulevard, Suite 106, Pensacola, Fla. 32503, for a license to operate in the State of Florida as a Small Business Investment Company (SBIC) under the provisions of the Small Business Investment Act of 1958 (Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors, and major stockholders are as follows:

Roy Hess, Chairman of the Board and President, 4900 Bayou Boulevard, Suite 106, Pensacola, Fla. 32503.
Edward K. Edwards, Vice President and Director, 4900 Bayou Boulevard, Suite 106, Pensacola, Fla. 32503.
Malcolm K. Pfeiffer, Secretary and Treasurer, 4900 Bayou Boulevard, Suite 106, Pensacola, Fla. 32503.
James R. Redmond, Vice President and Director, 4900 Bayou Boulevard, Suite 106, Pensacola, Fla. 32503.
Charles S. Liberis, Director and General Counsel, 4900 Bayou Boulevard, Suite 106, Pensacola, Fla. 32503.

The Applicant will begin operations with a capitalization of $525,000 which will be a source of long-term loans and equity investments for qualified small business concerns.

The Applicant will conduct its operations principally within a 200 mile radius of the city of Pensacola, Fla., and in other areas within the United States of America and its territories and possessions as may from time to time be approved by the SBA as its operating territory.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, including adequate profitability and financial soundness in accordance with the Act and regulations.

Notice is further given that any interested person may, not later than fifteen (15) days from the date of publication of this notice, submit written comments on the proposed company to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

[8025-01]

NEW COURT VENTURES, INC.

[Proposed License No. 02/02-0349]

Application for a License to Operate as a Small Business Investment Company

An application for a license to operate as a Small Business Investment Company under the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 661 et seq.), has been filed by New Court Ventures, Inc. (the Applicant), with the Small Business Administration (SBA) pursuant to 13 CFR 107.102.

The applicant with its principal place of business at One Rockefeller Plaza, New York, 10020, will begin operations with $500,000 of paid-in capital and surplus. The applicant will be the wholly owned subsidiary of New Court Private Equity Fund, Inc. (NCPEF), a closed-end investment company with 87 beneficial owners. The securities sold to NCPEF by the licensee will account for one percent of NCPEF's assets. NCPEF will also manage the applicant.

The officers and directors of the applicant will be as follows:

John P. Birkelund, Chairman of the Board, Director, 1020 Fifth Avenue, New York, N.Y. 10028.
Charles L. Lea, Jr., President, Director, 77 Park Avenue, Greenwich, Conn. 06830.
George F. Dinneen, Senior Vice President, Director, 20 Club Drive, Summit, N.J. 07901.
Francis X. Driscoll, Senior Vice President, Director, 8 Hansen Lane, Huntington Station, N.Y. 11746.
Charles T. Sager, Vice President, Director, 15 West 72d Street, Apartment No. 4C, New York, N.Y. 10020.
Albert S. Gluck, Secretary, Treasurer Director, 60 East End Avenue, New York, N.Y. 10028.

The above individuals have extensive experience in the venture capital field. They are also officers of NCPEF and New Court Securities, Inc. (NCS). The applicant will use office space furnished at no cost by NCS which will also serve as the applicant's investment advisor.

Officers of the applicant propose to become members of the board of directors of small concerns in which the applicant may invest. It will be the general policy of the applicant to work closely with its clients.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Act and the SBA rules and regulations.

The applicant will conduct its business primarily in New York City. The applicant intends to provide a source of equity (rather than collateral) oriented financing for small concerns. The early investments of the licensee will often be in convertible debt instruments which will provide current income while maintaining a potential equity interest.

Any person may, on or before (15 days from the date of this notice), submit to SBA written comments on the proposed Licensee. Any such communications should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in New York City.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: April 28, 1978.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

[Declaration of Disaster Loan Area No. 1460]

NORTH DAKOTA

Declaration of Disaster Loan Area

As a result of the President's major disaster declaration, I find that Adams, Billings, Bowman, Burleigh, Cass, Dickey, Dunn, Emmons, Golden Valley, Grand Forks, Grant, Hettinger, La Moure, Logan, McIntosh, Mercer, Morton, Pembina, Richland, Sioux, Slope, Stark, Traill, and Walsh Counties constitute a disaster area because of damage resulting from severe storms, ice jams, snowmelt, and flooding beginning about March 11, 1978. The Small Business Administration will accept applications for disaster relief loans from disaster victims within the above-named counties and adjacent counties within the State of North Dakota. Eligible persons, firms, and organizations may file applications for loans for physical damage until the close of business on June 16, 1978, and for economic injury until the close of business on January 17, 1979, at:

Small Business Administration, District Office, Federal Office Building, Room 218, 653 Second Avenue North, Fargo, N. Dak. 58102.

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: April 22, 1978.

A. VERNON WEAVER,
Administrator.

[FR Doc. 78-12059 Filed 5-2-78; 8:45 am]

[8025-01]

[Declaration of Disaster Loan Area No. 1458]

RHODE ISLAND

Declaration of Disaster Loan Area

The area of 38, 42, 44, 46, and 48 High Street in the town of Westerly, Washington County, R.I., constitutes a disaster area because of damage resulting from a fire which occurred on March 26, 1978. Eligible persons, firms, and organizations may file applications for loans for physical damage until the close of business on June 22, 1978, and for economic injury until the close of business on January 22, 1979, at:

Small Business Administration, District Office, 57 Eddy Street, Providence, R.I. 02903,

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: April 22, 1978.

A. VERNON WEAVER,
Administrator.

DEPARTMENT OF STATE

[Public Notice CM-8/52]

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on international multimodal transport and containers of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting from 9:30 a.m. to 5 p.m., on Wednesday, June 7, 1978, in room 9232 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C. The meeting will be open to the public.

The purpose of the meeting is to discuss matters germane to multimodal transport and containers. The following specific issues will be addressed in the order indicated:

Discussion of preparations for June intersessional OECD meeting of the Intergovernmental Preparatory Group on International Multimodal Transport;

Discussion of regulations for the International Convention on Safe Containers (CSC);

M Y 3 7 8 UMI

V 4 3 — 8 6

Briefing on present U.S. status regarding TIR Convention, 1975, and Customs Convention on Containers, 1972;

Discussion of the following matters as addressed by the ECE, Group of Rapporteurs on Container Transport:

Proposed Convention on Container Standards International Multimodal Transport International Convention on Safe Containers (CSC);

Hamburg Conference (March 1978), on Maritime Bill of Lading;

Discussion of preparations for the 19th IMCO Subcommittee on Containers and Cargoes, July 24-28, London.

Necessary documents will be distributed as early as possible.

Any questions concerning this meeting should be directed to Mr. Richard E. Johe, Department of State, 202-632-1313.

Comments from the public will be welcomed.

Dated: April 25, 1978.

RICHARD K. BANK,
Chairman, Shipping Coordinating Committee.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

PUBLIC INSPECTION OF WRITTEN DETERMINATIONS

Intention to Disclose

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of intention to disclose.

SUMMARY: This document provides notice that the Service intends to make open to public inspection certain written determinations. This notice also explains how any person may determine whether any of the described written determinations pertain to that person, and explains the procedures that person may follow if there is disagreement regarding the proposed deletions.

DATES: Persons wanting to find out whether their particular written determinations are among those to be made open to public inspection pursuant to this notice are requested to contact the Service by May 18, 1978.

Requests for additional deletions must be submitted by June 7, 1978. A petition in the United States Tax Court must be filed by July 18, 1978. Except for the disputed portion of any document that is the subject of an action brought in the United States Tax Court, the written determinations described in this notice will be made open to public inspection on August 28, 1978.

ADDRESS: Any questions or correspondence regarding this notice should be sent to: Internal Revenue Service, Attention: T:FP:R, Ben Franklin Station, P.O. Box 7604, Washington, D.C. 20044.

FOR FURTHER INFORMATION CONTACT:

George E. Freeland of the Rulings Disclosure Branch, Tax Forms and Publications Division, Office of the Assistant Commissioner, Technical, 202-566-4378 or 202-566-6272.

SUPPLEMENTARY INFORMATION: Section 6110(h) of the Internal Revenue Code of 1954 provides that certain written determinations (letter rulings and technical advice memoranda) issued in response to requests submitted before November 1, 1976, shall be open to public inspection. Accordingly, the Service is preparing to open to public inspection the written determinations issued after December 31, 1953, but before January 1, 1968, classified as reference and that originated in the Individual Tax Division, Office of the Assistant Commissioner (Technical), or predecessor divisions, and that involve issues falling within the jurisdiction of that Division. A written determination classified as reference is one the Commissioner has determined to have significant reference value.

Issues falling within the jurisdiction of the Individual Tax Division are those involving:

(a) Income taxes of noncorporate taxpayers (including individuals, partnerships, estates and trusts);

(b) Political organizations under section 527 of the Internal Revenue Code (except section 527(f));

(c) Employment taxes and taxes on self-employment income;

(d) Estate, gift, and certain excise taxes;

(e) Procedure and administrative provisions of the Internal Revenue Code, except those specifically applicable to employee plans, exempt organizations, and actuarial determinations.

The Division also has jurisdiction over issues involving both noncorporate and corporate taxpayers with respect to:

(f) Charitable contributions; tenant-stockholders of cooperative housing corporations;

(g) Employee stock option and stock purchase plans;

(h) Real estate investment trusts;

(i) Election of certain small business corporations as to tax status and related matters, except the rules relating to certain qualified pension plans. The Division does not have jurisdiction over issues involving excise taxes under Chapters 42 and 43 of the Internal Revenue Code, nor did it issue written determinations prior to October 1, 1973, involving Interest Equalization Tax.

The Division is composed of three Branches: Individual Income Tax Branch (T:I:I); Estate and Gift Tax Branch (T:I:EG); and Wage, Excise and Administrative Provisions Branch (T:I:WEA). All reference written determinations issued during the prescribed time periods discussed in this notice and originating in these branches or predecessor branches are intended to be within the scope of this notice.

DELETIONS

Section 6110(c) of the Code requires the Internal Revenue Service to delete certain information from the documents described in this notice. The Service intends to delete names, addresses, and taxpayer identifying numbers, and will also attempt to recognize and delete other identifying details, trade secrets, and the other information described in section 6110(c), before making the written determination open to public inspection.

Persons to whom the written determinations described in this notice pertain (or successors in interest, executors, or authorized representatives of these persons) may contact the Internal Revenue Service to find out whether their particular written determinations are among those to be made open to public inspection pursuant to this notice. These persons may request a copy of their written determinations with the proposed deletions indicated. Such requests should be submitted by May 18, 1978. Such requests must indicate the specific name of the party to which the written determination pertains, for example, a corporation acting on behalf of one or more subsidiaries must indicate the name of such subsidiary or subsidiaries. If such a person disagrees with the proposed deletions, that person may indicate any additional information that person believes should be deleted. Any request for additional deletions must be submitted by June 7, 1978, and must include a statement indicating which of the exemptions provided in section 6110(c) of the Code is applicable to each additional deletion requested. If the Service feels it cannot make any or all of the additional deletions requested, the Service will so advise the requester. The requester will then have the right to file a petition in the United States Tax Court. This petition must be filed by July 18, 1978.

ADDITIONAL DISCLOSURE

After the deleted copy of a written determination is made open to public inspection in the National Office Reading Room, any person may request the Service to make additional portions of the written determination open to public inspection. If the Service receives a request that involves disclosure of names, addresses, or taxpayer identifying numbers, the Service will deny the request. If the request involves disclosure of anything other than names, addresses, or taxpayer identifying numbers, the Service will contact the person to whom the written determination pertains before further action is taken.

M Y 3 — 7 8 UMI

BACKGROUND FILE DOCUMENTS

After the deleted copy of a written determination is made open to public inspection, any person may request copies of related background file documents. Notice will be provided to the person to whom the written determination pertains if a request for related background file documents is received. The notice and any other notice or correspondence relating to public inspection of written determinations will be mailed to the latest address in the Service's written determination file, unless a later address is provided to the Service in connection with these matters.

The written determinations described in this notice will be made open to public inspection by being placed in the National Office Reading Room, Room 1564, Internal Revenue Service Building, 1111 Constitution Avenue NW., Washington, D.C., on August 28, 1978. However, the disputed portion of any document that is the subject of any action brought in the United States Tax Court shall not be made available until after a court determination regarding such portion is made.

JEROME KURTZ,
Commissioner of Internal Revenue.

[4830-01]

[Delegation Order No. 156, Amdt. 6]

REGIONAL COMMISSIONERS, ET AL.

Delegation of Authority

AGENCY: Internal Revenue Service.

ACTION: Delegation of Authority.

SUMMARY: This Amendment permits Regional Commissioners, District Directors and Assistant to the Commissioner (Public Affairs) to disclose certain taxpayer identity information to the press and other media for purposes of notifying persons entitled to undelivered tax refunds. The text of this Amendment appears below.

EFFECTIVE DATE: April 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Howard T. Martin, CP:D, 1111 Constitution Avenue NW., Room 1603, Washington, D.C. 20224, Telephone Number, 202-566-3908, not a toll-free telephone number.

HOWARD T. MARTIN,
Director, Disclosure Operations Division.

DISCLOSURE OF IDENTITY INFORMATION OF TAXPAYERS ENTITLED TO UNDELIVERED TAX REFUNDS

The authority vested in the Commissioner of Internal Revenue by IRC 6103 (m)(1) and Treasury Department Order No. 150-37 to disclose taxpayers' names and the city, state and zip code of their mailing addresses to the press and other media for purposes of notifying persons entitled to undelivered tax refunds, is delegate to all Regional Commissioners, District Directors, and the Assistant to the Commissioner (Public Affairs).

This authority may not be redelegated.

This Order supplements paragraph 9 of Delegation Order No. 156, issued May 19, 1976, which is printed in the FEDERAL REGISTER dated May 21, 1976, Vol. 41, Number 100, page 20898.

JEROME KURTZ,
Commissioner.

APRIL 19, 1978.

[4810-22]

DEPARTMENT OF THE TREASURY

Office of the Secretary

STEEL WIRE ROPE FROM THE REPUBLIC OF KOREA

Antidumping Extension of Investigatory Period

AGENCY: United States Treasury Department.

ACTION: Extension of Antidumping Investigatory Period.

SUMMARY: This notice is to advise the public that the Secretary of the Treasury has determined that a tentative determination as to whether sales at less than fair value of steel wire rope from the Republic of Korea have occurred cannot reasonably be made in 6 months. This decision will be made in not longer than 7 months from the date of the initiation of the investigation.

Sales at less than fair value generally occur when the price of merchandise sold for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries.

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Leon McNeill, U.S. Customs Service, Office of Operations, Duty Assessment Division, Technical Branch, 1301 Constitution Avenue NW., Washington, D.C., 202-566-5492.

SUPPLEMENTARY INFORMATION: On September 27, 1977, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26 and 153.27) from counsel acting on behalf of Broderick and Bascom Rope Company of St. Louis, Missouri alleging that steel wire rope is, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) (hereinafter referred to as "the Act"). On the basis of this information, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of November 1, 1977 (42 FR 57202).

For purposes of this notice, the term "steel wire rope" means ropes, cables, and cordage other than wire strand, of steel, other than brass plated, not fitted with fittings, not made up into articles and not covered with textiles or other nonmetallic materials.

Pursuant to section 201(b)(2) of the Act (19 U.S.C. 160(b)(2)), notice is hereby given that the Secretary concludes that the determination provided for in section 201(b)(1) of the Act (19 U.S.C. 160(b)(1)) cannot reasonably be made within 6 months. The determination under section 201(b)(1) of the Act (19 U.S.C. 160(b)(1)) will, therefore, be made within no more than 7 months.

A one-month extension of the investigatory period is required in this case in view of the volume and complexity of the information submitted by the respondents relating to numerous varying sizes and specifications of the subject merchandise, and the additional time needed to analyze and verify such information before a tentative determination can be made.

This notice is published pursuant to section 201(b)(2) of the Act (19 U.S.C. 160(b)(2)).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

APRIL 28,1978.

[8320-01]

VETERANS ADMINISTRATION

CAREER DEVELOPMENT COMMITTEE

Reestablishment

Notice is hereby given of a determination by the Administrator of Veterans Affairs to reestablish the Career Development Committee which terminated on December 31, 1977. This determination follows consultation with the Committee Management Secretariat, pursuant to the Federal Advisory Committee Act (Pub. L. 92-463) and OMB Circular No. A-63, Revised, March 27, 1974. The Career Development Program has operated to the benefit of the Veterans Administration by recruiting and retaining in its system many good physicians, clinical psychologists, and dentists. It is a major attracting device for talented young physicians. Over the years the Career Development Committee has provided very astute advice concerning the types of candidates that we should support in these positions. The Veterans Administration retains 46 percent of the graduates of this program, which is remarkably high for such a program. We believe that we cannot

V 43 | 86 MY 3 78 UMI

operate such a program without the independent judgment and advice of the Committee, which is contributory to the high quality of the system and to the respect and prestige that the program holds within the academic medical community.

Interested persons may submit comments regarding the reestablishment of the Career Development Committee to the Committee Management Officer, Veterans Administration Central Office, Room 1001, 810 Vermont Avenue NW., Washington, D.C. 20420.

Dated: April 27, 1978.

MAX CLELAND,
Administrator.

[FR Doc. 78-12023 Filed 5-2-78; 8:45 am]

[8320-01]

CENTRAL OFFICE EDUCATION AND TRAINING REVIEW PANEL

Meeting

The Veterans Administration gives notice pursuant to Pub. L.92-463 that a meeting of the Central Office Education and Training Review Panel, authorized by Section 1790(b), Title 38, United States Code, will be held in Room A-53, Veterans Administration Central Office, 810 Vermont Avenue NW., Washington, D.C. on May 24, 1978 at 10 a.m. The meeting will be held for the purpose of reviewing the decision of the Director, Veterans Administration Regional Office, Baltimore, Md., that education allowances to all veterans and eligible persons enrolled in Maryland School for Education, Business and Vocational Skills, located at 5420 Harford Road, Baltimore, Md. 21214 and 212 South Ritchie Highway, Glen Burnie, Md. 21011 be discontinued effective December 31, 1977.

The meeting will be open to the public up to the seating capacity of the conference room. Because of the limited seating capacity, it will be necessary for those wishing to attend to contact Mr. Bernard D. Duber, Chief Field Operations Education and Rehabilitation Service, Veterans Administration Central Office (phone 202 389-2850) prior to May 15, 1978.

Dated: April 27, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Admininstrator.

INTERSTATE COMMERCE COMMISSION

[Notice No. 650]

ASSIGNMENT OF HEARINGS

APRIL 28, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested:

MC 114211 (Sub-No. 317), Warren Transport, Inc., now being assigned May 31, 1978, (3 days), at Denver, CO, in a hearing room to be later designated.
MC 105006 (Sub-No. 5), L. K. Smith Trucking, a corporation, now being assigned June 5, 1978 (5 days), at Denver, CO, in a hearing room to be later designated.
MC 128270 (Sub-No. 24), Rediehs Interstate Inc., now being assigned June 12, 1978 (3 days), at Denver, CO., in a hearing room to be later designated.
MC 115651 (Sub-No. 30), Kaney Transportation, Inc., now assigned May 11, 1978, at Chicago, IL, is canceled and application dismissed.
MC 41404 (Sub-No. 130), Argo-Collier Truck Lines, Corp., now assigned May 15, 1978, at Chicago, IL, is postponed indefinitely.
MC 113855 (Sub-No. 413), now assigned May 8, 1978, at Chicago, IL, will be held in Room 572, Everett McKinley Dirksen Building, 219 South Dearborn Street.
MC 143059 (Sub-No. 4), Mercer Transportation Co., and MC 141804 (Sub-No. 95), Western Express, Division of Interstate Rental, Inc., are now assigned for hearing May 31, 1978 (1 day), at San Francisco, CA, at a location to be later designated.
MC 141871 (Sub-No. 5), WNI, Inc., is now assigned for hearing June 1, 1978 (2 days), at San Francisco, CA. at a location to be later designated.
MC 134768 (Sub-No. 2), Lexington-Paris Motor Freight, Inc., and MC 121649 (Sub-No. 4), Milan Express, Inc., are now assigned for continued hearing July 25, 1978 (2 days), at the Executive Plaza Inn, 1471 East Brooks Road at Interstate-55 in Memphis, TN.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-12050 Filed 5-2-78; 8:45 am]

[7035-01]

[Notice No. 651]

ASSIGNMENT OF HEARINGS

APRIL 28, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

CORRECTION

FD-28697, for which hearing dates and locations were published in the FEDERAL REGISTER on April 11 on page 15212 and April 26, 1978, on page 17902, showed the case title incorrectly. The correct case title is: Southern Railway Co. Discontinuance of Trains Nos. 1 and 2 between Washington, DC, and New Orleans, LA. Also, in the publication of April 26, 1978, the May 19, 1978, hearing location is incorrrectly shown as Charlottesville, WV. Charlottesville, VA, is correct.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY—ELIMINATION OF GATEWAY LETTER NOTICES

APRIL 21, 1978.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rule (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before May 15, 1978. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a *common carrier*, by motor vehicles, over irregular routes.

No. MC 40215 (Sub-No. E11) (Correction), filed May 17, 1974, published in the FEDERAL REGISTER issue of November 3, 1976, and partially republished, as corrected, this issue. Applicant: RICHARDSON TRANSFER & STORAGE CO., INC., 246 North 5th Avenue, Salina, KS 67401. Applicant's representative: James F. Flint, Ephraim and Polydoroff, Suite 600, 1250 Connecticut Avenue NW., Washington, DC 20036. *Household goods*, as defined by the Commission, (1)(a) From points in IA to points in CA. (Garden City, KS*). (F)(1) From points in IA to points in NM. (Garden City, KS*). (F)(2) From points in IA to points in NV. (Garden City, KS*). (G) From points in IA to points in OK. (Wichita, KS*). (H) From points in IA to points in TX. (points in KS and Kansas City, MO*). The purpose of this filing is to eliminate the gateways indicated by asterisks above.

NOTE.—The purpose of this partial republication is to correct the origin destinations. The remainder of this letter-notice remains as previously published.

No. MC 40215 (Sub-No. E35), filed May 17, 1974. Applicant: RICHARDSON TRANSFER & STORAGE CO., INC., 246 North 5th Avenue, Salina, KS 67401. Applicant's representative: James Flint, suite 600, 1250 Connecticut Avenue NW., Washington, DC 20036. *Household goods*, as defined by the Commission, (1) From points in NM to points in AR on and north of a line beginning at the OK-AR State line at Siloam Springs, AR, and extending along AR Hwy 16 to junction AR Hwy 23 near St. Paul, then southeast along AR Hwy 23 to junction Interstate Hwy 40, then along Interstate Hwy 40 to the AR-TN State line. (Galena, or Arkansas City, AR*). (2) From points in NM to those points in KS on and north of a line beginning at the KS-MO State line, and extending along U.S. Hwy 24 to Topeka, KS, then along KS Hwy 4 to Eskridge, KS, then along KS Hwy 99 to Emporia, KS, then along U.S. Hwy 50 (formerly U.S. Hwy 50S) to Garden City, KS, and then along U.S. Hwy 50 to junction KS-CO State line. (points in KS*). (3) From those points NM on and north of a line beginning at the NM-CO State line near Raton, and extending along Interstate Hwy 25 to junction Interstate Hwy 40 near Albuquerque, then west along Interstate Hwy 40 to the CO-AZ State line, to those points in OK on and west of a line beginning at the KS-OK State line, and extending south on U.S. Hwy 54 to the OK-TX State line. (Liberal, KS*). The purpose of this filing is to eliminate the gateways as indicated by asterisks above.

No. MC 40215 (Sub-No. E36), filed May 17, 1974. Applicant: RICHARDSON TRANSFER & STORAGE CO., INC., 246 North Fifth Avenue, Salina, KS 67401. Applicant's representative: James E. Flint, Suite 600, 1250 Connecticut Avenue NW., Washington, DC 20036. *Household goods*, as defined by the Commission, (1)(A) From those points in IA on and north and east of line beginning at the IA-IL State line near Fort Madison, IA, and extending west along IA Hwy 2 to junction Interstate Hwy 35, then north along Interstate Hwy 35 to junction U.S. Hwy 20 at Williams, IA, then west along U.S. Hwy 20 to the IA-NE State line at Sioux City, IA, to points in ID on and south and west of a line beginning at the ID-OR State line at Payetta, ID, and extending east along Interstate Hwy 80 to junction ID Hwy 51 near Mountain Home, then south on ID Hwy 51 to the ID-NV State line. (B) From those points in IA on and south and east of a line beginning at the IA-MO State line, and extending along IA Hwy 5, then along IA Hwy 5 to junction IA Hwy 2 at Centerville, IA, then east along IA Hwy 2 to the IA-IL State line near Fort Madison, IA, to points in ID. (Garden City, KS*). (2) From those points in IA north and east of a line beginning at the IA-NE State line, and extending along Interstate Hwy 80 near Loveland, then east along Interstate Hwy 80 to the junction of U.S. Hwy 65 at Des Moines, then south along U.S. Hwy 65 to IA-MO State line near Lineville, to points in KS beginning at the KS-NE State line, and extending along U.S. Hwy 77, then south on U.S. Hwy 77 to junction U.S. Hwy 24, then along U.S. Hwy 24 to Manhattan, KS, then along U.S. Hwy 18 (formerly U.S. Hwy 40) to Junction City, KS, then along U.S. Hwy 77 to junction U.S. Hwy 56 (formerly U.S. Hwy 40) to Larned, KS, then west along U.S. Hwy 156 (formerly U.S. Hwy 50N) to Garden City, KS, then east on U.S. Hwy 50 to Emporia, then north along KS Hwy 99 to junction KS Hwy 4 at Eskridge, then along KS Hwy 4 to U.S. Hwy 24 at Topeka, then east along U.S. Hwy 24 to the KS-MO State line. (Hutchison, KS, or Kansas City, MO*). (3) From points in IA on and east and south of a line beginning at the IA-MO State line, and extending along U.S. Hwy 63 to junction U.S. Hwy 30, to junction IA Hwy 64, then along IA Hwy 64 to the IA-IL State line, to points in UT. (Garden City, KS*). (4) From Payne, IA, to points in MD. (Marysville, KS, Kansas City, MO, and Akron, OH*). The purpose of this filing is to eliminate the gateways as indicated by asterisks above.

No. MC 40215 (Sub-No. E37), filed May 17, 1974. Applicant: RICHARDSON TRANSFER & STORAGE CO., INC., 246 North 5th Street, Salina, KS 67401. Applicant's representative: Theodore Polydoroff, Suite 600, 1250 Connecticut Avenue NW., Washington, DC 20036. *Household goods*, as defined by the Commission, (1)(A) From points in MI to those points in WY on and south of a line beginning at the WY-NE State line, and extending along Interstate Hwy 80, then along Interstate Hwy 80 to the WY-ID State line. [7035-01]

[Ex Parte No. MC 43]

LEASE AND INTERCHANGE OF VEHICLES BY MOTOR CARRIERS

Order

B and P Motor Lines, Inc., (MC 106074), Shelby Motor Lines, Inc. (MC 96763), and Forest Dale, Inc (MC 12801), all under common control, have filed a petition for waiver of paragraphs (a)(3) and (c) of section 1057.4 of Lease and Interchange of Vehicles Regulations (49 CFR 1057).

We find: 1. That petitioners have an effective jointly administered safety program.

2. That petitioners will be able to more efficiently operate if permitted to trip lease.

3. That petitioners request for relief beyond that already provided by paragraph (c), as amended by Ex Parte MC 43 (Sub-No. 6), is not warranted.

It is ordered: 1. That waiver of paragraph (a)(3) is granted, provided petitioners remain in compliance with the motor carrier safety regulations of the U.S. Department of Transportation and under common control.

2. That waiver of paragraph (c) is denied.

Decided: April 11, 1978.

By the Commission, Motor Carrier Leasing Board, Board Members Joel E. Burns, Robert S. Turkington, and William F. Sibbald.

H. G. HOMME, JR.,
Acting Secretary.

[7035-01]

[Ex Parte No. MC 43]

LEASE AND INTERCHANGE OF VEHICLES BY MOTOR CARRIERS

Order

Cherokee Hauling & Rigging, Inc. (MC 127834 and numerous subs), Virginia Hauling Co. (MC 13806 and numerous subs), and Horne Heavy Hauling, Inc. (MC 35045 and numerous subs), all under common control, have filed a petition for waiver of paragraphs (a)(3) and (c) of section 1057.4 of the Lease and Interchange of Vehicles Regulations (49 CFR 1057).

We find: 1. That the Board has already considered and granted in part a similar petition seeking the identical waiver by the same petitioners.

It is ordered: 1. That waiver of paragraphs (a)(3) and (c) is denied.

Decided: April 5, 1978.

By the Commission, Motor Carrier Leasing Board, Board Members Joel E. Burns, Robert S. Turkington, and William F. Sibbald. Board Member Turkington not participating.

H. G. HOMME, Jr.,
Acting Secretary.

2

COMMODITY FUTURES TRADING COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Vol. 43, No. 82, April 27, 1978, page 18128.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., May 2, 1978.

CHANGES IN THE MEETING: The meeting is postponed until 10 a.m. on May 5, 1978.

[S-927-78 Filed 5-1-78; 4:00 pm]

[6570-06]

3

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: S-885-78.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 9:30 a.m. (eastern time), Tuesday, May 2, 1978.

CHANGES IN THE MEETING: The date of the meeting is changed to Wednesday, May 3, 1978, and the time of the meeting is changed to 10 a.m. (eastern time).

A majority of the entire membership of the Commission determined by recorded vote that the business of the Commission required these changes and that no earlier announcement was possible.

The vote was as follows:

In favor of change.—Eleanor Holmes Norton, Chair; Daniel E. Leach, Vice Chair; Ethel Bent Walsh, Commissioner.

Opposed.—None.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat at 202-634-6748.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 115—SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS

Final Regulation

AGENCY: Office of Education, Health, Education, and Welfare.

ACTION: Final regulation.

SUMMARY: This document sets forth certain requirements and criteria governing the awarding of Federal assistance to school districts for current expenditures in areas affected by Federal activities. The amended regulation presents to the public and applicants certain definitions and procedures used in the processing of such awards. These amendments are made necessary by Pub. L. 93-380.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with its publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Mrs. Edna Cave, Division of School Assistance in Federally Affected Areas, telephone: 202-245-1975.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 305(a)(1) of the Education Amendments of 1974 revised section 3, which covers the computation of entitlements based on numbers of federally-connected children. Section 305(a)(2) revised section 5, which covers the allocation of payments authorized under Pub. L. 81-874, the Impact Aid Program.

Although the matters of entitlement related to handicapped children and entitlements related to children from low-rent public housing were included in the notice of proposed rulemaking, they are not included in the regulation set forth below, but will be the subject of separate rulemaking.

The regulation set forth below encompasses the following: minor revision of the method of computing the federally-connected average daily attendance (ADA) as set forth in the definitions section (§ 115.3(e)(f)); addition of the term "county" to the definitions section (§ 115.3(p)); addition of the term "school year" to the definitions section (§ 115.3(q)); revision of sections in Subpart C concerning payments under section 3 when the percentage eligibility requirement is not met (§ 115.21); entitlements under amended section 3(e) (§ 115.22); reduction of financial assistance under section 5 of the Act due to insufficient appropriations (§ 115.25); and additions to Subpart C relating to the special savings clauses under Pub. L. 93-380 (§ 115.27). Certain sections of Part 115 are being republished without any major change being made other than revising references to Pub. L. 81-874 to reflect statutory changes, renumerating a regulatory section in one instance, and rewording for clarity. These sections are the final filing date for applications (§ 115.11(g)); changes in boundaries, classification, and governing authority of applicants (§ 115.20); payments under section 4(a) of the Act (§ 115.23); election under section 4(c) of the Act (§ 115.24); and determination of generally comparable local educational agencies (§ 115.30(a)(10), (b)(2)(iii)). The regulation does not include the matters of entitlements related to handicapped children (§ 115.28) and entitlements related to low-rent public housing children (§ 115.29); these matters will be the subject of separate rulemaking. The regulation also does not treat the matter of the prohibition against consideration by States of Pub. L. 81-874 payments in the administration of State aid (section 5(d) of the Act); that matter has been the subject of separate rulemaking (Subpart G of Part 115).

1. *Major amendments to the regulation.* A. *Definition of "county."* The term "county" has been defined in § 115.3(p) also to mean municipalities and other political subdivisions of a State that are not considered part of a county by the Secretary of Commerce in compiling data on counties.

B. *Continuation of eligibility when the 3 percent requirement is not met.* Section 3(c)(2)(A)(ii) of Pub. L. 81-874 provides eligibility for entitlement for two years immediately following the year in which a local educational agency meets the 3 percent requirement of section 3(c)(1)(B) of the Act, even though the agency fails to meet the 3 percent requirement during those two years. Section 115.21 sets forth the basis for eligibility under section 3(c)(2)(A)(ii), specifies the statutory limitation on the entitlement computation for the second year of continued eligibility under that section, and provides the benefits of the section to an applicant agency that was not in existence in one or both of the two school years before its application, or when an applicant is absorbed by a successor local educational agency in a school district reorganization.

C. *Section 3(e), Pub. L. 81-874.* Section 3(e) of Pub. L. 81-874 provides for adjustments to entitlements for reductions in the numbers of "A" or "B" children resulting from a decrease or cessation of Federal activities within the State in which the local educational agency is located. Section 3(e) requires: (1) The number of "A" and "B" children in the school district to be less than 90 percent of the number of these children in the school district during the previous fiscal year; and (2) That the decrease or cessation of Federal activities results in a substantial decrease in the number of "A" and "B" children in the school district. Section 115.22 sets forth the basic provisions of section 3(e) and establishes how the Commissioner shall make determinations under these provisions. In § 115.22(b)(2), a decrease is considered substantial when it equals 3 percent of the current year's total ADA and is at least 10 in ADA in number. Section 115.22(b)(3) requires an applicant school district to identify the particular decrease or cessation of Federal activity which occurred within the State in which the district is situated and which resulted in the "substantial decrease" in the number of "A" and "B" children. Also, the school district must obtain certification of this decrease or cessation from the Federal agency involved in the activity.

D. *Reduced payments because of insufficient appropriations.* Section 5(c) of Pub. L. 81-874 sets forth a schedule of payments when appropriations are insufficient to pay all entitlements in full. Section 115.25(a) references this section of the Act and describes the procedure for determining payments in such a circumstance. Section 115.25(b) provides that, where part of an entitlement is attributable to children who live in low-rent public housing, that part shall not be paid under section 5(c)(2) of the Act. This special treatment is made necessary by the provision of section 5(e) of the Act, which requires a determination by the Commissioner of that part of an entitlement attributable to the number of "A" and "B" children who live in low-rent public housing, and which further provides that that part of the entitlement for a local educational agency shall not be allocated or paid under section 5(c)(2) of the Act.

E. *Savings clauses under Pub. L. 93-380.* There are four savings clauses which affect applicants under Pub. L. 81-874 that are contained in Pub. L. 93-380. These savings clauses are not part of Pub. L. 81-874 but have a direct bearing on the payments of local educational agencies under the Act. In response to public comment on the notice of proposed rulemaking, the final regulation regarding the savings clauses has been reworded to provide clarity and to be specific regarding the provision of benefits under the savings clauses to applicants involved in reorganizations. Section 115.27 references these savings clauses and sets forth further provisions deemed necessary to clarify and implement them. Section 115.27(b) deals with section 305(b)(2)(A) of Pub. L. 93-380. This sentence clearly states that a local educational agency must be eligible for section 3, Pub. L. 81-874 entitlement in order to be eligible for payment under this savings clause, and it provides the benefits of this savings clause to certain applicants that were not in existence in earlier years (§ 115.27(b)(1)). A local educational agency which fails to meet the 3 percent eligibility requirement for an entitlement under section 3, Pub. L. 81-874 is continued as eligible for two more years. Although such an agency is eligible for a payment under this savings clause, it is subject nevertheless to a restriction on the amount of payment for the second year of continued eligibility (§ 115.27(b)(2)). Section 115.27(c) references the guaranteed payment provided by section 305(b)(2)(B) of Pub. L. 93-380 for school districts experiencing enrollment decreases because of military base closings. It describes the decrease of federally-connected children that is necessary for eligibility under this clause, explains that there must be a direct relationship between the decrease in the number of federally-connected children and an announced decrease or cessation of Federal activities on a military installation, and specifies what information must be provided to support the claim for the guaranteed payment. Also, it provides the benefits of this savings clause to certain applicants that were not in existence in the preceding year (§ 115.27(c)(4)). Section 115.27(d) references section 305(b)(2)(C) of Pub. L. 93-380 and explains that the number of "out of county" and "out of State" "B" children must equal at least 10 percent of the total number of "B" children for eligibility under the clause; it provides the benefits of this savings clause to certain applicants that were not in existence in the preceding year and provides that amounts attributed to this section in prior years are creditable to the current guarantee of this section. In § 115.27(e), relating to section 305(b)(2)(D) of Pub. L. 93-380, the method for computing the amount of payment under this savings clause is described.

2. *Comments on the proposed regulations.* Interested parties were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulation. A summary of the comments and responses to them is given. The comments are arranged in order of the sections of the final regulation to which they apply.

A. *General comments. Comment.* One commenter wrote that any tribe or tribal organization that operates an elementary or secondary school should be included among the local educational agencies eligible to receive financial assistance under Pub. L. 81-874.

Response. No change in the regulation is necessary. A tribe or a tribal organization recognized as a local educational agency is eligible. Section 403(6)(A) of Pub. L. 81-874 defines a local educational agency as a board of education "or other legally constituted local school authority having administrative control and direction of free public education in a county, township, independent or other school district located within a State." This definition can be altered only by amending the basic statute.

Comment. Two commenters objected because section 305(a)(1) of Pub. L. 93-380 does not include, among those to be counted in the computation of payment, children with a parent employed on Federal property situated in a State other than that of the applicant local educational agency.

Response. No change in the regulation is possible. The law can be changed by Congress but not by regulations.

Comment. Several commenters expressed difficulty in understanding the regulation.

Response. The wording of the regulation has been changed in many instances in an effort to make it more understandable. The new wording does not represent any change from the notice of proposed rulemaking in interpretation or implementation of the basic law.

B. § 115.3 *Definitions. Comment.* One commenter pointed out that sections 3(a) and 3(b) of Pub. L. 81-874 distinguished between residence in and out of the county in which the school district of a local educational agency is located, and that there was considerable inconsistency among definitions of counties by the Department of Commerce and other Federal and State agencies. The commenter said that the differences could work a substantial hardship on urban school districts not considered to be in the county, when the parents of students lived in those districts but worked on Federal property outside the city limits.

Response. The regulation has not been changed. According to section 403(11) of Pub. L. 81-874, the term "county" means those divisions of a State utilized by the Secretary of Commerce in compiling and reporting data regarding counties. To consider municipalities and other political subdivisions as parts of counties when they are not considered as such by the Secretary of Commerce would be inconsistent with the law. The regulation clarifies the distinction between counties and other units of government that will be considered as counties for purposes of Pub. L. 81-874.

C. § 115.20 *Changes in boundaries, classification, and governing authority of applicants. Comment.* One commenter stated that the Office of Education lacked the authority to require the extensive reporting procedures outlined in § 115.20(a). The commenter said that the amendments in Pub. L. 93-380 did not affect § 115.20 and that legislative history had not authorized, nor had legislative intent been found to require, detailed reporting.

Response. No change has been made in the regulation. Since Subpart C was reworded, the entire subpart was repeated; substantial portions, including § 115.20, were changed only for greater clarity. Moreover, section 401(b) of Pub. L. 81-874 authorizes the Commissioner to promulgate regulations considered necessary to carry out the provisions of Pub. L. 81-874. Where changes in boundaries, classification, and governing authority of applicants occur, it is necessary to determine to whom payment of final entitlement is to be made and from whom any overpayment is to be collected. An applicant local educational agency that ceases to exist during a school year is not entitled to a payment that is based on an entire school year. The data requested are necessary to insure proper verification of the nature of the change that has taken place within an applicant school district.

D. *§ 115.22 Entitlements under section 3(e). Comment.* One commenter pointed out that section 305(a)(1) of Pub. L. 93-380 amended section 3 of Pub. L. 81-874 to require, under paragraph (f), that determinations made with respect to the number of children an applicant is eligible to claim under that section for any fiscal year should be made on the basis of estimates only whenever actual satisfactory data were not available. The commenter said that a statement to that effect should be added to § 115.22 on entitlements under section 3(e).

Response. No change has been made in the regulation, because paragraph (f) applies to all of section 3, including section 3(e).

Comment. One commenter referred to the clause in § 115.22(b)(3) that the Commissioner would require local educational agencies to submit a certified statement identifying the particular decrease in or cessation of Federal activities. The commenter felt that the requirement would place on the local educational agency a responsibility

V 43 | 86 MY 3 78 UMI

that belonged to the Commissioner of Education, that the Commissioner had the authority to get information from Federal agencies, and that the requirement was mandated neither by the statute nor by legislative history and must, therefore, be withdrawn.

Response. No change in the regulation has been made other than rewording for clarity. Section 401(b) of Pub. L. 81-874 authorizes the Commissioner to make regulations necessary to carry out the provisions of Pub. L. 81-874. A local educational agency is considered to be in a better position to be more aware of a particular decrease or cessation in local Federal activities than the Commissioner. However, the Commissioner is ready to render assistance to any applicant that explains in writing any difficulty in preparing or submitting the required statement.

E. § 115.25(a)(2) *Reduction of financial assistance. Comment.* One commenter pointed out a discrepancy between § 115.25(a)(2) of the proposed rule and section 5(c)(2) of Pub. L. 81-874, in which the former section excluded payments for section 2 entitlements from the second tier of payments, while the latter section expressly provided that they be paid at the rate of 35 percent of entitlement.

Response. The regulation would have been changed in accordance with the comment to provide for payment at the 35 percent rate. In the meantime, however, section 330(b) of Pub. L. 94-482, approved October 12, 1976, amended section 5(c) of Pub. L. 81-874 to provide that 100 percent of an entitlement for section 2 be paid under section 5(c)(1) (first tier of payments), thereby undoing the need for payment of any remaining portion of section 2 entitlement under sections 5(c)(2) and 5(c)(3). The regulation has been changed accordingly.

Comment. One commenter stated his interpretation of § 115.25(b) to mean that a local educational agency may classify a child who lives in a low-rent public housing unit with a parent who works on Federal property either under section 3(b) or as a low-rent housing student under section 3(a).

Response. No change in the regulation is necessary. The interpretation of the commenter is correct. A child eligible under section 3(a) may be claimed under that section or under one section 3(b) subcategory, but may not be claimed under both.

F. § 115.27 *Special savings clause. Comment.* One commenter complained that § 115.27 of the proposed rule provided little help in determining the amounts of entitlement under section 305(b)(2) of Pub. L. 93-380. The commenter said that the law left some question as to how entitlements under the section were to be computed, how the different entitlements were related to each other and to section 3 of Pub. L. 81-874, and to what extent the Federal government was not obligated under them. The commenter also expressed a need for definition of the terms "payment" and "entitlement" as interpreted by the Office of Education.

Response. In response to the comment, the regulation has been changed to state clearly the guarantees provided by section 305(b)(2) of Pub. L. 93-380. The different savings clauses and section 3 of Pub. L. 81-874 are interrelated. Each clause specifically references section 3 in a manner which indicates that any payments computed under the clauses are related to the payments that have been computed already on the basis of entitlements under section 3. Each clause seeks to insure a level of guarantee for each eligible school district, to the extent that authorizing legislation can guarantee funds that are dependent on an appropriation. Each clause sets a different level of guarantee for which various school districts will be eligible. Some school districts will be eligible under more than one clause, but the clauses do not operate as unique entitlements to be added to the basic payment. Once a level of guarantee for a particular clause is achieved, then not only has the purpose of that clause been satisfied, but that same level does not also require satisfaction under another clause. Guarantees are satisfied by payments under section 3 of Pub. L. 81-874 and any additional amount under section 305(b)(2) of Pub. L. 93-380 necessary to reach the level of guarantee. In the context of Pub. L. 81-874, "entitlement" means the maximum amount of money the local educational agency has a legal right to receive as computed under section 3(d), and "payment" means the amount of money computed under section 5 that actually is tendered to the local educational agency.

Comment. One commenter expressed the belief that the regulation should include a reasonable time schedule for payments under section 305(b)(2) of Pub. L. 93-380, so that school districts entitled to those funds could anticipate the receipt of them.

Response. The regulation has not been changed. It is not considered appropriate to include payment schedules of entitlements in a regulation, because these schedules vary from year to year. No one can be certain when an appropriation will be available. Furthermore, sections 305 (b)(2)(A) and (D) of Pub. L. 93-380 may sometimes require supplemental appropriations.

Comment. One commenter argued that § 115.27(b) was in error in stating that a local educational agency had to be entitled to a payment under section 3 of the Act in order to qualify in section 305(b)(2)(A) of Pub. L. 93-380. The commenter stated that, on the contrary, the agency, in order to be eligible, had to establish its right to payment under section 3 only once in any of the fiscal years 1974 through 1977.

Response. The regulation has not been changed. The first sentence of section 305(b)(2)(A)(i), "the amount paid to such agency * * * on the basis of the entitlement of that agency," implies that the agency shall have established its entitlement under section 3 before entitlements under section 305 (b)(2)(A) apply to that agency. Section 3(c)(2)(A)(ii) of Pub. L. 81-874 provides that an eligible local educational agency shall continue to be eligible under section 3 for two succeeding fiscal years in which it fails to meet that requirement. Therefore, to require, in § 115.27(b), eligibility under section 3 does not defeat the purpose of section 305(b)(2)(A)(i). Most school districts adversely affected by the revisions in section 3 made by Pub. L. 93-380 will have the ill effects lessened in some fashion by these provisions of section 305(b)(2)(A). An agency that was eligible in fiscal year 1975 continues to be eligible in 1976 and 1977, unless it fails to apply.

Other changes. A. The term "school year" has been added to the definitions in § 115.3(q) to distinguish in certain instances between "school year" and "fiscal year."

B. The reference to section 305(b)(2) of Pub. L. 93-380 has been omitted from § 115.11(g) as inappropriate to the topic of discussion. The paragraph refers to requirements for the amendment of a timely filed application for additional or alternative financial assistance. The information necessary for making determinations under section 305(b)(2) should be contained in the initial application document.

C. The phrase "following that" has been removed from § 115.11(g)(1) to reflect the change in the fiscal year which used to end on June 30 but which now ends on September 30.

D. For the purpose of clarification, the phrase "for the fiscal year two years or one year before the year for which application is made" has been inserted after the phrase "of the Act" in § 115.21(c)(1).

E. The old § 115.21(e) has been changed to § 115.21(f), and a new § 115.21(e) has been added to clarify that section 3(c)(2)(A)(ii) of Pub. L. 81-874 applies to certain applicants after June 30, 1975.

F. The last sentence which reads "This election is not subject to change after, and shall become final upon, the date of final payment for the fiscal year involved" has been deleted from § 115.24(b) to be consistent with § 115.11, which requires amendments to be filed no later than September 30 of the fiscal year for which assistance is sought.

G. Section 115.25 has been changed to reflect the amendment made by section 330(b) of Pub. L. 94-482, approved October 12, 1976, which provides 100 percent of entitlement to section 2 under section 5(c)(1) of Pub. L. 81-874.

H. Section 115.26 concerning the "failure or refusal of a local educational agency to educate children living on Federal property" has been withdrawn because it does not sufficiently clarify or add to the language of section 6(f) of Pub. L. 81-874. A review of section 6(f) will be undertaken and if necessary a rule will be proposed.

I. The original § 115.27(e)(2) has been deleted. That section concerned internal administrative procedures related to the use of estimated entitlements and payments under section 305(b)(2)(D) of Pub. L. 93-380. Since it may be necessary on occasion to adjust those procedures, it is deemed inadvisable to set them forth in the form of a regulation.

NOTE.—The Office of Education has determined that this document does not contain a proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program No. 13.478, School Assistance in Federally Affected Areas—Maintenance and Operation.)

Dated: January 5, 1978.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: April 26, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Part 115 of Title 45 of the Code of Federal Regulations is amended as follows:

1. Section 115.3 is amended by revising paragraphs (e) and (f) and by adding paragraphs (p), and (q) to read as follows:

§ 115.3 Definitions.

* * * * *

(e) "Average daily attendance of federally-connected pupils" in each pertinent subcategory of federally-connected children under sections 3(a), 3(b), and 4(a) means the number determined in the manner described in this paragraph.

(1) At some specific date after the third day of the legal school session of the regular school year and before the cutoff date for filing Form RSF-1, a membership count of all pupils claimed in the various federally-connected subcategories must be made either by:

(i) Conducting a parent-pupil survey to determine the parent's employment on Federal property or active duty assignment in the uniformed services and the child's residence on Federal property; or by

(ii) Obtaining certifications from the various employers and the appropriate housing officials as to the employment of the parents of the children claimed or residence of the children on the specific date involved.

The membership count of all pupils made as of this specific date constitutes the official membership report of the applicant local educational agency for that date.

(2) The average daily attendance (hereinafter referred to as ADA) of federally-connected pupils shall then be obtained in the following manner.

(i) For the purposes of the application OE Form 4019 (Form RSF-1), the membership in each federally-connected subcategory shall be multiplied by the ratio of total ADA on the date of the membership count to the total membership as reported in the official membership and ADA report of the applicant district for the reporting period; and

(ii) For the purposes of the final report OE Form 4037 (Form RSF-3) the membership in each federally-connected subcategory shall be multiplied by the ratio of the total ADA for the period July 1 to the following June 30 to the total membership. This total ADA may include ADA based upon free public education provided in summer school as determined in accordance with State law.

(3) At the option of the applicant, a second membership count may be made. Procedures for a second membership count are set out in paragraph (f) of this section.

(20 U.S.C. 283(2)(b), 239(a), 244(10))

(f) "Average daily attendance of federally-connected pupils when determined by two counts of all pupils" means the number determined in the manner described in this paragraph.

(1) A first count of membership of each subcategory of federally-connected children must be made as described in paragraph (e) of this section. If conducted, a second count of membership must be made during the last quarter of the regular school year and uniformly for the entire local educational agency.

(2) A membership count of all pupils, made as of the same dates as the counts of federally-connected children, constitutes the official membership report of the applicant school district for those dates.

(3) Add the total membership for each count and divide the sum by two to compute an average total membership for both counts.

(4) Add the total federally-connected membership for each subcategory for both counts and divide the sum by two to compute an average federally-connected membership for each subcategory.

(5) Divide the total ADA for the period July 1 to the following June 30 by the average total membership obtained in paragraph (3) to obtain the ratio of ADA to membership.

(6) For the purposes of the final report OE Form 4037 (Form RSF-3), the average federally-connected membership for each subcategory obtained in subparagraph (4) shall be multiplied by the ratio of the total ADA to the average total membership. This total ADA may include ADA based upon free public education provided in summer school as determined in accordance with State law.

(20 U.S.C. 238(a)(b), 239(a), 244(10))

* * * * *

(p) "County" means, for the purpose of computing entitlement under section 3 of the Act and payments under section 5 of the Act as well as for the purpose of this part, those divisions of a State utilized by the Secretary of Commerce in compiling and reporting data regarding counties, subject to the following qualifications:

(1) Where a municipality or other political subdivision of a State is not treated as part of a county by the Secretary of Commerce in compiling and reporting data regarding counties, those municipalities and other political subdivisions are regarded as separate counties; and

(2) Where a local educational agency is situated in more than one county, the term "county" in the phrase "in the county in which the school district of such agency is located" includes any county in which the local educational agency is situated in whole or in part.

(20 U.S.C. 238(a)(b) and note; 20 U.S.C. 244(11); 88 Stat. 534)

(q) "School year" as used in this part, means the period between July 1 of one year and June 30 of the subsequent year.

(20 U.S.C. 242)

2. Section 115.11 is amended by revising paragraph (g) to read as follows:

§ 115.11 Final date for filing applications.

* * * * *

(g) A timely filed application may be amended to apply for additional or alternative financial assistance under sections 3(d)(2)(B), 3(d)(3)(B)(ii), 3(e) or section 4(d) of the Act, if the amendment is:

(1) Filed no later than September 30 of the fiscal year for which assistance is sought; and

(2) Accompanied by a detailed statement setting forth the basis of the claim and a justification for the requested entitlement.

(20 U.S.C. 240(a)(1))

3. Part 115 is amended by revising subpart C to read as follows:

V 4 3 — 8 6

Subpart C—Payments

Sec.
115.20 Changes in boundaries, classification, and governing authority of applicants.
115.21 Payments under section 3 when percentage eligibility requirement is not met.
115.22 Entitlements under section 3(e).
115.23 Payments under section 4(a).
115.24 Election under section 4(c).
115.25 Reduction of financial assistance under sections 2, 3, and 4 due to insufficient appropriations.
115.26 [Reserved]
115.27 Adjustments to payments related to special savings clauses under Pub. L. 93-380.

AUTHORITY: 20 U.S.C. 238-240, 244(11).

Subpart C—Payments

§ 115.20 Changes in boundaries, classification, and governing authority of applicants.

(a) If the applicant is a party to any merger, consolidation, annexation, deconsolidation, or other similar action which may affect its boundaries, identity, governing authority, classification, or control, it must notify the Commissioner as soon as practicable of the effective date of that action, its extent and character, and the legal authority under which the action was or is to be effected. This notification must include the following information:

(1) The effective date of change in boundaries or organization, for all purposes, including administrative and fiscal;

(2) Identification by name, district, number and address of all former agencies involved and the application number for each applicant involved in any change;

(3) A statement describing the specific type of change, with a citation of the section or sections of the State law under which the change was accomplished;

(4) The legal name of the resulting successor agency (even if the name and legal classification of the applicant agency are retained after a change);

(5) A statement whether assets and liabilities of the former agency or agencies have been transferred to the successor agency, or whether a settlement agreement has been made and, if so, the effective date of this action;

(6) A statement whether a new board of education has or will assume control and management of the successor agency and, if so, the effective date; and

(7) The name and address of the authorized representative for purposes of the Act, who shall be duly designated by the governing body of the successor agency. Evidence of this official designation must be submitted in the form of a copy of the resolution duly recorded in the minutes of the proceedings of the governing body.

(b) A local educational agency is not entitled to any payment on the basis of an application under sections 3 or 4 of the Act (except as provided in paragraph (d) of this section) if:

(1) The change in the organization of the local educational agency is effective within the school year covered by the application and occurs prior to the close of the regular school term of that year; and

(2) The local educational agency thereby ceases to be a legally consituted local educational agency.

(c) Except as provided in § 115.21(d), a local educational agency which assumes administrative control and direction of free public education in all or a portion of the area of the previously existing applicant, may (if it is not already an applicant under the section involved or if it files an application in accordance with § 115.11(d) have its entitlement under section 3(d)(1) or 4(a)(1) of the Act for the entire fiscal year determined by either of the following, whichever is more favorable to it:

(1) On the basis of the entire area under its jurisdiction on the last day of that year; or

(2) On the basis only of the area acquired by the local educational agency from the previously existing local educational agency, except that the latter basis may only be used:

(i) For an application under section 3 of the Act for which a favorable finding has been made (or would have been made in due course but for the change in district organization) on the basis of the estimates required under section 3(c)(1) of the Act with respect to the previously existing agency; and

(ii) For an application under section 4 of the Act for which such a favorable finding has been made (or would have been made in due course but for the change in district organization) under section 4(a)(1).

(d) Any payment made before the Commissioner considered the change in the organization of the local educational agency must be repaid to the United States except to the extent that:

(1) It is accounted for by the adjustments made in the entitlements of any successor applicant local educational agency under either paragraph (c) of this section or paragraph (d) of § 115.21; and

(2) Any balance remaining or the entire payment made is found by the Commissioner not to be in excess of the amount to which the pre-existing local educational agency would have become entitled on the basis of the number of federally-connected children:

(i) Who were not covered by any other application; and

(ii) To whom free public education was provided by the previously existing local educational agency or by any successor non-applicant local educational agency.

(20 U.S.C. 237(c), 244(6)(A))

§ 115.21 Payments under section 3 when percentage eligibility requirement is not met.

(a) Under the exception provided in section 3(c)(2)(A)(ii) of the Act, an applicant continues to be eligible for payment under the Act, even if it fails to meet the 3 percent eligibility requirement of section 3(c)(1)(B) of the Act, for two years following any fiscal year in which it: (1) was determined to be eligible under that requirement and (2) received a net payment under section 3.

(b) The number of children determined for the purpose of establishing the amount of entitlement under section 3 in the second fiscal year of the two-year period specified in paragraph (a) may not exceed 50 percent of the number of children in each federally-connected subcategory for the last fiscal year during which the applicant met the eligibility requirement of section 3(c)(1)(B) of the Act.

(c) If an applicant local educational agency was not in existence in either one or both of the two fiscal years preceding that for which application is made, that agency may nevertheless receive the benefit of the provisions of paragraph (a) of this section if that agency is:

(1) Composed only of territory which was formerly included in a predecessor agency or agencies which were determined to have met the percentage eligibility requirement contained in section 3(c)(1)(B) of the Act for the fiscal year two years or one year before the year for which application is made; and

(2) The predecessor agency or agencies received a net payment under section 3 of the Act for the fiscal year two years or immediately before that for which application is made.

(20 U.S.C. 238(c)(2)(A)(ii))

(d) If any local educational agency which had filed an application in a timely manner under section 3 of the Act and was entitled to payment by virtue of paragraph (a) or (c) of this section ceases to be a legally constituted local educational agency as a result of a district reorganization which is effective before the close of the regular school term within the fiscal year covered by the application (thereby becoming subject to the provisions of § 115.20(b)), a successor local educational agency which:

(1) Files an application in accordance with § 115.11(d) (unless already an applicant under section 3); and

(2) Assumes administrative control and direction of free public education

in all or a portion of the area of the previously existing applicant before the close of the applicant's regular school term, may have its application processed on the basis of the:

(i) Area acquired from the previously existing local educational agency, and

(ii) Rights of that agency, without regard to the 3 percent requirement, subject to appropriate adjustment on account of payments made to the previously existing local educational agency.

(20 U.S.C. 238, 244(6)(A).)

(f) Section 305(b)(2)(A) of Pub. L. 93-380 governs the case of any applicant that was determined to have met the 3 percent eligibility requirement before July 1, 1975, but which fails to meet this requirement in any school year ending before July 1, 1977.

(88 Stat. 553; Sen. Rep. No. 93-763, 205.)

§ 115.22 Entitlements under section 3(e).

(a) An applicant eligible under section 3(e) of the Act is entitled to receive, for the fiscal year in which eligibility is determined and for any of the three succeeding fiscal years, not less than 90 percent of the amount to which the applicant was entitled under section 3 of the Act for the preceding fiscal year.

(b) For an applicant to be eligible under section 3(e) of the Act:

(1) The number of children determined with respect to an applicant under sections 3(a) and 3(b) of this Act must be less than 90 percent of the number of children determined under those sections of the Act for the applicant during the preceding fiscal year. In making that determination, the Commissioner shall divide the current fiscal year's sections 3(a) and 3(b) ADA by the preceding fiscal year's ADA for those sections.

(2) There must have been a substantial decrease in the number of children determined under sections 3(a) and 3(b) of the Act resulting from a decrease or cessation of Federal activities, in the State within which the applicant is located, during the year for which an application is filed. A decrease is substantial when it equals 3 percent of the current fiscal year's total ADA and at least 10 in ADA.

(3) The applicant must submit a statement to the Commissioner identifying the particular decrease in or cessation of Federal activities; the statement must be certified as to its accuracy by an authorized official of the Federal agency associated with the conduct of the affected activities.

(c) Any section 3(e) payments to an applicant are considered for all other purposes as payments attributable to determinations of children under section 3(b)(2)(A) of the Act.

(20 U.S.C. 238(e).)

§ 115.23 Payments under section 4(a).

(a) Payment under section 4(a) is intended to compensate a local educational agency for sudden and substantial increases in pupils whose attendance in school during the current school year is a direct result of Federal activities. This payment may be made only when the Commissioner determines that, although the applicant has made a reasonable tax effort, the education of the increased number of children places a substantial and continuing financial burden on the applicant, and the applicant cannot secure funds from other sources adequate to provide these children a level of education equivalent to that maintained in generally comparable school districts in the same State.

(b) In the first fiscal year following payment under section 4(a), a payment not to exceed 50 percent of the entitlement in this preceding year under section 4(a) will be made, subject to the availability of funds. The payment may not include any entitlement due to those increases in section 3(a) or 3(b) of the preceding year for which payment was made.

(20 U.S.C. 239(a).)

(c) No payments will be made under section 4(a) of the Act unless:

(1) The increase in ADA of federally-connected pupils in the current year over the ADA of those children in the preceding year is at least equal to 5 percent of non-Federal ADA in the preceding year, and

(2) The increase in the current total ADA over the preceding year's total ADA is at least 5 percent of the preceding year's total ADA.

(20 U.S.C. 293(a)(1).)

(d) No payments will be made under section 4(a) of the Act unless the parents of the pupils entering the schools of the local educational agency for the first time during the current school year enter the area of that agency to accept employment because of Federal activities on or after February 1 of the preceding year. An increase in activities of the United States for the purpose of section 4(a) of the Act may be found to have occurred in circumstances which include the following:

(1) Activities resulting from Federal contracts in the current fiscal year when the number of employees engaged in the Federal activity increased over the preceding fiscal year; and

(2) Activities where production resulting from Federal contracts changed so as to require employees with new skills for this production; therefore, new employees migrated into the area of the local educational agency.

(e) Activities of those persons not employed by the United States or by a contractor of the United States shall not be considered to be a direct result of activities of the United States for the purposes of section 4(a).

(20 U.S.C. 239(a)(1); 83-703, House Report No. 703, July 3, 1953, 12.)

§ 115.24 Election under section 4(c).

Under section 4(c) of the Act, a local educational agency may elect to count for eligibility and payment under section 4(a) of the Act the entire increase in the number of children who are:

(a) In average daily attendance at its schools during the school year; and

(b) Otherwise eligible to be counted under section 3 of the Act. This election may be made only if an application under section 4 is filed in a timely manner on Form RSF-1 in accordance with § 115.11.

(20 U.S.C. 239(c).)

§ 115.25 Reduction of financial assistance under sections 2, 3, and 4 due to insufficient appropriations.

(a) Section 5(c) of the Act determines the portions of entitlements that will be allocated and paid when an appropriation for a fiscal year is not enough to fund in full all entitlements under sections 2, 3, and 4. It establishes funding priorities as follows:

(1) Before any other allocation is made, funds will be allocated to provide 100 percent of entitlements under section 2 and 25 percent of entitlements under section 3.

(2) Funds will be allocated to provide varying percentages (ranging from 28 to 75 percent) of entitlements under section 3; the varying percentages, as provided in section 5(c)(2) of the Act, are as follows:

(i) Seventy-five (75) percent for section 3(a) children in local educational agencies where those children comprise 25 percent or more of the total number of children in average daily attendance,

(ii) Sixty-three (63) percent for section 3(a)(1) (children residing on Federal property with a parent employed on Federal property in the same State as the local educational agency),

(iii) Sixty-five (65) percent for section 3(a)(2) (children who reside on Federal property and have a parent in one of the uniformed services or children residing on Indian lands),

(iv) Thirty-two (32) percent for section 3(b)(1) (children residing on Federal property),

(v) Thirty-two (32) percent for section 3(b)(2)(A) (children residing with a parent employed on Federal property within the county of the local educational agency),

(vi) Twenty-eight (28) percent for section 3(b)(2)(B) (children residing with a parent employed on Federal property outside the county but in the same State of the local educational agency), and

M Y 3 — 7 8
UMI

V 43 | 86 MY 3 78 UMI

(vii) Thirty-five (35) percent for section 3(b)(3) (children with a parent in one of the uniformed services).

However, these allocations are subject to two restrictions. First, none of these allocations will be made unless all of them can be made. Second, entitlements attributable to children residing on, or residing with a parent employed on, low-rent public housing property (described in section 403(1)(C) of the Act) are excluded from these allocations under section 5(c)(2).

(3) Remaining portions of entitlements under section 3 and all entitlements under section 4 will be allocated on a prorated basis to the extent permitted by available funds.

(b) Any part of an entitlement determined under section 3 of the Act attributable in whole or in part to children residing on, or residing with a parent employed on low-rent public housing property, is considered to be attributable in its entirety to these children. Thus, payments for entitlements based in whole or in part on low-rent public housing children are to be excluded in their entirety under section 5(c)(2).

(20 U.S.C. 240(c)(e); 20 U.S.C. 244(1)(c); Sen. Rep. No. 93-1026, 162 (1974))

§ 115.26 [Reserved]

§ 115.27 Adjustments to payments related to special savings clauses under Pub. L. 93-380.

(a) Special savings clauses in section 305(b)(2) of Pub. L. 93-380 guarantee, to the extent of available appropriations, an overall payment to eligible applicant local educational agencies. These special savings clauses do not create separate entitlements to be added individually to the basic Pub. L. 81-874 payment. The amount of payment under this section is computed by subtracting any payment under section 3 of the Act from the overall payment that is guaranteed by section 305(b)(2) of Pub. L. 93-380. Any remainder is then allocated among the savings clauses for which the applicant is eligible in whatever order the Commissioner considers appropriate.

(b) *Section 305(b)(2)(A) of Pub. L. 93-380.* (1) The first sentence of clause (A)(i) of section 305(b)(2) insures that any local educational agency which is entitled to receive a payment under section 3 of the Act for a current year will not receive less than 80 percent or 90 percent, as determined below, of the payment that was received under section 3 for the preceding year.

(i) The guarantee of 90 percent applies to any local educational agency which was eligible for a payment under section 3 of the Act for fiscal year 1973 that was equal to 10 percent or more of the agency's total current expenditures for fiscal year 1973.

(ii) The guarantee of 80 percent applies to any other local educational agency entitled to receive a payment under section 3 for a current year.

(iii) If an applicant local educational agency was not in existence in fiscal year 1973, it may nevertheless receive the 90 percent guarantee if:

(A) It is composed only of territory which was the entire territory of a predecessor agency or agencies which received a payment under section 3 for fiscal year 1973 and met the 10 percent eligibility requirement; and

(B) Either the applicant local educational agency or all of the predecessor agencies comprising it received a net payment under section 3 for the preceding fiscal year that determines the amount of the guarantee.

(iv) If an applicant local educational agency was not in existence in the preceding fiscal year, it may nevertheless receive the 80 percent guarantee if it is composed only of territory which was formerly included in a predecessor agency or agencies which met the section 3 eligibility requirements and received a net payment under that section for the preceding fiscal year.

(2) The second sentence of clause (A)(i) of section 305(b)(2) is effective only in fiscal years 1976 and 1977. It permits an applicant local educational agency to be eligible for payment under section 3 of the Act, even if the agency fails to meet the 3 percent eligibility requirement of section 3(c)(1)B) of the Act, for two years after the fiscal year the agency last met that requirement and received a payment under section 3. For the second year of payment under this provision, payment may not exceed 50 percent of the payment that was received for the last fiscal year in which the percentage eligibility requirement was met.

(i) Applicants subject to the maximum payment limitations under the second sentence of clause (A)(i) may not receive more than that maximum payment under the guaranteed payment provisions in the first sentence of clause (A)(i).

(ii) Payments to eligible applicants based on the second sentence of section 305(b)(2)(A)(i) of Pub. L. 93-380 are not subject to the special funding requirement of section 305(b)(2)(A)(ii) of the Act.

(88 Stat. 553; Sen. Rep. 93-1026, 163-164; Sen. Rep. No. 93-763, 57.)

(c) *Section 305(b)(2)(B) of Pub. L. 93-380.*

(1) Clause (B) of section 305(b)(2) guarantees a level of payment to applicants which have suffered a decrease in section 3 ADA as a direct result of decreases in or cessations of Federal activities on military installations that were announced after April 16, 1973. The level of payment for the first year of eligibility and each succeeding year for which an application is filed is 90 percent of the agency's entitlement under section 3 for the preceding year.

(i) For the purposes of this clause, the term "military installation" means a facility, camp, or base operated by or under the jurisdiction of the Armed Forces of the United States.

(ii) The announcement of a decrease or cessation of Federal activities must be an official announcement or order issued by the Federal government.

(2) No payment will be made under clause (B) unless:

(i) The decrease in section 3 ADA is at least 10 percent for any one of the following:

(A) Fiscal year 1974 section 3 ADA compared to fiscal year 1973 section 3 ADA, or

(B) Fiscal year 1975 section 3 ADA compared to fiscal year 1974 section 3 ADA, or

(C) Fiscal year 1975 section 3 ADA compared to fiscal year 1973 section 3 ADA,

(ii) The decrease in section 3 ADA was a direct result of a decrease in or cessation of Federal activities on a military installation, and

(iii) The decrease in or cessation of Federal activities was due to a specific announcement issued by the Federal government on or after April 16, 1973.

(3) In order to receive a payment under clause (B), an applicant must provide to the Commissioner whatever data and information that the Commissioner considers necessary and appropriate to establish the basis for payment.

(4) If an applicant local educational agency was not in existence in the preceding fiscal year, it may nevertheless receive the guarantee under clause (B) if it is composed only of territory which was formerly included in a predecessor agency or agencies which were determined eligible under clause (B) and received a net payment under either section 3 or clause (B) for the preceding fiscal year.

(88 Stat. 534; Sen. Rep. No. 93-763, 57-58, 206-207 (1974).)

(d) *Section 305(b)(2)(C) of Pub. L. 93-380.*

(1) Clause (C) is designed to offset the immediate reduction in payments affected by the amendments to section 3(b) of the Act under Pub. L. 93-380. Those amendments eliminated payments based on children residing with a parent employed on property which is outside the State of the applicant and reduced payments for children residing with a parent employed on Federal property which is outside the county of the applicant but within the same State. Clause (C) guarantees that a payment for section 3(b) children will not be less than 90 percent of the amount the applicant received for section 3(b) children for the preceding fiscal year. The amount received for 3(b) children may have been received through 3(b) and the hold harmless benefits (section 305(b)(2) of Pub. L. 93-380).

(2) An applicant is eligible under Clause (C) if, during the year of application, the number of children who either:

(i) Reside with a parent employed on Federal property in a State other than the State in which the applicant is situated, but which is within reasonable commuting distance of the applicant, or

(ii) Reside with a parent employed on Federal property in a county outside the county in which the applicant is situated but within the same State,

is equal to 10 percent or more of the number of children eligible under section 3(b) of the Act for that year.

In determining whether a particular Federal property is within "reasonable commuting distance", any prior determination for that property under Pub. L. 81-874 is controlling, unless the applicant presents new information justifying, in the Commissioner's opinion, a reconsideration of that determination. Any Federal property located in the same State as the applicant is considered to be within reasonable commuting distance.

(3) If an applicant local educational agency meets the eligibility requirements for Clause (C) but was not in existence in the preceding fiscal year, it may receive the Clause (C) guarantee based on the net amount paid for the preceding year under section 3(b) to any predecessor agency or agencies; however, all of the territory of the predecessor agency or agencies must be part of the applicant local educational agency.

(88 Stat. 535; Sen. Rep. No. 93-763, 206-207 (1974.))

(e) *Section 305(b)(2)(D) of Pub. L. 93-380.* (1) Payment under clause (D) is designed to compensate a local educational agency, which is eligible to receive a payment under section 3 of the Act, for having to share an appropriation with low-rent public housing entitlements.

(2) The amount of payment under clause (D) is computed by subtracting the applicant's payment for section 3 (as allocated under section 5(c) of the Act) from the amount of funds that the applicant would have received for section 3 had there been no payments under the current appropriation for low-rent public housing entitlements.

(88 Stat. 534, 535.)

4. § 115.30 is amended by revising paragraphs (a)(10) and (b)(2)(iii) to read as follows:

§ 115.30 Determination of generally comparable local educational agencies.

(a) • • •

(10) Estimated current fiscal year per pupil cost for the State (in those States in which an applicant requests an entitlement under section 3(d)(2)(B) or 4 of the Act). The actual per pupil costs shall be submitted to the Commissioner at such time as they become available for each group.

(20 U.S.C. 238(d), 255(5).)

(b) • • •

(2) • • •

(iii) The estimated percent of change in per pupil cost for all local educational agencies in the State, in the aggregate, for the current fiscal year from the second preceding fiscal year, for each State wherein an applicant requests an entitlement under section 3(d)(2)(B) or section 4. Since comparable district data are submitted for the second year preceding, the estimated percent of increase factor for adjusting the per pupil cost to the current year will suffice for all purposes prior to the final payment. However, the State shall submit actual data to the Commissioner for the purpose of computing final payments.

(20 U.S.C. 238(d), 244(5).)

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1208]

MINIATURE CHRISTMAS TREE LIGHTS

Proposed Safety Standard

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes a consumer product safety standard for miniature Christmas tree lights and similar miniature decorative lights in order to eliminate or reduce unreasonable risks of injury from electrical shock and fires that the Commission has preliminarily determined are associated with the lights. The Commission also proposes for public comment recommendations regarding materials, labeling, and provisions to address special hazards to children presented by plugs and connectors of the lights.

DATES: (1) The Commission proposes that the standard be applicable to all miniature Christmas tree lights manufactured after December 1, 1979.

(2) Written comments on the proposal must be received by the Commission by July 3, 1978.

(3) Interested persons will have an opportunity to make an oral presentation of data, views, or arguments on June 7, 1978 at 9:30 a.m. Those wishing to make oral presentations should notify the Office of the Secretary (202-634-7700) by May 31, 1978. A summary or copy of testimony is to be submitted to the Office of the Secretary by June 2, 1978.

(4) The time during which the Commission must either publish a final rule or withdraw this proposal is extended to March 15, 1979.

ADDRESSES: Written comments should be submitted to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. All material which the Commission has that is relevant to this proceeding, including any comments that may be received on this proposal, may be seen in, or copies obtained from, the Office of the Secretary, 3rd Floor, 1111 18th Street, NW., Washington, D.C. 20207. The oral presentation will be conducted in the Commission's 3rd floor hearing room, 1111 18th Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Carl W. Blechschmidt, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6557.

A. Background

In this document the Commission proposes a comprehensive standard to address the unreasonable risks of injury from electrical shock and fires that the Commission has preliminarily determined are associated with miniature Christmas tree lights and similar miniature decorative lights. The proposed standard is comprehensive and complete as a result of the many ways in which these products can result in electrical fire and shock. Although the proposed standard contains many performance tests and many requirements, a large number of these requirements and tests can be met by manufacturers by using components that are made of certain known, available materials and are built to certain existing specifications. Therefore, for purposes of complying with the certification provisions of section 14(a)(1) of the act (15 U.S.C. 2063(a)(1)), the Commission believes that manufacturers will be able to base certification for miniature Christmas tree lights, in large part on certification of components by component suppliers. (See Section H of this preamble for a more comprehensive discussion of certification.)

Since its formation in 1973, the Consumer Product Safety Commission has received reports of incidents and injuries due to electrical shocks and fires associated with miniature Christmas tree lights and similar miniature decorative lights. In 1974, a number of manufacturers voluntarily undertook recall of certain decorative lighting as a result of the reports received at that time and the encouragement of the Commission's staff.

The Commission's decision to initiate the standard development proceeding for miniature Christmas tree lights and similar miniature decorative lights, as a result of the shock and fire hazards associated with these products, was based primarily on the CPSC 1975 Christmas Decorative Light Survey and technical analyses of Christmas light products. The 1975 Christmas Decorative Light Survey involved Commission inspection of manufacturers, importers and major retailers of miniature Christmas tree lights to identify hazardous products. Based on information obtained from this survey, the Commission was made aware that defects such as exposed live electrical conductors in miniature Christmas tree light products could very likely lead to hazardous situations. For example, when a miniature Christmas tree light string with an exposed electrical conductor, such as a bare wire or a dislodged lampholder contact, is plugged into a standard receptacle outlet, the probability that a person will contact a live part and receive a dangerous electric shock is significantly higher when compared to a miniature Christmas tree light string with no such exposed electrical conductor.

The Commission also has other information about injuries associated with miniature Christmas tree lights and similar miniature decorative lights that indicates a need for remedial action, including:

1. Reports of in-depth investigations of injuries, conducted by the Consumer Product Safety Commission (CPSC).
2. National Electronic Injury Surveillance System (NEISS) surveillance data.
3. CPSC Bureau of Epidemiology Special Report: Christmas Tree Lights—August 1976.
4. CPSC Bureau of Epidemiology Special Report—Christmas Tree Lights—December 1976.
5. Engineering Analysis of Miniature Christmas Lights with Regard to Safety Hazards, by the CPSC Bureau of Engineering Sciences—December 20, 1976.
6. Fire Marshal's reports—Dallas, Tex. (1969-1975).
7. Statistics furnished to the Commission by the National Fire Protection Association.
8. Information obtained from the International Association of Electrical Inspectors and originally furnished by electrical inspectors in 63 jurisdictions (1973-1974).
9. CPSC 1975 Christmas Decorative Light Survey.

Copies of all these sources may be obtained from the Office of the Secretary.

After considering the foregoing information, the Commission preliminarily determined that the following unreasonable risks of injury are associated with miniature Christmas tree lights and similar miniature decorative lights:

1. *Shock hazards.* Shock hazards can be caused by direct contact with exposed live electrical conductors or by contact with an intervening conductive object (such as metallic tree ornament or accessory) that is in contact with the exposed conductor. The following are examples of characteristics of these lights which can create shock hazards:

a. Bare wire exposed where the wire enters lampholders (sockets) or plugs.

b. Plug and receptacle fittings that readily come apart.

c. Exposed lamp leads.

d. Cracked lampholders.

e. Lampholder contacts which come out when the bulb is removed, thereby exposing the live contacts.

2. *Fire hazards.* Fire hazards can be caused by certain characteristics of the subject lights. The following are examples of characteristics of these lights that can create fire hazards:

a. An exposed conductor which shorts to a grounded object, thereby causing arcing and/or excessive heating of flammable materials. The short may not trip the circuit breaker or blows the circuit fuse in time to prevent a fire caused by the lights because the short may be intermittent or may not draw sufficient short-circuit current. The conductor can be exposed due to the features explained in the description of shock hazards in items 1 (a), (c), (d), and (e) above.

b. A flammable grade of thermoplastic material that becomes heated by abnormal current flow, defective lamps or other characteristics of these lights that result in excessively high temperatures. This class of material melts when heated and can flame. Melting can result in exposure of live parts, or molten, burning material dripping on tree branches, paper, carpets, or other flammable material near the lights.

c. Wire without proper overcurrent protection. Wire smaller in size than No. 20 American Wire Gauge (AWG) can overheat under short circuit conditions before the house wiring branch circuit overcurrent protective device can open. Wire smaller than No. 20 AWG is commonly used on the subject lights.

On the basis of the above information the Commission preliminarily determined that a consumer product safety standard is necessary to eliminate or reduce the specified unreasonable risks of injury associated with miniature Christmas tree lights and similar miniature decorative lights.

The Commission received information about two existing voluntary standards which are relevant to miniature Christmas tree lights and similar miniature decorative lights:

a. Underwriters Laboratories Inc. (UL)—"Standard for Christmas Tree and Decorative-Lighting Outfits—UL 588" (13th edition, November 15, 1974 revised December 30, 1974 and February 4, 1976).

b. National Ornament and Electric Lights Christmas Association (NOEL)—"NOEL Standard Midget Sets, September 16, 1975."

The voluntary standards include many beneficial features. It appeared to the Commission, however, that application of these standards would not eliminate or sufficiently reduce the unreasonable risks of injury associated with the miniature Christmas tree lights and other miniature decorative lights. The Commission believed that requirements in addition to those set forth in the voluntary standards were reasonably necessary to adequately protect the public against these risks of injury. In addition, the Commission recognized that it may be difficult to ensure continuing compliance with the voluntary standards, especially since the miniature Christmas tree light industry is composed mainly of small manufacturers located outside the United States.

As the result of these concerns, the Commission began the proceeding to develop a consumer product standard applicable to miniature Christmas tree lights by publishing a notice in the FEDERAL REGISTER of March 31, 1977 (41 FR 17154). In that notice, which was published in accordance with section 7(b) of the Consumer Product Safety Act (15 U.S.C. 2056), the Commission invited interested persons to submit an existing standard as a proposed consumer product safety standard or to submit an offer to develop a recommended safety standard. In addition, the Commission made specific observations about the adequacy of the voluntary standards to address the identified hazards and suggested promising approaches for provisions that could be used in a standard to reduce the risks of injury.

In response to the March 31 FEDERAL REGISTER notice, the Commission received two offers to develop a recommended standard applicable to miniature Christmas tree lights, from Underwriters Laboratories Inc., Melville, N.Y., and from National Consumers League, Washington, D.C. The Commission also received a submission as an existing standard from the National Ornament and Electric Lights Christmas Association (NOEL), New York.

The Commission subsequently accepted the offer of the National Consumers League (NCL), 1028 Connecticut Avenue, NW., Suite 522, Washington, D.C. 20036, to develop a consumert product safety standard applicable to miniature Christmas tree lights. On June 30, 1977, the Commission published in the FEDERAL REGISTER (42 FR 33354) a notice of acceptance of the offer, a summary of the terms of the offer, and an invitation to interested persons to participate in NCL's development of the recommended standard.

The period for NCL's development of the recommended standard ended on November 16, 1977. On that date NCL submitted material, including the following:

(1) NCL's proposed safety standard, (2) a conceptual rationale, which describes the basis on which the offeror's reviews panel determined the content of the standard submitted to the Commission, (3) a report which provides a section by section technical rationale for the specific language of the standard presented by the offeror to the Commission, and (4) an Economic Analysis Report.

The Commission's staff conducted an extensive evaluation of the standard which NCL recommended. It was necessary to conduct additional tests to determine the feasibility and effectiveness of some of the recommended requirements to address the electric shock and fire hazards associated with the product.

Copies of all materials which the Commission has considered during this process may be obtained from, or inspected in, the Office of the Secretary, 3rd Floor, 1111 18th Street NW., Washington, D.C. 20207.

In the FEDERAL REGISTER of January 16, 1978 (43 FR 2185), the Commission extended by 75 days the time allowed it to either publish a proposed standard or withdraw the notice of proceeding. The Commission extended the time because of the need for further development of one test in the proposed standard, the need to resolve several technical areas where the Commission staff and offeror may disagree, and the need for additional time to include packaging and labeling requirements in the proposal. In the FEDERAL REGISTER of April 5, 1978 (43 FR 14322) the Commission further extended by 30 days the time allowed it to either publish a proposed standard or withdraw the notice of proceeding. The additional extension was necessary in order to allow for review of this complex and lengthy document. The time period for publishing the proposed standard or withdrawing the notice of proceeding expires May 3, 1978.

As a result of its consideration and evaluation of the recommended standard submitted by NCL, the Commission has determined that some changes and additional requirements were necessary in order to reduce risks of injury from electrical fire and shock. In addition, the recommended standard was re-written to provide additional technical clarity for the requirements and to put the standard in a form suitable for publication in the Code of Federal Regulations. Therefore, the standard proposed below differs from the recommended standard submitted by the offeror. The major changes, and the reasons for the changes are discussed in this preamble.

B. The Proposed Standard

The standard which is proposed below is designed to reduce or eliminate the unreasonable risks of injury that the Consumer Product Safety Commission has preliminarily determined are associated with miniature Christmas tree lights.

The specifications of the standard will be Subpart A of Part 1208. In the interests of clarity, tests constituting an integral part of the standard have been placed in Subpart B. At Subpart C, the Commission has included recommendations concerning materials and provisions to address special hazards to children presented by plugs and connectors as well as recommended labeling. Although these provisions are recommendations rather than requirements and are not part of the standard, the Commission has includ-

V 43 5 86

ed them in the the proposal for reference and welcomes comments on these recommendations. The Commission intends to add compliance provisions (including a certification rule under section 14 of the CPSA) in the future. These will be set forth as Subpart D.

For the provisions of the standard recommended by NCL which the Commission has proposed in Part 1208, the Commission, except as noted below, adopts the rationale for these provisions that was submitted to the Commission by NCL. The rationale for the changed and additional provisions of the proposal is given below in the discussion of the requirements of each section of the standard. The proposed Part 1208 will be enforced using the U.S. Customary units for length, force, etc. that are given in the part. However, for convenience, the Metric equivalents are also given.

Subpart A of the proposed standard consists of 10 sections covering the following subject matter:

Sec.
1208.1 Purpose, Scope, and Application.
1208.2 Effective Date.
1208.3 Definitions.
1208.4 Abbreviations.
1208.5 Materials.
1208.6 Wiring and Assembly Requirements.
1208.7 Component Requirements.
1208.8 Overcurrent Protection.
1208.9 Lamps and Lampholders.
1208.10 Packaging and Labeling.

(The effective date of the proposed standard is discussed at section G of this preamble.) An explanation of the scope of the proposal and the technical provisions of the proposed standard (§§ 1208.5–1208.10) is given below.

At subpart B, the standard contains 29 tests to reduce the identified risks of injury associated with minature Christmas tree lights. A brief summary and explanation of these tests is also given below.

SCOPE OF THE PROPOSAL (SECTION 1208.1(B))

The requirements set forth in the proposed standard for Miniature Christmas Tree Lights, 16 CFR Part 1208, apply to lighting units intended for use with Cristmas trees or other Decorative applications. As defined at § 1208.3(i), miniature Christmas tree lights are lighting units which (1) have lamps or lampholders electrically connected by wires in series or in combinations of series path, (2) are equipped with or intended to be used with lamps that dissipate four watts of power or less per lamp when the product is connected to a 120 volt rms source, and (3) are intended to be supplied electric power from a nominal 120 volt receptacle. Strings of lamps or lampholders which are sold as part of rigid decorations, such as wreaths or frames, are covered by the standard. In addition, a lighting unit meeting these requirements would be covered by the standard even if it contains additional electrical elements other than lamps, such as switches, or an additional lamp or lamps which dissipate more than four watts of power.

MATERIALS (1208.5)

Section 1208.5 of the proposed standard is one of several sections in the standard designed to protect consumers from electrical fire and shock hazards that may result from contact with improperly or insufficiently insulated electrical conductors. The requirements are based on the function of the insulating material, since the function of the material is a significant factor in determining the likelihood of injury resulting from failures of the material. Section 1208.5(a) of the proposal divides insulating materials into three categories, and prescribes requirements for materials in each category.

The first category, Class X, is for parts of the lighting unit that do not directly contact, enclose, or support electrically live parts. Examples of these parts are shades, diffusers, reflectors, simulated needles, leaves, and supporting or decorative frames. Section 1208.5(a)(1) requires that these materials pass the Decorative Part Downward Burning Rate Test, at § 1208.37, to ensure that they are not highly flammable. Their proximity to the electrical circuit which is a potential ignition source, is the reason for the test. These parts are usually decorative in nature, and could propagate a local flaming condition into a major conflagration if highly flammable. The Decorative Part Downward Burning Rate test distinguishes materials which have rapid flaming characteristics as provided in § 1208.37. Class X materials must also pass the Cascade Failure Simulation Test, at § 1208.29, and the Short Circuit Simulation Test, at § 1202.28. These tests evaluate the overall performance of the lighting unit under stress conditions that may be encountered while in use. The Cascade Failure Simulation Test and the Short Circuit Simulation Test simulate what might occur, for example, in a situation where a short or fault occurs and decorative parts ignite.

The second and third categories, Classes Y and Z, are for materials which contact or are relied upon to enclose or support electrically live parts.

The requirements of § 1208.5(a) (2) and (3) applicable to Class Y and Z materials are intended to ensure that materials which contact or are relied on to enclose or support electrically live parts do not deteriorate or lose their effectiveness as barriers (1) between the potentially dangerous, available electrical energy and the consumer, (2) between the available electrical energy and the surrounding objects which may be electrically conductive and grounded, and (3) between electrically live parts of different polarity which could short together. Class Y materials are insulating materials contacting live parts in instances where the electrical energy is limited by fuses or similar devices. Examples of these materials are lamp bases, lampholders, and certain shades and diffusers that are integrally molded as part of the lamp bases. Class Y materials are not required to be flame retardant, since the materials are used with limited-energy live parts.

The recommended standard submitted by NCL distinguished Class Y and Class Z materials based on the normal operating current of the circuit. The proposed standard distinguishes Class Y and Z materials based on the maximum current rating of the overcurrent protective device. The purpose of this change is to ensure that flammable materials are not used as insulation for electrical components except where the electrical energy is limited by a special fuse or other protective device.

Although Class Y materials are used with limited-energy live parts, these parts can present a potential lethal shock hazard if the materials deteriorate or otherwise lose their effectiveness. Melting of the materials could occur, presenting a fire and shock hazard in use while under conditions well within the energy limit permitted by the overcurrent protection of the fuse of similar device. Section 1208.5(a)(2) requires that Class Y materials not melt to expose live parts at a temperature of 248° F (120° C) by requiring that these materials meet the Heating Test for Lamps and Lampholders at § 1208.38. The temperature value is based on readily attainable temperatures on materials near the lamps, the primary heat source. This temperature can result from the heat of the bulbs and can lead to exposed live parts when the lights are clustered. This temperature can also be obtained when an improper replacement lamp is placed in a light string. Class Y materials must also meet the tests prescribed for Class X materials at § 1208.5(a)(1), since highly flammable materials could also present a hazardous condition.

Class Z materials contact or are relied upon to enclose or support electrically live parts whose steady current flow under normal operating conditions is either not limited by an overcurrent protective device or is limited by an overcurrent protective device rated at more than 300 milliamperes. In addition, Class Z materials are insulation for wire, plugs, fuseholders, and connectors regardless of the presence of the overcurrent protective device. Class Z insulating materials on lampholders can be exposed to the energy

that fuses or similar devices rated 300 milliamperes can let through. The 300 milliampere value far exceeds the normal 100-200 milliampere current flow for a single series circuit of lights and is indicative of a serious overcurrent condition which, even when slightly exceeded, could cause localized high-heat conditions that might be incipient causes for fire and shock hazards. Section 1208.5(a)(3) requires Class Z materials to be flame retardant since the potentially available energy they insulate may otherwise cause serious overheating leading to fires and exposed live parts. These materials must pass the appropriate component flammability tests, at §§ 1208.21 and 1208.27. The test in § 1208.27 which does not apply to wire insulation, is based on a standard material flame test for judging flame retardant characteristics (Underwriters Laboratories Standard UL 94). The test for wire insulation flammability is based on a test in the Underwriters Laboratories Bulletin UL 62, dated February 24, 1978.

Additional requirements for insulating materials including wire insulation material at § 1208.7(a)(3), are contained under particular component requirements in the proposal, at § 1208.7. In § 1208.7(b)(5), insulating materials for plugs and connectors can be phenolic or urea composition thermosetting materials (materials that are inherently flame retardant and do not flow when heated) or one of the other specified Class Z materials when tested for flammability.

In § 1208.9, insulating materials used for lamps and lampholders must have insulating qualities to withstand the applied 1250 volts of the Dielectric Test for Lampholder and Lamp Assembly, § 1208.25. This value of voltage is a typical value used in material and assembly testing and is generally based on the formula: Two times the maximum voltage for the appliance (125 volts for Christmas lights) plus 1000 volts.

The proposed standard contains design specifications for conductive materials at § 1208.5(b). The Commission believes that it would be impractical to develop a performance specification for conductive materials, since extensive evaluation of the metallurgical, mechanical, electrical and chemical properties of all possible conductive materials would be needed in order to determine the appropriate tests. Copper and copper alloys (brass) have traditionally been used in appliances and are required for miniature Christmas tree lights by § 1208.5(b). Other conductors, such as iron, aluminum, gold, and silver may have serious economic or safety related drawbacks for application in miniature Christmas tree lights. Section 1208.5(b) provides that electrically live parts except for lamps and wire must be copper or have at least 60 percent copper by weight in the alloy (at least 80 percent for screw shell holders for lamps, fuses and other parts.) These percentages are consistent with minimums for electrical conductor brass of Underwriters Laboratories (UL) and industry standards.

If the Commission receives comments indicating that manufacturers wish to use another specified conductive material that does not present a hazard when used in miniature Christmas tree lights the Commission will consider changing the provisions of § 1208.5(b).

At § 1208.5(b) the proposal requires that metallized tinsel and other conductive flexible strips and threads, 0.25 in. (6.4 mm) and longer, and located within 1 in. (25.4 mm) of a lampholder, fuseholder, plug or connector shall pass the Conductive Tinsel Test (1208.41). The purpose of the test is to protect against exposed conductive materials that contact live parts from transmitting potentially hazardous current levels of 5 milliamperes and higher to people who might contact the material. Live parts are accessible to contact by strips and threads at lampholder and fuseholder openings, particularly during lamp and fuse servicing, and at plugs and connectors, particularly plug blades and receptacle openings. The Conductive Tinsel Test was added to the proposal by the Commission after a review by the Commission staff of the construction of miniature Christmas tree lights indicated the extensive use of metallized tinsel.

WIRING AND ASSEMBLY REQUIREMENTS (1208.6)

At § 1208.6 the proposal lists several requirements concerning the method of wiring of light strings in order to minimize overheating or the chance of having an exposed live part that could result in fire or shock.

Contact surfaces that are used to routinely make and break electrical circuits must be of adequate size and shape for proper mating of electrical parts in order to avoid overheating. Wire strands if used for contact surfaces would be of indeterminate or variable size and shape. This condition could result in overheating. Therefore, the proposal at § 1208.6(a) prohibits the use of wire as a contact mating mechanism.

The proposal, at § 1208.6(b) requires the wire connecting two components to be continuous and free of splices or taps. Such connections are a source of electrical failure which could lead to the exposure of live parts of other electrical abnormalities.

At § 1208.6(c), the proposal requires wire within components to be secured so that conductors are not exposed and will not become exposed when tension is applied to the wire as provided in the performance tests for components, §§ 1208.23 and 1208.35.

The proposal, at § 1208.6(d), requires, lights to be designed so that wire current ratings are not exceeded at normal operating currents. If wire current ratings are exceeded, wire insulation may be degraded, thus resulting in the exposure of live parts and possible short circuits.

Section 1208.6(e) requires overcurrent protection for wires of cross-sectional area less than No. 20 AWG to provide protection against fire when short circuit conditions exist in a light string.

Section 1208.6(f) requires each minature Christmas tree light to have an attachment plug or an add-on connector for connection to the power supply source. Miniature Christmas tree lights without attachment plugs or add-on connectors could present risks of injury from fire and shock. This requirement would eliminate the situation in which lights falling within the definition of the product covered by this standard were not provided with suitable means for electrical interface with the supply source.

Section 1208.6(g) requires that strings of lights with relatively small gauge wire (smaller in size than No. 20 AWG) must be routed in a pair of two or more wires twisted together longitudinally, except between components mounted on a frame, such as lampholders fixed in a tree-top star decoration. The purpose of this requirement is to give the wiring added strength against breakage with the resulting exposure of live parts.

The proposed standard at § 1208.6 (h) and (i) included requirements applicable to the assumbly of miniature Christmas tree lights. The purpose of these requirements is to protect consumers from exposure to live parts and shorts. At § 1208.6(h) the proposal requires separation of live parts. Opposite polarity conductors must be separated to prevent across-the-line shorts. Live parts must be separated from exposed dead metal parts in order to prevent shorts to outside dead metal parts. The parts must be separated by a spacing of at least 0.047 inch (1.19 mm) in order to adequately withstand the potential of 120 volts from bridging or tracking across the gap and creating the short.

Section 1208.6(i) of the proposal requires live parts to be insulated or otherwise enclosed so that they cannot be contacted by the probe in figure 1 of the regulation. The probe is the tip portion of a probe developed by Underwriters Laboratories to judge the accessibility of live parts based on testing a large sample of adults and children. The purpose of the requirement is to prevent persons from contacting live parts.

MY 3 7 8 UMI

V 43 — 86 MY 3 78 UMI

The recommended standard submitted by NCL did not contain requirements for separating live and dead metal parts and did not contain general requirements concerning the accessibility of live parts. However, the proposed standard includes these as general provisions in order to address fire and shock hazards that may arise where additional components, such as switches, are used.

COMPONENT REQUIREMENTS (1208.7)

The proposal at § 1208.7 includes design and performance requirements for components of miniature Christmas tree lights.

WIRE (1208.7) (a))

Wire construction requirements at § 1208.7(a) and performance tests at § 1208.13-22 are based almost entirely on tests in the Underwriters Laboratories (UL) Standard UL 62 for Types XT and FXT wire, the types of wire used in miniature Christmas tree lights that meet the UL specifications. However, the performance test for wire insulation flammability is based on UL Bulletin, Subject 62, dated February 24, 1978.

Section 1208.7(a)(1) requires copper wire to be used. Breaking strength requirements are included at § 1208.7(a)(1) in order to establish that soft annealed copper is used for flexibility and bendability. The recommended standard submitted by NCL contained a requirement that specified the use of "soft annealed" copper wire. In order to more accurately measure the desired characteristics of the wire, the Commission has added the maximum breaking strength requirement for the copper wire.

Wire gauge requirements are included at § 1208.7(a)(2) and Table B in order to ensure that the wire has proper current carrying capability.

At section 1208.7(a)(3) the proposal requires wire insulation to be composed of polyvinyl chloride or a copolymer of vinyl chloride and vinyl acetate. These are the materials for general, applicance wiring insulation, and the ones on which the performance tests are based. These materials are the only known ones presently being used for miniature Christmas tree lights. At this time the Commission believes that it would be impractical to develop performance tests for different materials. If the Commission receives comments indicating that manufacturers wish to use another material for wire insulation that does not present a hazard when used in miniature Christmas tree lights, the Commission will consider changing this provision in the final standard.

This section also provides for minimum average insulation thickness and minimum insulation thickness at any point. The purpose of these specification is to ensure adequate wire coverings for protection against shorts and contact with live parts.

The proposal, at § 1208.7(a)(4) includes requirements for the separation of parallel conductors by at least 1.5 times the required minimum average insulation thickness for a single conductor wire. The purpose of this requirement is to ensure adequate separation of conductors of parallel cord and still permit a common web of insulaltion joining the two conductors. Section 1208.7(a)(5) requires that a minimum of 0.013 inches (0.33 mm) of insulation should remain on each conductor after the parallel cord has been torn apart to separate the conductors. The purpose of this requirement is to prevent live parts from being exposed when the conductors are separated, thereby presenting a shock or shorting hazard.

The proposal, at § 1208.7(a)(6), also requires wire to pass tests for insulation resistance (1208.13), elongation and tensile strength (1208.14), heat-shock (1208.15), deformation (1208.16), cold-bend (1208.17), weathering (1208.18), dielectric (1208.19), abrasion (1208.20), flammability (1208. 21), and flexing (1208.22).

PLUGS AND CONNECTORS (1208.7 (b))

At § 1208.7(b), the proposal includes detailed design and performance requirements for plugs and connectors. These requirements are based on provisions in the Underwriters Laboratories (UL) Standard for Attachment Plugs and Receptacles (UL 498).

At § 1208.7(b)(1) the proposal includes requirements concerning the size and locations of plug blades. These requirements are included to protect consumers against electrical fire and shock hazards, since the blades must properly engage the standardized power supply recepticles of wall outlets and extension cords with a fit that does not result in exposed or misplaced live parts. Special thickness specifications are included in § 1208.7(b)(2) to protect consumers from shock where plug blades are constructed of folded-over metal stock.

At § 1208.7(b)(3), the proposal includes requirements for minimum plug body dimensions. The purposes of these dimensions is to provide an adequate distance between the blades and surfaces likely to be gripped during plug insertion and removal.

Section 1208(b)(4) includes requirements concerning the size and location of receptacle slots. These requirements are included to protect against fire and shock hazards since receptacles must properly accept the standardized blades of plugs with a fit that does not result in exposed or misplaced live parts.

As previously noted in the discussion of insulating materials, the insulating materials for plugs and connectors in § 1208.7(b)(5) are required to be certain specified flame retardant materials: Phenolic; urea; pliable, molded, natural or synthetic rubber, or a combination thereof; a polymer of vinyl chloride; or a copolymer of vinyl acetate. These materials are the only known ones presently being used. At this time the Commission believes that it would be impractical to develop performance tests for different materials. If the Commission receives comments indicating that manufacturers wish to use another material for insulating plug and connector live parts that does not present a hazard when used in miniature Christmas tree lights the Commission will consider changing this provision in the final standard.

Section 1208.7(b)(6) of the proposal requires plugs and connectors to be capable of withstanding a 75 pound force crush test, as provided in the crush test for plugs and connectors § 1208.34. This test is included since attachment components are particularly susceptible to being stepped on, thus shorting or exposing live parts or otherwise damaging the component. The 75 pound force test value is representative of accidental adult crush force values.

The proposal, at§§ 1208.7(b) (7), (8), (9), and (10), requires plugs and connectors to pass a series of mechanical tests to evaluate the integrity of these bodies to enclose live parts. Plugs and connectors must pass a wire pull test, § 1208.35, a wire insulation pull test, § 1208.36, and a blade push test, § 1208.33 and a blade pull test, § 1208.32.

The proposal, at § 1208.7(b)(11), requires electrically live parts within receptable openings to be enclosed so that they are inaccessible when tested by a probe (figure 1) that represents contact by persons to protect against electric shock.

Section 1208.7(b)(12) of the proposal prohibits openings in enclosures of plugs and connectors except for the slots of receptacles and the openings from which blades project. In addition, this section prohibits the use of parts of plug and connector bodies that are solely held together by friction. If friction only is relied on, the parts may readily come apart, exposing live parts to shorts and contact by persons. The proposal requires positive detent action, latches, screws, or other fasteners in order to hold together plug and connector insulating parts that are relied upon to enclose live parts.

The proposal, at § 1208.7(b)(13) requires receptacles to permit full insertion of the mating blades of plugs or add-on connectors. This requirement is intended to avoid the exposure of live parts. Receptacles must pass the Receptacle Insertion-Withdrawal Test, § 1208.31.

The proposal, at § 1208.7(b)(14) prohibits parts of plugs and connectors from having a temperature rise in exces of 30° C (54° F) when operated under maximum current conditions. Such a temperature rise indicates either a high resistance connection or an inadequate conductor. This condition could lead to dangerously high temperatures which could ultimately short, expose live parts, or ignite. The recommended standard submitted by NCL did not include an overload condition as part of the heating test for receptacles. The proposed standard includes an overload condition in the heating test for receptacles based on that contained in UL 498 in order to test receptacles under the conditions of making and breaking contact with a plug while under load.

Section 1208.7(b)(15) of the proposal requires plugs and connectors to pass each of the following tests: Plug and Connector Blade Pull Test (1208.32), Plug and Connector Blade Push Test (1208.33), Receptacle Insertion-Withdrawal Test (1208.31), Strain Relief Test for Plug and Connector Connections (1208.35), Security of Insulation at Plugs and Connectors (1208.36), Crush Test for Plugs and Connectors (1208.34), Temperature Test for Plugs, Connectors, and Fuseholders (1208.30), and Flammability Tests for Class Z Applications (Except Wire) (1208.27).

OVERCURRENT PROTECTION (1208.8)

The proposal, at § 1208.8, requires miniature Christmas tree lights to have fuses or similar protective devices to prevent overcurrent conditions that could cause degradation of materials leading to fire and shock hazards. The overcurrent protective devices are required for the following specific reasons:

(1) To provide protection during short circuit conditions for small size conductors (wire of cross-sectional area less than No. 20 AWG).

(2) To provide protection during short circuit conditions against bulbs rupturing and causing ignition of surrounding materials (one or more bulbs in the shorted circuit).

(3) To provide protection against melting lampholder materials in order to pass the Cascade Failure Simulation Test (§ 1208.29). The overcurrent protective device may be relied upon to provide protection when the current increases due to lamp filament burnouts, the burned out lamps passing current through the shunt feature within the miniature lamps.

(4) To meet a qualification for Class Y use of an insulating material (referred to as "close fusing") ad described in § 1208.5.

The proposal, at § 1208.8(b) establishes the method for rating an overcurrent protective device. The rated value is one-half of that which causes the device to open within 2 minutes when operated at room temperature. It may be necessary to determine that the rating of an overcurrent protective device is 300 milliamperes or less in connection with § 1208.5(a)(2), or 3 amperes or less in connection with § 1208.6(e).

The proposal, at § 1208.8(c) requires that live parts of a fuse or fuseholder not be accessible when tested by the accessibility probe (Figure 1). This requirement has been included since replaceable fuses could present a shock hazard if a person were able to contact live parts during removal and replacement of a fuse from its holder.

The recommended standard submitted by NCL assigned insulation materials used for overcurrent protection devices and their holders to Class Z, with the exception of special fuse-lamp devices and their holders. In the proposed standard at § 1208.8(d) the Commission has removed this exception and requires overcurrent protection device enclosures or holders to be Class Z materials as provided in § 1208.5(a)(3) (that is flame retardant materials) for all types and locations of the protective device. This requirement has been included since a fault that results in shorting of live parts on the supply side of any overcurrent device could cause ignition of flammable insulating materials. The overcurrent device only provides protection aganist faults which result in current going through the device element and would not provide protection against faults which do not send current through the overcurrent protection element. If special fuse lamp devices and their holders were exempt, a fault that results in shorting of live parts on the supply side of the device or holder could cause ignition of flammable insulating materials.

The proposal does not restrict the form of an overcurrent protective component. An overcurrent protective device may take the form of a special lamp that also provides fusing. Such a device should be provided with a holder which does not permit the entry of non-fuse type ordinary lamps from the string, so that the purpose of the special lamp is not defeated. This is required in § 1208.8(e).

If fuses of the string are replaceable, at least one spare fuse, of the original fuse type, must be provided in accordance with § 1208.8(f). This requirement reduces the likelihood that a consumer will attempt to defeat this important protective component by bypassing or shorting the fuse where a replacement is not readily at hand.

Section 1208.8(g) of the proposal requires overcurrent protective devices to pass each of the following tests as applicable: Temperature Test for Plugs, Connectors and Fuseholders (1208.30), Flammability Test for Class Z Applications (1208.27), Strain Relief Test for Lampholders, Fuseholders and Other Bodies Except Plugs and Connectors (1208.23) and Crush Test for Lampholders and Fuseholders (Other Than Types Which Are Incorporated in Plugs and Connectors) (1208.26).

LAMPS AND LAMPHOLDERS (1208.9)

The proposal, at § 1208.9(a), requires that lampholders must provide a spacing of not less than 0.030 inch (0.76.mm) through air and over surfaces between electrically live parts of differing electrical potential, and between electrically live parts and dead metal parts. Spacings less than the required amount result in designs wherein lampholper contacts could readily be bridged resulting in shorting conditions that could lead to overcurrent, heating, melting, fire and exposure of live parts. The proposal also requires that live parts of lampholders be recessed at least 0.20 inch from the lamp entery end of the lampholder. This minimum dimension is based on a requirement in the NOEL Standard; it is intended to isolate lampholder contacts so that the likelihood of having exposed lamp contacts (particularly extra-long lamp leads of push-in replacement lamps) when lamps are energized is reduced. In addition, the proposal at § 1208.9(b) requires that no live parts of either the lamps or lampholders be accessible before, during, or after insertion of a bulb. The purpose of this requirement is to protect live parts against accidental contact by persons. The Commission believes the opening in lampholders for inserting lamps must not permit live parts to be readily accessible to contact by a probe, especially since the lights are decorative attractions for children. As a result of the relatively small size of lamps, it is difficult to hold a lamp or lampholder and remain away from the electrical contacts. Therefore, no live parts of either the lamps or lampholders must be accessible before, during, or after insertion of a bulb.

Section 1208.9(c) refers to the Dielectric Test for Lampholders and Lamps (1208.25). As previously noted in the disussion of Materials (§ 1208.5), the Dielectric Test for Lampholder and Lamp Assembly is a measure of the insulating quality of the lampholder and lamp insulating materials. In addition, it is a check to assure adequate separation of opposite polarity live parts within the lampholder and lamp assembly to prevent shorting conditions that could ultimately lead to fire or exposure of live parts if the basic designs were inadequate.

Sections 1208.9 (d), (e), and (f) refer to performance tests (1208.26, 1208.24, 1208.23) for lampholders and lamp assemblies. See the discussion of the

V 43 — 86 MY 3 78 UMI

tests in this preamble for additional information regarding these requirements.

At § 1208.9(g), the proposal requires that each miniature Christmas tree light must have lamps that are intended to operate at the same voltage. The purpose of this requirement is to avoid dangerously overheating lampholders. This condition results when lamps for use at one particular voltage are accidentally inserted into lampholders in circuits designed for lamps that operate at a different voltage.

The proposal, at § 1208.9(h) provides that lamps that have shunts must not be used in series circuits having fewer than 10 lamps or lampholders. Series circuits of lamps with fewer than 10 lamps are intended to operate at voltages in excess of 12 volts. If lamps with shunts were used and a lamp with a shunt had the filament burn out, the shunt would bypass the open filament to keep the remaining lamps lit. This condition would subject remaining lamps to significant overvoltage conditions which could lead to dangerous overheating, melting of materials and other degradations of the string.

The proposal, at § 1208.9(i) refers to the Decorative Part Downward Burning Rate Test (1208.37) which requires that all lampholder and lamp assembly materials meet the minimum burning rate. This is to ensure that these materials are not highly flammable.

The proposed standard at § 1208.9(1) includes a requirement to eliminate lamp bulbs that could generate extremely high surface temperatures (approaching the self-ignition temperatures of materials that may be used in and around Christmas tree lights) either when lamp bulbs are incorrectly used in light sets not designed for them, or when overcurrent conditions are present but there is not enough current to open the lamp filament or any overcurrent protective device provided. Although this provision was not included in the recommended standard submitted by the offeror, the Commission believes that it is necessary in order to ensure that fires do not result from using lamp bulbs that generate extremely high surface temperatures.

The proposed standard, at § 1208.9(m), requires lamps and lampholders to pass each of the following tests: The Cascade Failure Simulation Test (1208.29); the Short Circuit Simulation Test (1208.28); the Heating Test for Lamps and Lampholders (1208.38); the Millivolts Drop Test for Lampholders (1208.39); the Strain Relief Test for Lampholders and Fuseholders (and other bodies except plugs and connectors) (1208.23); the Secureness of Lampholder Contacts Test (1208.24); the Crush Test for Lampholders and Fuseholders (Other than types which are incorporated in plugs and connectors) (1208.26); the Dielectric Test for Lampholders and Lamp Assembly (1208.25); the Flammability Test for Class Z Applications (Except Wire) (1208.27); the Maximum Wattage Test for Lamps (1208.40); and the Decorative Part Downward Burning Rate Test (1208.37).

As a result of additional research and testing conducted by the National Bureau of Standards (NBS) for the Commission after the submission of the recommended standard, the Commission has added additional requirements to the section of the proposal concerning lamps and lampholders (§ 1208.9). The offeror's recommended standard provided that lamps and lampholders must meet the Cascade Failure Simulation (CFS) Test (at 1208.29), which is a test intended to simulate the hazardous conditions which could occur during normal and failure operating modes of miniature Christmas tree lights.

The purpose of the Cascade Failure Simulation Test is to determine whether the lamp circuit is sufficiently protected against lampholder melting and subsequent exposure of live parts from overcurrent in the lamp circuit as bulbs burn out. However, laboratory tests at NBS have indicated that melting of certain lampholders can occur either from conditions that do not result in overcurrent or that result in overcurrent that is not sufficient to blow even a fuse that is rated at or slightly above the normal circuit current.

The original CFS Test in the recommended standard submitted by the offeror did not address the following credible hazard conditions of an operating light string where temperatures could be high enough to melt certain materials but where overcurrent conditions are not significant:

(1) Improper insertion of a lamp or lamps not designed for the light string under observation (e.g. substitutions of bulbs intended for a 10 lamp light string as replacement for burned out bulbs in a 35 or 50 lamp light string) can present a hazard without an overcurrent condition if a high voltage bulb designed for a 10 lamp circuit is inserted into a 35 or 50 lamp circuit. The 35 or 50 lamp circuit, which operates at higher currents (130 ma-150 ma) than the 10 lamp circuit (100 ma), will force higher current through the high voltage lamp. This will cause the lamp to burn hotter than normal. Although there are no significant overcurrent conditions present, the hot lamp bulb could melt its own socket or another lampholder if direct contact is made. The hot lamp could also ignite external materials.

(2) Lamps bunched together for a unique decorative effect can present a hazard without an overcurrent condition. This arrangement can result in lampholder melting and later exposure of conductors without an overcurrent condition being present.

(3) Placement of decorative attachments over the lamp assembly can result in melting and exposure of conductors without an overcurrent condition being present.

(4) Variability of contact resistance at the wire-to-lampholder connection within some types of lampholders can present a hazard without an overcurrent condition. The CFS Test does not adequately test this condition because of the variability of contact resistance with contact pressure and the relatively long period of time the condition can be present before a hazardous condition materializes.

(5) Defective lamps that run hot or shunts that do not open can result in melting and exposure of conductors without an overcurrent condition being present.

In order to address these hazard areas that are not included in the original CFS test, the Commission has both modified the CFS Test, at § 1208.29 and included three additional test requirements in the proposal, at § 1208.9 (j), (k), and (l). These tests are § 1208.38, Heating Test for Lamps and Lampholders, § 1208.39, Millivolt Drop Test for Lampholders, and § 1208.40, Maximum Wattage Test for Lamps. The CFT Test cannot readily be modified to simulate those hazardous situations resulting from usage of parts not designed for the light string or from events which may require a long period of time to become apparent; hence, there is a need for a minimum component performance level as provided by these tests. These modifications to the CFS Test and additional tests are intended to reveal hazardous conditions that may be present in the absence of a significant overcurrent condition. The Heating Test for Lamps and Lampholders requires lampholder assemblies to withstand a temperature of 248° F (120° C) for 2 hours without exposing conductors. The Millivolts Drop Test for Lampholders has been included to evaluate the integrity of wire to lampholder connections and to address overheating hazards presented by contact resistance within some types of lampholders. The Maximum Wattage Test for Lamps has been included to address the hazard of bulb surface temperatures which can exceed the self-ignition point of materials used on and around Christmas trees.

PACKAGING AND LABELING (1208.10)

The proposed standard, at § 1208.10, includes packaging and labeling requirements. The packaging and labeling requirements address the shock hazards which can be caused by direct contact with exposed live electrical conductors or by contact with an intervening conductive object. The requirements also address the fire hazards which can be caused by excessive heating of flammable materials.

After reviewing the NCL Review Panel recommendations, the Commission concluded that guidelines are necessary to ensure that the placement, type size, and prominence of the requisite labeling statements would make them conspicuous to the consumer. Because of the similarities between the labeling presently required for hazardous substances under the Federal Hazardous Substances Act (FHSA) and that required by this proposal, the proposed standard, at § 1208.10, provides that 16 CFR 1500.121, governing the prominence and conspicuousness of FHSA labeling, may be used as guidance for the labeling required by this section.

The proposal would require that miniature Christmas tree lights have a label containing cautionary information permanently affixed to the light string and located between the plug and the first lampholder. A permanent label is necessary since the fire and shock hazards addressed by the labeling could occur throughout the life of the product. The location of the label (between the plug and the first lampholder) is necessary since the consumer is likely to handle the product at this point when the product is used, and thus is likely to read the label if it is placed in this location.

The proposal would require that the permanently affixed label and the package have the signal word "Caution" or "Warning" as well as the statement of hazard "to avoid fire or shock hazards". The signal word is necessary to draw attention to the cautionary information on the label. The statement of hazard is necessary to state the purpose of the cautionary information.

The proposal would also require the following cautionary information: "Do not use on trees with metal or metallic needles, leaves or branch covering."

"Do not use staples or sharp-edge fasteners which can damage insulation."

"Use only decorations over lamps if provided with light set."

Metallic trees pose a potential shock hazard or fire hazard resulting from shorting if metal needles or other such conductive parts of trees penetrate the insulation of the light string as it is being installed on the tree, or work their way into bulb sockets or other openings in the string's insulation so as to contact live conductor parts.

Similarly, staples or sharp-edged fasteners may expose the user to electric shock or fire resulting from shorting if the fasteners contact live parts of the light string by penetration of the insulation as they are installed.

Attaching decorations to the bulbs, unless they are specifically designed to eliminate any potential hazard when employed with a particular pattern of light string, can pose a potential shock hazard when metallic parts of the decoration are pushed down into the bulb socket or are pushed through the insulation so as to contact live parts of the string. In addition, potential fire hazards occur if combustible or non-fire retardant materials present in the decoration are overheated by the bulb, and if the decoration overheats the lampholder.

The proposal would also require the permanently affixed label and the package to contain the complete name and mailing address of the domestic manufacturer, domestic importer, distributor, or private brand seller and the manufacturer's identification number (which may be in code), indicating the style number or name, the lot number, and the year of manufacture. This information is necessary in order to allow the Commission and consumers to identify the manufacturer and the product.

The proposal would require lamp and fuse replacement information on the permanent string label and package. The proposal would also require voltage and manufacturer information on the packet of spare bulbs if provided. Replacement information is necessary since installation of bulbs intended for use in light strings with a greater or smaller number of series bulbs than the string in which the bulb burn out has occurred will result in overheating, thus increasing the likelihood of fire hazard. Therefore, bulb replacement information for the string is required on the permanent string label. Since present day technology does not provide an economical, acceptable means to mark the voltage rating directly on the miniature light bulbs, voltage-rating information is required on the container of spare replacement bulbs to try to forestall installation of these bulbs in an inappropriate string, thus increasing the possibility of fire. In addition to the voltage rating of the bulbs, the spare-bulb container carries a manufacturer-identification to provide traceability of the manufacturer in case of safety or other problems with the bulbs.

Fuse replacement information is required for replaceable fuses since this information is necessary to ensure the continued effectiveness of this overcurrent protective device.

The offeror recommended that the Commission require the inclusion of the Commission's Hot Line number (a toll free number established to receive consumer complaints about product hazards and disseminate information about product safety) on the permanently attached label. The Commission has not included this provision in the proposed standard since inclusion of the number could lead to many calls unrelated to safety, such as calls concerning broken or burned out bulbs. This practice could also overburden the Commission's small hotline staff.

The Commission believes that the labeling included in this section also constitues performance and technical data authorized by Section 27(e) of the Consumer Product Safety Act (15 U.S.C. 2076(e)). Consequently, the Commission is also relying on this section as authority for these requirements.

The Commission is publishing with the proposed standard at § 1208.53 of Subpart C labeling recommendations concerning care and use instructions. While the labeling provisions of this section are not requirements of the standard, the Commission encourages manufacturers to follow these recommendations.

TESTS

The proposed standard, at Subpart B, includes tests applicable to miniature Christmas tree lights. These tests have been included in order to allow the Commission to test for compliance purposes. A brief summary of these tests is provided below. Failure to meet the performance requirements can generally result in exposure of live parts and short circuit conditions, or other conditions which are further explained below in connection with each test.

WIRE INSULATION RESISTANCE (1208.13)

The purpose of this test is to ensure that the material covering the wire conductor will provide adequate insulation. The test is widely applied to appliance wiring insulating materials.

WIRE INSULATION ELONGATION AND TENSILE STRENGTH (1208.14)

The purpose of this test is to evaluate the characteristics of the wire insulation by performing comparative strength tests before and after accelerated aging of specimens. This test has been widely applied to thermoplastic insulation which has polyvinyl chloride as the basic constituent.

HEAT-SHOCK TEST FOR WIRE INSULATION (1208.15)

The purpose of this test is to evaluate the behavior of wire insulation in terms of whether it will crack should it come in contact with hot surfaces up to 121° C for up to one hour.

DEFORMATION TEST (1208.16)

The purpose of this test is to evaluate the flow characteristics of wire insulation under mechanical pressure when it undergoes a rise in temperature.

V 4 3 — 8 6

COLD-BEND TEST (1208.17)

The purpose of this test is to evaluate the bendability of the wire insulation without cracking while being subjected to the coldest outdoor conditions likely to be encountered.

WEATHERING TEST (1208.18)

The purpose of this test is to evaluate the wire insulation for strength and aging after exposure to simulated rain and sun (ultra-violet light) conditions.

The proposed standard includes a weathering test for wire insulation in which specimens of wire are exposed in a xenon arc Weather-Ometer for a period of 1248 hours. Use of the xenon arc Weather-Ometer as opposed to other Weather-Ometers is proposed because the spectrum of radiation achievable with a xenon arc device more closely approximates the spectrum of solar radiation than do the spectra of other Weather-Ometers. Therefore, the xenon arc device has the potential for providing a fairer, more universal and more representative test than do the other available devices.

DIELECTRIC TEST FOR WIRE INSULATION (1208.19)

The purpose of this test is to locate any defects in the completeness of the insulation by placing a high voltage between the outer surface of the wire insulation and the wire conductor.

ABRASION TEST FOR WIRE INSULATION (1208.20)

The purpose of this test is to evaluate the wear characteristics of the wire insulation.

FLAMMABILITY TEST FOR WIRE INSULATION (1208.21)

The purpose of this test is to evaluate the horizontal burning rate of the finished insulation. The test requires that slow burning wire be used.

FLEXING TEST FOR WIRE (1208.22)

The purpose of this test is to evaluate the mechanical flexing characteristics of the wire. The test requires that the stranding of the conductors resist breakage as a result of flexing which is likely to be encountered while in service.

STRAIN RELIEF TEST FOR LAMPHOLDERS, FUSEHOLDER AND COMPONENT BODIES OTHER THAN PLUGS AND CONNECTORS (1208.23)

The purpose of this test is to evaluate the secureness of the attachment of wires to the component bodies of a string (other than the plugs and connectors). The test includes wire-to-wire pulls and wire-to-component pulls.

SECURENESS OF LAMPHOLDER CONTACTS (1208.24)

The purpose of this test is to evaluate the secureness of the lampholder electrical contacts to resist mechanical forces which tend to lift them out from the lampholder upon removal of a lamp or upon pushing the wires where the wires enter the lampholder.

DIELECTRIC TEST FOR LAMPHOLDER AND LAMP ASSEMBLY (1208.25)

The purpose of this test is to evaluate the separation of lampholder and lamp contacts by applying a 1250 volt potential across the contacts. If not adquately separated, bulbs could short out and result in overheating other components.

CRUSH TEST FOR LAMPHOLDERS AND FUSEHOLDERS (1208.26)

The purpose of this test is to evaluate the strength of the component bodies to resist breakage which could expose live parts or short circuit. The 16 pound force value represents a maximum thumb and forefinger pressure of the 95th percentile adult male as defined by Dreyfus in "The Measure of Man".

FLAMMABILITY TEST FOR CLASS 2 APPLICATIONS (EXCEPT WIRE) (1208.27)

This test evaluates the flame retardant characteristics of materials and is based on that contained in Underwriters Laboratories Standard UL 94 for 94 VO rated materials.

SHORT CIRCUIT SIMULATION TEST (1208.28)

The purpose of this test is to evaluate the overcurrent protective device in terms of its ability to interrupt circuits having the short curcuit current capacity likely to be encountered in the field without causing hazardous situations such as ignition of materials in proximity to the device. The test also determines whether the protective device will operate to prevent a lamp(s) from rupturing and igniting combustible surroundings when a short in the wiring occurs with one or more lamps in the shorted circuit.

CASCADE FAILURE SIMULATION TEST (1208.29)

The purpose of this test is to simulate the overcurrent conditions which could occur during the normal and failure operating modes of the miniature light string or decorations when lamp filaments burn out and the circuit current increases due to operation of the shunt feature contained within the lamps. With the Commission modification, the test is also intended to uncover hazardous situtations resulting from the accidental contact between a lamp and another lampholder, and from the bunching of the lamps together for unique decorative effect. The test is intended to uncover conditions where bare conductors or ignition hazards might result from lampholder melt down.

TEMPERATURE TEST FOR PLUGS, CONNECTORS, AND FUSEHOLDERS (1208.30)

Under maximum current conditions, the conductors of plugs, connectors and fuseholders should not result in temperature rises that indicate relatively high resistance paths. The purpose of this test is to evalute the adequacy of the conductors in terms of size, conductivity, and contact resistance. The test also evaluates connectors in terms of the adequacy of the receptacle contacts to resist burning or pitting.

RECEPTACLE INSERTION-WITHDRAWAL TESTS (1208.31)

The purpose of this test is to evaluate the characteristics of receptacles for retaining the blades of attachment plugs and add-on connectors.

PLUG AND CONNECTOR BLADE PULL TEST (1208.32)

The purpose of this test is to evaluate the security of the blades within the body of the plug or connector to resist pull forces. If a blade is displaced or dislodged it could expose live parts to contact by persns.

PLUG AND CONNECTOR BLADE PUSH TEST (1208.33)

The purpose of this test is to evaluate the integrity of the blades within the body of the plug or connector to resist push forces. A test failure occures if a blade is displaced or the enclosure opened to expose live parts.

CRUSH TEST FOR PLUGS AND CONNECTORS (1208.34)

This test evaluates the ability of the plug and connector bodies to resist breakage which could expose live parts or short circuit. The 75 pound force represents the crushing force under foot and is derived from a crush test in Underwriters Laboratories Standard UL 498.

STRAIN RELIEF TEST FOR PLUGS AND CONNECTOR CONNECTIONS (1208.35)

The purpose of this test is to evaluate the attachment of the wires to the plugs and connectors to resist pull forces that could expose live parts.

SECURITY OF INSULATION AT PLUGS AND CONNECTORS TEST (1208.36)

The purpose of this test is to evaluate whether insulation can slip away from the conductors of wire when pulled. If this condition exists, live parts could be exposed.

M Y 3 — 7 8 UMI

DECORATIVE PART DOWNWARD BURNING RATE TEST (1208.37)

The purpose of this test is to evaluate whether materials are relatively slow burning. All materials used on miniature Christmas tree lights and decorations should, as an absolute minimum, meet the burning rate requirements of this test. The test does not rule out most paper, flock, fiber, plastic and other materials unless they are very flammable.

HEATING TEST FOR LAMPS AND LAMPHOLDERS (1208.38)

The purpose of this test is to simulate additional credible failure modes that cannot be determined by using the Cascade Failure Simulation Test. The temperature of 248° F (120° C) is the minimum for lamp bases and lampholders to withstand.The heat can be generated under conditions including: (a) Placing over the lamp assembly a decorative attachment not supplied with the lighting unit, (b) defective lamps that run abnormally hot, and (c) incorrect replacement of lamps into the light string by consumers that result in high-heat conditions. The two hour period allows for a full thermal soaking so that the ultimate effects on materials will become apparent.

MILLIVOLTS DROP TEST FOR LAMPHOLDERS (1208.39)

The purpose of this test is to evaluate the electrical integrity of the wire-to-lampholder connections to ensure that relatively low-resistance connections are used which will not add excessive heat to the lamp/lampholder assembly.

MAXIMUM WATTAGE TEST FOR LAMPS (1208.40)

The purpose of this test is to eliminate lamp bulbs that could generate extremely high surface temperatures (approaching the self-ignition temperature of materials used in and around Christmas tree lights). While this test is not expected to affect most presently known bulb designs, it is an important limitation to prevent future designs which could present a hazard when used as replacement bulbs in miniature Christmas tree lights.

CONDUCTIVE TINSEL TEST (1208.41)

The purpose of this test is to protect consumers against electric shock when they contact metallized tinsel and other conductive strips and threads near string components.

C. RECOMMENDATIONS (SUBPART C)

The Commission is publishing with the proposed standard several recommendations concerning miniature Christmas tree lights. Although these recommendations at Subpart C are not part of the proposed standard and would not, if published by the Commission with any final standard, be binding, the Commission believes that these recommendations are in the public interest and could improve the safety of the product. The Commission encourages manufacturers to follow these recommendations in making miniature Christmas tree lights.

At § 1208.50 the Commission recommends that materials be used which are appropriate to the functions of the parts they comprise. Although this provision is of a generalized nature, it has been included as a recommendation in order to further emphasize to manufacturers the importance of using the proper materials for miniature Christmas tree lights.

At § 1208.51, the proposal includes general recommendations to protect against corrosion of parts of the lights that enclose, or support or secure enclosures of electrically energized parts. The section recommends that parts be of stainless steel, or plated or coated iron or steel. Corrosion or rust of these parts could lead to failure of the part, resulting in exposure of live metal parts.

At § 1208.52 the proposal includes recommendations that address the mouthburn and other electrical shock hazards that plugs and connectors present to children. These recommendations are based on the provisions in the Underwriters Laboratories (UL) Standard for Cord Sets and Power Supply Cords (UL 817 A). The extension cord provisions have been included as recommendations for minature Christmas tree lights since the potential hazards from fire and shock with extension cords are also present in miniature Christmas tree lights. The Commission believes that plugs and receptacles on minature Christmas tree lights may be at least as inviting to small children as they are on extension cords. The CPSC has decided that a mandatory standard is not necessary at this time to address the mouthburn and shock hazards associated with extension and power supply cords since the provisions of the UL Standard (UL 817 A) appear to be adequate. The Commission believes that the recommendations at Section 1208.52, which are similar to provisions in the existing voluntary standard (UL 817 A) would, if followed, adequately address the mouthburn and shock hazards associated with miniature Christmas tree lights. The Commission does not at this time believe that it is necessary to include these provisions as requirements. However, if the Commission receives information idicating that mouthburns and electric shocks to childern are occurring in spite of these recommendations because of a failure to follow them, the Commission would consider amending the standard to include these provisions as requirements.

The recommendation for faces of attachment plugs and add-on connectors at § 1208.52(a) is intended to provide greater distances between the blades and the surfaces likely to be contacted by the small fingers of children. At § 1208.52(b) the Commission recommends that plug bodies provice a finger grip of finger gripping area to reduce the likelihood that a plug can be gripped at the periphery of the face where the blades project. If plugs are gripped at this point, contact with the live blades may result. The Commission also recommends that wires not project from the plug or add-on connector in the finger grip, so that wires are not damaged when the plug is gripped.

At § 1208.52(c) the proposal recommends that live parts within receptacle openings be recessed at least ¼ inch (6.35mm) from the receptacle face. This distance would ensure a separation to prevent bridging by saliva, where children place the receptacle in their mouth.

At § 1208.52(d) the proposal recommends that all receptacle openings be reliably and effectively closed with insulating material. The purpose of this recommendation is to provide additional precautions against contact and bridging by saliva of children with live parts within receptacle openings. This recommendation is generally consistent with provisions in the UL Standard for extension cord sets. This recommendation differs from the UL provision since it includes all receptacle openings. whereas the UL extension cord set standard permits one receptacle to remain open. This difference is based on the fact that extension cord sets are generally only energized when at least one receptacle is used, so that one receptacle could remain with a closure. By contrast, Christmas tree lights are often operated when no receptacles are used, so that all receptacles should be closed.

The Commission is publishing with the proposed standard labeling recommendations at § 1208.53 of Subpart C. These labeling recommendations involve care and use instructions, including instructions for testing and inspecting the light strings before use, instructions for the proper replacement of blubs and fused. instructions for proper storage, special precautions for outdoor use, a cautionary message to keep young children away from light strings and bulbs, and (if the light string has a separate and connector receptacle) a statement indicating that only other miniature lights or decorations with miniature lights should be attached to the receptacle.

The Commission encourages interested persons to comment on the rec-

V 4 3 1 8 6

ommendations that have been included at Subpart C of this proposal.

D. OTHER CONSIDERATIONS

Findings. Section 9(c) of the act requires that prior to promulgating a consumer product safety rule the Commission shall consider and make appropriate findings as to:

(1) The degree and nature of the risk of injury which the rule is designed to eliminate or reduce;

(2) The approximate number of consumer products, or types or classes thereof, subject to such rule;

(3) The need of the public for the consumer products subject to such rule, and the probable effect of such rule upon the utility, cost, or availability of such products to meet such need;

(4) Any means of achieving the effect of the rule while minimizing adverse effects on competition or disruption or dislocation of manufacturing and other commercial practices consistent with the public health and safety;

(5) That the rule (including its effective date) is reasonably necessary to eliminate or reduce an unreasonable risk of injury associated with miniature Christmas tree lights and similar miniature decorative lights; and

(6) That promulgation of the rule is in the public interest (15 U.S.C. 2058 (b) and (c)).

The Commission must also include these findings in the final rule.

Section 9(b) of the act (15 U.S.C. 2058(b)) requires that in promulgating a consumer product safety rule, the Commission shall also consider and take into account the special needs of elderly and handicapped persons to determine the extent to which such persons may be adversely affected by the rule.

The Commission welcomes comments from interested parties relating to all aspects of the subject matter of these findings.

THE DEGREE AND NATURE OF THE RISK OF INJURY THE RULE IS DESIGNED TO ELIMINATE OR REDUCE

The proposed standard is intended to reduce electrical fire and shock hazards associated with miniature Christmas tree lights. Based on the CPSC 1975 Christmas Decorative Light Survey, the Commission's technical analyses of hazards associated with miniature Christmas tree lights (Engineering Analysis of Miniature Christmas Tree Lights—December 20, 1976), and also on information about injuries associated with this product, the Commission has determined that potentially fatal fire and electrical shock hazards may result from using these products. The Commission has preliminarily determined that miniature Christmas tree lights present an unreasonable risk of injury. Technical analysis of hazards associated with miniature Christmas tree lights by the Commission staff indicates that shock hazards can be caused by direct contact with exposed live electrical conductors or by contact with an intervening conductive objective (such as a metallic tree ornament or accessory) that is in contact with the exposed conductor. The following are examples of characteristics of these lights which can create shock hazards: Bare wire where the wire enters the lampholders or plugs; plug and receptacle fittings that readily come apart; exposed lamp leads; cracked lampholders; and lampholders contacts which come out when the bulb is removed, thereby exposing the live contacts. Fire hazards can result from certain characteristics of light strings that may allow an exposed conductor to short to a grounded object, causing arching or excessive heating of flammable materials. The conductor can be exposed from bare wire at the entrance to lampholders of plugs, exposed lamp leads, cracked lampholders, or lampholders contacts that come out when the bulb is removed. Fire hazards can result from easily flammable grades of thermoplastic material heated by excessive current flow or arching. In addition, fire hazards can also result from the use of wire without proper overcurrent protection.

Approximately 20 percent of the incidents associated with miniature Christmas tree lights reported during the 1977 Christmas season involved fire; 70 per cent involved smoking, overheating or melting without evidence of actual ignition; and 10 percent involved reports of exposed current-carrying wires.

From 1974-1976, a total of 183 incidents involving Christmas tree lights were reported to the Commission from all sources, including in-depth investigations, consumer complaints received by the Commission and newspaper clippings provided by various clipping services available to the Commission. In about 40 percent of these incidents miniature Christmas tree lights were identified as the product. In about 20 percent of the incidents, larger size light strings were identified as the product. In the other 40 percent of the incidents, the product was identified only as "Christmas tree lights." Fifty of the incidents resulted in personal injury. The primary hazard was fire: More than two thirds of the injuries were burns, either from direct contact with a burning light string or as a result of an extensive fire. Twelve of the 50 injuries were definitely attributed to miniature Christmas tree lights. Eleven of the injuries were definitely attributed to larger size strings. The remaining 27 injuries could not be attributed to a light string of a definite size. In many cases where there was extensive fire damage, the kind of light string involved could not be identified.

The Commission has received several newspaper clippings reporting fires known or suspected to involve Christmas lights that occurred during the 1977 Christmas season. Most of these fires involved extensive property damage.

Economic analysis. The Commission has considered the potential economic effects of this proposed standard on the industry and on consumers, including possible changes in the production cost and retail price of some lighting units and effects on the utility and availability of miniature Christmas tree lights. The National Consumers League submitted with its recommended standard an economic analysis report which provides a substantial amount of information about the potential impact of this proposed standard, which is similar in most respects to NCL's recommended standard. The Commission believes that the conclusions of the report are generally applicable to this proposal. Their analysis estimates that some 30 to 40 million miniature Christmas tree lights and similar miniature decorative lights produced each year are potentially subject to a standard, and that the provisions of the submitted standard would probably lead to an increase in the average total cost of manufacturing miniature Christmas lights of approximately 8 to 12 percent. This may result in an increase in the retail price of some sets. It is expected that necessary changes to lights can be made within the limits of existing manufacturing practices and technology. The cost increase may be smaller for products now conforming to the Underwriters Laboratories' voluntary provisions, since the proposal includes many requirements that are similar to the UL provisions. Since the majority of Christmas tree lights are produced in Taiwan and since the Taiwan government has decided to require that all Christmas lights exported to the United States be UL listed after July 31, 1978, the economic effect of the standard may be minimized.

Changes and additions to the NCL recommended standard made by the Commission may add further to the estimated increases in production costs and retail prices and may affect the availability of certain kinds of products. The addition of the heating test for lamps and lampholders (1208.38), for example, may result in the discontinuation of the use of low-density polyethylene as a lampholder material. Some models of strings, particularly those with certain 12 volt lamps, may no longer be available as a result of changes made to the Cascade Failure Simulation Test (1208.29). Certain models of lamps such as ballast lamps or twinkle lamp designs may no longer be available as a result of the maximum wattage test for lampholders (1208.40).

An economic analysis report on the proposal will be made available for interested persons to comment on before the Commission decides whether to issue a final standard. This report will also treat the economic issues associated with product testing and any certification rule the Commission may propose.

The Commission has considered available information concerning the degree and nature of the risk of injury summarized above from the CPSC 1975 Christmas Decorative Light Survey, the Commission's technical analyses of hazards associated with miniature Christmas tree lights, and information about injuries associated with this product. The Commission has also considered presently available information concerning the potential economic effect of this proposed standard on industry and on consumers. The Commission will make available for public comment any additional economic information and analysis that is relevant and relied upon in the final standard. At the present time the Commission believes that the potential benefits associated with the proposed standard appear to outweigh the effect of the proposed rule on the cost, utility, and availability of the product. The Commission preliminarily determines that miniature Christmas tree lights and similar miniature decorative lights present an unreasonable risk of injury from electric shock and fire.

E. STOCKPILING

The Commission has not included an antistockpiling provision in the proposed standard since, as a result of the nature of the miniature Christmas tree light industry, the Commission does not believe that such a provision is necessary to prevent the intentional buildup of noncomplying inventories. For most firms, a substantial and costly deviation from normal production, and distribution practices and shipping schedules would have to be made in order to have non-complying merchandise in the U.S. before the effective date. The Commission believes that most firms will not have sufficient economic incentive to make these changes. If the Commission later determines that an antistockpiling provision is necessary, the Commission will issue such a rule.

F. ENVIRONMENTAL CONSIDERATIONS

The Commission has conducted an environmental assessment of the regulatory alternatives concerning miniature Christmas tree lights, addressing the potential effects of action on the production, distribution, consumption, and disposal of products subject to the standard. The effects of these alternatives will not lead to any significant impact on air and water quality, solid waste disposal, land use, energy use, or any other aspect of the physical environment. Since the proposed standard would not have a significant adverse effect on the quality of the human environment, an Environmental Impact Statement is not required. A copy of the environmental assessment may be seen in, or obtained from, the Office of the Secretary.

G. EFFECTIVE DATE

The Commission is proposing that the standard become effective on December 1, 1979. Miniature Christmas tree lights that are manufactured after the effective date of this standard must meet its requirements if the product is manufactured for sale, offered for sale, or distributed in commerce within the United States or if the product is imported into the United States.

The Commission is interested in implementing the standard in the shortest period of time consistent with the need to protect the public that will not create major market disruptions. Since many of the provisions in the proposed standard are currently being met by manufacturers, the Commission believes that the proposed effective date is consistent with the need to protect the public. In proposing this effective date, the Commission has taken into consideration the nature of the overseas production cycle for this product, since most of the light strings are manufactured abroad. Information presently available to the Commission indicates that the foreign manufacturing cycle, including raw material or component part acquisition, begins as early as fifteen to eighteen months before a given Christmas for some firms.

Assembly of the product for many firms may continue until seven or eight months before Christmas. The Commission believes that the December 1, 1979 effective date is reasonable and necessary to allow all manufacturers to comply with the standard with a minimum amount of disruption to their production cycles and manufacturing practices; products to be sold in the 1979 Christmas season would have been imported by the December 1, 1979 effective date. In addition, the Commission believes that the effective date is reasonable since presently available information indicates that most manufacturers would be able to make any necessary changes in their production process within the period between the anticipated publication of the final standard (March 15, 1979) and the proposed effective date, December 1, 1979. Also, since the foreign manufacturing cycle for the 1980 season would not begin before June 1979 for most firms, the anticipated publication of the final standard should provide most manufacturers with sufficient time to acquire raw materials and component parts for the 1980 Christmas season. If additional data show that it is in the public interest to extend or shorten the proposed effective date, the effective date could be changed. The Commission encourages the submission of data and arguments concerning the most appropriate effective date.

H. CERTIFICATION AND LABELING

Manufacturers and private labelers of miniature Christmas tree lights will be required to comply with the certification provisions of section 14(a)(1) of the act (15 U.S.C. 2063(a)(1) after the effective date of the miniature Christmas tree light safety standard. Section 14(a)(1) requires manufacturers (and private labelers, if the product bears a private label) to issue a certificate which states that the product conforms to all applicable consumer product safety standard and specifies any applicable standard. The certificate shall be based on a test of each product or upon a reasonable testing program and must state the name of the manufacturer or private label issuing the certificate and include the date and place of manufacture. Section 14(b) provides that, at the option of the person required to certify the product, testing may be conducted by an independent third party qualified to perform such tests or testing programs.

In addition, section 14 (b) and (c) of the act allows, but does not required, the Commission to issue regulations which would (1) prescribe a reasonable testing program, (2) specify which manufacturer shall issue the certificate when a product has more than one "manufacturer," and (3) require labeling of products subject to the safety standards. (Manufacturers of products subject a consumer product safety standard are required to issue a certificate under section 14(a)(1) based on a test of each product or on a reasonable testing program, even if the Commission has not issued regulation section 14 (b) and (c). Specific certification and labeling requirements of the type authorized by section 14 (b) and (c) of the Consumer Product Safety Act are not included in the proposed standard, but the Commission anticipates that they will be developed in the near future. The rule on certification and labeling will be separately proposed for public comment in accordance, with the requirements of the Administrative Procedure Act (5 U.S.C. 553). However, the Commission anticipates at this time that the proposed standard will not be issued in final form until the certification rule is also issued.

MAY 3 1978 UMI

V 43 | 86 MY 3 78 UMI

Until such time as the Commission proposes a rule on certification, the following is offered as an indication of how the Commission staff believes that the Commission's certification rule should be structured. Interested persons may wish to use this as guidance for the development and conduct of a reasonable testing program and as guidance in commenting on the provisions of the standard itself.

The proposed standard includes many requirements and tests for components at subpart B. The Commission recognizes the impracticability of testing each item of an assembled product against each requirement of the standard. Therefore, the Commission offers the following guidance. The Commission believes that using certain known available materials of given specifications might provide a high degree of assurance that many of the components will meet the general requirements of the standard and will pass the performance tests in subpart B. Examples of such components are wire, fuses, plugs, and connectors. The following performance tests at subpart B of the standard address wire components: 1208.13-22. Plugs and connectors are covered by the following tests: 1208.30-36. Consequently, a manufacturer of a miniature Christmas tree light string should be able to be assured that the light string will meet many of the requirements of the standard, including many of the performance tests in subpart B of the standard, if appropriate component materials are purchased. The Commission believes that certification for miniature Christmas tree lights could in part be based on certification of components by component suppliers. The component supplier would certify the components as meeting the applicable requirements of the standard after an inspection or test of each component or by performance of a reasonable testing program.

The person issuing the certificate of performance for the assembled strings would rely on testing and inspection records from the component supplier as one of the basis for certification that the assembled string meets those requirements of the standard applicable to the certified components.

For some requirements of the standard manufacturers may not have any reasonable assurance that the requirements can be met by design or material choice. Instead, the ability to meet these requirements depends on the quality of workmanship or assembly practices. For these requirements the Commission believes that it will be necessary for the manufacturer to actually test the completed product. This may be necessary in order to ensure compliance with the requirements of the standard applicable to lampholders. As a result of the impracticability of testing each product, conformance to the standard may be demonstrated by the use of a lot acceptance sampling plan, where a lot to be inspected or tested is a quantity of production items manufactured during some specified time interval. The quantity of production in the lot or the interval of time of production used to define the lot is left as a choice of the manufacturer, or of the party responsible for issuing the certificate. For example, the manufacturer might choose to inspect or test each day's production of a given model, or each week's; or each month's. As guidance to the manufacturer, if experience has demonstrated that the production items are not highly variable so that requirements can be met with ease, then defining a lot in terms of a large quantity of production is justified and will minimize testing costs. If the production items are variable and, at times may not conform to the requirements, then smaller lot sizes are desirable. By identifying products by lot, on the box, manufacturers may be able to ensure that the Commission will not be forced to take action against a larger quantity of product to protect the consumer against a hazard associated with a particular lot.

The Commission staff is now drafting a proposed certification rule including a reasonable testing program. Although several months may be required before this certification rule could be published as a proposal, the Commission recognizes that the content of the Commission's certification rule and the final form of the standard are interrelated. The Commission does not intend to issue a final standard before the certification rule is issued, so that the effects of the certification rule and the standard on each other can be considered.

Although the Commission does not intend to issue a certification regulation as part of the standard that is being proposed in this notice, the Commission believes that it would be helpful to solicit comments on issues related to this subject so that these comments can be considered in drafting a proposed certification regulation. The following questions are among those that will be considered in the process of issuing a certification regulation.

1. Who should be required to certify? To what extent should component manufacturers be required to certify their components? To what extent should manufacturers be allowed to rely upon the certification of component manufacturers?

2. Concerning the requirement for a "reasonable" testing program:

(a) Should the Commission specify a reasonable testing program? Should compliance with the program be mandatory on those who are required to issue certificates of compliance? Or should the program be issued as a guideline?

(b) If the Commission does issue a document on reasonable testing, would it be sufficient to specify the levels of quality to be maintained and verified by a reasonable testing program? Or,

(c) Should the Commission prescribe the specific steps required for sampling and testing?

3. What would be the most appropriate and effective testing programs? Is design qualification testing sufficient to demonstrate compliance to the standard? Should production testing by means of inspection and testing of samples from production be a part of a reasonable testing program?

4. Should manufacturers be required to retain the samples that are tested? If so, for how long?

5. What records should be kept of the manufacturer's testing programs, the tests performed, and the test results? How long should such records be maintained?

6. What are the expected cost or other economic effects of practices or procedures manufacturers are likely to demonstrate compliance to testing and certification requirements?

In addressing these questions, commentors should keep in mind the nature of the miniature Chirstmas tree light industry and the cost and effects of any contemplated testing program.

Comments that solely concern certification issues will not be addressed in the preamble to any final consumer product safety standard for miniature Christmas tree lights that may be issued by the Commission. Rather, these comments will be considered by the Commission prior to proposing a certification regulation. The substantive comments that are received on that proposal will be addressed in the preamble to the final certification regulation when it is issued.

I. Extension of Time To Publish Final Rule

Section 9(a)(2) of the CPSA (15 U.S.C. 2058(a)(2)) requires the Commission to publish a notice of proposed rulemaking in the Federal Register and to provide interested persons with an opportunity to participate in the rulemaking through submission of written data, views, or agruments. In addition to these written comments, interested persons must also be given an opportunity for the oral presentation of data, views, or arguments.

Section 9(a)(1) of the CPSA provides that within 60 days after publication of a proposed rule, the Commission shall promulgate a final rule or withdraw the proposal. The Commission may extend the 60-day period for good cause and must publish its reasons for extension in the Federal Register.

The process of issuing a consumer product safety rule or withdrawing the applicable notice of proceeding requires the Commission to consider the substantive comments that are received on the proposal, decide if any changes to the proposed rule are required, make the findings required by section 9 of the act, and prepare an appropriate Federal Register notice. In the case of the proposed standard for miniature Christmas tree lights the Commission intends to issue a certification rule under section 14(b) of the act along with a final standard. The certification rule must also be proposed for public comment, and the public comments must be considered, before the certification rule can be issued in final form. As a result of these factors the Commission does not believe that a final standard can be issued until March 15, 1979. Accordingly, the Commission hereby extends until March 15, 1979, the date on which it must either publish a consumer product safety rule addressing the risk of injury from fire and shock associated with minature Christmas tree lights or withdraw by rule the applicable notice of proceeding. This period may be further extended for good cause shown.

Conclusion and Proposal

Having considered NCL's recommended safety standard for miniature Christmas tree lights and the supporting material submitted therewith, together with other relevant information, the Commission concludes that the recommended standard, changed as described above should be proposed as a consumer product safety standard.

Accordingly, pursuant to provisions of the Consumer Product Safety Act (7(f), 27(e), Pub. L. 92-573, 86 Stat. 1215, 1227, 15 U.S.C. 2056(f), 2076(e)), the Commission proposes that title 16, chapter II of the Code of Federal Regulations be amended by adding to subchapter B a new part 1208, as follows:

PART 1208—STANDARD FOR MINIATURE CHRISTMAS TREE LIGHTS AND SIMILAR MINIATURE DECORATIVE LIGHTS

Subpart A—General Requirements of the Standard

Sec.
1208.1 Purpose, scope, and application.
1208.2 Effective date.
1208.3 Definitions.
1208.4 Abbreviations.
1208.5 Materials.
1208.6 Wiring and assembly requirements.
1208.7 Component requirements.
1208.8 Overcurrent protection.
1208.9 Lamps and lampholders.
1208.10 Packaging and labeling.

Subpart B—Tests Required by the Standard

1208.13 Wire insulation resistance test.
1208.14 Wire insulation elongation and tensile strength tests.
1208.15 Heat-shock test for wire insulation.
1208.16 Deformation test for wire insulation.
1208.17 Cold-bend test for wire insulation.
1208.18 Weathering test for wire insulation.
1208.19 Dielectric tests for wire insulation.
1208.20 Abrasion test for wire insulation.
1208.21 Flammability test for wire insulation.
1208.22 Flexing test for wire.
1208.23 Strain relief test for lampholders, fuseholders, and other bodies except plugs and connectors.
1208.24 Secureness of lampholder contacts test.
1208.25 Dielectric test for lampholder and lamp assembly.
1208.26 Crush test for lampholders and fuseholders (other than types which are incorporated in plugs and connectors).
1208.27 Flammability tests for class Z applications (except wire).
1208.28 Short circuit simulation test.
1208.29 Cascade failure simulation test.
1208.30 Temperature test for plugs, connectors, and fuseholders.
1208.31 Receptacle insertion-withdrawal tests.
1208.32 Plug and connector blade pull test.
1208.33 Plug and connector blade push test.
1208.34 Crush test for plugs and connectors.
1208.35 Strain relief test for plug and connector connections.
1208.36 Security of insulation test at plugs and connectors.
1208.37 Decorative part downward burning rate test.
1208.38 Heating test for lamps and lampholders.
1208.39 Millivolts drop test for lampholders.
1208.40 Maximum wattage test for lamps.
1208.41 Conductive tensel test.

Subpart C—Recommendations

1208.50 General materials.
1208.51 Conductive materials.
1208.52 Plugs and connectors.
1208.53 Recommended labeling.

Authority: Sec. 2, 3, 7, 9, 14, 19, 27(e), Pub. L. 92-573, 86 Stat. 1207, 1208, 1212-17, 1220, 1224, 1227 (15 U.S.C. 2051, 2052, 2056, 2058, 2063, 2068, 2076(e).)

Subpart A—General Requirements of the Standard

§ 1208.1 Purpose, scope, and application

(a) *Purpose.* The purpose of this subpart A and subpart B, which together comprise the safety standard for miniature Christmas tree lights and other similar miniature decorative lights, is to set forth requirements to address the hazards of electric shock and fire, which are associated with the use of miniature Christmas tree lights and similar miniature decorative lights, and which may cause injury or death.

(b) *Scope and application.* (1) This part 1208 applies to all miniature Christmas tree lights as defined in § 1208.3(i) that are produced or distributed for sale to or for the personal use, consumption, or enjoyment of consumers in or around a permanent or temporary household or residence, a school, in recreation or otherwise. This part does not apply to miniature Christmas tree lights that are not customarily produced or distributed for sale to, use or consumption by, or enjoyment of a consumer.

(2) Miniature Christmas tree lights manufactured after the effective date of this standard must meet the requirements of this standard if the miniature Christmas tree light is manufactured for sale, offered for sale, or distributed in commerce within the United States of if the miniature Christree tree light is imported into the United States.

(3) For enforcement purposes the requirements of this part 1208 are based on the U.S. customary units for measurement, that are given in the part. However, for convenience, the metric (SI) equivalents are also given.

§ 1208.2 Effective date.

This part 1208 becomes effective as to products manufactured after December 1, 1979.

§ 1208.3 Definitions.

For purposes of this part:

(a) "Add-On connector" means a combination attachment plug and receptacle device that may be attached to the electrical conductors of an appliance (including a miniature Christmas tree light), designed to accept the electrical attachment plug(s) of other appliances (including a miniature Christmas tree light), without adding additional current to the wires of the appliance of which it is a part. An add-on connector is also known as a "current tap".

(b) "Attachment plug" means a device attached to electrical conductors of an appliance (including a miniature Christmas tree light), which, by insertion into a receptacle, establishes electrical connection between the appliance and the receptacle conductors. See also the definition of add-on connector.

(c) "Connector" means a receptacle device that may be a part of an appliance (including a miniature Christmas tree light) and is used for the connection of an attachment plug. It may be integral with the plug, in which case it is an add-on connector; or it may be a pendant on the wires, in which case it is an end connector.

(d) "Decorative part" means any attachment to a string that is not a part relied upon for enclosing or supporting electrically live parts.

(e) "End connector" means a receptacle device that is a pendant on the wires and may be used on an appliance including a miniature Christmas tree light) for the connection of an attachment plug. Also known as a "cord connector body."

(f) "Lamp base" means the part of an electric light bulb that supports the bulb envelope and separates the elec-

V 4 3 | 8 6

trical contacts that mate with a lampholder. The lamp base may or may not be a permanent part of the bulb envelope.

(g) "Lampholder" means a socket for the insertion of an electric light bulb. A lampholder is attached to the wires of a string.

(h) "Lay" means the distance between the points in which the wire or wire conductor strands complete one cycle of twist.

(i) "Miniature Christmas tree light or similar miniature decorative light" means a lighting unit intended for use with Christmas trees or other decorative applications, which: (1) has lamps or lampholders electrically connected by wires in series or in combinations of series paths, (2) is equipped with or intended to be used with lamps that dissipate 4 watts of power or less per lamp when the product is connected to a 120 volt rms source, and (3) is intended to be supplied electric power from a nominal 120 volt receptacle. Strings of lamps or lampholders which are sold as part of rigid decorations, such as wreaths or frames, are included with—this definition. In addition, a lighting unit meeting these requirements would be within the definition even it contains additional electrical elements other than lamps, such as switches, or an additional lamp or lamps with dissipate more than 4 watts of power.

(j) "Overcurrent Protective Device" means a component such as a fuse or circuit protector that opens a circuit when the current becomes excessive.

(k) "Parallel Cord" means distinct wire conductors, with insulation between conductors, formed together in a single un-twisted cable.

(l) "Plug" See the definition of Attachment Plug.

(m) "Pole" means each of two parts of an electrical circuit at which opposite electrical forces are manifested.

(n) "Receptacle" means a contact device for connection of an attachment plug.

(o) "Series Circuit" means the connection of two or more lamps or lampholders in sequence in which one lamp or lampholder is electrically joined to the next such that all the circuit current will flow through each lamp and return to the source, and removal of any lamp would open the circuit and interrupt the current.

(p) "Shunt" means a device within a lamp which is intended to become operative upon failure of the filament. It provides a secondary current path and allows the string to continue to operate.

(q) "Socket"—See the definition of Lampholder.

(r) "String" means lampholders interconnected with wires terminating in an attachment plug or an add-on connector. The string may include other electrical components and/or decorative parts.

(s) "Wire" means a flexible, insulated electrical conductor.

(t) The definitions in Section 3 of the Consumer Product Safety Act (15 U.S.C. 2052) apply to this Part 1208.

§ 1208.4 Abbreviations.

The following is a list of some abbreviations used in this part.

AWG=American Wire Gauge
°C=Degree Celsius
°F=Degree Fahrenheit
ft=Foot
in=Inch
lbf=Pound Force
m=Meter
mm=Millimeter
N=Newton
rms=Root Mean Square

§1208.5 Materials.

(a) *Electrically Insulating Materials.* This subsection provides requirements for insulating materials. Other requirements for these materials are found in §§ 1208.7 and 1208.9. In this subsection, insulating materials are divided into three categories related to the functions of the insulating materials. The following is a description of the three categories and requirements for insulating materials which comprise each category.

(1) Class X—Class X materials do not directly contact, enclose, or support electrically live parts. Class X materials are used as shades, diffusers, reflectors, simulated needles and leaves, and supporting or decorative frames. Materials used for Class X purposes shall pass the Decorative Part Downward Burning Rate Test (1208.37), the Cascade Failure Simulation Test (1208.29), and the Short Circuit Simulation Test (1208.28) of Subpart B of this part.

(2) Class Y—Class Y materials contact or are relied upon to enclose or support electrically live parts whose steady current flow under normal operating conditions is limited by an overcurrent protective device rated at no more than 300 milliamperes. Class Y materials may include materials used as lamp bases, lampholders and certain shades and diffusers that are integrally molded as part of the lamp bases. Materials used for Class Y purposes shall pass the Decorative Part Downward Burning Rate Test (1208.37), the Cascade Failure Simulation Test (1208.29), the Short Circuit simulation Test (1208.28) and the Heating Test for Lamps and Lampholders (1208.38) of Subpart B of this part.

(3) Class Z—Class Z materials contact or are relied upon to enclose or support electrically live parts whose steady current flow under normal operating conditions is either not limited by an overcurrent protective device or is limited by an overcurrent protective device rated at more than 300 milliamperes. In addition, Class Z covers all materials, regardless of overcurrent protection, when used as insulation for wire, plugs, fuseholders and connectors. It also covers materials used for lampholders, lamp bases and other assemblies that are not Class X or Class Y applications. Materials used for Class Z purposes shall pass the appropriate component flammability tests (1208.21; 1208.27), the Cascade Failure Simulation Test, (1208.29) the Short Circuit Simulation Test (1208.28) and the Heating Test for Lamps and Lampholders (1208.38) of Subpart B of this part.

(b) *Conductive Materials.* (1) Electrically live parts, except for lamps, wire, and screwshell holders for lamps, fuses and other parts, shall be copper or an alloy that contains at least 60 percent copper by weight. For screwshell holders for lamps, fuses, and other parts, the materials shall be copper or an alloy that contains at least 80 percent copper by weight.

(2) Metallized tinsel and other conductive flexible strips and threads, 0.25 in (6.3 mm) and longer, and located within 1 in (25.4 mm) of a lampholder, fuseholder, plug or connector, shall pass the Conductive Tinsel Test of Subpart B (1208.41).

§ 1208.6 Wiring and assembly requirements.

(a) Wire conductors shall terminate in permanent electrical connections; that is, wire conductors shall not be used to routinely make and break electrical circuits. For lampholders with lamps removable by consumers, this means that wire conductors shall terminate at stationary plates, bars, or other connectors within lampholders which serve as the electrical contacts for making and breaking the electrical circuit whem lamps are inserted and removed from lampholders.

(b) The wire connecting two components shall be continuous and free of splices or taps.

(c) Wire within components shall be secured so that the conductor is not exposed and will not become exposed when tension is applied to the wire as described in the performance tests for components: Strain Relief Test for Plug and Connector Connections (1208.35), and Strain Relief Test for Lampholders, Fuseholders, and Other Bodies Except Plugs and Connectors (1208.23) of Subpart B of this part.

(d) The maximum non-transient current flow shall not exceed the value indicated in Table A for the corresponding wire size.

TABLE A.—*Wire current ratings*

Wire size, in American Wire Gauge (AWG):						
18	19	20	21	22	23	24
Current, in amperes:						
7	5	3	2.5	1.5	1.3	1.0

M Y 3 7 8 UMI

(e) A string having any wire conductors of cross-sectional area less than No. 20 AWG shall be provided with overcurrent protection so that there are two protective devices, one for each pole, located in the circuit between the attachment plug or add-on connector and the points where the conductor becomes smaller in size than No. 20 AWG. The rating of the devices shall not exceed 3 amperes. See also § 1208.8 for additional overcurrent protection requirements.

(f) Each miniature Christmas tree light set shall have an attachment plug or an add-on connector for connection to the power supply source.

(g) Wire that is not parallel cord, and has a conductor cross-sectional area less than that of No. 20 AWG wire, shall have two or more wires twisted together longitudinally except between components, such as lampholders, mounted on a frame. The maximum length of the lay of the longitudinally twisted wires shall be not more than 10 times the sum of the outside diameters of the wires which are twisted together.

(h) Except where otherwise specified, uninsulated live parts of opposite polarity shall be separated as specified herein. Also uninsulated live parts shall be separated from dead metal parts which are likely to be exposed to contact by persons as specified herein. The parts shall be separated by a space through air, and over surface of not less than 0.047 inch (1.19 mm). For purposes of this measurement, an unexposed dead metal part interposed between live parts of opposite polarity or between a live part and exposed dead metal is considered to reduce the spacing by an amount equal to the dimension of the unexposed metal part in the direction of the measurement.

(i) All electrically live parts (except for live parts of plug blades for power supply connection) shall be insulated or otherwise enclosed so that they cannot be contacted by the probe in figure 1.

§ 1208.7 Component Requirements.

This section sets forth the design and performance requirements for components of miniature Christmas tree lights.

(a) *Wire.* Wire shall conform to the specifications in table B.

(1) Wire conductors shall consist of individual copper conductor strands. The wire conductor shall meet the maximum breaking strength requirements as indicated in table B.

(2) The cross-sectional area of wire conductor shall not be less than 391 circular mils (0.198 square mm) and shall be one of the AWG numbers in table B. The allowable area tolerance is minus 3 percent. If the minus tolerance is exceeded, the wire will be considered to be the next higher AWG number. The AWG number signifies the total circular mil area, which is the sum of the circular mil areas of the individual conductor strands.

(3) Wire insulation shall be composed of polyvinyl chloride or a copolymer of vinyl chloride and vinyl acetate, with a minimum average insulation thickness and a minimum insulation thickness at any point of the wire, as indicated in table B.

(4) The distance between distinct conductors of parallel cord shall be at least 1.5 times the required minimum average thickness for the insulation given in table B.

(5) The thickness of insulation for conductors of a parallel cord shall be a minimum of 0.013 in. (0.33 mm) after the distinct conductors have been intentionally torn apart in either direction to separate the conductors.

TABLE B.—*Wire specifications*

AWG size of conductor	Cross sectional area		Maximum breaking strength (a)		Minimum average insulation thickness (b)		Minimum insulation thickness at any point	
	Circular mils	Square millimeters	Pound-force	N	Inches	Millimeters	Inches	Millimeters
18	1,620	0.823	49.1	218.0	0.023	0.58	0.021	0.53
19	1,290	.653	39.0	174.0	.023	.58	.021	.53
20	1,020	.518	31.0	138.0	.023	.58	.021	.53
21	812	.410	24.6	109.0	.023	.58	.021	.53
22	640	.326	19.4	86.3	.020	.51	.018	.46
23	511	.258	15.4	68.5	.020	.51	.018	.46
24	404	.205	12.7	56.5	.020	.51	.018	.46

(a) Based on a maximum pull rate of 12 in (305 mm) per minute with the conductor insulation removed.
(b) Average insulation thickness is the average of maximum and minimum thickness measured at each of five separate locations along the wire.

(6) Wire shall pass each of the following tests in table C:

TABLE C.—*Tests for wire*

Test	Paragraph
Insulation resistance	1208.13
Elongation and tensile strength	1208.14
Heat-shock	1208.15
Deformation	1208.16
Cold-bend	1208.17
Weathering	1208.18
Dielectric	1208.19
Abrasion	1208.20
Flammability	1208.21
Flexing	1208.22

(b) *Plugs and connectors.* (1) Attachment plugs and add-on connectors shall have their blades located parallel to one another spaced 0.500±0.005 inch (12.7±0.13 mm) on centers, and extending out from the face of the plug or connector at least 0.625 inch (15.88 mm) and no more than 0.718 inch (18.24 mm). The blade width shall be 0.250±0.010 inch (6.35±0.25 mm). Except as required in 1208.7(b)(2), the thickness of a blade shall be 0.060±0.005 inch (1.524±0.127 mm).

(2) Plugs and connectors with folded blades shall meet these additional requirements. Except for that portion of a blade within 0.25 inch (6.25 mm) of the face, the thickness of the blade shall be 0.060±0.005 inch (1.524±0.127 mm). Within 0.25 inch (6.35 mm) of the face the thickness of the blade shall not be greater than 0.065 inch (1.65 mm). In an attachment plug or add-on connector having spring-blades, in which only one end of each folded-over blades is secured, the metal stock shall be 0.028-0.032 inch (0.711-0.013mm) thick. In an attachment plug or an add-on connector having spring type folded-over blades in which both ends of each blade are se-

V 43 — 86 MAY 3 78 UMI

cured, the thickness of the metal stock shall not be less than 0.020 inch (0.508 mm).

(3) The face of attachment plugs and add-on connectors in which the blades project shall be in a plane perpendicular to the major axis of the blades. The face shall be a minimum of 0.50 inch (12.7 mm) by 0.875 inch (22.2 mm), with the blades centered and with a maximum radius of 0.22 inch (5.56 mm) at the corners. The 0.875 inch (22.2 mm) minimum dimension shall be perpendicular to the width of the blades. The blades shall be located in the middle of the face with maximum off-center distance of 0.0625 inch (1.59 mm) in any direction.

(4) The parallel slots in the receptacle faces of add-on connectors and end connectors shall be spaced 0.500±0.005 inch (12.70±0.13 mm) on centers. Slots shall be a minimum of 0.075 inch (1.90 mm), a maximum of 0.095 inch (2.41 mm) in width, and a minimum of 0.265 inch (6.73 mm) and a maximum of 0.285 inch (7.24 mm) in length. The distance across a receptacle face (for example, the diameter of a round face, or distance between opposite sides of a hexagonal face) of an add-on connector and an end connector shall be a minimum of 0.875 inch (22.22 mm). The receptacle slots shall be located in the middle of the face with a maximum off-center distance of 0.0625 inch (1.59 mm) in any direction.

(5) With the exception of phenolic or urea polymeric materials, electrically insulating materials shall be flame retardant as determined by the Flammability Tests for Class Z Applications of subpart B (1208.27). Pliable, molded, natural, or synthetic rubber, a combination thereof, the polymeric materials noted above, a polymer of vinyl chloride or a copolymer of vinyl chloride and vinyl acetate, shall be used for the insulating body of attachment plugs and connectors.

(6) Plugs and connectors shall be capable of withstanding a compressive load of 75 lbf (333.7 N) applied at right angles to the major axis of the plug blades or connector receptable cavities, as described in the Crush Test for Plugs and Connectors of subpart B (1208.34).

(7) Strings shall be capable of withstanding a pull on the wires leading to a plug or connector without detachment of the wire, exposure of live parts so that they can be contacted by the probe in figure 1, or cutting through wire insulation, as indicated by the Strain Relief Test for Plug and Connector Connections of subpart B (1208.35).

(8) Insulation on wires to plugs and connectors shall be prevented from slipping away from the plug or connector and exposing bare wire as determined by the Security of Insulation Test at Plugs and Connectors of subpart B (1208.36).

(9) Plug or add-on connectors shall enclose electrically energized parts, preventing them from being contacted by the probe depicted by figure 1 when sujected to blade push forces of the Plug and Connector Blade Push Test of subpart B (1208.33).

(10) Each blade of a plug or add-on connector, and the parallel blades tested together, shall be capable of withstanding a tensile force as determined by the Plug and Connector Blade Pull Test of subpart B (1208.32).

(11) Live parts within receptacle openings of add-on and end connectors shall not be capable of being contacted by the probe shown in figure 1.

(12) All wire terminations and other live parts of plugs and connectors shall be completely enclosed, except for receptacle openings on add-on and end connectors and blades projecting from plugs and add-on connectors. There shall be no dependence upon the use of separable covers or discs and parts which perform no function other than to provide strain relief. For purposes of this requirement separable covers and discs are those held in place by only friction without any positive detents, latches, screws, or fasteners.

(13) Receptacles shall enable a mating attachment plug or add-on connector to seat properly without exposing the blades between the plane of the face in which the blades project and the plane of the rim of the receptacle face as determined by the Receptacle Insertion-Withdrawal Tests in subpart B (1208.31).

(14) Plugs and connectors shall not have a temperature rise that exceeds 54° F (30° C), measured as described in the Temperature Test for Plugs, Connectors and Fuseholders of subpart B (1208.30).

(15) Plugs and connectors shall be capable of passing each of the following tests in table D:

TABLE D.—*Plug and connector tests*

Test	Paragraph
Plug and connector blade pull test	1208.32
Plug and connector blade push test	1208.33
Receptacle insertion-withdrawal test	1208.31
Strain relief test for plug and connector connections	1208.35
Security of insulation test at plugs and connectors	1208.36
Crush test for plugs and connectors	1208.34
Temperature test for plugs, connectors, and fuseholders	1208.30
Flammability tests for class Z applications (except wire)	1208.27

§ 1208.8 Overcurrent protection.

(a) In addition to the overcurrent protection requirement in § 1208.6(e), lamps shall be protected by overcurrent protective devices that prevent ignition under short circuit conditions with one or more lamps in the shorted circuit as determined by the Short Circuit Simulation Test of subpart B (1208.28). The shorted circuit may be between electrically live parts of opposite polarity or between electrically live parts and ground. In figure 2, overcurrent protective device pair A, A′ serves the entire string; overcurrent protective device pair B, B′ serves the group of lamp series circuits; and each overcurrent protective device pair C, C′ serves an individual lamp series circuit.

(b) Overcurrent protective devices shall be rated at ½ of the current that causes the protective device to open within 2 minutes when operated at room temperature.

(c) If replaceable fuses are used there shall be no electrically live parts of the fuse or holder that can be contacted by the probe in figure 1 during removal and replacement of the fuse.

(d) Insulation materials used for enclosures or holders of overcurrent protection devices must comply with the requirements for class Z materials at § 1208.5(a)3.

(e) Holders for replaceable fuses shall not accommodate the bases of non-fuse lamps used in the string.

(f) If fuses of the string are replaceable, at least one spare fuse, of the original fuse type, shall be provided with the product.

(g) Overcurrent protective devices are subject to the following tests in table E:

TABLE E.—*Tests for overcurrent protection device holders*

Test	Paragraph
Temperature test for plugs, connectors, and fuseholders	1208.30
Flammability test for class Z applications (except wire)	1208.27
Strain relief test for lampholders, fuseholders, and other bodies (except plugs and connectors)	1208.23
Crush test for lampholders and fuseholders (other than types which are incorporated in plugs and connectors)	1208.26

§ 1208.9 Lamps and Lampholders.

(a) Lampholders shall provide a spacing of not less than 0.030 inch (0.76 mm) through air and over surfaces between electrically live parts and dead metal parts. Electrically live parts of a lampholder shall be recessed at least 0.20 inch (5.08mm) from the lamp entry end of the lampholder.

(b) Lampholders shall have no conductive parts, live and dead (nonenergized), that can be contacted by the probe shown in Figure 1, before, during, or after the insertion of a lamp for which the lampholder is intended with the lamp and lamp contacts in any position permitted by the design.

(c) Lampholders and lamps shall withstand a dielectric breakdown between the electrically live parts and the outer surfaces of the assembly in accordance with the Dielectric Test for Lampholder and Lamp Assembly of Subpart B (1208.25).

(d) Lampholders, without lamps, shall not crack or expose electrically live parts when subjected to crush forces in accordance with the Crush Test for Lampholders and Fuseholders (Other Than Types Which Are Incorporated in Plugs and Connectors) of Subpart B (1208.26).

(e) Lampholders contacts shall be affixed within the lampholders in a way that will not permit displacement in accordance with the Secureness of Lampholder Contacts Test of Subpart B (1208.24).

(f) Wires within the lampholder shall be affixed so that when forces are exerted on the wires, there will be no exposure of electrically energized parts as specified by the Strain Relief Test for Lampholders, Fuseholders and Other Bodies Except Plugs and Connectors of Subpart B (1208.23).

(g) Miniature Christmas tree lights and decorations shall have lamps with only one operating voltage, unless the lamps are fuse lamps.

(h) Lamps that have shunts shall not be used in series circuits having fewer than 10 lamps or lampholders.

(i) Miniature Christmas tree lights and decorations shall have insulating materials, in accordance with § 1208.5(a). All materials are subject to the Decorative Part Downward Burning Rate Test of Subpart B (1208.37).

(j) The insulating body of a lamp and lampholder shall withstand thermal conditioning at a temperature no lower than 248° F (120° C) for no less than 2 hours with no softening or melting of the material that exposes electrically live parts in accordance with the Heating Test for Lamps and Lampholders of Subpart B (1208.38).

(k) The millivolts drop between the terminals of a lampholder shall not exceed 200 millivolts in accordance with the Millivolts Drop Test for Lampholders of Subpart B (1208.39).

(l) A lamp shall not be able to dissipate a wattage equal to 2.5 times the area of the outside glass bulb surface above the base in square centimeters or 1.25 times the minimum diameter of the lamp (the outside surface of the bulb) in the location of the filament in millimeters, whichever value is less, for more than 2 minutes in accordance with the Maximum Wattage Test for Lamps of Subpart B (1208.40).

(m) Lamps and lampholders shall be capable of passing each of the following tests in Table F:

TABLE F.—*Lamps and lampholders tests*

Test	Paragraph
Cascade failure simulation test	1208.29
Short circuit simulation test	1208.28
Heating test for lamps and lampholders	1208.38
Millivolts drop test for lampholders	1208.39
Strain relief test for lampholders, fuseholders and other bodies except plugs and connectors	1208.23
Secureness of lampholder contacts test	1208.24
Crush test for lampholders and fuseholders (other than types which are incorporated in plugs and connectors)	1208.26
Dielectric test for lampholder and lamp assembly	1208.25
Maximum wattage test for lamps	1208.40
Flammability tests for class Z applications (except wire)	1208.27
Decorative part downward buring rate test	1208.37

§ 1208.10 Required Packaging and Labeling.

(a) *Scope.* Miniature Christmas tree lights and similar miniature decorative lights shall meet the packaging and labeling requirements of this section. All cautionary statements required by this section to appear on any package or tag, shall be prominent and shall be conspicuous and legible and in contrast by typography, layout, or color with other printed matter. CPSC regulations at 16 CFR 1500.121 provide type size, placement, and other requirements for cautionary labeling under the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261). Those regulations indicate how labeling can meet the requirements of the FHSA that labeling appear prominently and conspicuously on the label of a hazardous substance. The Commission suggests that the FHSA regulations at 16 CFR 1500.121 be used as guidelines as to whether labeling required in this standard is prominent, conspicuous and legible.

(b) *Labeling on Light String and Package.* Miniature Christmas tree lights shall have the following information on a label located between the plug and the first lampholder and permanently affixed to the light string: (16 CFR 1500.121(f) may be referred to for determining placement and conspicuousness for these statements).

(1) On one side of the permanently affixed label the following information must appear:

(i) The signal word "Caution or Warning";

(ii) The following statement of hazard: "To avoid fire or shock hazards";

(iii) The additional cautionary information

"Do not use on trees with metal or metallic needles, leaves or branch covering."

"Do not use staples or sharp-edge fasteners which can damage insulation."

"use only decorations over lamps if provided with light set."

(iv) Complete name and mailing address of the domestic manufacturer, domestic importer, distributor, or private brand seller;

(v) The manufacturers identification number (may be in code), indicating the style number or name, the lot number, and the year of manufacture;

(vi) The following statement or parts thereof, as applicable: "Use the following chart to safely replace bulbs and/or fuses:

Lamp: —— volts.
Fuse (when fuseholder can accommodate glass tube cartridge type fuse): —— amps, —— min. volts.
Fuse (when fuseholder designed to accommodate fuse other than glass tube cartridge type): replacement model number or equivalent.

(2) The labeling which is required by paragraph (b)(1) of this section shall also appear together prominently and conspicuously on the display panel of the package in which miniature Christmas tree lights and similar miniature decorative lights are displayed for sale to the public.

(c) *Labeling for Spare Bulb.* The following information shall appear on an envelope containing any spare bulb that is provided with the miniature Christmas tree light or similar miniature decorative light:

(1) The voltage of the bulbs;

(2) The manufacturer's identification number (may be in code).

Subpart B—Tests

NOTE.—Unless specified elsewhere in this subpart, tests are to be conducted at ambient air temperatures within the range 66°F (18.9°C) to 84°F (28.9°C) inclusive.

§ 1208.13 Wire Insulation Resistance.

The conductor length of the test specimen shall be a maximum of 5,000 ft (1,524 m). The test voltage shall be between 200 and 1,000 volts direct current inclusive. The measurement shall be made after 1 minute at the test voltage. Measured in room temperature tap water, when the specimen has been immersed for a minimum of six hours, the insulation resistance shall be at least 2.5 (1000)/L megohms, where L is the conductor length of the test specimen in feet, or 2.5 (304.8)/L megohms, where L is the length of the test specimen in meters.

§ 1208.14 Wire Insulation Elongation and Tensile Strength.

(a) For purposes of this test, a specimen consists of not less than a 6 inch (152 mm) length of complete tube formed by the insulation, except that in the case of parallel cords the specimen is the unseparated multiple tube. In order to prepare the specimen remove individual strands of the conductor from the insulation without damaging the insulation specimen.

(b) For purposes of this test, an aged sample is one which has been placed

V 43 | 86 MY 3 78 UMI

in a circulating-air oven, suspended vertically so that it does not touch the oven sides or other specimens, and maintained at an oven temperature not less than 212°F (100°C) for 168 hours.

(c) After aging some of the samples, remove them from the oven and keep them at a room temperature of 75.2±14.4°F (24.0±8.0° C) for at least 16 and not more than 96 hours. The unaged samples must be kept at this room temperature for at least 30 minutes.

(d) Use an apparatus that indicates the actual maximum load at which a specimen breaks. If an apparatus with a spring balance is used, be certain that recoil of the spring is prevented.

(e) Clamp each specimen in position with two gauge marks, 2 in (51 mm) apart, located outside of and between the grips. Adjust the movable grip to make the specimen taut, but not under tension. Then adjust the grip so that it moves at a speed of at least 20 inches (510 mm) per minute. In as must as the width of a mark increases when a specimen is stretched, make the measurement of elongation with reference to the center of each guage mark; that is, a point halfway between the edges of each mark. Allow the apparatus to separate the grips until the specimen breaks. Note the distance between the gauge marks at the time of the break. For an unaged specimen to pass the test, the elongation must be a minimum of 4 inches (102 mm) (200 per cent), and the minimum tensile strength of the wire insulation must be 1600 lbf/in (11.03 magepascals). For an aged specimen to pass the test, the minimum elongation of the wire insulation must be 50 percent of the result obtained with the unaged specimens, and the minimum acceptable tensile strength must be 85 percent of the result obtained with unaged specimens.

(f) For purposes of this test, elongation is the increase in distance between the guage marks, and tensile strength is the measured load which ruptures the specimen divided by the cross sectional area of the unaged specimen.

§ 1208.15 Heat-Shock Test for Wire Insulation.

(a) Each specimen of wire is to be wound tightly for six complete turns around a mandrel having a diameter of 0.094 in (2.4 mm). Successive turns are to be in contact with one another, and both ends of the specimen are to be securely held in place by friction tape.

(b) Each mandrel with wire attached shall be subjected to a temperature of not less than 250°F (121°C) in a circulation air-oven for one hour. The wire insulation shall be inspected for cracks while the wire is on the mandrel when it is removed from the oven. The wire insulation must not show any cracks on the surface as determined by the use of 0.002 inch (0.051 mm) guage. If the guage enters the plane of the surface when inserted into cracks located on the wire, the wire does not pass.

§ 1208.16 Deformation Test for Wire Insulation.

For purposes of test, the insulation thickness of an insulated conductor is the average diameter over the insulation minus the diameter of the conductor, with the difference divided by two. The average diameter is the average of maximum and minimum diameters measured at each of five separate locations along the wire. On a 1 inch (25.4 mm) or longer length of insulated conductor, measure the insulation thickness with a loading mechanism consisting of a dead-weight dial micrometer with a presser foot 0.375 inch (9.52 mm) in diameter that exerts a force of at least 0.1808 lbf (0.805 N) on the specimen. Following this, place the test specimen and the loading mechanism so that they are not in contact with each other in a circulating-air oven, maintained at a temperature not less than 250°F (121°C). After one hour, the micrometer is to be placed on the specimen with the force exerted by the micrometer plus additional force to equal a total of 0.552 lbf (2.46 N) for wire with conductors smaller in size than No. 20 AWG, and 0.882 lbf (3.93 N) for wire conductors No. 20 AWG and larger in size. After one hour at this force, and while in the oven, measure the insulation thickness. To pass the test the insulation thickness under the force must not be less than 50 percent of the initial measurement.

1208.17 Cold-Bend Test for Wire Insulation.

Subject a wire specimen and a 0.25 inch (6.35 mm) diameter mandrel to a temperature of −31°F (−34.9°C) for one hour. While maintaining the wire specimen and mandrel at that temperature, wind the wire tightly for six complete turns around the mandrel, at the rate of about 3 seconds per turn (18 ± 3 seconds for six turns). Successive turns are to touch one another. Maintain the wire tightly wrapped around the mandrel. To pass the test, wire insulation must show no cracks when inspected with the wire on the mandrel as determined by the use of a 0.002 inch (0.051 mm) guage. If the gauge enters the plane of the surface when inserted into cracks located on the wire, the wire does not pass.

§ 1208.18 Weathering Test for Wire Insulation.

(a) To pass this test, wire insulation that has been subjected to simulated outdoor weathering shall exhibit tensile strength and ultimate elongation not less than 80 percent of those of unweathered specimens. For this test, outdoor weathering shall be simulated by exposure of wire to a source of ultraviolet light and water spray in an artificial weathering apparatus as described in the following paragraph.

(b) The weathering test equipment shall be xenon are (water-cooled) Weather-Ometer employing a lamp rated at 6500 watts and automatic light monitoring and control systems. Borosilicate inner and outer filters shall be used. The wire specimens shall be mounted verticially on the inside of the specimen drum. The specimen drum is to rotate at one revolution per minute. The specimens shall be exposed to a radiant flux of 323 microwatts per square inch (50 microwatts per square centimeter or 12 calories per second per square centimeter) while monitoring at a wave length of 3400 angstroms (340 nanometers). A continous water spray cycle of 3 minutes on followed by 17 minutes off shall be used throughout the test. The temperature within the apparatus while in operation but with the spray off shall be 145.±9.0° F (63.0±5.0° C). The specimens are to be retained in the Weather-Ometer for a period of 1253 hours.

(c) After 1253 hours have elapsed, cool the samples to room temperature and then remove them from the apparatus. Remove the conductors from the insulation, and then test the insulation for tensile strength and elongation as directed in the test by that name.

§ 1208.19 Dielectric Tests for Wire Insulation.

(a) The insulation on wire must withstand without breakdown for a period of 1 minute the application of a 60 hertz sinusoidal potential of 1250 volts rms between the conductor and conductive foil tightly wrapped over the wire (except not wrapped over the ends of the wire).

(b) The insulation on the individual conductors which are joined together to form an integral multiconductor cords must withstand for one minute without breakdown between conductors the application of a 60 hertz sinusoidal potential of 1250 volts. The test potential is to be applied between each ciricuit conductor and every other circuit conductor. For each test, the applied potential is to be increased from zero at a uniform rate that is not less than 125 volts in 60 seconds, and is not more than 500 volts per second. The increase is to continue in this manner until the voltage reaches the level specified above. If this level is reached without breakdown, the voltage is to be held constant at the specified level for 60 seconds and is then to be reduced to zero at the rate mentioned above. If the wire insulation withstands these tests without breakdown, the wire insulation passes.

§ 1208.20 Abrasion Test for Wire Insulation.

(a) The insulation on wire must not wear through to expose the conductor in 400 or fewer cycles of the abrasion procedure described in the following paragraphs.

(b) Straight specimens of insulated wire are to be tested without any conditioning. One end of each specimen is to be attached to a reciprocating table or equivalent while the table is at one end of its travel. The other end of each specimen is to be attached so that there is a tensile force not less than 0.25 lbf (1.11 N). Each specimen is to be placed over a quarter cylinder to whose outer surface an unused sheet of medium grade emery cloth (½) is attached. The radius of the surface of the emery cloth is to be 3.5±0.25 inches (89±6 mm). The longitudinal axis of the quarter cylinder is to be perpendicular to each of the planes that contain the specimens as they move on, and are abraded by, the emery cloth. The table or equivalent is to be started in its reciprocating motion (simple harmonic motion) at the rate of between 20 and 30 cycles per minute inclusive, each cycle consisting of one complete back and forth motion with a stroke of not less than 6.25 inches (159 mm). The table is to be stopped every 50 cycles and the emery cloth is to be shifted slightly to one side so that in subsequent cycles each specimen is abraded by a fresh surface of the cloth. The wire is not acceptable in the size being tested if the strands are exposed anywhere on any of the specimens in 400 or fewer cycles of the abrasion.

§ 1208.21 Flammability Test for Wire Insulation.

(a) A length of wire is to be held taut in a horizontal position between two supports in a chamber approximately 24 inches (610 mm) long, approximately 12 inches (305 mm) wide, and approximately 12 inches (305 mm) high, open at the top and on one long side to permit an air flow of not greater than 30 ft (9.14 m) per minute. Dry absorbent surgical cotton is to be placed over the bottom of the test chamber, with no more than 9 inches (229 mm) between the cotton and the test specimen. The specimen is to be marked at distances of 2 inches (51 mm), 7 inches (178 mm), and 13 inches (330 mm) from one point of support of the wire. The flame from a Bunsen or Tirrill burner using methane gas is to be applied for 30 seconds to the sample at the 2 inch (51 mm) mark with the burner in a vertical position, and the tip of the blue inner flame applied to the underside of the wire. The barrel of the burner, having a bore of 0.375 inch (9.52 mm) and a length of approximately 4 inches (102 mm) above the primary air inlets, is to be adjusted to give a 2 inch (51 mm) flame with the blue inner cone equal to one third of the flame height. If the sample flames, the time of flaming is to be recorded as the time required for the flame to progress along the marked 6 inch (152 mm) section (between the 7 inch (178 mm) and 13 inch (330 mm) marks).

(b) If the sample does not flame, or if the flaming extinguishes before reaching the 13 inch (330 mm) mark, or if the finished wire shows a rate of flaming no greater than 1 inch (25.4 mm) per minute, and no flaming particles or drips falling from the sample ignite the cotton, the test is passed.

§ 1208.22 Flexing Test for Wire.

(a) Bend each specimen into the form of a flat-bottomed, square-cornered U with the legs of the U straight and of equal length. Tape the bottom of the U to the side of a movable round rod (A in Figure 3) with the axis of the conductor or conductors parallel to the longitudinal axis of the movable rod and the legs of the U extending perpendicular to the longitudinal axis of the movable rod between a pair of fixed round rods (B in Figure 3) that are 0.25 inch (6.35 mm) in diameter. Apply full force of 0.75 ounce force (0.209 N) to the free end of each leg. The longitulnal axes of the two fixed rods are to be equidistant from the movable rod before the flexing motion begins, and continually parallel to one another and to the longitundinal axis of the movable rod to which the speciments are taped. The distance between the two fixed rods is to result in the specimens being midway between the rods with a space from specimen to rod of not less than 0.0156 inch (0.397 mm), and not more than 0.0625 inch (1.59 mm).

(b) While passing the current that is indicated in Table A through the conductors, operate the movable rod in the pivoted motion (simple harmonic motion) depicted by the broken lines in Figure 3, at the rate of between 10 and 15 cycles per minute inclusive, each cycle consisting of one complete back and forth motion through an angle of 180 degrees centering about the points of flexure. After 6000 cycles stop the motion. Cut each specimen open and examine for broken strands at the points of flexure against the two fixed rods. The wire is acceptable in the size tested if half or fewer than half of the strands are broken in each leg of the specimens tested.

§ 1208.23 Strain relief test for lampholders, fuseholders and other bodies except plugs and connectors.

(a) The connection of wires to a body must be capable of withstanding a single pull of 8 lbf (35.6 N) applied to each of the wires individually, and to all possible combinations of the wires, in any direction. Each pull is to last for at least one minute. If a knot in the wires is provided outside the body, the pull is to be applied to each of the wires, with the knot between the point of application of the pull force and the body, without undoing the knot. Lampholders are to have lamps inserted and fuseholders are to have fuses inserted during the tests of those bodies.

(b) *Wire Pull—Method 1.* The body is to be secured in a manner that does not additionally support the wire connection, an example of which is shown in Figure 4.

(c) *Wire Pull—Method 2.* (1) The pull is to be applied between all combinations of any two wires to the body. The body shall not be secured for this test. See Figure 5.

(2) The results are considered acceptable if no live part becomes exposed as a result of a pull. Exposure means being contacted by the probe in Figure 1 before, during or after a pull on the conductor. In addition, a wire conductor is considered to be exposed before, during and after the pull if the end of the wire insulation does not enter the plane of the wire entry opening. Breakage of the wire conductor constitutes a failure, unless the break occurs at the jaws or attachment of the wire to a pulling device, in which case the results are to be discarded and another sample tested.

§ 1208.24 Secureness of lampholder contacts test.

(a) The reliability of the secureness of the contacts is to be determined in their as-received condition, following 7 hours of normal operation of the string in a position tending to cause the greatest heating of the lampholder, and then cooling to room temperature. The test force of 2 lbf (8.9 N) is to be applied for no less than 1 minute in a direction tending to force the contacts out of the lampholder after removing the lamp. The force is to be applied to each of the wires individually, and to all possible combinations of the wires exiting from the lampholder 0.125±0.031 inch (3.18±.79 mm) from their point of entry into the lampholder body.

(b) To pass the test, there must be no displacement of the contact in excess of 0.031 inch (0.79 mm) or which allows an electrically live part to be touched by the probe shown in Figure 1.

(c) Exception: If a knot in the wires is provided outside the body of the lampholder as a means of securing the contacts, preventing the attachment of the clamping device 0.125 inch (3.18 mm) from the lampholder body, the clamp is to be secured immediately adjacent to the knot on the side away from the lampholder.

V 43 | 86

§ 1208.25 Dielectric test for lampholder and lamp assembly.

(a) To pass this test, the assembly of a lampholder and lamp must withstand without breakdown, for a period of 1 minute, the application of a 60-hertz sinusoidal potential of 1,250 volts, with the voltage increased from zero at a rate not to exceed 500 volts per second, between the electrical conductors and metal foil placed over the assembly and arranged to conform to its shape. The wire leads to the lampholder may serve as the electrode for the electrical conductors within the assembly.

§ 1208.26 Crush test for lampholders and fuseholders (other than types which are incorporated in plugs and connectors).

(a) A complete lampholder without a lamp or fuseholder without a fuse, with wires attached, shall be tested.

(b) A lampholder or fuseholder is placed between two flat surfaces parallel to each other and parallel to the major axis of the holder. Apply 16 lbf (71.2 N) compressive force perpendicular to the major axis and to the plane of the flat surfaces against the holder. For lampholders and fuseholders with open ends for lamp or fuse insertion, the force is to be applied at the open end for 1 minute and distributed along the holder body from the edge of the opening to a point no further than 0.20 inch (5.08 mm) from the edge. To pass the test, there must be no cracks or exposure of electrically energized parts that can be contacted with the probe in Figure 1.

§ 1208.27 Flammability tests for class Z applications (except wire).

(a) Test specimens are to be conditioned for at least 40 hours at a temperature of 73.4±3.6° F (23.0±2.0° C) and a relative humidity of 50±5 percent prior to testing. Other test specimens are to be conditioned in a circulating air oven for not less than 168 hours at 158° F (70° C) and then cooled in a desicator, over anyhdrous calcium chloride, for at least 4 hours at room temperature prior to testing. The test is to be conducted in a chamber, with an air flow no greater than 30 ft (9.14 m) per minute.

(b) Each specimen is to be supported from the upper 0.25 inch (6.4 mm) of the specimen, with the longitudinal axis vertical, by a clamp on a ring stand or the equivalent so that the lower end of the specimen is 0.375 inch (9.5 mm) above the top of the burner tube during flame application and 12 inches (305 mm) above a horizontal layer of dry absorbent surgical cotton (2 by 2 inch (51 by 51 mm) swatch thinned to a maximum free standing thickness of 0.25 inch (6.4 mm)).

(c) A Bunsen or Tirrill burner having a bore of 0.375 inch (9.52 mm) and a length of approximately 4 inches (101.6 mm) above the primary air inlets, using methane gas, is then to be ignited and adjusted to produce a blue flame 0.75 inch (19 mm) high. The flame should be obtained by adjusting the gas supply and the air ports of the burner until a 0.75 inch (19 mm) yellow-tipped blue flame is produced and then an increase in the air supply is to be made until the yellow tip disappears. The height of the flame is to be measured again and corrected to 0.75 inch (19 mm) if necessary.

(d) The test flame is to be brought to a central location under the lower end of the test specimen and allowed to remain for 10 seconds. The test flame is then to be withdrawn at least 6 inches (152 mm) away and the duration of flaming of the specimen noted. When flaming of the specimen ceases, the test flame is to be immediately placed again under the specimen. After 10 seconds, the test flame is again to be withdrawn, and the duration of flaming and glowing is to be noted. The illumination in the area when the test is performed shall not exceed 0.3 foot-candles.

(e) If the specimen drips molten or flaming material during either flame application, the burner may be tilted to an angle up to 45 degrees and also slightly withdrawn away from one of the sides of the specimen during the flame application to avoid materials dripping into the tube of the burner. If the specimen drips molten or flaming material or is consumed during the test, the burner is to be hand-held, and the 0.375 inch (9.5 mm) distance between the bottom of the specimen and the top of the burner tube is to be maintained during the flame application. Any molten strings of the material are to be ignored, and the flame is to be applied to the major portion of the specimen.

Observe and record the following:

(A) Duration of flaming after first flame application.

(B) Duration of flaming after second flame application.

(C) Duration of flaming plus visible glowing after second flame application.

(D) Whether or not specimen drips flaming particles which ignite cotton swatch.

(f) To pass the test, a test sample must not burn with flaming combustion for more than 10 seconds after each application of the test flame; no specimen may drip flaming particles that ignite the dry absorbent surgical cotton located 12 inches (305 mm) below the test specimen; and no specimen may have glowing combustion which persists beyond 30 seconds after the second removal of the test flame.

§ 1208.28 Short circuit simulation test.

(a) Electricial supply circuits of 125 volts, 60 hertz, calibrated to deliver 200 amperes to the string under short circuit conditions; and 125 volts, 60 hertz, calibrated to deliver 1,000 amperes to the string under short circuit conditions; each protected by a 20 ampere circuit breaker shall be used.

(b) This test is to be conducted on a string placed on a bed of dry absorbent surgical cotton. If the string has more than one lamp series circuit, the test must be performed using only one of those circuits the one with the longest length of wires between the plug and the first lampholder in the circuit. The test must be conducted with lamps having shunts (if used).

(c) Trace one wire from the plug to the first lampholder in the lamp series circuit that is provided with or can accommodate a lamp having a shunt (if used). Cut the wire midway between that lampholder and the next lampholder in the series circuit. If lamps without shunts are used exclusively, cut wire midway between the second and third lampholder. Strip the insulation from the wire extending from the first lampholder. Cut the wire between the plug and the last lampholder of the series string. Strip insulation from the wire extending from the plug. Twist the ends of the two stripped wires firmly together. Place dry absorbent surgical cotton over the complete test sample. Connect the plug to the 200 ampere electricial supply circuit, and by means of a switch, energize the test circuit. Repeat the test on another sample with one less lampholder in the circuit until only the overcurrent protective device is in the test circuit.

(d) Repeat the above steps on the 1,000 ampere electrical supply circuit. The test is passed if there is no breakage of the glass envelope of a lamp or fuse (if used), no expulsion of fragments from the test sample, and no ignition of the surrounding cotton.

§ 1208.29 Cascade failure simulation test.

(a) In this simulation, a lamp series circuit is represented by a single lamp, lamp base, and lampholder with wires attached, and a variable resistor or equivalent. The lamp, lampbase and lampholder together comprise a lamp assembly. The circuit is operated with the overcurrent protective devices which normally serve the circuit.

(b) Figure 6 shows a schematic diagram of the test circuit for the simulation of a cascade failure in a string where a pair of overcurrent protective devices serves only one lamp series circuit. For the simulation where a pair of overcurrent protective devices serves more than one lamp series circuit, the lamp series circuits that are in addition to the one circuit being represented by the lamp assembly and variable resistor, are to be electrically connected in parallel to the lamp assembly and variable resistor. At least

one of the additional lamp circuits is to be open circuited during the test.

(c) In general, the test will require the use of components from more than one string. Select the lamps for the string under test that have the hottest operating bulb surface temperatures. Decorative parts around the lamp, lampbase, and lampholder are to be in place during the test except as noted below. Additional fuses (if used) are to be obtained from other strings of the identical type.

(d) An unenergized lamp assembly from the same string or one of the identical type must be rested on top of the lamp assembly under test such that the part of the unenergized lampholder at which the internal contacts are closest to the surface is touching the bulb envelope of the tested assembly at a point as close as possible to the lamp filament. This may require rotating the lamp assembly under test so that the point at which its lamp filament is closest to the bulb envelope is also the point that contacts the unenergized lampholder. Maintenance of this contact is required throughout the test. For a string supported on a frame where the lampholders are separated to prevent lamps from contacting adjacent lampholders, the unenergized lamp assembly placement step noted herein may be omitted.

(e) For light strings with decorative parts around the lamp, lampbase, or lampholder that can be removed, the Cascade Failure Simulation Test must be performed both with and without the parts in place. In this situation, the above requirement that an unenergized lamp assembly be placed over the lamp assembly under test applies only when the decorative parts are not in place.

(f) To determine the normal current flow in a lamp series circuit, replace all lamps that operate intermittently (for example, bulbs that have thermally actuated internal contacts to alternatively open and close the series lamp circuit) with steadily burning lamps, and connect the string to a 120 volt, 60 hertz power supply. Measure the current. For multiple series circuit strings, measure the current in each lamp series circuit and calculate its average value. This is considered to be the normal lamp current. The variable resistor must have a resistance range up to at least 10 percent greater than the operating resistance of a lamp series circuit.

(g) Remove lamp assemblies by cutting the wires between each assembly selected and the nearest adjacent assemblies. Connect one assembly in the appropriate test circuit as shown in Figure 6. With the variable resistor at the maximum setting, connect the test circuit to the power supply. Increase the current through the assembly by adjusting the variable resistor until the previously determined normal lamp circuit current is reached and hold this value for a 5 minute±20 second period. After this period, increase the current to a value that is 20±1 percent below the maximum current that either the overcurrent protective devices or the lamp filament would pass (whichever is lower) if the current were increased from the normal current at a rate approximately 10 milliamperes every 10 seconds; these points having been previously determined by successive trials.

(h) If there is no discernable physical change in appearance, such as melting or dripping of materials, after 10-11 minutes increase the current in successive steps of 5 percent of the previous value, maintaining each step for a 5-6 minute period. If there is discernable physical change in appearance at any step, continue operation at that step for an additional 5-6 minutes. Continue this stepping process until either the lamp filament or the overcurrent protective device opens the circuit. For a valid test, the filament must operate for at least 10 minutes at a current above the normal value. If repeated samples open-circuit before the required 10 minute operating period is complete, reduce the value of the first over-current step by 5 percent and repeat the test on additional samples.

(i) If the lamp filament opens and the lamp shunt and overcurrent protective devices are still operational, increase the current in successive steps equal to 10 percent of the overcurrent protective device rating, maintaining each step for a 3-4 minute period. If there is discernable physical change in appearance at any step, continue operation at that step for an additional 10-11 minutes. Continue this stepping process until either the lamp shunt or the overcurrent protective device opens. If desired to save time, the lower current steps which begin after the filament opens, may be omitted so long as at least three consecutive steps are passed through just prior to opening either the lamp shunt or the overcurrent protective device.

(j) To pass the test, there must be no exposure of electrical conductors either in the lamp assembly under test or in the unenergized lampholder over it such that they can be contacted by the probe in Figure 1 and there shall be no ignition of any parts of the string during the test.

§ 1208.30 Temperature Test for Plugs, Connectors and Fuseholders.

(a) To pass this test, wire terminations and other live parts of plugs, connectors, and fuseholders must operate at 15 amperes with a maximum temperature rise of 54°F (30°C), except that: (1) Attachment plugs, and connectors and fuseholders (but not add-on connectors) are to be operated at the current rating of the connecting wire with a maximum temperature rise as set forth above; and (2) circuits protected by non-replaceable or non-interchangeable overcurrent protection devices are to be operated at the maximum value at which the device will operate continuously for at least two hours without the overcurrent protection devices opening the circuit (except as provided under paragraph (a) of this section), with a maximum temperature rise as set forth above.

(b) When testing plugs and add-on connectors, the connections to the blades are to be made to minimize heating from the connection. When testing receptacles, the receptacle contacts are to be tested together by means of an inserted attachment plug. They are to be tested after having been subjected to the overload test described in the following paragraph.

(c) Overload Test: Insert and withdraw an attachment plug having rigidly secured solid blades which are connected through a flexible cord to a load. Cause the connector to make and break 22.5 amperes (except that end connectors are to make and break 150 percent of the current rating of the connecting wire) for 50 cycles of operation at a rate no faster than 10 cycles per minute. The blade of the plug is to mate with the receptacle contact for no more than 1 second during each cycle.

(d) The unrestricted attachment plug is to be inserted and withdrawn with an average velocity of 30±3 inches (762±76 mm) per second in each direction during a 2.5 inch (63.5 mm) stroke measured from the fully inserted position. The potential of the test circuit is to be 120 volts ac, with the power factor between 0.75 to 0.80 inclusive.

(e) To pass this test, there must be no electrical or mechanical failure of the connector, or undue burning or pitting of the receptacle contacts.

§ 1208.31 Receptacle Insertion-Withdrawal Tests.

(a) This test is to be conducted using an attachment plug or add-on connector having solid blades which are 0.260 inch (6.60 mm) wide, 0.065 inch (1.651 mm) thick, and extend out 0.718 inch (18.24 mm) from the face of the plug or connector.

(b) The force needed for initial insertion of the blades of an attachment plug and add-on connector into the receptacle of a connector to within at least 0.0313 inch (0.793 mm) of full insertion must not exceed 20 lbf (89 N). The force needed to withdraw the blades after the first insertion and subsequent insertions must not exceed 15 lbf (66.75 N). The force needed for subsequent insertions of the blades to within at least 0.0313 inch (0.793 mm)

MY 3 78
UMI

V 4 3 1 8 6

of full insertion must not exceed 15 lbf (66.75 N). After 10 conditioning cycles of insertion and withdrawal of the blades, a pull of 3 lbf (13.35 N) in a direction normal to the face of the receptacle body and tending to withdraw the blades is to be applied for one minute. The results are acceptable if there are no exposed live parts that can be contacted by the probe in Figure 1.

(c) To pass the test, electrically live parts of a connector must remain insulated or enclosed as a result of the insertion and withdrawal forces so that they can not be contacted with the probe in Figure 1.

(d) In addition, to pass the test, the blades must not be accessible following the application of the insertion forces described in the previous paragraph using a 0.0313 inch (.793 mm) thick feeler gauge whose width is not less than 0.20 inch (5.08 mm).

§ 1208.32 Plug and Connector Blade Pull Test.

(a) Support plugs and add-on connectors so that tensile forces can be applied to the blade or blades along their longitudinal axes without restricting possible displacment of the blades and/or breakage of the enclosure of electrically live parts.

(b) Apply a 20 lbf (89 N) to each blade in succession and to the two blades tested together. Maintain each force for two minutes.

(c) The test is passed if a blade is not displaced more than 0.094 inch (2.38 mm). Measurements are to be made not less than 2 minutes nor more than 4 minutes after removal of the force.

§ 1208.33 Plug and Connector Blade Push Test.

(a) Support plugs and add-on connectors so as not to restrict possible displacement of the receptacle contacts and/or breakage of the enclosure of electrically live parts. Subject each blade, in turn, to a force of 35 lbf (155.6 N) applied gradually along the longitudinal axis of the blade in a direction toward the face of the plug or connector in which the blades project. Maintain the force for a period of one minute. This test is passed if neither blade is displaced more than 0.094 inch (238 mm) and the enclosure is not opened to expose electrically live parts so that they can be contacted by the probe in Figure 1 (except for the blades projecting as intended from the face of the plug or connector) as a result of the applied force.

§ 1208.34 Crush test for plugs and connectors.

A force of 75 lbf (333.7 N) is to be applied gradually to the surface of the plug or connector body at a right angle to the major axis of the plug blades or receptacle cavities for a period of 1 minute. The test is to be repeated on a different sample with the compressive force applied from a direction perpendicular to the direction of the previously applied force, and also perpendicular to the major axis of the plug blades or receptacle cavities. To pass the test there must be no cracking of the plug or connector body to expose electrically live parts as determined using the probe of Figure 1, and no contact made between conductor parts of opposite polarity.

§ 1208.35 Strain relief test for plug and connector connections.

(a) With the plug or connector body securely anchored (by the blades in the case of a plug), the wires are to be pulled together steadily for 1 minute in the direction normal to the plane of the cord entrance with a force of 30 lbf (133.5 N) for No. 18 AWG wires and 20 lbf (89 N) for wires smaller in size than No. 18 AWG.

(b) If no conductor is detached and if no bare conductor is beyond the plane of the wire entry opening or can be contacted by the probe in Figure 1, the construction passes the test.

§ 1208.36 Security of insulation test at plugs and connectors.

(a) To determine that the wire insulation is secured as required, the plug or connector is to be tested with at least 6 inch (152 mm) lengths of wires.

(b) The insulation on each conductor of the wires is to be split parallel to the conductor for a short distance at a point approximately 1 inch (25.4 mm) from its entry into the plug or connector and all strands of the conductor are to be severed at the split portion. With the plug or connector body securely anchored (by the blades in the case of a plug), a direct pull of 15 lbf (66.75 N) for No. 20 AWG and larger size wires and 10 lbf (44.50 N) for wires less than No. 20 AWG is to be applied to the free ends of the wires together for 2 minutes.

(c) The test is passed if there is no detachment of the insulation from within the plug or connector, no baring of the conductors at the entry to the plug or connector that can be contacted with the probe in Figure 1, and no bare conductor beyond the plane of the wire entry opening.

§ 1208.37 Decorative part downward burning rate test.

(a) The decorative part is to be supported on a noncombustible surface in a location having an air flow no greater than 30 ft (9.14 m) per minute. With the specimen positioned so as to place one of its major surfaces in a substantially vertical plane, the uppermost edge or surface is then to be ignited through the use of any convenient open flame such as an ordinary paper bookmatch. (To facilitate ignition, in the case of molded form or figure not having an exposed edge, it may be necessary to cut a slit or opening in the desired area.) Once the decorated part is ignited, the ignition flame is to be removed and the vertical downward burning rate is to be determined by measurement of burning distance in inches and time in seconds. Usually a vertical downward burning distance of 6 inches (152 mm) is sufficient to determine the burning rate; however, in the case of parts less than 6 inches (152 mm) in height, a shorter distance may be used. Where the finished part is too small to permit determination of the vertical downward burning rate, it is necessary to test larger test specimens of the same material and minimum thickness.

(b) If repeated attempts to ignite the material fail to sustain combustion, the material is considered to comply with the requirements.

(c) Where the decorative part consists of a combination of two or more materials the burning rate is to be determined on the combination unless it is determined that each material, when tested by itself, complies with the maximum allowable burning rate.

(d) To pass the test, the vertical downward burning rate must be less than or equal to 4 inches (102 mm) per 60 seconds.

§ 1208.38 Heating test for lamps and lampholders.

A circulating-air oven maintained at a uniform temperature of no less than 248° F (120° C) is to be used for the heating test. Lampholders with non-energized lamps are to be suspended in the oven by the wires to them. Additional lampholders with non-energized lamps are to be placed in the oven on their sides on flat surface(s). After a minimum of two hours of heating, the samples are to be removed and, after cooling to room temperature, examined for exposure of electrically live parts as determined by contact with the probe in Figure 1.

§ 1208.39 Millivolts drop test for lampholders.

A lampholder is to be fitted with a lamp base in which the lamp has been replaced by a short length, not more than 1 inch (25.4 mm), of No. 30 AWG solid copper wire. The lampholder assembly is to be placed in the position of the lamp assembly shown in Figure 7. The overcurrent protective devices are to be short circuited and the current is to be increased to 135 percent of the rating of the overcurrent protective device. The voltage between the wires coming from the assembly is to be measured. To pass this test, the drop between the wire is not to exceed 200 millivolts.

M Y 3 7 8 UMI

§ 1208.40 Maximum wattage test for lamps.

The lamp is to be inserted into the lamp assembly shown in Figure 7. With the variable resistor at the maximum setting, connect the test circuit to the power supply. Adjust the variable resistor until the product of the current (in amperes) and the voltage across the lamp in volts is no greater than the wattage specified in § 1208.9(1). This adjustment should be completed within 60 seconds after power application. To pass this test, the lamp filament must open within two minutes after the specified wattage is achieved.

§ 1208.41 Conductive tinsel test.

(a) Metallized tinsel and other conductive flexible strips and threads, 0.25 inch (6.4 mm) and longer, and located within 1 inch (25.4 mm) of a lampholder, fuseholder, plug or connector shall be tested.

(b) Strips or threads of material shall be secured between two copper alloy clamps which are separated by not less than 0.25 inch (6.4 mm). Enough strips or threads are to be used to result in a single layer of material adding up to a total width of not less than 0.25 inch (6.4 mm).

(c) With an adjustable power supply, starting from zero, the applied voltage shall be gradually increased up to 120 volts ac.

(d) To pass the test, the material shall result in a current of less than 5 milliamperes or the material shall cause the circuit to open before this value is attained.

Subpart C—Recommendations

§ 1208.50 General materials.

Materials should be used which are appropriate to the functions of the parts they comprise.

§ 1208.51 Conductive materials.

Parts that are not electrically energized, but serve to enclose, or support, or secure enclosures of, electrically energized parts, should be of stainless steel, or plated or coated iron or steel, or otherwise protected against corrosion.

§ 1208.52 Plugs and connectors.

(a) *Faces of attachment plugs and add-on connectors.* The faces of attachment plugs and add-on connectors should be 0.75 (plus 0.0, minus 0.020) inch (19.05 (plus 0.0, minus 0.51) mm) by 1.0 (plus 0.0, minus 0.025) inch (25.4 (plus 0.0, minus 0.64) mm), with the blades centered and with a maximum 0.22 inch (5.56 mm) radius at the corners; the 1.0 inch (25.4 mm) dimension should be perpendicular to the width of the blades.

(b) *bodies of attachment plugs and add-on connectors.* The bodies of attachment plugs and add-on connectors should be of a shape that is not likely to be grasped at the periphery of the face at which the blades project, but rather is conducive to being gripped at a section formed for that purpose. The gripping area should extend over a distance of a least 0.687 inch (17.46 mm) located between two higher sections. The section at the rear should have a sharply defined projection at least 0.094 inch (2.38 mm) high, with a base of at least 0.063 inch (1.59 mm). In place of the gripping area, a finger grip in the form of a closed loop capable of accommodating fingers may be provided. Plugs and add-on connectors should not have wire(s) that projects from the plug or add-on connector in the finger grip area.

(c) *Recessed live parts.* Add-on and end connectors should have live parts within receptacle openings recessed at least 0.25 inch (6.35 mm) from the receptacle face.

(d) *Closures for receptacle openings.* Add-on connectors and end connectors should have receptacle openings that are reliably and effectively closed with insulating material. The closing means:

(1) Should, when in closed position, prevent a straight steel wire, 0.010 inch (0.254 mm) in diameter (No. 30 AWG), from touching any receptacle electric contact.

(2) Should be removable from the receptacle, but should not be removable from the string.

(3) Should be capable of normal displacement from (complete removal if appropriate), and return to (insertion if appropriate), the receptacle without breakage or damage, both before and after the connector and closing means have been conditioned for 7 hours at 158.0° F (70° C) in a circulating-air oven. The displacement and return operation after conditioning should be conducted after the parts have cooled to room temperature. If the closing means is removable from the receptacle, the conditioning should be conducted with the closing means positioned in the connector. A closing means not positioned in the receptacle should also be subjected to the conditioning.

(4) Should not impair the performance of the connector as determined after three simulated cycles of use, each cycle consisting of normal displacement and return of the closing means.

(5) Should not serve as a tab or handle that can be used to open another closing means on the connector.

(6) Should not be provided with handles, loops, knobs, or the like that might facilitate removal.

(7) Should be capable of withstanding a straight pull of no less than 1 pound applied perpendicular to the face of the receptacle, without the closure being removed from the receptacle.

(e) *Exposure of plug blades.* Receptacles should accommodate plug blades without exposure of the blades between the faces of the plug and receptacle as follows: The determination should be made using plug blades which extend out 0.718 inch (18.24 mm) from the face of the plug and after full insertion should not be accessible using a 0.010 inch (0.254 mm) thick feeler gauge whose width is not less than 0.020 inch (5.08 mm).

§ 1208.53 Recommended labeling.

(a) At least the following care and use instructions should appear as additional cautionary labeling on either a display panel of the package or on a separate notice inserted in the package to assist consumers:

(1) Instructions for testing and inspecting the light strings prior to use;

(2) Instructions for the proper replacement of bulbs and fuses;

(3) Instructions for proper storage;

(4) Special precautions for outdoor use;

(5) A cautionary message to keep young children away from light strings and bulbs;

(6) If the light string has a separate end connector receptacle, a statement indicating that only other miniature lights or decorations with miniature lights should be attached to the receptacle.

(b) The Commission regulations at 16 CFR 1500.121 (a), (c), and (d) may be used as guidance in determining the placement and conspicuousness of these statements.

(c) If the care and use instructions are provided on a separate insert notice, all information that is required by § 1208.10(c) to appear on the permanent label and packaging should also appear on the insert sheet immediately preceding the directions for use.

Interested persons are invited to submit written data, views, or arguments regarding any aspect of the proposed standard on or before July 3, 1978. Comments submitted after this date will be considered to the extent practicable. Commentors are requested to cite the specific sections of Part 1208 being commented upon and to identify the specific portions of other documents to which they refer.

The Commisssion is particularly interested in obtaining, either by written comment or by oral presentation, additional data, views, and arguments on the following matters:

(a) The degree and nature of the risk of injury the rule is designed to eliminate or reduce;

(b) The approximate number of consumer products, or types or classes thereof, subject to the rule;

(c) The need of the public for consumer products subject to such rule,

V 4 3 — 8 6

and the probable effect of such a rule upon the utility, cost, or availability of such products to meet that need;

(d) Any means of achieving the objective of the rule while minimizing adverse effects on competition or disruption or dislocation of manufacturing and other commercial practices consistent with the public health and safety;

(e) The necessity of the rule to eliminate or reduce the unreasonable risk of injury associated with the consumer products subject to the rule;

(f) Whether the rule is in the public interest;

(g) Any adverse effects that this proposed rule will have on elderly and handicapped persons;

(i) Whether the proposed effective date of the rule is reasonable and necessary.

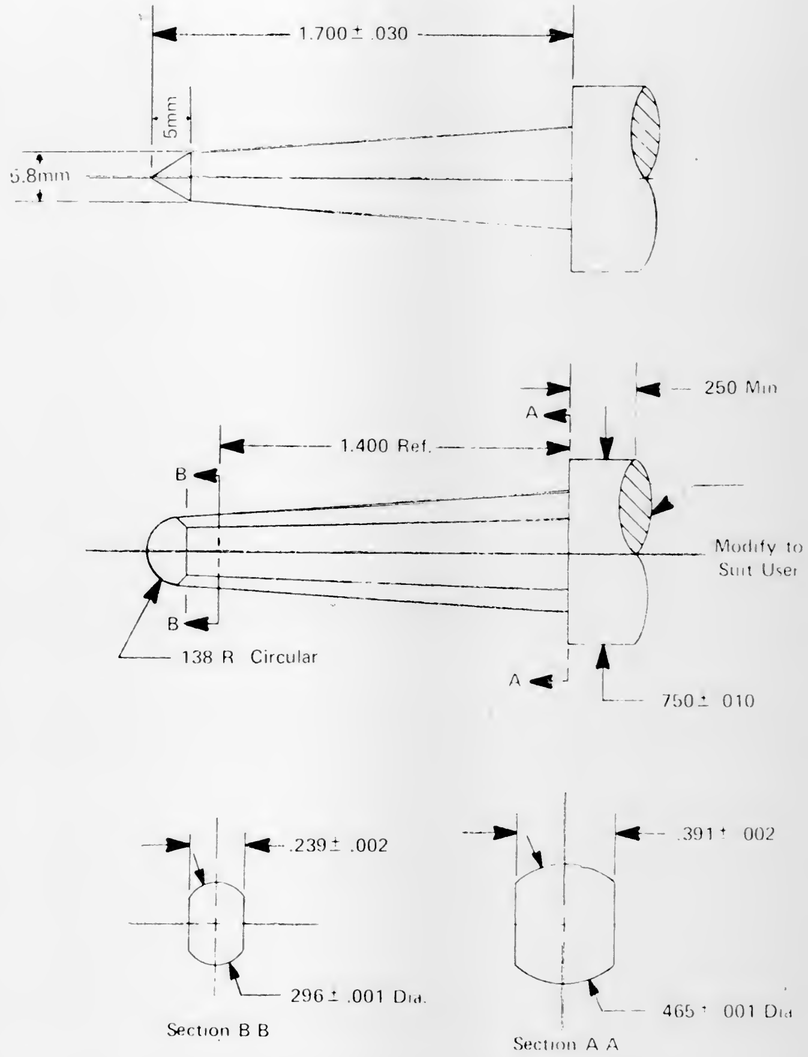
Comments should be accompanied, to the extent possible, by supporting data or documentation. Requests for confidentiality of documentation will be handled in accordance with the Freedom of Information Act as amended (5 U.S.C. 552), the Commission's proposed interim regulations under that Act (39 FR 30298), and the provisions of section 6(a)(2) of the CPSA (15 U.S.C. 2055(a)(2)).

Written submissions and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments may be supported by a memorandum or brief.

Interested persons will be afforded an opportunity to make an oral presentation of data, views, or arguments on any aspect of the proposed standard on June 7, 1978, at 9:30 a.m., in the Commission hearing room, third floor, 1111 18th Street NW., Washington, D.C.

The Commission's Procedural Regulations for Oral Presentations Concerning Proposed Consumer Product Safety Rules (16 CFR Part 1109) will govern this proceeding.

Those wishing to make oral presentations should notify the Office of the Secretary, 202-634-7700 by May 30, 1978. In addition, a summary or copy of the presentation, preferably in 5 copies is to be submitted to the Office of the Secretary by June 2, 1978.



The official transcript of the oral presentations of data, views, or arguments, any written comments that are received, and all other material which the Commission has that is relevant to this proceeding may be seen in, or copies obtained from the Office of the Secretary, third floor, 1111 18th Street NW., Washington, D.C. 20207.

Dated: April 28, 1978.

SADYE DUNN,
Acting Secretary, Consumer Product Safety Commission.

[8320-01]

VETERANS ADMINISTRATION

[38 CFR Part 18d]

NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS AND ACTIVITIES RECEIVING OR BENEFITING FROM FEDERAL FINANCIAL ASSISTANCE

Proposed Regulations

AGENCY: Veterans Administration.

ACTION: Proposed Regulations.

SUMMARY: These proposed regulations, which apply to all recipients of Federal financial assistance from the VA (Veterans Administration), are intended to ensure that their programs and activities are operated without discrimination on the basis of handicap. The regulations define and forbid acts of discrimination against qualified handicapped individuals in employment and in the operation of programs and activities receiving assistance from the VA. As employers, recipients must make reasonable accommodation to the handicaps of applicants and employees unless the accommodation would cause the employer undue hardship. As providers of services, recipients are required to make programs and activities operated in existing facilities accessible to handicapped persons, to ensure that new facilities are constructed so as to be readily accessible to handicapped persons, and to operate their programs in a nondiscriminatory manner. These proposed regulations implement the Rehabilitation Act of 1973.

DATES: Comments must be received on or before July 3, 1978. The proposed effective date will be the date the final requirements are published in the FEDERAL REGISTER.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. Comments will be available for inspection at the address shown above during normal business hours until July 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles Clark, Veterans Administration, Office of Human Goals (09), 1425 K Street NW., Room 1116, Washington, D.C. 20420, 202-389-2012.

SUPPLEMENTARY INFORMATION: Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 704, provides that "No otherwise qualified handicapped individual * * * shall, solely by reason of his handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Under Executive Order 11914 (41 FR 17871, April 29, 1976) HEW (Department of Health, Education, and Welfare) was required to issue general standards for other agencies and departments to follow in writing their regulations to implement section 504. The standards were published at 43 FR 2132, January 13, 1978. Generally, the standards set forth enforcement procedures, standards for determining which persons are handicapped, and guidelines for determining what practices are discriminatory.

The VA's proposed regulations are similar to the regulations issued by HEW (45 CFR Part 84). Changes were made to meet specific organizational, procedural or program requirements of the VA. Some recipients will be subject to the regulations of both the VA and HEW. To eliminate the duplication it is anticipated that a delegation of section 504 responsibility will be effected between the two agencies. It is expected that the delegation will parallel the delegations of responsibility with regard to title VI of the Civil Rights Act of 1964 that are currently in effect between the VA and HEW. Under the title VI delegations of responsibility, HEW has responsibility for institutions of higher learning, public schools, hospitals, and other health facilities, and the VA is responsible for proprietary schools.

Appendix A lists the VA programs which are subject to the requirements of section 504. Although the application of section 504 may seem rather inappropriate with regard to such programs as burial benefits or programs designed to assist certain disabled veterans (specially adapted housing and automobiles and adaptive equipment), it must be remembered that the law applies to employment practices of recipients as well as the provision of services.

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until July 12, 1978. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: April 27, 1978.

By the direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

A new Part 18d is added to read as follows:

PART 18d—NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS AND ACTIVITIES RECEIVING OR BENEFITING FROM FEDERAL FINANCIAL ASSISTANCE

Subpart A—General Provisions

Sec.
18d.1 Purpose.
18d.2 Application.
18d.3 Definitions.
18d.4 Discrimination prohibited.
18d.5 Assurances required.
18d.6 Remedial action, voluntary action and self-evaluation.
18d.7 Designation of responsible employee.
18d.8 Notice.
18d.9 Administrative requirements for certain recipients.
18d.10 Effect of State or local law or other requirements and effect of employment opportunities.

Subpart B—Employment Practices

18d.11 Discrimination prohibited.
18d.12 Reasonable accommodation.
18d.13 Employment criteria.
18d.14 Preemployment inquiries.

Subpart C—Program Accessibility

18d.21 Discrimination prohibited.
18d.22 Existing facilities.
18d.23 New construction.

Subpart D—Elementary, Secondary, and Adult Education

18d.31 Application.
18d.32 Location and notification.
18d.33 Free appropriate public education.
18d.34 Educational setting.
18d.35 Evaluation and placement.
18d.36 Procedural safeguards.
18d.37 Nonacademic services.
18d.38 Adult education programs.
18d.39 Private education programs.

Subpart E—Postsecondary Education

18d.41 Application.
18d.42 Admissions and recruitment.
18d.43 General treatment of students.
18d.44 Academic adjustments.
18d.45 Housing.
18d.46 Financial and employment assistance to students.
18d.47 Nonacademic services.

Subpart F—Health and Social Services

18d.51 Application.
18d.52 Health and other social services.
18d.53 Drug and alcohol addicts.
18d.54 Education of institutionalized persons.

Subpart G—Procedures

18d.61 Procedures.

Appendix A—Statutory Provisions to Which This Part Applies.

AUTHORITY: Sec. 504, Rehabilitation Act of 1973, Pub. L. 93-112, 87 Stat. 394 (29 U.S.C. 704); E.O. 11914, 41 FR 17871, April 29, 1976)

Subpart A—General Provisions

§ 18d.1 Purpose.

The purpose of this part is to effectuate section 504 of the Rehabilitation Act of 1973, which is designed to eliminate discrimination on the basis of handicap in any program or activity receiving Federal financial assistance.

§ 18d.2 Application.

This part applies to each recipient of Federal financial assistance from the Veterans Administration and to each program or activity that receives or benefits from such assistance.

18d.3 Definitions.

As used in this part, the term: (a) "The Act" means the Rehabilitation Act of 1973, Pub. L. 93-112, as amended by the Rehabilitation Act Amendments of 1974, Pub. L. 93-516, 29 U.S.C. 794.

(b) "Section 504" means section 504 of the Act.

(c) "Education of the Handicapped Act" means that statute as amended by the Education for all Handicapped Children Act of 1975, Pub. L. 94-142, 20 U.S.C. 1401 et seq.

(d) "Agency" means the Veterans Administration.

(e) "Administrator" means the Administrator of Veterans Affairs.

(f) "Recipient" means any State or its political subdivision, any instrumentality or a State or its political subdivision, any public or private agency, institution, organization, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance.

(g) "Applicant for assistance" means one who submits an application, request, or plan required to be approved by an Agency official or by a recipient as a condition to eligibility for Federal financial assistance.

(h) "Federal financial assistance" means any grant, loan, contract (other than a procurement contract of or a contract insurance or guaranty), or any other arrangement by which the Agency provides or otherwise makes available assistance in the form of:

(1) Funds, including funds extended to any entity for payment to or on behalf of students admitted to that entity, extended directly to those students for payment to that entity, or extended directly to those students contingent upon their participation in a program of education or training of that entity;

(2) Services of Federal personnel; or

(3) Real and personal property or any interest in or use of such property, including;

(i) Transfers or leases of such property for less than fair market value or for reduced consideration; and

(ii) Proceeds from a subsequent transfer or lease of such property if the Federal share of its fair market value is not returned to the Federal Government.

(i) "Facility" means all or any portion of buildings, structures, equipment, roads, walks, parking lots, or other real or personal property or interest in such property.

(j) "Handicapped person." (1) Handicapped persons means any person who:

(i) Has a physical or mental impairment which substantially limits one or more major life activities;

(ii) Has a record of such an impairment; or

(iii) Is regarded as having such an impairment.

(2) As used in paragraph (j)(1) of this section; the phrase:

(i) "Physical or mental impairment" means:

(A) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological; musculoskeletal; special sense organs including speech organs; respiratory; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or

(B) Any mental or psychological disorder, such as mental retardation; organic brain syndrome, emotional or mental illness, and specific learning disabilities.

(ii) "Major life activities" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning and working.

(iii) "Has a record of such an impairment" means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(iv) "Is regarded as having an impairment" means:

(A) Has a physical or mental impairment that does not substantially limit major life activities but is treated by a recipient as constituting such a limitation;

(B) Has none of the impairments defined in paragraph (j)(2)(i) of this section, but is treated by a recipient as having such an impairment.

(k) "Qualified handicapped person" means:

(1) With respect to employment, a handicapped person who, with reasonable accommodation, can perform the essential functions of the job in question;

(2) With respect to elementary, secondary, or adult educational services, a handicapped person:

(i) Of an age during which nonhandicapped persons are provided such services;

(ii) Of any age during which it is mandatory under State law to provide such services to handicapped persons; or

(iii) To whom a State is required to provide a free appropriate public education under section 612 of the Education of the Handicapped Act; and

(3) With respect to postsecondary and vocational education services, a handicapped person who meets the academic and technical standards requisite to admission or participation in the recipient's education program or activity;

(4) With respect to training in Veterans Administration health care facilities, a handicapped person who with reasonable accommodation can function within facility requirements for patient and staff safety and well being;

(5) With respect to other services, a handicapped person who meets the essential eligibility requirements for the receipt of such services.

(l) "Handicap" means any condition or characteristic that renders a person a handicapped person as defined in paragraph (j) of this section.

§ 18d.4 Discrimination prohibited.

(a) *General.* No qualified handicapped person shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity which receives or benefits from Federal financial assistance.

(b) *Discriminatory actions prohibited.* (1) A recipient, in providing any aid, benefit, or service, may not, directly or through contractual, licensing, or other arrangements, on the basis of handicap:

(i) Deny a qualified handicapped person the opportunity to participate in or benefit from the aid, benefit, or service;

(ii) Afford a qualified handicapped person an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others;

(iii) Provide a qualified handicapped person with an aid, benefit, or service that is not as effective as that provided to others;

(iv) Provide different or separate aid, benefits, or services to handicapped persons or to any class of handicapped persons unless such action is necessary to provide qualified handicapped persons with aid, benefits, or services that are as effective as those provided to others;

(v) Aid or perpetuate discrimination against a qualified handicapped person by providing significant assistance to an agency, organization, or person that discriminates on the basis of handicap in providing any aid, benefit, or service to beneficiaries of the recipient's program;

(vi) Deny a qualified handicapped person the opportunity to participate

MY 3 78 UMI

V 43 | 86

as a member of planning or advisory boards; or

(vii) Otherwise limit a qualified handicapped person in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving an aid, benefit, or service.

(2) Aids, benefits, and services, to be equally effective, are not required to produce the identical result or level of achievement for handicapped and nonhandicapped persons, but must give handicapped persons equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement, in the most integrated setting appropriate to the person's needs.

(3) Despite the existence of separate or different programs or activities provided in accordance with this part, a recipient may not deny a qualified handicapped person the opportunity to participate in programs or activities that are not separate or different.

(4) A recipient may not, directly or through contractual or other arrangements, utilize criteria or methods of administration that:

(i) Have the effect of subjecting qualified handicapped persons to discrimination on the basis of handicap.

(ii) Defeat or substantially impair accomplishment of the objectives of the recipient's program with respect to handicapped persons, or

(iii) Perpetuate the discrimination of another recipient if both recipients are subject to common administrative control or are agencies of the same State.

(5) In determing the site or location of a facility, an applicant for assistance or a recipient may not make selections that:

(i) Exclude handicapped persons from, deny them the benefits of, or otherwise subject them to discrimination under any program or activity that receives or benefits from Federal financial assistance, or

(ii) Defeat or substantially impair the accomplishment of the objectives of the program or activity with respect to handicapped persons.

(6) As used in this section, the aid, benefit, or service provided under a program or activity receiving or benefitting from Federal financial assistance includes any aid, benefit, or service provided in or through a facility that has been constructed, expanded, altered, leased or rented, or otherwise acquired, in whole or in part, with Federal financial assistance.

(c) *Programs limited by Federal law.* The exlusion of nonhandicapped persons from the benefits of a program limited by Federal statute or Executive order to handicapped persons or the exclusion of a specific class of handicapped persons from a program limited by Federal statute or Executive order to a different class of handicapped persons is not prohibited by this part.

§ 18d.5 Assurances required.

Assurances required. An applicant for Federal financial assistance for a program or activity to which this part applies shall submit an assurance on a form specified by the Administrator, that the program will be operated in compliance with this part.

(b) *Duration of obligation.* (1) When Federal financial assistance is extended in the form of real property or structures on the property, the assurance will obligate the recipient or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for the purpose for which Federal financial assistance is extended or for another purpose involving the provisions of similar services or benefits.

(2) Where Federal financial assistance is extended to provide personal property, the assurance will obligate the recipient for the period during which it retains ownership or possession of the property.

(3) In all other cases the assurance will obligate the recipient for the period during which Federal financial assistance is extended.

(c) *Extent of application to institution or facility.* An assurance shall apply to the entire institution or facility. The Administrator may waive this requirement if the institution or facility can establish that the practices in designated parts and programs will not affect its practices in the program for which Federal financial assistance is being received or requested. If the assistance is being received or requested for the construction of a facility or part of a facility, the assurance shall apply to the entire facility and to facilities operated by the institution or facility.

(d) *Outside individuals or organizations.* A recipient shall not use the services of an individual or organization that discriminates against the handicapped or permit such an individual or organization to use its facilities. The recipient shall provide the Administrator with written assurance from individuals and organizations that such discrimination will not take place while they are providing services for the recipient or using his or her facilities.

(e) *Covenants.* (1) Where Federal financial assistance is provided in the form of real property or interest in the property from the Agency, the instrument effecting or recording this transfer shall contain a covenant running with the land to assure nondiscrimination for the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits.

(2) Where no transfer of property is involved but property is purchased or improved with Federal financial assistance, the recipient shall agree to include the covenant described in paragraph (b)(2) of this section in the instrument effecting or recording any subsequent transfer of the property.

(3) Where Federal financial assistance is provided in the form of real property or interest in the property from the Agency, the covenant shall also include a condition coupled with a right to be reserved by the Agency to revert title to the property if there is a breach of the covenant. If a transferee of real property proposes to mortgage or otherwise encumber the real property as security for financing construction of new, or improvement of existing, facilities on the property for the purpose for which the property was transferred, the Administrator may, upon request of the transferee and if necessary to accomplish such financing and upon such conditions as he or she considers appropriate, agree to forbear the exercise of the right to revert title as long as the lien of the mortgage or other encumbrance remains effective.

§ 18d.6 Remedial action, voluntary action and self-evaluation.

(a) *Remedial action.* (1) If the Administrator finds that a recipient has discriminated against qualified persons on the basis of handicap in violation of section 504 or this part, the recipient shall take such remedial action as the Administrator considers necessary to overcome the effects of the discrimination.

(2) Where a recipient is found to have discriminated against qualified persons on the basis of handicap in violation of section 504 or this part and where another recipient exercises control over the recipient that has discriminated, the Administrator, where appropriate, may require either or both recipients to take remedial action.

(3) The Administrator may, where necessary to overcome the effects of discrimination in violation of section 504 or this part, require a recipient to take remedial action with respect to:

(i) Handicapped persons who are no longer participants in the recipient's program but who were participants in the program when such discrimination occurred; or

(ii) Handicapped persons who would have been participants in the program had the discrimination not occurred.

(b) *Voluntary action.* A recipient may take steps, in addition to any action that is required by this part, to overcome the effects of conditions that resulted in limited participation in the recipient's program or activity by qualified handicapped persons.

(c) *Self-evaluation.* (1) A recipient shall, within 1 year of the effective date of this part:

(i) Evaluate with the assistance of interested persons, including handicapped persons or organizations representing handicapped persons, its current policies and practices and the effects of the policies and practices that do not or may not meet the requirements of this part;

(ii) Modify, after consultation with interested persons, including handicapped persons or organizations representing handicapped persons, any policies and practices that do not meet the requirements of this part; and

(iii) Take, after consultation with interested persons, including handicapped persons or organizations representing handicapped persons, appropriate remedial steps to eliminate the effects of any discrimination that resulted from adherence to these policies and practices.

(2) A recipient that employs fifteen or more persons shall, for at least 3 years following completion of the evaluation required under paragraph (c)(1) of this section, maintain on file, make available for public inspection, and provide to the Administrator upon request:

(i) A list of the interested persons consulted;

(ii) A description of areas examined and any problems identified; and

(iii) A description of any modifications made and of any remedial steps taken.

§ 18d.7 Designation of responsible employee.

A recipient that employs fifteen or more persons shall designate at least one person to coordinate its efforts to comply with this part.

§ 18d.8 Notice.

(a) A recipient that employs fifteen or more persons shall take appropriate initial and continuing steps to notify participants, beneficiaries, applicants and employees, including those with impaired vision or hearing, and unions or professional organizations holding collective bargaining or professional agreements with the recipient that it does not discriminate on the basis of handicap in violation of section 504 and this part. The notification shall state, where appropriate, that the recipient does not discriminate in admission or access to, or treatment, or employment in, its programs and activities. The notification shall also include an identification of the responsible employee designated under § 18d.7. A recipient shall make the initial notification required by this paragraph within 90 days of the effective date of this part. Methods of initial and continuing notification may include the posting of notices, publication in newspapers and magazianes, placement of notices in recipient's publication, and distribution of memorandums or other written communications.

(b) If a recipient publishes or uses recruitment materials or publications containing general information that it makes available to participants, beneficiaries, applicants, or employees, it shall include in those materials or publications a statement of the policy described in paragraph (a) of this section. A recipient may meet the requirement of this section either by including appropriate inserts in existing materials and publications or by revising and reprinting the materials and publications.

§ 18d.9 Administrative requirements for certain recipients.

(a) The Administrator may require any recipient with fewer than fifteen employees, or any class of such recipients, to comply with §§ 18d.7 and 18d.8 in whole or in part, when the Administrator finds a violation of this part or finds that such compliance will not significantly impair the ability of the recipient or class of recipients to provide benefits or services.

(b) The Administrator may at his or her discretion exempt certain recipients from compliance with §§ 18d.6(c) and 18d.7.

§ 18d.10 Effect of State or local law or other requirements and effect of employment opportunities.

(a) The obligation to comply with this part is not obviated or alleviated by the existence of any State law or other requirement that, on the basis of handicap, imposes prohibitions or limits upon the eligibility of qualified handicapped persons to receive services or to practice any occupation or profession.

(b) The obligation to comply with this part is not obviated or alleviated because employment opportunities in any occupation or profession are or may be more limited for handicapped persons than for nonhandicapped persons.

Subpart B—Employment Practices

§ 18d.11 Discrimination prohibited.

(a) *General.* (1) No qualified handicapped person shall, on the basis of handicap, be subjected to discrimination in employment under any program or activity to which this part applies.

(2) A recipient shall make all decisions concerning employment under any program or activity to which this part applies in a manner which ensures that discrimination on the basis of handicap does not occur and may not limit, segregate, or classify applicants or employees in any way that adversely affects their opportunities or status because of handicap.

(3) A recipient may not participate in a contractual or other relationship that subjects qualified handicapped applicants or employees to discrimination in employment. The relationships referred to in this section include relationships with employment and referral agencies, with organizations providing or administering fringe benefits to employees of the recipient, and with organizations providing training and apprenticeship programs.

(b) *Specific activities.* Nondiscrimination in employment applies to:

(1) Recruitment, advertising, and the processing of applications for employment;

(2) Hiring, upgrading, award of tenure, demotion, transfer, layoff, and rehiring;

(3) Rates of pay or other forms of compensation and changes in compensation;

(4) Job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;

(5) Leaves of absence, sick leave, or any other leave;

(6) Fringe benefits available by virtue of employment, whether or not administered by the recipient;

(7) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activites, and selection for leaves of absence to pursue training;

(8) Employer sponsored activities, including social or recreational programs; and

(9) Any other term, condition, or privilege of employment.

(c) *Collective bargaining agreements.* A recipient's obligation to comply with this subpart is not affected by any inconsistent term of any collective bargaining agreement to which it is a party.

§ 18d.12 Reasonable accommodation.

(a) A recipient shall make reasonable accommodation to the known physical or mental limitations of a handicapped applicant or employee in order to determine if he or she is qualified to perform essential job skills unless the recipient can demonstrate that the accommodation would impose an undue hardship on the operation of its program.

(b) Reasonable accommodation may include:

(1) Making facilities used by employees readily accessible to and usable by handicapped persons; and

(2) Job restructuring, part-time or modified work schedules, acquisition or modification of equipment or devices, the provision of readers or interpreters and other similar actions.

(c) In determining under paragraph (a) of this section whether an accommodation would impose an undue

MY 3 78
UMI

V 4 3 — 8 6

hardship on the operation of a recipient's program, factors to be considered include:

(1) The overall size of the recipient's program with respect to number of employees, number and type of facilities, and size of budget;

(2) The type of the recipient's operation, including the composition and structure of the recipient's workforce; and

(3) The nature and cost of the accommodation needed.

(d) A recipient may not deny any employment opportunity to a qualified handicapped employee or applicant if the basis for denial is the need to make reasonable accommodation to the physical or mental limitations of the employee or applicant.

§ 18d.13 Employment criteria.

(a) A recipient may not use any employment test or other selection criterion that screens out or tends to screen out handicapped persons or any class of handicapped persons unless:

(1) The test score or other selection criterion, as used by the recipient, is shown to be job-related for the position in question, and

(2) Alternative job-related tests or criteria that do not screen out or tend to screen out as many handicapped persons are not shown by the Administrator to be available.

(b) A recipient shall select and administer tests concerning employment to best ensure that, when administered to an applicant or employee who has a handicap that impairs sensory, manual, or speaking skills, the test results accurately reflect the applicant's or employee's job skills, aptitude, or whatever other factor the test purports to measure, rather than reflecting the applicant's or employee's impaired sensory, manual, or speaking skills (except when those skills are the factors that the test purports to measure).

§ 18d.14 Preemployment inquiries.

(a) Except as provided in paragraphs (b) and (c) of this section, a recipient may not conduct a medical examination or may not inquire of an applicant as to whether the applicant is a handicapped person or as to the nature or severity of a handicap. A recipient may, however, inquire as to an applicant's ability to perform job-related functions.

(b) A recipient may invite applicants for employment to indicate whether and to what extent they are handicapped if:

(1) It is taking remedial action to correct the effects of past discrimination under § 18d.6(a);

(2) It is taking voluntary action to overcome the effects of conditions that resulted in limited participation in its Federally assisted program or activity under § 18d.6(b); or

(3) It is taking affirmative action under section 503 of the Act.

(i) The recipient shall state clearly on any written questionnaire used for this purpose or make clear orally, if no written questionnaire is used, that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts; and

(ii) The recipient shall state that:

(A) The information is being requested on a voluntary basis;

(B) The information will be kept confidential as provided in paragraph (d) of this section;

(C) Refusal to provide the information will not subject the applicant or employee to any adverse treatment; and

(D) The information will be used only in accordance with this part.

(c) Nothing in this section shall prohibit a recipient from conditioning an offer of employment on the results of a medical examination conducted prior the the employee's entrance on duty, if:

(1) All entering employees are subjected to such an examination regardless of handicap; and

(2) The results of such an examination are used only in accordance with the requirements of this part.

(d) Information obtained in accordance with this section as to the medical condition or history of the applicant shall be collected and maintained on separate forms that shall be given confidentiality as medical records, except that:

(1) Supervisors and managers may be informed regarding restrictions on the work or duties of handicapped persons and regarding necessary accommodations;

(2) First aid and safety personnel may be informed, where appropriate, if the condition might require emergency treatment; and

(3) Government officials investigating compliance with the Act shall be provided relevant information upon request.

Subpart C—Program Accessibility

§ 18d.21 Discrimination prohibited.

No qualified handicapped person shall, because a recipient's facilities are inaccessible to or unusable by handicapped persons, be denied the benefits of, be excluded from participation in, or otherwise be subjected to discrimination under any program or activity to which this part applies.

§ 18d.22 Existing facilities.

(a) *Program accessibility.* A recipient shall operate each program or activity to which this part applies so that the program or activity, when viewed in its entirety, is readily accessible to handicapped persons. This paragraph does not require a recipient to make each of its existing facilities or every part of a facility accessible to and usable by handicapped persons.

(b) *Methods.* A recipient may comply with the requirement of paragraph (a) of this section through redesign of equipment, reassignment of classes or other services to accessible buildings, assignment of aides to beneficiaries, home visits, delivery of health, or other social services at alternate accessible sites, alteration of existing facilities and construction of new facilities in conformance with § 18d.23 or any other methods that make its program or activity accessible to handicapped persons. A recipient is not required to make structural changes in existing facilities where other methods are effective in making its programs or activities readily accessible to handicapped persons. In choosing among available methods for complying with paragraph (a) of this section, a recipient shall give priority to methods that offer programs and activities to handicapped persons in the most integrated setting appropriate.

(c) *Small health, welfare or other social service providers, and recipients that operate other than educational programs or activities.* If a recipient with fewer than fifteen employees, finds after consultation with a handicapped person seeking its services, that there is no method of complying with paragraph (a) of this section other than making a significant alteration in its existing facilities, the recipient may, as an alternative, refer the qualified handicapped person to other providers whose services are accessible.

(d) *Time period.* A recipient shall comply with paragraph (a) of this section within 60 days of the effective date of this part except that when structural changes in facilities are necesary, these changes shall be made as soon as possible, but not later than 3 years after the effective date of this part.

(e) *Transition plan.* If structural changes to facilities are necessary to meet the requirement of paragraph (a) of this section, a recipient shall develop a transition plan within 6 months of the effective date of this part. The plan shall be developed with the assistance of interested persons, including handicapped persons or organizations representing handicapped persons. A copy of the transition plan shall be available for public inspection. The plan shall, at a minimum:

(1) Identify physical obstacles in the recipient's facilities that limit the accessibility of its program or activity to handicapped persons;

(2) Describe in detail the methods that will be used to make the facilities accessible;

(3) Specify the schedule for taking the steps necessary to achieve full program accessibility and, if the time period of the transition plan is longer than 1 year, identify steps that will be taken during each year of the transition period; and

(4) Indicate the person responsible for implementation of the plan.

(f) *Notice.* The recipient shall implement procedures to ensure that interested persons, including persons with impaired vision or hearing, can obtain information concerning the existence and location of services, activities, and facilities that are accessible to and usable by handicapped persons.

§ 18d.23 New construction.

(a) *Design and construction.* Each facility or part of a facility constructed by, on behalf of, or for the use of a recipient, after the effective date of this part, shall be designed and constructed so that the facility or part of the facility is readily accessible to and usable by handicapped persons.

(b) *Alteration.* Each facility or part of a facility which is altered by, on behalf of, or for the use of a recipient after the effective date of this part in a manner that effects or could affect the usability of the facility or part of the facility shall, to the maximum extent feasible, be altered so that the altered portion of the facility is readily accessible to and usable by handicapped persons.

(c) *American National Standards Institute accessibility standards.* Design, construction, or alteration of facilities in conformance with the "American National Standard Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped," published by the American National Standards Institute, Inc. (ANSI A117.1-1961(R1971),[1] which is incorporated by reference in this part, shall constitute compliance with paragraphs (a) and (b) of this section. Departures from particular requirements of those standards by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility is provided.

Subpart D—Elementary, Secondary, and Adult Education

§ 18d.31 Application.

This Subpart D applies to elementary, secondary, and adult education programs and activities that receive or benefit from Federal financial assistance.

§ 18d.32 Location and notification.

A recipient that operates a public elementary or secondary educational program shall annually:

(a) Undertake to identify and locate every qualified handicapped person residing in the recipient's jurisdiction who is not receiving a public education; and

(b) Notify handicapped persons and their parents or guardians of the recipient's duty under this subpart.

§ 18d.33 Free appropriate public education.

(a) *General.* A recipient that operates a public elementary or secondary education program shall provide a free appropriate public education to each qualified handicapped person who is in the recipient's jurisdiction, regardless of the nature or severity of the person's handicap.

(b) *Appropriate education.* (1) The provision of an appropriate education is the provision of regular or special education and related aids and services that:

(i) Are designed to meet individual educational needs of handicapped persons as adequately as the needs of nonhandicapped persons are met; and

(ii) Are based upon adherence to procedures that satisfy the requirements of §§ 18d.34, 18d.35, and 18d.36.

(2) Implementation of an individualized education program developed in accordance with the Education of the Handicapped Act is one means of meeting the standard established in paragraph (b)(1)(i) of this section.

(3) A recipient may place a qualified handicapped peson in or refer that person to a program other than the one that it operates as its means of carrying out the requirements of this subpart. The recipients remain responbile for ensuring that the requirements of this subpart are met with respect to any qualified handicapped person so placed or referred.

(c) *Free education.* (1) The provision of a free education is the provision of educational and related services without cost to the handicapped person or to his or her parents or guardian, except for those fees that are imposed on nonhandicapped persons or their parents or guardian. It may consist either of the provision of free services if a recipient places a handicapped person in or refers that person to a program not operated or, by the recipient as its means of carrying out the requirements of this subpart, of payment for the costs of the program. Funds available from any public or private agency may be used to meet the requirements of this subpart. Nothing in this section shall be construed to relieve an insurer or similar third party from an otherwise valid obligation to provide or pay for services provided to a handicapped person.

(2) If a recipient places a handicapped person in or refers that person to a program not operated by the recipient as its means of carrying out the requirements of this subpart, the recipient shall ensure that adequate transportation to and from the program is provided at no greater cost than would be incurred by the person or his or her parents or guardian if the person were placed in the program operated by the recipient.

(3) If placement in a public or private residential program is necessary to provide free appropriate public education to a handicapped person because of his or her handicap, the program including non-medical care and room and board, shall be provided at no cost to the person or his or her parents or guardian.

(4) If a recipient has made available, in conformance with this section and § 18d.34, a free appropriate public education to a handicapped person and the person's parents or guardian chooses to place the person in a private school, the recipient is not required to pay for the person's education in the private school. Disagreements between a parent or guardian and a recipient regarding whether the recipient has made such a program available or regarding the question of financial responsibility are subject to the due process procedures of § 18d.36.

(d) *Compliance.* A recipient may not exclude any qualified handicapped person from a public elementary or secondary education after the effective date of this part. A recipient that is not, on the effective date of this part, in full compliance with the requirements of paragraphs (a) through (c) of this section shall meet those requirements at the earliest practicable time, but not later than September 1, 1978.

§ 18d.34 Educational setting.

(a) *Academic setting.* A recipient shall educate, or shall provide for the education of, each qualified handicapped person in its jurisdiction with persons who are not handicapped to the extent appropriate to the needs of the handicapped person. A recipient shall place a handicapped person in the regular educational environment operated by the recipient unless it is demonstrated by the recipient that the education of the person in the regular environment with the use of supplementary aids and services cannot be achieved satisfactorily. If a recipient places a person in a setting other than the regular educational environment, it shall consider the proximity of the alternate setting to the person's home.

(b) *Nonacademic settings.* In providing or arranging for the provision of nonacademic and extracurricular services and activities, a recipient shall ensure that handicapped persons participate with nonhandicapped persons in those activities and services to the

[1] Copies obtainable from American National Standards Institute, Inc., 1430 Broadway, New York, N.Y. 10018.

M Y 3 — 7 8 UMI

V 4 3 1 8 6

maximum extent appropriate to the needs of the handicapped person in question.

(c) *Comparable facilities.* If a recipient in compliance with paragraph (a) of this section operates a facility for handicapped persons, the recipient shall ensure that the facility and the services and activities provided in that facility are comparable to the other facilities, services, and activities of the recipient.

§ 18d.35 Evaluation and placement.

(a) *Preplacement evaluation.* A recipient that operates a public elementary or secondary education program shall conduct an evaluation of any qualified person who, because of handicap, needs or is believed to need special education or related services before taking any action concerning the initial placement of the person in a regular or special program and any subsequent change in placement.

(b) *Evaluation procedures.* Elementary, secondary, and adult education programs and activities that receive or benefit from Federal financial assistance shall establish standards and procedures which ensure that:

(1) Tests and other evaluation materials have been validated for the specific purpose for which they are used and are administered by trained personnel in conformance with the instructions provided by their producer;

(2) Tests and other evaluation materials include those tailored to assess specific areas of educational need and not merely those which are designed to provide a single general intelligence quotient; and

(3) Tests are selected and administered to best ensure that, when a test is administered to a student with impaired sensory, manual, or speaking skills, the test results accurately reflect the students aptitude or achievment level or whatever other factor the test purports to measure, rather than reflecting the student's impaired sensory, manual, or speaking skills (except where those skills are the factor that the test purports to measure).

(c) *Placement procedure.* In interpreting evaluation data and in making placement decisions, a recipient shall:

(1) Draw upon information from a variety of sources;

(2) Establish procedures to ensure that information obtained from all sources is documented and carefully considered;

(3) Ensure that the placement decision is made by a group of persons, including persons knowledgeable about the student, the meaning of the evaluation data and the placement options; and

(4) Ensure that the placement decision is made in accordance with § 18d.34.

(d) *Reevaluation.* A recipient to which this section applies shall establish procedures, in accordance with paragraph (b) of this section, for periodic reevaluation of students who have been provided special education and related services. A reevaluation procedure consistent with the Education for the Handicapped Act is one means of meeting this requirement.

§ 18d.36 Procedural safeguards.

(a) A recipient that operates a public elementary or secondary education program shall implement a system of procedural safeguards with respect to actions regarding the identification, evaluation, or educational placement of persons who, because of handicap, need or are believed to need special instruction or related services. The system shall include:

(1) Notice;

(2) An opportunity for the parents or guardian of the person to examine relevant records;

(3) An impartial hearing with opportunity for participation by the person's parents or guardian and representation by counsel; and

(4) A review procedure.

(b) Compliance with the procedural safeguards of section 615 of the Education of the Handicapped Act is one means of meeting this requirement.

§ 18d.37 Nonacademic services.

(a) *General.* (1) Elementary, secondary, and adult education programs that receive or benefit from Federal financial assistance shall provide nonacademic and extracurricular services and activities in a manner which gives handicapped students an equal opportunity for participation in these services and activities.

(2) Nonacademic and extracurricular services and activities may include counseling services, physical recreational athletics, transportation, health services, recreational activities, special interest groups and clubs sponsored by the recipient, referrals to agencies which provide assistance to handicapped persons, and employment of students, including both employment by the recipient and assistance in making available outside employment.

(b) *Counseling services.* Elementary, secondary, and adult education programs that receive or benefit from Federal financial assistance and that provide personal, academic, or vocational counseling, guidance, or placement services to its students shall ensure that qualified handicapped students are not counseled toward more restrictive career objectives than are nonhandicapped students with similar interests and abilities.

(c) *Physical education and athletics.* In providing physical education courses and athletics and similar programs and activities to any of its students, an elementary, secondary, or adult education program or activity that receives or benefits from Federal financial assistance may offer to handicapped students physical education and athletic activities that are separate or different from those offered to nonhandicapped students only if:

(1) Separation or differentiation is consistent with § 18d.34; and

(2) No qualified handicapped student is denied the opportunity to compete for teams or to participate in courses that are not separate or different.

§ 18d.38 Adult education programs.

A recipient that operates an adult education program or activity may not, on the basis of handicap, exclude qualified handicapped persons from the program or activity. The recipient shall take into account the needs of these persons in determining the aid, benefits, or services to be provided under the program or activity.

§ 18d.39 Private education programs.

(a) A recipient that operates a private elementary or secondary education program may not on the basis of handicap, exclude a qualified handicapped person from that program if the person can, with minor adjustments, be provided an appropriate education, as defined in § 18d.33(b)(1), within the recipient's program.

(b) A recipient may not charge more for providing an appropriate education for handicapped persons than to nonhandicapped persons except to the extent that any additional charge is justified by a substantial increase in cost to the recipient.

(c) A recipient to which this section applies that operates special education programs shall operate those programs in accordance with §§ 18d.35 and 18d.36. Each recipient to which this section applies is subject to §§ 18d.34, 18d.37, and 18d.38.

Subpart E—Postsecondary Education

§ 18d.41 Application.

This Subpart E applies to postsecondary education programs and activities that receive or benefit from Federal financial assistance.

§ 18d.42 Admissions and recruitment.

(a) *General.* Qualified handicapped persons may not, on the basis of handicap, be denied admission or be subjected to discrimination in admission or recruitment by a recipient.

(b) *Admission.* In administering its admission policies, a recipent:

(1) May not apply limitations on the number or proportion of handicapped persons who may be admitted;

(2) May not use any test or criterion for admission that has a disproportionate, adverse effect on handicapped persons or any class of handicapped persons unless:

(i) The test or criterion, as used by the recipient, has been validated as a predictor of success in the education program or activity in question; and

(ii) Alternate tests or criteria that have a less disproportionate, adverse effect are not shown by the Administrator to be available;

(3) Shall assure itself that:

(i) Admissions tests are selected and administered to best ensure that, when a test is administered to an applicant who has a handicap that impairs sensory, manual, or speaking skills, the test results accurately reflect the applicant's aptitude or achievement level or whatever other factors the test purports to measure, rather than reflecting the applicant's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure);

(ii) Admissions tests that are designed for persons with impaired sensory, manual, or speaking skills are offered as often and in as timely a manner as are other admissions tests; and

(iii) Admissions tests are administered in facilities that, on the whole, are accessible to handicapped persons; and

(4) Except as provided in paragraph (c) of this section, may not inquire as to whether an applicant for admission is a handicapped person. After admission, the recipient may inquire on a confidential basis as to handicaps that may require accommodation.

(c) *Preadmission inquiry exception.* When a recipient is taking remedial action to correct the effects of past discrimination under § 18d.6(a) or when a recipient is taking voluntary action to overcome the effects of conditions that resulted in limited participation in its Federally assisted program or activity under § 18d.6(b), the recipient may invite applicants for admission to indicate whether and to what extent they are handicapped.

(1) The recipient shall state clearly on any written questionnaire used for this purpose or make clear orally if no written questionnaire is used that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary action efforts; and

(2) The recipient shall state clearly that the information is being requested on a voluntary basis, that it will be kept confidential, that refusal to provide it will not subject the applicant to any adverse treatment, and that it will be used only in accordance with this part.

(d) *Validity studies.* For the purpose of paragraph (b)(2) of this section, a recipient may base prediction equations on first year grades, but shall conduct periodic validity studies against the education program or activity in question to monitor the general validity of the test scores.

§ 18d.43 General treatment of students.

(a) No qualified handicapped student shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any academic, research, occupational training, housing, health insurance, counseling, financial aid, physical education, athletics, recreation, transportation, other extracurricular, or other program or activity operated by a recipient.

(b) A recipient that considers participation by students in education programs or activities not operated wholly by the recipient as part of, or equivalent to, an education program or activity operated by the recipient shall assure itself that the other education program or activity, as a whole, provides an equal opportunity for the participation of qualified handicapped persons.

(c) A recipient shall operate its programs and activities in the most integrated setting appropriate.

§ 18d.44 Academic adjustments.

(a) *Academic requirements.* A recipient shall make necessary modifications to its academic requirements to ensure that these requirements do not discriminate or have the effects of discriminating, on the basis of handicap, against a qualified handicapped applicant or student. Modifications may include changes in the length of time permitted for the completion of degree requirements, substitution of specific courses required for the completion of degree requirements, and adaption of the manner in which specific courses are conducted. Academic requirements that the recipient can demonstrate are essential to the program of instruction being pursued by the student or to any directly related licensing requirements will not regarded as discriminatory within the meaning of this section.

(b) *Other rules.* A recipient may not impose upon handicapped students other rules, such as the prohibition of tape recorders in classrooms or guide dogs in campus buildings, that limit the participation of handicapped students in the recipient's education program or activity.

(c) *Course examinations.* In its course examinations or other procedures for evaluating students' academic achievement in its program, a recipient shall provide methods for evaluating the achievement of students who have a handicap that impairs sensory, manual, or speaking skills that will best ensure that the results of the evaluation represent the students' achievement in the course, rather than reflect the students' impaired sensory, manual, or speaking skills (except where such skills are the factors that the test purports to measure).

(d) *Auxiliary aids.* (1) A recipient shall ensure that no qualified handicapped student is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination under the education program or activity operated by the recipient because of the absence of educational auxiliary aids for students with impaired sensory, manual, or speaking skills.

(2) Auxiliary aids may include taped texts, interpreters or other effective methods of making orally delivered materials available to students with hearing impairments, readers in libraries for students with visual impairments, classroom equipment adapted for use by students with manual impairments, and other similar services and actions. Recipients need not provide attendants, individually prescribed devices, readers for personal use or study, or other devices or services of a personal nature.

§ 18d.45 Housing.

(a) *Housing provided by a recipient.* A recipient that provides housing to its nonhandicapped students shall provide comparable, convenient, and accessible housing to quailifed handicapped students at the same cost as to others. At the end of the transition period provided for in § 18d.22(e), this housing shall be available in sufficient quantity and variety so that the scope of handicapped students' choice of living accommodations is, as a whole, comparable to that of nonhandicapped students.

(b) *Other housing.* A recipient that assists any agency, organization, or person in making housing available to any of its students shall assure itself that such housing is, as a whole, made available in a manner that does not result in discrimination on the basis of handicap.

§ 18d.46 Financial and employment assistance to students.

(a) *Provisions of financial assistance.* (1) In providing financial assistance to qualified handicapped persons, a recipient may not:

(i) On the basis of handicap, provide less assistance than is provided to nonhandicapped persons, limit eligibility for assistance, or otherwise discriminate; or

(ii) Assist any entity or person that provides assistance to any of the recipient's students in a manner that discriminates against qualified handicapped persons on the basis of handicap.

(2) A recipient may administer or assist in the administration of scholar-

M Y 3 7 8 UMI

V 4 3 | 8 6

ships, fellowships, or other forms of financial assistance established under wills, trusts, bequests, or similar legal instruments that require awards to be made on the basis of factors that discriminate or have the effect of discriminating on the basis of handicap only if the overall effect of the award of scholarships, fellowships, and other forms of financial assistance is not discriminatory on the basis of handicap.

(b) *Assistance in making available outside employment.* A recipient that assists any agency, organization, or person in providing employment opportunities to any of its students shall assure itself that these employment opportunities, as a whole, are made available in a manner that would not violate Subpart B of this part if the opportunities were provided by the recipient.

(c) *Employment of students by recipients.* A recipient that employs any of its students may not do so in a manner that violates Subpart B of this part.

§ 18d.47 Nonacademic services.

(a) *Physical education and athletics.* (1) In providing physical education courses and athletics and similar programs and activities to any of its students, a recipient may not discriminate on the basis of handicap.

(2) A recipient may offer to handicapped students physical education and athletic activities that are separate or different only if separation or differentiation is consistent with the requirements of § 18d.43(c) and only if no qualified handicapped student is denied the opportunity to compete for teams or to participate in courses that are not separate or different.

(b) *Counseling and placement services.* A recipient that provides personal, academic, or vocational counseling, guidance, or placement services to its students shall provide these services without discrimination on the basis of handicap. The recipient shall ensure that qualified handicapped students are not counseled toward more restrictive career objectives than are nonhandicapped students with similar interests and abilities. This requirement does not preclude a recipient from providing factual information about licensing and certification requirements that may present obstacles to handicapped persons in their pursuit of particular careers.

(c) *Social organizations.* A recipient that provides significant assistance to fraternities, sororities, or similar organizations shall assure itself that the membership practices of these organizations do not permit discrimination otherwise prohibited by this subpart.

Subpart F—Health and Social Services

§ 18d.51 Application.

This Subpart F applies to health, and other social service programs and activities that receive or benefit from Federal financial assistance.

§ 18d.52 Health and other social services.

(a) *General.* In providing health, or other social services or benefits, a recipient may not, on the basis of handicap:

(1) Deny a qualified handicapped person these benefits or services;

(2) Give a qualified handicapped person an opportunity to receive benefits or services that is not equal to that offered nonhandicapped persons;

(3) Provide a qualified handicapped person with benefits or services that are not as effective (as defined in § 18d.4(b)(2)) as the benefits or services provided to others;

(4) Provide benefits or services in a manner that limits or has the effect of limiting the participation of qualified handicapped persons; or

(5) Provide different or separate benefits or services to handicapped persons except where necessary to provide qualified handicapped persons with benefits and services that are as effective as those provided to others.

(b) *Notice.* A recipient that provides notice concerning benefits or services or written material concerning waivers of rights or consent to treatment shall ensure that qualified handicapped persons, including those with impaired sensory or speaking skills, are not denied effective notice because of their handicap.

(c) *Auxiliary aids.* (1) A recipient that employs fifteen or more persons shall provide appropriate auxiliary aids to persons with impaired sensory, manual, or speaking skills, where necessary to give these persons an equal opportunity to benefit from the service in question.

(2) The Administrator may require recipients with fewer than fifteen employees to provide auxiliary aids where the provision of aids would not significantly impair the ability of the recipient to provide its benefits or services.

(3) Auxiliary aids may include brailled and taped material, interpreters, and aids for persons with impaired hearing or vision.

§ 18d.53 Drug and alcohol addicts.

A recipient that operates a general hospital or outpatient facility may not discriminate, with regard to a drug or alcohol abuser or alcoholic who is suffering from a medical condition, in the admission of that person for treatment of the medical condition, or in the treatment of the medical condition because of the person's drug or alcohol abuse or alcoholism.

§ 18d.54 Education of institutionalized persons.

A recipient that operates or supervises a program or activity for persons who are institutionalized because of handicap and is responsible for providing training shall ensure that each qualified handicapped person, as defined in § 18d.3(k)(2), in its program or activity is provided an appropriate education, as defined in § 18d.33(b). Nothing in this section shall be interpreted as altering in any way the obligations of recipients under subpart D.

Subpart G—Procedures

§ 18d.61 Procedures.

The procedural provisions applicable to title VI of the Civil Rights Act of 1964 apply to this part. These procedures are found in §§ 18.6 through 18.11 and Part 18b of this chapter.

APPENDIX A—STATUTORY PROVISIONS TO WHICH THIS PART APPLIES

1. Payments to State Homes (38 U.S.C. 641-643).
2. State home facilities for furnishing domiciliary, nursing home, and hospital care (38 U.S.C. 5031-5037).
3. Community nursing home care (38 U.S.C. 620).
4. Sharing of medical facilities, equipment, and information (38 U.S.C. 5051-5057).
5. Assistance in establishing new state medical schools, grants to affiliated medical schools; assistance to health manpower training institutions (38 U.S.C. ch. 82).
6. Approval of educational institutions (38 U.S.C. 104).
7. Medical care for survivors and dependents of certain veterans (38 U.S.C. 613).
8. Space and office facilities for representatives of State employment service (38 U.S.C. 244(4)).
9. Space and office facilities for representatives of recognized national service organizations (38 U.S.C. 3402(a)(2)).
10. Vocational rehabilitation, post-Vietnam era veterans educational assistance, veterans educational assistance, dependents educational assistance, and administration of educational assistance (38 U.S.C. chs. 31, 32, 34, 35 and 36 respectively).
11. Automobile and adaptive equipment for certain disabled veterans and members of the Armed Forces (38 U.S.C. ch. 39).
12. Specially adapted housing for disabled veterans (38 U.S.C. 801-805).
13. Veterans housing—direct loans (38 U.S.C. 1811).
14. Burial benefits (38 U.S.C. ch. 23).

Fish and Wildlife Service

STATUS OF NATIVE SPECIES PROTECTED BY ENDANGERED SPECIES CONVENTION

Advance Notice of Potential Rulemaking

V 4 3 — 8 6 MY 3 7 8 UMI

[4310-55]

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 23]

STATUS OF NATIVE SPECIES PROTECTED BY THE ENDANGERED SPECIES CONVENTION

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Advance notice of potential rulemaking.

SUMMARY: The Service is surveying the status of all species of wildlife native to the United States that are listed in Appendices I and II of the Endangered Species Convention in order to determine if they are appropriately listed. Each of the nations party to the convention is to conduct a similar survey and submit proposals for appropriate changes that will be considered at the next meeting of the Parties. This notice summarizes the preliminary results of the United States survey, and invites the public to supply information that will assist the Service in determining the status of certain native wildlife species. A public meeting will be held on May 31, 1978, in Washington, D.C. to discuss the issues raised in this survey.

DATES: The Service will consider all comments received by July 3, 1978.

ADDRESSES: Please send comments to the Director, U.S. Fish and Wildlife Service, Federal Wildlife Permit Office, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Dr. Richard L. Jachowski, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, phone 202-254-8100.

SUPPLEMENTARY INFORMATION: The Convention on International Trade in Endangered Species of Wild Fauna and Flora has three appendices listing species that are subject to regulation. According to Article II of the Convention:

1. Appendix I shall include all species threatened with extinction which are or may be affected by trade. Trade in specimens of these species must be subject to particularly strict regulation in order not to endanger further their survival and must only be authorized in exceptional circumstances.

2. Appendix II shall include:

(a) all species which although not necessarily now threatened with extinction may become so unless trade in specimens of such species is subject to strict regulation in order to avoid utilization incompatible with their survival; and

(b) other species which must be subject to regulation in order that trade in specimens of certain species referred to in sub-paragraph (a) of this paragraph may be brought under effective control.

3. Appendix III shall include all species which any Party identifies as being subject to regulation within its jurisdiction for the purpose of preventing or restricting exploitation, and as needing the cooperation of other parties in the control of trade.

Appendices I and II were developed in 1973 when the Convention was negotiated at a plenipotentiary conference of 80 nations in Washington, D.C. The International Union for Conservation of Nature and Natural Resources (IUCN), which prepared the original draft of the Convention, also developed a list of wildlife species in need of protection. The final composition of Appendices I and II (containing about 419 and 264 taxa respectively) was negotiated at the Conference, with many nations proposing changes in the original list (41 FR 24367).

Subsequent changes in Appendices I and II were not made until the nations party to the Convention met in November 1976 in Berne, Switzerland. The 122 changes in the listed taxa made at Berne became effective on February 4, 1977, 90 days after their adoption. No further changes have occurred since the list of species in 50 CFR, Part 23 was published. (42 FR 10462).

The Parties decided to adopt criteria for adding or deleting species after reviewing the more than 600 proposals to amend Appendices I and II that were submitted in 1976. The criteria stress the need to consider both the biological status and the trade status of the species. The Service's proposed rule on the procedure for changing the appendices includes these criteria. (43 FR 12349). They are reprinted below.

§ 23.21 Criteria for amending the appendices.

(a) *Additions, general rule.* Species may only be added to Appendix I, II or III if they meet the following internationally agreed criteria. In determining the appropriate appendix in which a species should be included, the biological and trade status of the species should be evaluated together. Trade in this context means any import, export or re-export.

(b) *Additions to Appendix I.* Appendix I shall include species threatened with extinction which are or may be affected by trade.

(1) *Biological status.* To qualify for Appendix I, a species must be currently threatened with extinction. Information of any of the following types is required, in order of preference: (i) scientific reports on the population size or geographic range of the species based on single surveys; (ii) reports by reliable observers other than scientists on the population size or geographic range of the species over a number of years; or (iv) reports from various sources on habitat destruction, heavy trade or other potential causes of extinction. Genera are included if most of their species are threatened with extinction and if identification of individual species within the genus is diffucult. The same applies to the listing of any smaller taxa within larger ones. If most of the smaller taxa are not threatened, but identification of individual species is difficult, the entire larger taxon should be placed on Appendix II. Species included an Appendix I because of difficulty in distinguishing them from threatened species in the same higher taxon should be annotated as such in the appendix.

(2) *Trade status.* Species meeting the biological criteria should be listed in Appendix I if they are or may be affected by international trade. This includes any species that might be expected to be traded for any purpose, scientific or otherwise. Particular attention should be given to any species for which such trade might, over a period of time, involve numbers of specimens constituting a significant portion of the total population size necessary for the continued survival of the species. The biological status and trade status of a species are obviously related. When biological data show a species to be declining seriously, there need be only a probability of trade. When trade is known to occur, information on the biological status need not be as complete. This principle especially applies to groups of related species, where trade can readily shift from one species that is well-known to another for which there is little biological information.

(c) *Additions to Appendix II.* Appendix II shall include species which although not necessarily now threatened with extinction may become so unless trade in wildlife and plants of such species is subject to strict regulation in order to avoid utilization incompatible with their survival, and other species which must be subject to regulation in order that trade in such species of wildlife and plants may be brought under effective control.

(1) *Biological status.* To qualify for Appendix II, a species need not currently be threatened with extinction, but there should be some indication that it might become so. Such an indication might be a decreasing or very limited population size or geographic range of distribution. Information on biological status should be one of the types required for Appendix I species. Genera should be listed if some of their species are threatened and identification of individual species within the genus is difficult. The same should apply to listing any smaller taxa within larger ones.

(2) *Trade status.* Species meeting the biological criteria should be listed if they presently are subject to trade or are likely to become subject to trade. The latter situation can arise where heavy trade in one species is extended to include similar species if the demand grows or if supplies of the one species are depleted. The amount of trade that a species can sustain without threat of extinction generally will be greater for species in Appendix II than for those in Appendix I, so there should be evidence of actual or expected trade in such a volume as to constitute a potential threat to survival of the species. Appendix II serves in part as a monitoring tool to gather trade data. The monitoring of a species in Appendix II can indicate if similar species not listed in Appendix I or II are likely to be subject to trade.

(d) *Additions to Appendix III.* Appendix III shall include species which any party identifies as being subject to regulation within its jurisdiction for the purpose of preventing or restricting exploitation, and as needing the cooperation of other parties in the control of trade.

(e) *Deletions and transfers from Appendices I and II.* Species may only be deleted from Appendix I or II, or transferred from Appendix I to Appendix II if the following internationally agreed criterion is met. There must be positive scientific evidence

that the species can withstand the exploitation resulting from the removal of protection afforded by the present listing. This evidence must transcend informal or lay evidence of changing biological status and any evidence of commercial trade which may have been sufficient to require the species to be placed on an appendix intially. Such evidence should include at least a well-documented population survey, an indication of the population trend of the species, showing recovery sufficient to justify deletion or transfer, and an analysis of the potential for commercial trade in the species.

(f) *Deletions from Appendix III.* Any party that has submitted a species for inclusion in Appendix III may withdraw it at any time.

A Special Working Session was held in October 1977 in Geneva, Switzerland, to discuss certain issues concerning implementation of the Convention that the Parties were unable to resolve at their first meeting. The participants in the Special Working Session recommended that the Parties supply certain types of information in any future proposals to change Appendix I or II. The Service included these types of information in the requirements for petitions in the proposed rule on the procedure for changing the appendices (43 FR 12349). The participants also recommended that the Parties review the species of wildlife listed in the current appendices in order to make any necessary corrections at the next meeting.

Under the terms of ths review, each Party is to survey the status of all species of wildlife listed in Appendices I and II that are native to its country. In cases where a species occurs in more than one Party country, the Secretariat of the Convention has designated one of the Parties to coordinate the review. The Service identified 134 species of wildlife in Appendices I and II that are native to the United States, and published a notice in the FEDERAL REGISTER on March 6, 1978, requesting information on them (43 FR 9169). The Service also communicated this list to the Secretariat for purposes of coordination and to other countries with a request for information on species in common.

The Secretariat has requested that Parties submit formal proposals to amend Appendices I and II by August 15, 1978, in order that they may be considered at the next meeting of the Conference of the Parties. The meeting is to be held March 19-31, 1979, in San Jose, Costa Rica.

The purposes of the present notice are to announce the preliminary results of the survey of 134 wildlife species in the United States and to request additional comments and information. The present results are based on a study of all information available to the Service at the time this notice was prepared. It should be emphasized that the findings are preliminary and may be modified in light of significant new information.

Following receipt of additional information and comments, the Service will review these findings and prepare formal proposals to make appropriate changes in the appendices. Any proposals that the Service communicates to the Secretariat will be announced simultaneously as a proposed rulemaking in the FEDERAL REGISTER. Information and comments received subsequent to the proposed rulemaking will assist the Service in determining if its formal proposals should be modified before they are considered by the Parties. A final rulemaking will be published after the meeting of the Parties, announcing those amendments to Appendices I and II that the Parties adopt.

Key to bases for recommendations: (1) Available biological and trade information indicates the species is now appropriately listed because of its biological and international trade status; (2) available biological and trade information does not meet requirements to effect a change under the criteria, but it suggests the species should be reclassified because of its biological status; (3) available biological and trade information does not meet requirements to effect a change under the criteria, but it suggests the species should be reclassified because of its trade status; (4) available biological and trade information meets the criteria to indicate the species should be reclassified because of its biological status; (5) available biological and trade information meets the criteria to indicate the species should be reclassified because of its trade status; (6) available biological and trade information indicates the species should be listed because of its similarity in appearance to other listed species, subspecies or populations of the same species; and (7) available biological and trade information does not meet requirements of the criteria to effect a change and it does not suggest the species should be reclassified.

The reasons for the preliminary findings presented in this table are explained below. Discussions of species are grouped according to the basis for the recommended listing.

(1) Species for which the available biological and trade information indicate that they are now appropriately listed because of their biological and trade status.

There are 12 mammals, 13 birds, 6 reptiles, and 2 fishes, or 33 of the 134 listed native species that appear to fit this category, according to information examined by the Service. This information on present and historical abundance and range of geographic distribution, and on the extent of international trade appears sufficient to warrant the current listings of these species in the appendices. There is actual or potential trade in each species, and each is currently (Appendix I) or potentially (Appendix II) threatened with extinction according to the most recent data.

The mammals recommended for retention in their current listings on this basis include the whales, polar bear, dugong, and manatee.

Among the species of birds recommended for retention in their current listings on the basis that they fit the criteria are several raptors. The bald eagle in most of the 48 conterminous United States is reduced in abundance to the extent that it qualifies for Appendix I, but populations in Canada and Alaska are not currently threatened with extinction (see discussion below). The Convention provides that geographically separate populations of a biological species or subspecies may be treated as separate "species" for purpose of control, provided they are listed as such in the appendices.

The Prairie falcon, merlin, gyrfalcon and goshawk are commonly used in falconry. Information on their abundance is either slight or conflicting, but the high potential for trade indicates they should be retained on Appendix II.

The decline of the peregrine falcon in Europe and North America has been closely studied, and is linked to pesticides. Recent surveys throughout much of North America found that at best the decline has slowed or stopped, but in many places the breeding rate was continuing to drop. Banding studies and counts of migratory hawks indicate increase but so far do not provide statistically sufficient data for analysis. If populations were at normal levels, the demand for falconry birds might be insignificant relative to the total population. Because of their reduced present level, any trade needs to be strictly controlled.

All of the listed sea turtles are recommended to remain in Appendix I because population trends indicate rapid declines, some of the species have very low breeding populations, and the commercial harvest of adults and destruction of nests are continuing threats to their survival.

(2) Species for which the available biological and trade information does not meet requirements of the criteria to effect a change, but suggests that the species should be reclassified because of its biological status.

The criteria for deletion of a species from Appendix I or II, or transfer from Appendix I to Appendix II, require scientific evidence of population size and trend showing recovery of the species and an analysis of the potential for commercial trade. The criteria for deletion of a species from the appendices or its transfer from Appendix I to Appendix II are more rigorous than those for addition of a species because the Parties recognized that prematurely reducing the protection afforded a species could result in permanent loss of the resource. Errors in listing, if any, were to favor the wildlife or plant rather than its exploitation. The basic test for such transfer or deletions is whether or not the species can withstand the exploitation that would follow this reduction or loss of protection. There are 3 mammals, 4 birds and 1 fish among the listed native species for which the data show substantial populations, but these data do not meet the requirements of the criteria for deletion or transfer from Appendix I to Appendix II. It appears that if more complete information on the biological status of these species becomes available, it might be appropriate to effect such changes, in light of our current knowledge of international trade in them.

While the natural range of the Atlantic sturgeon apparently has been severly limited, this fish has been reported in numbers sufficient not to be considered currently threatened with extinction.

Trophy hunting of the bighorn sheep continues in the United States, Canada, and Mexico with little knowledge of the recovery rate of this species. It's range has been greatly reduced and the current population has been reported at no more than 18,000 to 20,000, down from an estimated 1.5 million to 2 million in the last century. New herds have been introduced into many areas to re-establish the species and in some instances these introductions have been successful. Habitat protection is the basic need because, except for a few fragments that have escaped overgrazing by domestic livestock, the habitat of the bighorn has been destroyed.

Reported increasing in population in the United States, the Mearn's quail has recovered sufficiently in part of its range to withstand controlled hunting, but the status is unknown over the greater part of its range in Mexico.

The Alaskan and Canadian grizzly or brown bears continue to be taken by trophy hunters from various parts of the world. The pelt of the gray wolf is extremely warm and used in the manufacture of cold weather clothing. Substantial populations of both species occur in Alaska and Canada. While current biological data are not complete on these species, the Service has received substantial information on these animals too late to be considered in the present notice, but it will be included in the subsequent findings.

The golden eagle is a widespread species, of which the United States populations do not appear to be potentially threatened with extinction in spite of persecution and some utilization for falconry, taxidermy and feathers. However, it is very difficult to distingush U.S. specimens from specimens entering international trade from other countries where the species requires strict protection.

The snowy owl is periodically abundant in Alaska and Canada, and is frequently sighted in northern parts of the 48 conterminous United States during those periods of abundance farther north. The bird does not appear to be potentially threatened with extinction, although accurate population data are unavailable. Trade appears to be limited to taxidermy and local use for food.

(3) Species for which the available biological and trade information does not meet requirements of the criteria to effect a change, but suggests that

V 4 3 — 8 6

the species should be reclassified because of its trade status.

There are 9 mammals, 11 birds, 3 fishes, and 1 mollusc or 24 of the 134 listed native species for which no positive evidence of current national or international trade is available. In addition, each of these species is protected under state or Federal law, which greatly reduces the potential for trade. Knowledge of the present and historical abundance and geographic range is variable and in no case does it appear to meet the requirements of the criteria for deletion or transfer of a species from Appendix II. However, the lack of evidence for, and unlikelihood of, trade in these species suggests that their listing in the appendices serves no useful purpose in a Convention intended to regulate international movement of wildlife and plants. Any reduction in protection afforded by the Convention is not expected to harm these species.

The puma, for example, is widespread in distribution although it has been extirpated in many of the settled portions of North America and two subspecies are threatened with extinction. The species still persists in wilder regions of the New World, and is regularly sport-hunted in the western states except California, and in Mexico and central and South America. The species appears to be adequately managed for a sustained sport harvest in certain western states, but there has been a general decline in its abundance. The potential for international trade in the puma is slight and is unlikely to present a threat to its survival.

The marsh hawk is apparently numerous in the United States wherever suitable marshland is available. The U.S. Fish and Wildlife Service Breeding Bird Survey shows this species has declined 5 percent per year over the past 10 years, but numbers of individuals are still large. There is little likelihood of trade; the species is unimportant in falconry. Current information on the biological and trade status of the bird thus suggests it should not be listed in Appendix II, but this information does not meet the requirements of the criteria for deletion.

(4) Species for which the available biological and trade information meets the criteria to indicate they should be reclassified because of their biological status.

Biological status alone is not sufficient to effect a change in listing under the criteria; it must be considered along with trade status to evaluate the impact that any reclassification might have on the species. However, for some species it is biological status, rather than trade status, that primarily indicates the need for reclassification.

This survey indicates that there are 3 mammals, 3 birds, 2 reptiles, 2 fishes and 2 mussels for which the information on biological status appears sufficient to effect a change in the listing, given what is known about trade status. Certain of these species are believed to be extinct since no living specimens have been found after many years of searching. The criteria do not specifically address this situation, but it is clear that the listing of the species is not appropriate in view of the fundamental principles of the Convention.

The West Indian monk seal, the longjaw cisco and the blue pike of the Great Lakes, and the yellow-blossom and Sampson's pearly mussels fit this category of apparent extinction as no specimens have been found in recent years. For example, no living specimen of the longjaw cisco has been seen since 1952.

The Mexican duck has recently been reclassified as a subspecies of the mallard duck (*Anas platyrhynchos*); current nomenclature for this subspecies is *Anas platyrhynchos diazi*. The U.S. population of *diazi*-like ducks contains only about 10% pure individuals. Recent surveys in Mexico indicate the taxon is secure there.

There currently appears to be no potential trade in the northern elephant seal, and its population is increasing under protective measures.

The greater prairie chicken has recovered in such numbers that it may now be taken legally by hunters within parts of its range.

A reported 46 percent increase between 1970 and 1974 enlarged the total U.S. population of American alligators to almost 750,000 individuals. This species should, therefore, no longer be considered as currently threatened with extinction.

Surveys report the U.S. population of the American kestrel to exceed 300,000 individuals. The U.S. Fish and Wildlife Service Breeding Bird Survey shows it to have increased in abundance in the United States over the past 10 years. The species is widespread throughout North and South America. While there is limited local use of this species for falconry it cannot be considered as endangered or in significant international trade.

There are only 200-400 known individuals of the American crocodile in the United States. Furthermore, respondents suggest this population has only 25 known breeding females and practically no current survival of the hatchlings. The United States population of this species should be placed in Appendix I to receive the protection afforded a species threatened with extinction, for which there is a high risk that specimens could illegally enter the extensive trade in crocodilian hides. The biological status of other populations of this species in the Caribbean and Mexico is poorly known, and they should be retained in Appendix II.

(5) Species for which the available biological and trade information meets the criteria to indicate they should be reclassified because of their trade status.

There are a mammal, a bird and a reptile among the listed species for which the information on present and historical abundance and range of geographic distribution, and on the extent of international trade apears sufficient to warrant reclassification. When it is suggested that a species should be reclassified because of trade status, this means that trade status, rather than biological status, primarily indicates the need for reclassification. However, trade status alone is not sufficient to effect a change in listing under the criteria.

The northern elephant seal, for example, is completely protected from trade in the United States under Federal law, and its population has made a well-documented recovery in recent years. Current information indicates that it is not threatened with extinction, and that there is little likelihood of trade to justify retaining it in the appendices.

(6) Species for which the available biological and trade information indicates they should be listed because of similarity in appearance to other listed species, subspecies or geographically separate populations of the same species.

The fundamental principles of the Convention provide that species may be listed in Appendix II, subjecting them to regulation in order that trade in other species meeting the biological and trade criteria may be brought under effective control. The reason is that it can be difficult to distinguish between a species needing protection and a close relative that does not need protection, especially if the specimen is a part or derivative. There are three mammals and a bird among the listed native species that qualify for listing on this basis. They are difficult for persons trained in wildlife identification to distinguish from other listed species, subspecies or geographically separate populations of the same species.

The southern sea otter, which has recovered in abundance and is protected from trade by state and Federal law, so closely resembles the northern sea otter when processed as a pelt that it should be retained in Appendix II.

The pelt of the river otter likewise is very difficult to distinguish from that of other species of otters that are currently or potentially threatened with extinction. This is one basis for recommending that the otter be retained in Appendix II; another basis for its proposed retention is discussed below.

The Mexican subspecies of the pronghorn exists in sufficient numbers

to be subject to controlled hunting in the U.S. Trophy specimens of the Mexican pronghorn closely resemble those of the Sonoran pronghorn, which is treatened with extinction and listed in Appendix I.

(7) Species for which the available biological and trade information does not meet requirements of the criteria to effect a change and does not suggest the species should be reclassified.

This survey confirmed that there are a number of species listed in the appendices about which very little is known. The available information on population size and trends, or on the extent of international trade in certain of these species is so incomplete that it is very difficult to determine if they should be retained in their current listing or if they should be reclassified or deleted from the appendices. If they were not now listed, it is doubtful that many of these species would meet the current criteria for addition to Appendices I and II. This finding applies to 8 mammals, 4 birds, 21 reptiles, 1 amphibian and 30 molluscs, or 64 of the 134 listed species. There is evidence of substantial trade in some of these species, but little indication of the impact it has on the survival of wild populations. The criteria emphasize that deletion or transfer from Appendix I to Appendix II should require scientific evidence of population size and trend showing recovery of the species and an analysis of the potential for commercial trade, showing that the species could withstand the exploitation resulting from a reduction of protection afforded by the Convention.

The secretive nature of the wild cats has made it difficult to determine their biological status. Many of them are heavily hunted for their pelts and there is little information on population levels or on recovery rates of exploited population.

Information on the population biology of the bobcat is fragmentary, despite a number of recent studies to determine the status of this species. Information from various sources indicates that substantial numbers of bobcats occur in the United States, and that the species occupies much of its original geographic range. However, it is easily trapped and the market value of its fur has increased greatly in the last few years. The effect of the expected increase in trapping on populations cannot be predicted with any certainty. The basis for listing species of the family Felidae in Appendix was as follows. "All cats are potentially involved in the fur trade, and the scale of this trade is such that all species must be considered as vulnerable, few populations now remaining unaffected. All wild species not in Appendix I should be on Appendix II, so that the scale of their occurrence in trade can be monitored." Given our current knowledge of this species and the basis for its inclusion in the appendices, the Service recommends that it be kept in Appendix II to aid in monitoring and that the listing be annotated to indicate this. Otherwise, it might be appropriate to transfer this species to Appendix III, where exports could be monitored without necessarily placing limits on the quantity of pelts that are shipped until the impact of trade is known.

The lynx was listed in Appendix II for the same reason as the bobcat. The species is in high demand for its pelts, and its abundance is poorly documented except in a few localities. Lynx have cycles of abundance and scarcity linked to abundance of the snowshoe hare, and it is possible that heavy trapping of lynx in a period of scarcity could harm their populations. Evidence is inadequate to determine if international trade in this species should be controlled. The Service has received substantial information on the lynx too late to be considered in the present notice, but it will be considered in the subsequent findings.

The river otter is found and harvested in many areas of the United States and Canada, but knowledge of its population biology and the impact of the fur trade is very incomplete. As with the bobcat, studies are underway to clarify its status in parts of the United States. This species was listed along with others of its subfamily because of heavy fur trade and similarity in appearance among the pelts of different species. The Service has also received substantial information on this species too late to be considered in the present notice.

The Tule white-fronted goose also fits this situation. There is little information on its population, aside from the general knowlede that it is small. The potential for trade is low and would most likely involve hunting and aviculture.

The Sonoran toad is a species for which there are no population data and no evidence of international trade although there might be some potential for pet trade.

Many of the listed reptiles are known to be subject to trade: crocodilians, boas, and monitor lizards for their skins; tortoises, lizards and snakes for use as pets. This trade is extensive, but its impact on the survival of the wildlife populations is poorly known. There is little reliable information on past or present population levels or on changes in geographic ranges of distribution of these species.

The numerous species and subspecies of freshwater mussels listed in the appendices are known to have small ranges of distribution and low population sizes, but there are few well-documented population surveys. Freshwater mussels are commercially harvested for their shells, which are exported, and some of the listed species are likely to be harvested along with other more abundant species. However, there are no data on the extent to which the listed species are included in commercial harvests.

This survey of native species is being conducted to determine if the species are appropriately listed, given the criteria adopted by the Party nations. It is evident that certain of the listed species do not benefit from inclusion in Appendix I or II, and that the criteria for deletion or transfer prevent some appropriate changes from being made. Therefore, the Service is considering the possibility of proposing not only changes in the listings of certain species, but also changes in the criteria that would allow the Parties to develop appendices that reflect the best available biological and trade information.

The Service welcomes additional information and comments that will assist in evaluating these preliminary findings and the criteria, and in preparing appropriate proposals to amend the appendices. All materials that are received will be available for public inspection from 7:45 a.m. to 4:15 p.m., Monday through Friday, in Room 546, 1717 H Street NW., Washington, D.C.

Public Meeting

In addition to considering all written comments, received by July 3, 1978, the Fish and Wildlife Service will hold a public meeting on the issues discussed in this advance notice of proposed rulemaking. The public meeting will be conducted from 9 a.m. to 12 noon on May 31, 1978, in the Secret Service Auditorium, located on the first floor of the Matomic Building, 1717 H Street NW., Washington, D.C.

So that adequate time may be allocated for the views of all interested parties, those planning to attend the public meeting are encouraged to notify Ms. Joan Caton, Chief, Management Operations Branch, Federal Wildlife Permit Office, Washington, D.C. 20240, 202-632-8796, of their participation not later than Friday, May 19, 1978.

The primary author of this notice is Dr. Richard L. Jachowski, Federal Wildlife Permit Office.

Note.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: April 28, 1978.

Harvey K. Nelson,
Acting Director,
Fish and Wildlife Service.

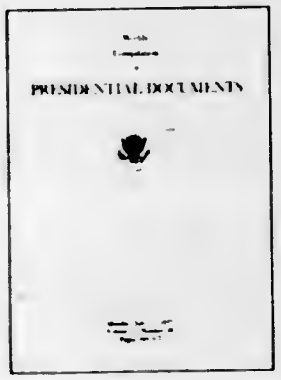
The authentic text behind the news . . .

The Weekly Compilation of PRESIDENTIAL DOCUMENTS



Administration of Jimmy Carter

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published quarterly, semiannually, and annually. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by Office of the Federal Register, National Archives and Records Service, General Services Administration

"THE FEDERAL REGISTER—WHAT IT IS AND HOW TO USE IT"

Reservations for May are being accepted for the free Friday workshops on how to use the FEDERAL REGISTER. The sessions are held at 1100 L Street NW., Washington, D.C. in room 9409 from 9 to 11:30 a.m.

Each session includes a brief history of the FEDERAL REGISTER, the difference between legislation and regulations, the relationship of the FEDERAL REGISTER to the Code of Federal Regulations, the elements of a typical FEDERAL REGISTER document, and an introduction to the finding aids.

FOR RESERVATIONS call: Martin V. Franks, Workshop Coordinator, 202-523-3517.

SUNSHINE ACT MEETINGS 19330

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 587; Valencia Orange Reg. 586, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period May 5-May 11, 1978, and increases the quantity of such oranges that may be so shipped during the period April 28-May 4, 1978. Such action is needed to provide for orderly marketing of fresh Valencia oranges for the periods specified due to the marketing situation confronting the orange industry.

DATES: The regulation becomes effective May 5, 1978, and the amendment is effective for the period April 28-May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and order No. 908, as amended (7 CFR part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under this marketing order, and upon other information, it is found that the limitation of handling of Valencia oranges, as hereafter provided, will tend to effectuate the declared policy of the act.

The committee met on May 1 and 2, 1978, to consider supply and market conditions and other factors affecting the need for regulation, and recommended quantities of Valencia oranges deemed advisable to be handled during the specified weeks. The committee reports the demand for Valencia oranges continues strong.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of Valencia oranges. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

1. Section 908.887 is added as follows:

§ 908.887 Valencia orange regulation 587.

Order. (a) The quantities of Valencia oranges grown in Arizona and California which may be handled during the period May 5, 1978, through May 11, 1978, are established as follows:

(1) District 1: 285,000 cartons;
(2) District 2: 456,000 cartons;
(3) District 3: 209,000 cartons.

(b) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" mean the same as defined in the marketing order.

2. Paragraphs (a) (1), (2), and (3) in § 908.886 Valencia Orange Regulation 586 (43 FR 17935), are hereby amended to read:

§ 908.886 Valencia orange regulation 586.

(a) • • •

(1) District 1: 266,000 cartons;
(2) District 2: 418,000 cartons;
(3) District 3: 266,000 cartons.

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).)

Dated: May 4, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

PART 1427—COTTON

Subpart—Seed Cotton Loan Program Regulations

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to change the eligibility requirements for upland seed cotton and provide that interest rates shall be set quarterly to conform to the regular cotton loan program. This rule is necessary to inform producers of these changes. This rule will permit cooperators to participate in the seed cotton loan program.

DATE: Effective May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Dalton J. Ustynik, ASCS, 202-447-6611, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking concerning the detailed operation provisions to carry out the upland and extra long staple seed cotton loan program, was published in the FEDERAL REGISTER on December 22, 1977 (42 FR 644126). No comments were received. It has been determined that the program will be continued and that operating provisions will remain basically the same as under past programs. However, two changes have been made: (1) eligiblity requirement have been changed, and (2) interest rates are set quarterly. The regulations issued by Commodity Credit Corporation and published in 7 CFR part 1427—Cotton as "Subpart—Seed Cotton Loan Program Regulations" in the FEDERAL REGISTER (37 FR 14816 and 16631) are hereby revised to read as set forth below, effective for the 1978 and subsequent crops of cotton. The material previously appearing in this subpart remains in full force and

V 43 | 87 MY 4 78 UMI

effect as to the crops to which this material was applicable.

Subpart—Seed Cotton Loan Program Regulations

§ 1427.160 General statement.

The regulations in this subpart, including any amendments hereto, set forth the requirements with respect to recourse loans on eligible upland and extra long staple seed cotton of the 1978 and subsequent crops of cotton for which a seed cotton loan program is authorized. Recourse loans will be made available by CCC through county offices to eligible cotton producers and approved cotton cooperative marketing associations at approved locations.

§ 1427.161 Administration.

(a) *Responsibility.* The Price Support and Loan Division, Agricultural Stabilization and Conservation Service, will administer the provisions of this subpart under the general supervision and direction of the Deputy Administrator, State and County Operations, Agriculture Stabilization and Conservation Service, in accordance with program provisions and policy determined by the CCC Board of Directors and the President or Executive Vice President, CCC. In the field, the program in this subpart will be administered by the Agricultural Stabilization and Conservation State and county committees and the Management Field Office.

(b) *Limitation of authority.* County executive directors, State and county committees, the Management Field Office, and employees thereof do not have authority to waive or modify any of the provisions of the regulations in this subpart.

(c) *State committee.* The State committee may take any action authorized or required by the regulations in this subpart to be taken by the county committee which has not been taken by such committee. The State committee may also: (1) correct or require a county committee to correct any action taken by such county committee which is not in accordance with the regulations in this subpart, or (2) require a county committee to withhold taking any action which is not in accordance with the applicable regulations in this subpart.

(d) *Executive Vice President, CCC.* No delegation herein to a State or county committee or the Management Field Office shall preclude the President or Executive Vice President, CCC, or the Executive Vice President's designee, from determining any question arising under the regulations in this subpart or from reversing or modifying any determination made by a State or county committee or the Mangement Field Office.

§ 1427.162 Availability of loans.

(a) *Locations.* Loans on eligible seed cotton shall be available only at locations where conditions make it feasible, subject to the approval of the County committee of the county in which the gin is located. Approval of such locations will be based upon the climatic conditions of the area, the type storage suitable for the area, and other conditions that are determined necessary in order to protect the interest of CCC and producers. A ginner who desires approval and desires to participate in the program shall submit an application for a determination of eligibility. An application form, related questionnaire, and copy of these regulations may be obtained from the State or county office. Such applications should be filed as soon as possible, before the ginning season starts.

(b) *Period of availability.* Loans will be available from the beginning of harvest through March 31 following the calendar year in which such crop is grown.

§ 1427.163 Disbursement of loans.

(a) *Where to request loans.* A producer or the producer's agent shall request a loan at the local county office for the county where the cotton is stored, which will assist the producer in completing the loan documents, except that approved cooperatives and approved financially responsible commercial ginning companies designated by producers to obtain loans in their behalf may obtain loans through a central county office.

(b) *Disbursement of loans.* Disbursement of each loan will be made by the county office of the county in which the cotton is stored by means of drafts drawn on CCC by the county office, except that approved cooperatives or commercial ginning companies designated by producers to obtain loans in their behalf may obtain disbursement of loans at a central county office. Service charges shall be deducted from the loan proceeds. The producer or the producer's agent shall not present the loan documents for disbursement unless the cotton is in existence and in good condition. If the cotton is not in existence and in good condition at the time of disbursement, the producer or the agent shall immediately return the draft issued in payment of the loan or, if the draft has been negotiated, shall promptly return the proceeds.

§ 1427.164 Eligible producer.

(a) *Producer.* An eligible producer is any individual, partnership, corporation, association, trust, estate, or other legal entity, a State or political subdivision thereof, or an agency of such State or political subdivision producing eligible upland or eligible extra long staple seed cotton in the capacity of landowner, landlord, tenant, or sharecropper. If eligible seed cotton is produced on a farm by a landlord and the share tenant or sharecropper, a loan may be obtained only as follows:

(1) If the seed cotton is divided among the producers entitled to share in such cotton, each landlord, tenant, or sharecropper may obtain a loan on their separate share.

(2) If the seed cotton is not divided, all producers having a share in the seed cotton may obtain a joint loan on such cotton.

(b) *Estates and trusts.* A receiver of an insolvent debtor's estate, an executor or an administrator of a deceased person's estate, a guardian of the estate of a ward or an incompetent person, and a trustee of a trust estate shall be considered to represent the insolvent debtor, the deceased person, the ward or incompetent person, and the beneficiaries of the trust, respectively, and the production of the receiver, executor, administrator, guardian, or trustee shall be considered to be the production of the person represented. Loan documents executed by any such person will be accepted by CCC only if they are legally valid and such person has the authority to sign the applicable documents.

(c) *Eligibility of minors.* A minor who is otherwise an eligible producer shall be eligible for a loan only if the minor meets one of the following requirements: (1) The right of majority has been conferred on the minor by court proceedings or by statute; (2) a guardian has been appointed to manage the minor's property and the applicable loan documents are signed by the guardian; (3) any note signed by the minor is cosigned by a financially responsible person; or (4) a bond is furnished under which a surety guarantees to protect CCC from any loss incurred for which the minor would be liable had the minor been a adult.

(d) *Approved cooperative.* A cooperative marketing association which is approved by the Executive Vice President, CCC, pursuant to part 1425 of this chapter, to obtain loan(s) on a crop of cotton, may obtain loans on eligible production of such crop on behalf of its members provided the marketing agreement between the producer and the cooperative gives the cooperative such authority. The term "producer" as used in this subpart and on applicable forms shall refer both to an eligible producer as defined in paragraphs (a), (b), and (c) of this section and to an approved cooperative marketing association unless the content otherwise requires.

§ 1427.165 Eligible seed cotton.

Upland and extra long staple seed cotton produced by eligible producers is eligible cotton if it meets the following requirements:

(a) Such cotton must be tendered for a loan within the availability period of § 1427.162.

(b) Upland cotton must have been produced on a farm by a "cooperator" as defined in the Agricultural Act of 1949, as amended, who has complied with the set-aside and normal crop acreage requirements, if any as prescribed in Parts 718, 722, 728, 775, and 791 of this title and any amendment thereto. Extra long staple cotton must have been produced by a "cooperator" as defined in section 408(b) of the Agricultural Act of 1949, as amended, on a farm on which it has been determined that the acreage planted to such cotton does not exceed the established allotment as prescribed in Part 718, 722, and 791 of this title and any amendments thereto.

(c) Such cotton must be in existence and in good condition.

(d) The producer tendering the cotton for loan must have the legal right to pledge it as security for a loan.

(e) Such cotton must not have been produced on land owned by the Federal Government if such land is occupied without a lease, permit or other right of possession.

(f) The producer tendering such cotton must not have previously sold and repurchased such cotton or placed it under CCC loan and redeemed it.

(g) The beneficial interest in the cotton must be in the producer tendering the cotton for a loan and must have always been in the producer or in the producer and a former producer whom the producer succeeded before it was harvested. To meet the requirements of succession to a former producer, the right, responsibilities, and interest of the former producer with respect to the farming unit on which the cotton was produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest without acquisition of any additional interest in the farming unit shall not constitute succession. The county committee shall determine whether the requirements with respect to succession have been met. A producer shall not be considered to have divested himself of the beneficial interest in the cotton of the producer enters into a contract to sell, or gives an option to buy the cotton, if, under the contract or option, the producer retains control and risk of loss of and title to the cotton, and retains controls of its production. If a loan is made available through an approved cooperative marketing association, the beneficial interest in the cotton must always have been in the producer-members who delivered the cotton to the approved cooperative or its member cooperative or must always have been in them and former producers whom they succeeded before the cotton was harvested. Cotton so delivered to a cooperative marketing association shall not be eligible for a loan if the producer-members who delivered the cotton to the cooperative or its member cooperative do not retain the right to share in the proceeds from the cotton as provided in part 1425 of this chapter.

(h) If the person tendering the cotton for a loan is a landowner, landlord, tenant, or sharecropper, the cotton must be the landowner, landlord, tenant, or sharecropper's separate share of the crop and must not have been acquired by such person directly or indirectly from a landowner, landlord, tenant, or sharecropper, or have been received in payment of fixed or standing rent.

(1) The cotton must be stored in identity preserved lots in approved storage meeting requirements of 1427.171.

§ 1427.166 Insurance.

The cotton must be insured at the full loan value against loss or damage by fire.

§ 1427.167 Liens.

If there are any liens or encumbrances on the cotton, waivers that will fully protect the interest of CCC must be obtained even though the liens or encumbrances are to be satisfied from the loan proceeds, except in the case of approved cooperatives who agree to hold CCC harmless from liability to prior lienholders. In lieu of waiving his prior lien on the cotton tendered as security for a loan, a lienholder may execute a Lienholder's Subordination agreement (form CCC-864) with CCC in which the lienholder subordinates the security interest to the rights of CCC in the cotton. A fraudulent representation as to prior liens or otherwise will render the producer liable under the civil frauds statutes and subject the producer and any other person who causes the fraudulent representation to be made to criminal prosecution under the provisions of the Commodity Credit Corporation Charter Act.

§ 1427.168 Forms, authorizations, and other documents.

The documents to be delivered by producers in connection with each loan shall be as follows: A note, chattel mortgage, and security agreement, and required lien waiver or subordination agreement, and such other documents as may be required by CCC.

§ 1427.169 Loan rate and quality.

(a) *Loan rate.* The loan rate applicable to each quality of seed cotton placed under loan shall be the loan rate as specified in the applicable crop supplement to this Subpart 1427, "Cotton Loan Program Regulations", for that quality of cotton in the county where stored.

(b) *Quality.* The quality to be used in determining the loan rate shall be the estimated quality of lint cotton in each lot of seed cotton as determined by the county office, except that if a control sample of the lot of cotton is classed by a USDA Board of Cotton Examiners, the quality for the lot shall be the quality shown on the form 1 or form 3 classification card issued for the control sample.

§ 1427.170 Quantity for loan.

(a) *Quantity.* The quantity of lint cotton in each lot of seed cotton tendered for loan shall be determined by the county office by multiplying the weight or estimated weight of seed cotton by the lint turnout factor determined in accordance with paragraph (b) of this section.

(b) *Lint turnout factor.* The lint turnout factor for any lot of seed cotton shall be the percentage determined by the county committee representative during the initial inspection of the lot. If a control portion of the lot is weighed and ginned, the turnout factor determined for the portion of cotton ginned will be used for the lot. If a control portion is not weighed and ginned, the lint turnout factor shall not exceed 32 percent for machine picked cotton and 22 percent for machine stripped cotton unless acceptable proof is furnished showing that the lint turnout factor is greater.

(c) *Maximum quantity for loan.* Loans shall not be made on more than a percentage established by the county committee of the quantity of lint cotton determined as provided in this section. If the seed cotton is weighed, the percentage to be used shall not be more than 95 percent. If

V 4 3 — 8 7
M Y
7 8
UMI

the quantity is determined by measurement, the percentage to be used shall not be more than 90 percent. The percentage to be used in determining the maximum quantity for any loan may be reduced below such percentages by the county committee when determined necessary to protect the interests of CCC on the basis of one or more of the following risk factors: (1) Condition or suitability of the storage site or structure, (2) condition of the cotton, (3) location of the storage site or structure, and (4) other factors peculiar to individual farms or producers which relate to the preservation or safety of the loan collateral. Loans may be made on a lower percentage basis at the producer's request.

§ 1427.171 Approved storage.

Approved storage shall consist of storage located on or off the producer's farm (excluding public warehouses) which is determined by a county committee representative to afford adequate protection against loss or damage and which is located within a reasonable distance, as determined by CCC, of an approved gin. If the cotton is stored off the producer's farm, the producer must furnish satisfactory evidence that the producer has the authority to store the cotton on such property and that the owner of such property has no lien for such storage against the cotton.

§ 1427.172 Loan service fee.

A producer shall pay a loan service fee of $10 per loan, plus $1 for each additional rick or other individual lot in storage over one, for each loan disbursed, except that in the case of loans to approved cooperatives or to producer through approved ginning companies acting in the producer's behalf, the fee shall be $7.25 per loan if the cooperative or approved ginning company prepares the loan documents. This fee is not refundable.

§ 1427.173 Interest rate.

Loans shall bear interest at the rate in effect on date of disbursement through maturity of the loan. Such rates will be determined quarterly and announced at the same time as rates are announced for warehouse stored cotton loans in a separate notice published in the FEDERAL REGISTER.

§ 1427.174 Restrictions in use of agents.

A producer who desires to appoint an attorney-in-fact to act in the producer's place and stead in obtaining and repaying loans may use Power of Attorney, Form ASCS 211 (referred to in this subpart as "Form 211"), except that a power of attorney on another form will be accepted if it is determined by CCC to be legally sufficient. The original or facsimile of the power of attorney or a copy certified by a notary public as a true and correct copy must be filed with the county office. An attorney-in-fact shall not make any purchase of the seed cotton redeemed from a loan or the producers' equity in such cotton for the attorney-in-fact's account or as agent for others, or sell any such cotton or equities therein to any person by whom the attorney-in-fact is employed or who has the right to control or direct the attorney-in-fact's sales of the seed cotton, the equity therein, or the lint cotton produced therefrom. Any delegation of authority given in violation of this paragraph shall be without force and effect and shall not be recognized by CCC.

§ 1427.175 Setoffs.

(a) *Facility and drying equipment loans.* If any installment or installments on any loan made by CCC on farm storage facilities or drying equipment are due and payable under the provisions of the note evidencing such loan out of any amount due the producer under the regulations in this subpart, the amount due the producer, after deduction of applicable fees and charges and amounts due prior lienholders, shall be applied to satisfy the amounts due and payable on such installment(s).

(b) *Producers listed on county claim control record.* If the producer is indebted to CCC or to any other agency of the United States and such indebtedness is listed on the county claim control record, amounts due and payable to the producer under the regulations in this subpart, after deduction of amounts due and payable on farm storage facilities or drying equipment and other amounts provided in paragraph (a) of this section, shall be applied as provided in the Secretary's "Setoff Regulations", part 13 of this title, to such indebtedness.

(c) *Producer's right.* Compliance with the provisions of this section shall not deprive the producer of any right that would otherwise have to contest the justness of the indebtedness involved in the setoff action, either by administrative appeal or by legal action.

§ 1427.176 Loss or damage to the cotton.

The producer is responsible for any loss in quantity or quality of the cotton under loan.

§ 1427.177 Maturity.

Loans on seed cotton are due and payable on May 31 following the calendar year in which such crop is grown, or upon such earlier date as CCC may make written demand for payment in order to be in a position to conform to State or local quarantine regulations or for other reasons.

§ 1427.178 Settlement.

(a) *Release of chattel mortgage.* The chattel mortgage shall not be released until the loan has been satisfied in full. After satisfaction of a loan, the county executive director shall release the chattel mortgage.

(b) *Repayment of loan.* A producer may, at any time prior to maturity of the loan, obtain release of all or any part of the loan cotton by paying the amount of the loan thereon, plus interest and charges to CCC.

(c) *Removal of loan cotton.* A producer or the producer's agent shall not remove from storage any cotton covered by a chattel mortgage until prior written approval has been received from the county committee for removal of such cotton. Any such approval shall be subject to the terms and conditions set out in the approval form. If a producer or the producer's agent obtains such approval, they may remove such cotton from storage, sell the seed cotton, have it ginned, and sell the lint cotton and cottonseed obtained therefrom. The ginner shall inform the county office in writing immediately after the cotton removed from storage has been ginned and furnish the county office the loan number, producer's name, and applicable gin bale numbers. If the seed cotton is removed from storage, the loan, interest, and charges thereon must be satisfied not later than (1) the date established by the county committee, (2) promptly after the producer received the class cards (and the warehouse receipts, if the cotton is delivered to a warehouse), representing such cotton, or (3) the loan maturity date, whichever is earliest. If the seed cotton or lint cotton is sold, the loan, interest, and charges must be satisfied immediately. A producer (except a cooperative) may obtain a warehouse storage loan on the lint cotton, but the loan, interest, and charges on the seed cotton must be satisfied out of the proceeds of the warehouse storage loan. An approved cooperative must repay the seed cotton loan, interest, and charges before pledging the cotton for a warehouse storage loan. If approved cooperatives and commercial ginning companies authorized by producers to obtain loans in their behalf remove seed cotton from storage prior to obtaining approval to move such cotton, such removal shall constitute conversion of such cotton unless the cooperative or commercial ginning company notifies the county office in writing the following morning by mail or otherwise that such cotton has been moved and is on the gin yard, furnished CCC an irrevocable letter of credit if requested, and repays the loan within the time specified by the county committee. Any removal from storage shall not be deemed to constitute a release of CCC's security interest in the cotton or to release the producer or approved cooperative from liability for the loan, interest, and charges if full payment of such amount is not received by the county office.

(d) *Cotton going out of condition.* If, either before or after maturity, the producer discovers that the cotton is going out of condition or is in danger of going out of condition, the producer shall immediately so notify the county office and confirm such notice in writing. If the county committee determines that the cotton is going out of condition or is in danger of going out of condition, the county committee will call for repayment of the loan on or before a specified date. If the producer does not repay the loan or have the cotton ginned and obtain a warehouse storage loan on the lint cotton produced therefrom within the period as specified by the county committee, the cotton shall be considered abandoned.

(e) *Need for removal from storage.* If the producer has control of the storage site and if the producer subsequently loses control of the storage site or there is danger of flood or damage to the cotton or storage structure making continued storage of the cotton unsafe, the producer shall immediately either repay the loan or move the cotton to the nearest approved gin for ginning and shall, at the same time, inform the county office. If the producer does not do so, the cotton shall be considered abandoned.

§ 1427.179 Fraud and unlawful disposition.

The making of any fraudulent representation by a producer in the loan documents, in obtaining a loan, or in connection with settlement, or the unlawful disposition of any portion of the cotton by the producer, shall render the producer and any other person who causes such fraudulent representation to be made subject to criminal prosecution or action under civil frauds statutes under Federal law.

§ 1427.180 Foreclosure.

Any seed cotton pledged to CCC as security for loan which is abandoned or which has not been removed from storage by loan maturity may be removed from storage by CCC and ginned and the resulting lint cotton warehoused for the account of CCC. The lint cotton and cottonseed may be sold, at such time, in such manner, and upon terms as CCC may determine at public or private sale. CCC may become the purchaser of the whole or any part of such cotton and cottonseed. If the proceeds are less than the amount due on the loan (including interest, ginning charges, and any other charges incurred by CCC), the producer shall be liable for such difference. Any overplus remaining from the proceeds received therefrom, after deduction from such proceeds the amount of the loan, interest, ginning charges and any other charges, shall be paid to the producer or the producer's personal representative without right of assignment to or substitution of any other person.

§ 1427.181 Definitions.

As used in the regulations in this subpart, and in all instructions, forms, and documents in connection therewith, the words and phrases listed in this section shall have the meaning assigned to them herein unless the context or subject matter otherwise requires:

(a) *General.* The following words or phrases: "Person," "State committee," "State executive director," "county committee," "county executive director," and "farm," respectively, shall each have the same meaning as the definitions of such terms in the "Regulations Governing Reconstitution of Farm and Allotments," part 719 of this title, and any amendments thereto.

(b) *CCC.* The term "CCC" shall mean Commodity Credit Corporation.

(c) *Management Field Office.* The term "Management Field Office," shall mean Management Field Office, P.O. Box 205, Kansas City, Mo. 64141.

(d) *County committee.* The term "county committee" shall mean only the county committee and not its representative.

(e) *County office.* The term "county office" shall mean the Agricultural Stabilization and Conservation county office.

(f) *Chattel mortgage.* The term "chattel mortgage" means any security instrument which secures a loan under this subpart.

(g) *Charges.* The term "charges" means all fees, cost, and expenses incident to insuring, carrying, handling, storing, ginning, conditioning and marketing the cotton and cottonseed and otherwise protecting the interest in the loan collateral of CCC or the producer.

(h) *Representative of the county committee and county committee representative.* The terms "representative of the county committee" and "county committee representative" means a member of the county committee, the county executive director, or a person designated by the county executive director to act in the county executive director's behalf.

(i) *Seed cotton.* The term "seed cotton" shall mean cotton which has not passed through the ginning process.

(j) *Lint cotton.* The term "lint cotton" shall mean cotton which as passed through the ginning process.

Signed at Washington, D.C., on April 26, 1978.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

[3410-05]

PART 1427—COTTON

Subpart—Specifications for Bale Packaging Materials

WRAPPING OF COTTON

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule provides the specifications governing cotton bale packaging materials used for 1978 and subsequent crops cotton pledged for price support loans. This rule is needed in order that producers and others will know what materials are acceptable to CCC. Bales of cotton will be acceptable for price support loans only if they conform to these specifications.

EFFECTIVE DATE: May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Dalton Ustynik, ASCS, 202-447-6611, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On October 7, 1977, Commodity Credit Corporation (CCC) published in the FEDERAL REGISTER (42 FR 54660) a notice that the Department proposed to make certain determinations concerning the 1978 crops of upland and extra long staple cotton. Such determinations included a determination of the specifications for bale packaging materials applicable to 1978 crop cotton pledged to CCC for price support loans. Five comments were received, all favoring bagging specifications. Three recommended amending specifications as recommended by the Cotton Industry Bale Packaging Committee, one recommended elimination of polypropylene material and adoption of a pound bagging for standard density bales and one recommended that only 100 percent cotton bagging be used. After consideration of all responses to the notice and recommendations made by the Cotton Industry Bale Packaging Committee at its meeting on September 11 and 12, 1977, and March 2, 1978, it has been determined that the specifications should be amended to provide that (1) each bundle of ties shall bear a certification by the manufacturer that the ties were manufactured according to the

V 43 | 87 MY 4 78 UMI

specifications, (2) joints on 10 gauge square knot type and crosshead type wire ties used to wrap flat bales and bales compressed to standard density and universal density at a warehouse may be on sides of bales, (3) T2 type new jute bagging be permitted for use on flat and gin standard and universal density bales and, (4) eliminates polyethylene panels and half-bag and sheet combinations from the list of approved packaging materials except that carryover materials from the 1977 crop may be used in 1978.

Accordingly, the Specifications for Bale Packaging Materials Used in Wrapping Cotton published in 42 FR 29849 on June 10, 1977, as amended, are revised to read as set forth below, effective with the 1978 crop of cotton. The material previously appearing in these regulations remains in full force and effect as to the crop to which it was applicable.

Subpart—Specifications for Bale Packaging Materials

Sec.
1427.1901 Purpose.
1427.1902 Specifications for bale ties and buckles.
1427.1903 Specifications for bagging.
1427.1904 Test methods.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 (b) and (c); secs. 101, 103, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441, 1444, 1421).)

Subpart—Specifications for Bale Packaging Materials

§ 1427.1901 Purpose.

This subpart is for the purpose of announcing the specifications applicable to bale packaging materials for packaging the 1978 and subsequent crops of cotton tendered to CCC for loans, unless otherwise approved by the Executive Vice President, CCC, or his designee: *Provided, however,* That all bales of cotton packaged and identified with the testing programs of the Cotton Industry Bale Packaging Committee sponsored by the National Cotton Council of America will be exempt from the provisions of this subpart, and any bale packaging materials carried over from 1977 which were eligible for packaging 1977 crop loan cotton also may be used to package 1978 crop cotton pledged for loans.

§ 1427.1902 Specifications for bale ties and buckles.

Any fixed length bale ties used on flat bales shall not exceed 10 feet 3 inches in length, exclusing overlap. All ties and buckles or fasteners must be coated or finished with a rust inhibitor.

(a) *General requirements—(1) Number of ties required.* (i) Flat bales (bales having densities of less than 20 pounds per cubic foot) must have not less than 6 ties.

(ii) Standard density bales (bales having densities of at least 20 pounds but less than 28 pounds per cubic foot) must have not less than 8 ties.

(iii) Universal density bales (bales having densities of 28 pounds or more per cubic foot) must have not less than 8 ties.

(2) *Flat bales packaged with nonreuseable ties.* Except for bales stored only in the States of Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia, if the ties on a bale are not suitable for reuse when the bale is compressed, the ties will not be deemed to meet these specifications unless the producer has prepaid any warehouse charge for furnishing new bale ties. If the bale is stored at a warehouse not having compress facilities and bales shipped from the warehouse are normally compressed in transit, the warehouse receipt must show that the bale ties are not suitable for reuse when the bale is compressed and the charge assessed by the nearest compress in line of transit for furnishing new bale ties will be deducted from the loan proceeds.

(b) *Conventional hot rolled steel ties and buckles.* The total weight of bale ties and buckles to tie each bale of cotton shall not be less than 8½ pounds.

(c) *Cold rolled high tensile steel strapping.* The supplier's name or trademark must be printed or embossed on every 36 inches of strapping.

(1) *For use on flat bales and standard density and universal density bales compressed at a warehouse.* The strapping shall have a minimum width of three-fourths of an inch and minimum thickness of 0.025 inch with zero tolerance, minimum weight of 1 pound per 15.7 linear feet of strapping or 4 pounds per bale of cotton, minimum breaking strength of 2,400 pounds with a joint strength of not less than 2,040 pounds.

(2) *For use on gin standard density and gin universal density bales.* The strapping shall have a minimum width of three-fourths of an inch and minimum thickness of 0.031 inch with zero tolerance, minimum weight of 1 pound per 12.7 linear feet of straping or 5 pounds per bale of cotton and minimum breaking strength of 3,200 pounds with a joint strength of not less than 2,720 pounds for gin standard density bales or 4,000 pounds with a joint strength of not less than 3,400 pounds for gin universal density bales.

(3) *Keylock type fixed length tie for use on flat bales and universal density bales compressed at a warehouse.* The bale tie must have a minimum width of 0.74 inches and a minimum thickness of 0.025 inches, minimum weight of 4 pounds per bale of cotton, minimum breaking strength of 3,200 pounds with a joint strength of not less than 2,700 pounds. The tie shall be constructed so as not to disengage at the joint while tucking or while being handled with clamp trucks.

(d) *Wire Ties.* Ties must be manufactured from wire which conform to ASTM-A-510 issued by the American Society for Testing Materials (ASTM). Each bundle of wire shall bear a certification that the wire ties have been manufactured according to the specifications for Bale Packaging Materials as published in Part 1427, Chapter XIV, Title 7 of the Code of Federal Regulations. The certification shall also show the name and address of the wire tie manufacturer and contain a quality control code which will permit the ties to be identified to the 2,000 pound lot and/or wire carrier.

Wire tie manufacturers shall follow a regular procedure of testing and inspection which involves a minimum of one break test on a sample from each 2,000 pound lot and/or wire carrier. Wire ties shall be fabricated within the United States. The tare weight for 10-gauge wire shall be 3 pounds per bale and the tare weight for 9-gauge wire shall be 4 pounds per bale.

(1) *For use on flat bales and bales compressed to standard density and universal density at a warehouse.*

(i) *Square knot type wire.* The ties shall not be smaller than 10-gauge with a minimum joint strength of 1,850 pounds. Joints may be on side of bales.

(ii) *Crosshead type wire.* The ties shall not be smaller than 10-gauge with a minimum joint strength of 1,650 pounds. The minimum elongation of the wire shall be [one inch] per 10 inches. Joints may be on side of bales.

(2) *For use on gin standard density and gin universal density bales.* The ties shall be not smaller than 9-gauge. The breaking strength of the wire must not be less than 3,400 pounds with a joint strength of not less than 2,100 pounds with the joints placed on the tops of the bales. If the joints are placed on the sides of the bales, the breaking strength of the wire must not be less than 3,200 pounds with a joint strength of not less than 3,040 pounds.

§ 1427.1903 Specifications for bagging.

Except in cases where shrink-pack polyethylene bags, poly-propylene half-bag panel combinations, or spiral sewn bags of burlap and/or polypropylene are used, each bale must be wrapped with a pattern of bagging consisting of two pieces (panels) of bagging material. All bagging material must be clean, in sound condition, and of sufficient strength to adequately protect the cotton. The material must not have salt of other corrosive material added and must not contain sisal or other hard fiber or any other material which will contaminate or adversely affect cotton as determined by the President or Executive Vice President, Commodity Credit Corporation.

(a) *New jute bagging used to wrap flat bales (32 ounces per linear yard).* Each one-half pattern (panel) of new jute bagging used to wrap flat bales must not be less than 108 inches or more than 115 inches in length and must not be less than 47 inches or more than 56 inches in width. The bagging must contain not less than 41 warp yarns per 12 inches of bagging of a size equal to or larger than the weft (filling) yarns and must contain not less than 25 weft (filling) yarns per 12 inches of bagging. The bagging must weigh not less than 11¼ and not more than 13¼ pounds per pattern (two panels) at 13.75 percent moisture content (not moisture regain).

(b) *New jute bagging used to wrap gin standard density and gin universal density bales.* Each one-half pattern (panel) of new jute bagging used to wrap standard gin universal density bales must not be less than 96 inches or more than 100 inches in length for gin universal density bales and not less than 100 inches or more than 102 inches for gin standard density bales and must not be less than 40 inches or more than 150 warp yarns per 40 inches of bagging of a size equal to or larger than the weft (filling) yarns, must contain not less than 25 weft (filling) yarns per 12 inches of bagging and must weigh not less than 7½ and not more than 8½ pounds per pattern (two panels) at 13.75 percent moisture content (not moisture regain). A marker warp yarn of the same size as the remaining warp yarns, made of jute of plied cotton, dyed dark green with a colorfast, nonbleeding dye of a type which will not be subject to permanent staining of cotton fiber under normal weathering conditions must be placed in the center of each panel to designate the 8-pound tare weight of the bagging. *Provided,* That new jute bagging material meeting the warp and weft requirements for jute bagging used on flat bales and weighing not less than 8¾ and not more than 11¼ pounds per pattern at 13.75 percent moisture content (not moisture regain) may be used to wrap gin standard density and gin universal density bales.

(c) *Compact center type new jute bagging—(1) Used to wrap flat bales (24 ounces per linear yard).* Each one-half pattern (panel) of compact center type new jute bagging used to wrap flat bales must not be less than 108 inches or more than 115 inches in length and must not be less than 46 inches in width. The bagging must contain a center panel not less than 32 inches wide and contain not less than 110 warp yarns and an outer edge not less than 7 inches wide containing not less than 13 warp yarns including salvage. The warp yarn must be a size equal to or larger than the weft (filling) yarns. The bagging must contain not less than 25 weft (filling) yarns per 12 inches of bagging with a minimum weft yarn weight of 40 pounds per spindle (14,400 yards). The bagging must weigh not less than 8½ and not more than 9½ pounds per pattern (two panels) at 13.75 percent moisture content (not moisture regain). A marker warp yarn of the same size as the other warp yarns, made of jute or a plied cotton yarn, dyed dark blue with a colorfast, non-bleeding dye of a type which will not be subject to permanent staining of cotton fiber under normal weathering conditions must be palced in the center of each panel to designate the 9-pound tare weight.

(2) *Used to wrap gin standard and universal density bale.* Compact center type new jute bagging (24 ounces per linear yard) meeting the same width and fabric construction requirements for compact center type new jute bagging as used on flat bales cut to a length of not less than 98 inches or more than 101 inches in length, weighing not less than 7½ and not more than 8½ pounds per pattern (two paneis) at 13.75 percent moisture content (not moisture regain) and containing a dark green center market yarn to designate the 8 pounds tare weight of the bagging may be used to wrap gin standard and gin universal density bales.

(d) *T2 type new jute bagging—(1) Used to wrap flat and modified flat bales.* Each one-half pattern of T2 type new jute bagging used to wrap flat and modified flat bales must be not less than 108 inches in length and must not be less than 46 inches in width. The bagging must contain not less than 108 two-ply warp yarns per 12 inches of bagging and not less than 48 weft (filling) yarns per 12 inches of bagging with a minimum weft yarn weight of 14 pounds per spindle (14,400 yards). The bagging must weigh not less than 6.65 and not more than 7.75 pounds per pattern (two panels) at 13.75 percent moisture content (not moisture regain). A market warp yarn made of jute or cotton either plied or single of a size not less than the other warp yarn dyed red with a colorfast non-bleeding dye of a type which will not be subject to permanently staining of cotton fiber under normal weathering conditions, must be placed in the center of each panel to designate the 7 pound tare weight of the bagging. The average tensil breaking strength shall not be less than 295 kilograms (650 pounds) and 60 kilograms (132 pounds) in the weft way with a tolerance of minus 10 kilograms (22 pounds) (10 centimeters by 20 centimeters) ravel strip method.

(2) *Used to wrap gin standard and universal density bales.* T2 type new jute bagging meeting the same fabric construction requirements for T2 type new jute bagging as used on flat and modified flat bales cut to a length of not less than 98 inches or more than 101 inches and not less than 40 inches in width, weighing not less than 5.5 pounds and not more than 6.5 pounds per pattern (two panels) at 13.25 percent moisture content (not moisture regain), and containing a black center marker yarn to designate the 6 pound tare weight of the bagging may be used to wrap gin standard and gin universal density bales.

(e) *Salvage jute (burlap) bagging—(1) General requirements.* Salvage jute (burlap) bagging must be processed specifically for cotton bale coverings from once-used good quality closely woven heavy jute bags previously used for sugar, coffee, cocoa, or other products approved by the President or Executive Vice President, CCC. Each one-half pattern (panel) must be composed of not more than three pieces of used bag cloth of the same construction and weight. There must not be more than two crosswise sewn seams and no lengthwise sewn seams in any one-half pattern (seams, hems, and necessary patches in the original bags from which the bagging is made will not be considered sewn seams). Overlap at seams and patches must not be greater than 3½ inches. Overlaps, patches, and hems sewn into bagging to increase the weight of lightweight material will not be permitted. Sewn seams must be such that the edges of the joined pieces coincide to make a symmetrical one-half pattern without appreciable displacement of the edge of one piece of bagging relative to the edge of the adjoining piece in the seam. Sewing must be with strong thread with not larger than ⅜-inch stitching.

(2) *To wrap flat bales.* Each one-half pattern (panel) used to wrap flat bales must not be less than 108 inches or more than 115 inches in length and must be not less than 47 inches or more than 56 inches in width. The bagging must weigh not less than 11¼ and not more than 13¼ pounds per pattern (two panels) at 13.75 percent moisture content (not moisture regain).

(3) *To wrap gin standard density and gin universal density bales.* Each one-half pattern (panel) used to wrap gin standard and gin universal density must not be less than 40 inches or more than 48 inches in width and must be not less than 96 inches or more than 102 inches in length. The bagging must weigh not less than 7½ and not more than 11¼ pounds per pattern (two panels) at 13.75 percent moisture content (not moisture regain).

(f) *Spiral sewn burlap bags used to wrap gin standard and gin universal density bales and bales compressed to standard density and universal density at a warehouse.—(1) Material.* Spiral sewn burlap bags used to wrap

V 4 3 | 8 7 M Y 4 7 8 UMI

gin standard and gin universal density bales and bales compressed to standard density and universal density at a warehouse must be spiral sewn from new burlap which is not less than 60 inches wide before sewing and weighs not less than 13.25 ounces per linear yard (this corresponds to burlap weighing 8.9 ounces per 40-inch width). The material must have a true selvage on each side. Spiral sewn bags made from split burlap with raw edges will not be acceptable.

(2) *Bag size.* The bag size must be tailored to individual bale size at each location. Bags shall git bales tightly, but must be large enough to minimize bursting and long enough to completely cover and secure heads of bales.

(3) *Seams.* Seams must be sewn in accordance with standand government specifications for sewing flat burlap, which are as follows: Typed SSA-1 seam, type 401 stitch, minimum four stitches per inch, and 4/12 or 5/12 cotton thread, or 1,000 denier polypropylene thread meeting ultraviolet inhibitor concentration requirements of paragraph (i) (2) (iii) of this section, with breaking strength of 5 grams per denier. Sewing thread shall be white to designate the 3 pound tare weight of the bag.

(g) *Cotton bagging.*—(1) *General requirements.* Bagging made from 100 percent cotton may be used to wrap flat bales stored only in the States of Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia, and on gin standard density and gin universal density bales stored in all States. The bagging must weigh not less than 7.7 ounces per square yard with a minimum weight of 4 pounds per pattern for flat bales, 3.1 pounds for gin standard density bales, and 3 pounds for gin universal density bales, at 8.5 percent moisture content (not moisture regain). Each panel of bagging must not be less than 48 inches in widths, and 112 inches in length for flat bales, 100 inches in length and 42 inches in width for gin standard density bales and 96 inches in length and 42 inches in width for gin universal density bales. Each panel must be constructed with true selvages on each side.

(2) *Woven.* The bagging must contain not less than 120 warp yarns (plied or single) per 12 inches of bagging of a size equal to or larger than the weft (filling) yarns and must contain not less than 78 weft (filling) yarns (plied or single) per 12 inches of bagging.

(3) *Warp knitted.* The bagging must be constructed with not less than two guide bars. The bagging must contain not less than 5 wales per inch and not less than six courses per inch. All yarns (plied or single) must be form connected with each other. The bagging must have stabilized construction with elongation or stretch not than 15 percent or more than 30 percent. Variation in tensile strength in wale and course direction must not exceed 20 percent. The bagging must have a minimum bursting strength of 75 pounds.

(h) *Polyethylene shrink-pack bags used to wrap gin standard density and gin universal density bales.* Polyethylene shrink-pack bags used to wrap gin standard and gin universal density bales must meet the following requirements:

(1) *Density.* The bag must be low density virgin polyethylene.

(2) *Color.* The bag must be clear.

(3) *Gauge.* The gauge shall be not less than 8 mil.

(4) *Gauge tolerance.* The average of any 20 evenly spaced points around the length and width of a bag must be within plus or minus 10 percent of 8 mil. Yield on any order of 2,000 pounds or more shall not vary more than plus or minus 3 percent from the nominal yield.

(5) *Tensile strength.* For machine (length) and transverse (cross) direction the tensile strength must be not less than 2,500 pounds per square inch, and for transverse (cross) direction, not less than 2,000 pounds per square inch.

(6) *Elongation.* For both machine (length) and transverse (cross) direction the elongation must be not less than 400 percent.

(7) *Impact resistance.* The impact resistance must be not less than 450 grams.

(8) *Slip characteristics.* Bags must be low slip (coefficient of friction not less than 0.50) with not anti-block or slip additive included.

(9) *Tagging.* A piece of woven yarn scrim not less than 5 inches by 7 inches and laminated on each side with polyethylene must be placed inside the bag on the head of bale and heat welded to the cover, or some other suitable reinforcing material must be bonded to the bag.

(10) *Tare weight.* Tare weight shall be not less than 2 pounds per shrink-pack bag.

(11) *Sealing head of bales.* Extra precaution must be taken in sealing heads of bales to provide maximum coverage and protection.

(12) *Shrink ratio.* The ratio of machine (length) direction shrink to the transverse (cross) direction shrink must not exceed 1.5:1.

(13) *Total tare weight.* The total tare weight (i.e. bag and ties) shall be printed on the bag. Printing shall read "total tare = —— lbs." and the bale tare weight shall be included in the appropriate space.

(14) *Bag size.* Each bag shall be not less than 87 inches in length when used on 54 inch by 20 inch presses and not less than 83 inches in length when used on 50 inch by 20 inch presses.

(1) *Polypropylene material*—(1) *General.* Polypropylene material used to wrap bales shall be new polypropylene fabric manufactured in the United States from yarn and resins produced in the United States and woven specifically for use on cotton bales. The bale covers shall be uniform in size and color, clean, unstained, and free of any extraneous material.

(2) *Yarns.* No scrap, reground, or reworked polymer shall be used, except that unoriented edge trim may be reground and directly recycled during operation of extruder.

(i) *Type.* The yarn shall be crystalline or isotatic polypropylene tape yarn.

(ii) *Dimension.* Yarn dimensions shall be 2.1 mils thick, plus or minus 0.2 mil and 95 mils wide, plus or minus 2 mils.

(iii) *Inhibitor concentration.* The yarn shall be stabilized by a system containing organo-nickel complex ultraviolet light inhibitor. The yarn shall contain organo-nickel complex at a concentration of not less than 0.1 percent nickel as metal from the inhibitor. The Cotton Industry Bale Packaging Committee will have samples checked periodically by a private laboratory at manufacturers; expense.

(3) *Fabric woven from stabilized yarns*—(i) *Minimum weight.* The fabric must weigh an average of not less than 3 ounces per square yard and no test sample shall weigh less than 2.8 ounces per square yard.

(ii) *Yarn count.* There must be 12 warp yarns, plus or minus 1, per inch; and 10 weft yarns, plus or minus 1, per inch.

(iii) *Color.* The color of the fabric shall be translucent light gold, unless otherwise approved by the Cotton Industry Bale Packaging Committee. A different colored warp yarn meeting ultraviolet inhibitor concentration must be inserted in the center of each panel by the fabric manufacturer. The center of each panel must be marked in the weft direction with a clearly visible line running across the entire width of the panel or with a series of three lines having a minimum of 12 inches on each edge and a minimum of 6 inches in the center. The lines must be within one inch of the true center of the length of the panel.

(iv) *Tensile strength.* Minimum tensile strength shall be 125 pounds per inch average in the warp direction and 100 pounds per inch average in the weft direction. Ten samples shall be tested in each direction for this determination and no single test shall be more than 10 pounds per inch below the specified average.

(v) *Elongation.* Fabric shall have an elongation to break of not less than 15 percent average in both warp and weft directions. Ten samples shall be tested in each direction for this determination and no single test value shall be below 12 percent.

(vi) *Selvage.* Each outer edge of the fabric shall be a tucked selvage or natural selvage containing not less than the number of warp ends prevalent in the body of the fabric. A heat cut selvage will not be acceptable. Ends of cut sheets and spiral sewn bags must be finished by heat cutting to give a pin test value of at least 40 pounds per inch.

(vii) *Air permeability.* The fabric in an unstressed state must permit not less than 5 cubic feet per minute per square foot, nor more than 50 cubic feet per minute per square foot of air flow.

(viii) *Weathering resistance.* The fabric shall retain not less than 70 percent of its original tensile breaking strength after 1,200 hours exposure to accelerated weathering.

(4) *Coatings.* Any coating added to the fabric to reduce gloss, fibrillation, slippage, or for other technical reasons, shall be as stable as the fabric to which it has been applied when exposed to accelerated weathering. Such coating must not adversely affect cotton which it is to contact.

(5) *Minimum panel size.* (i) Each panel of bagging must be not less than 52 inches in width and 112 inches in length for use on nonmodified flat presses (28 inch width bales).

(ii) Each panel of bagging must be not less than 48 inches in width and 112 inches in length for use on modified flat presses (25 inch width bales).

(iii) Each panel of bagging must be not less than 44 inches in width and 100 inches in length for use on gin standard density bales.

(iv) Each panel of bagging must be not less than 44 inches in width and 96 inches in length for use on gin universal density bales.

(6) *Additional specifications for spiral sewn bags.* Spiral sewn polypropylene bags must meet the following requirements:

(i) Fabric shall conform the specifications for woven polypropylene fabric specifications.

(ii) The fabric from which each bag is sewn shall be a minimum of 60 inches in width.

(iii) The bag size must be tailored to individual bale size at each location. Bags shall fit bales tightly, but must be large enough to minimize bursting and long enough to completely cover and secure heads of bales.

(iv) Seams must be sewn in accordance with the following: Type SSN-1 Seam, type 401 stitch, minimum four stitches per inch, and 4/12 or 5/12 cotton thread, or 1,000 denier polypropylene thread meeting ultraviolet inhibitor concentration requirements of paragraph (i)(2)(iii) of this section, with breaking strength of 5 grams per denier. Sewn seams at botton of bags must be a minimum of ¾ inch from heat cut edges and be of type SSA-1

(7) *Additional requirements for half-bag panel combinations.* Half-bag panel combinations must meet the following requirements:

(i) Fabric shall conform to specifications for woven polypropylene fabric specifications.

(ii) The half-bag size must be tailored to individual bale size at each gin location. (*a*) *Flat presses.* For flat presses each half-bag shall be not less than 36 inches in depth and each panel shall be not less than 48 inches in width and 112 inches in length. (*b*) *Gin universal presses.* For 54 inch by 20 inch gin universal presses, each half-bag shall be not less than 32 inches in depth and each panel shall be not less than 40 inches in width and 98 inches in length. For 50 inch by 20 inch presses, each half-bag shall be not less than 34 inches in depth and each panel shall be not less than 40 inches in width and 96 inches in length. (c) *Gin standard presses.* For gin standard presses, each half-bag shall not be less than 40 inches in width and 100 inches in length.

(iii) Seams must be sewn in accordance with the following: Type SSN-1 seam, type 401 stitch, minimum four stitches per inch, and 4/12 or 5/12 cotton thread or 1,000 denier polypropylene thread meeting ultraviolet inhibitor concentration requirements of paragraph (i)(2)(iii) Of this section, with breaking strength of 5 grams per denier. All cuts shall be heat cut or shall be rolled to prevent ravelling.

(8) *Identification markings.* Each panel and/or spiral sewn bag must have the name or trademark of the fabric manufacturer (that is, the company weaving the material) suitably printed no more than 36 inches apart and 8 to 12 inches from the panel selvage. Each identification mark shall be at least three-fourths inch in height but not more than one inch in height. The identification markings shall be placed on record with the Cotton Industry Bale Packaging Committee and CCC.

(9) *Inspection and certification requirements*—(i) *Responsibility for inspection.* The fabric manufacturer and the supplier are both responsible for performance of all inspection requirements as specified herein. They may use their own or any other facilities suitable for the performance of such inspection requirements, unless such facilities are disapproved by the Cotton Industry Bale Packaging Committee or CCC.

(ii) *Right to perform inspection or testing.* Reasonable inspection or tests deemed necessary may be performed by the Cotton Industry Bale Packaging Committee and/or CCC to assure that materials conform to prescribed specifications.

(iii) *Inspection or testing expense.* Expense for such inspection or testing shall be borne by the fabric manufacturer or supplier.

(iv) *Certification required by the Cotton Industry Bale Packaging Committee*—(*a*) *Submission of samples.* All manufacturers of polypropylene must submit samples to a private testing laboratory selected by the Cotton Industry Bale Packaging Committee or CCC for certification that materials meet all prescribed specifications.

(*b*) *Approved list.* Upon receipt of testing results, the Cotton Industry Bale Packaging Committee will publicize throughout the cotton industry a list of approved manufacturers and their trademarks.

(*c*) *Responsibility for components and materials.* The supplier and fabric manufacturer are responsible for insuring that components and materials used are manufactured, examined, and tested in accordance with approved specifications and standards.

(*d*) *Certification of fabric furnished.* Fabric manufacturers shall certify to customers that the fabric furnished has been manufactured in the United States from yarn and resins produced in the United States for use as cotton bale covers, and which meet the material specifications herein, and that the manufacturer is on the Cotton Industry Bale Packaging Committee's approved list.

§ 1427.1904 Test methods.

The following testing methods will be used by CCC in determining whether bagging and bale ties and buckles or fasteners used to package cotton tendered for CCC loans beginning with the 1978 crop of cotton meets the above specifications. Except for polyethylene shrink-pack bags, spiral sewn burlap bags and bagging manufactured from polypropylene material, each sample of bagging selected for testing will consist of one-half pattern. (Each sample of polyethylene shrink-pack bag and spiral sewn burlap bags will consist of one bag. Polypropylene material selected for testing will consist of a minimum of ten randomly selected panels or spiral sewn bags or an equivalent amount of flat goods in cases where the material is tested before it is in panel or spiral sewn bag form.)

(a) *Weight and strength of bale ties and buckles.* The bale ties and buckles will be weighed on suitable accurate scales and the weight determined to the nearest one-half pound. A bundle or package of ties and buckles may be weighed and averaged to determine the weight of ties and buckles necessary to package a bale of cotton. For high tensile steel strapping, a given number of feet of strapping will be weighed to determine the number of feet of strapping per pound. Breaking

V 43 | 87 MY 4 78 UMI

strength and joint strength tests will be made only when determined to be necessary.

(b) *Length.* The length of the sample will be measured directly using a measuring stick, steel tape, or other suitably graduated device. The sample will be laid out flat on a smooth horizontal surface and the length measured. Both selvages for jute and cotton panels will be measured and the length of each side of polyethylene shrink pack bags will be measured. The length of the sample will be the average of the two measurements rounded to the nearest inch. Jute and cotton measurements will be made on the sample in equilibrium with standard atmospheric conditions as specified in A.S.T.M. D 1776 62-T.

(c) *Width.* The width of the sample will be measured directly using a measuring stick, steel tape, or other suitably graduated device and will include the selvages. The sample will be laid out flat on a smooth horizontal surface and the measurements made perpendicular to the lengths (selvages in the case of jute and cotton). Three width measurements will be taken on each sample. One measurement will be made at the center of the sample and two other measurements will be made approximately 12 inches in from each end of the sample. The average of the three measurements rounded to the nearest inch, will be the width. For compact center type new jute, the compact center shall be measured between the outer edges of the outermost yarns in the more compact area. The loosely woven edges shall be measured from the outer edge of the outer-most warp yarn of the compact area to the outside edge including selvage. Three width measurements will be taken at locations described above for other width measurements and averaged. Jute and cotton measurements will be made on the sample in equilibrium with standard atmospheric conditions as specified in A.S.T.M. D 1776 62-T.

(d) *Warp yarn count.* For new jute (except for the compact center type new jute) and woven cotton bagging, the number of warp ends in the width of the sample including the selvages will be counted at each end of the sample. The average of the two counts will be divided by the width, as determined above. This figure will be multiplied by 12 to determine warp yarns per 12 inches of bagging or by 40 to determine warp yarns per 40 inches of bagging. For compact center type new jute bagging, the number of warp ends in the denser center area will be counted at each end of the sample and averaged. The average of the two counts will be the warp yarn count for the compact center section. The number of warp ends in the outer edges will be counted at each end and at each edge including selvages and averaged. The average of the two counts will be the warp yarn count for the outer edges. For T2 type new jute bagging, the number of 2 ply warp yarns will be counted in width of the sample including the selvages. The average of the two counts will be divided by the width in inches and multiplied by 12 to determine warp yarn per 12 inches. For polypropylene bagging, the number of warp ends in a 12 inch width of the sample will be counted. This figure will be divided by 12 to determine the warp yarns per inch of bagging.

(e) *Weft yarn count.* The number of weft (filling) yarns over a measured length of 36 inches on each sample of new jute, including T2 new jute, and woven cotton bagging will be counted. The number counted divided by 3 will be the weft yarn count per 12 inches. For polypropylene bagging, the number of weft ends in a 12 inch length of the sample will be counted. This figure will be divided by 12 to determine the weft yarns per inch of bagging.

(f) *Weight of bagging.* The weight of bagging, except for polypropylene material, will be determined by weighing on suitable accurate scales, and the weight per pattern will be determined to the nearest one-tenth pound. Several patterns (or bales of bagging patterns) may be weighed simultaneously and the weight averaged. The weight for jute bagging will be calculated on the basis of 13.75 percent moisture content (not moisture regain) and for cotton bagging on the basis of 8.5 percent moisture content (not moisture regain). (Polypropylene fabric weight will be determined as prescribed in subparagraph (k)(3) of this section.)

(g) *Wale count of warp knitted cotton bagging.* The number of wales or ribs running lengthwise of the sample from wrap knitted cotton bagging will be counted over a measured width (relaxed state) of 12 inches on each sample. The number counted divided by 12 will be the wale count per inch.

(h) *Course count of warp knitted cotton bagging.* The number of courses or loops which form a line horizontal to the wales or ribs will be counted over a measured length (relaxed state) of 12 inches on each sample of warp knitted cotton bagging. The number counted divided by 12 will be the course count per inch.

(i) *Additional tests on warp knitted cotton bagging.* Elongation or stretch properties of warp knitted cotton bagging will be tested at one pound per inch static load using methods as specified in A.S.T.M. D 2594. Bursting strength will be tested on an approved type of constant rate of traverse machine equipped with a bursting attachment (ball burst) as specified in A.S.T.M. D 231.

(j) *Additional tests for polyethylene material.* The gauge and gauge tolerance of polyethylene material shall be tested in accordance with A.S.T.M. D 374. The tensile strength and elongation shall be tested in accordance with A.S.T.M. D 882-67. Impact resistance shall be tested in accordance with A.S.T.M. method B 1709-67. Slip characteristics shall be tested in accordance with A.S.T.M. D 1894. The ratio of machine direction shrink to transverse direction shrink will be calculated in accordance with A.S.T.M. D 2732.

(k) *Additional test procedures for polypropylene material*—(1) *Yarn dimensions.* Polypropylene material shall also be tested as follows: Yarn dimensions will be tested as specified in A.S.T.M. D 3218-73T.

(2) *Inhibitor concentration.* Yarn shall be removed from the warp direction of each test sample and analyzed for ultraviolet inhibitor concentration by following applicable analytical test procedure as specified in method Military—B 52472B (ME) paragraph 4.4.2.7.2.2. atomic absorption method. Specimen yarns shall likewise be removed from the weft or fill direction and tested for inhibitor concentration. Values obtained less than 0.1 percent nickel as metal for the inhibitor in either warp or weft direction of the fabric shall be deemed nonconformance and constitute failure of this test.

(3) *Fabric weight.* The fabric weight per square yard shall be determined as specified in Federal Test Method Standard No. 191, method 5041.

(4) *Tensile strength and elongation.* A minimum of ten randomly selected samples will be tested for tensile strength and elongation to break at standard conditions and in accordance with Federal Test Method Standard No. 191.

(5) *Accelerated weathering*—(i) *Preparation of specimens.* The sample unit will be one finished panel or spiral sewn bag or an equivalent amount of flat goods. Three swatches 4 inches by 12 inches shall be cut from each principal direction (warp and weft) of the fabric. Each swatch shall be cut into two 4 inch by 6 inch test specimens: One specimen to be used for initial break strength and the other specimen to be used for break strength after accelerated weathering. The specimens shall be marked to indicate which are cut with the long dimension in the warp direction and which have the long dimension in the weft direction.

(ii) *Initial tensile breaking strength.* The marked control specimens shall be conditioned for 24 hours at the standard condition specified in Federal Test Method Standard No. 191 and shall be tested for breaking strength in accordance with Federal Test Method Standard No. 191, method 5100.1. The result shall be averaged for specimens in warp direction and averaged for specimens in weft direction and the averages shall be recorded as the initial breaking strength in warp and weft directions. An average in warp of less than 125 pounds or less than 100 pounds in the weft direction shall constitute failure of this test.

(iii) *Breaking tensile strength after accelerated weathering.* The balance of the specimens shall be tested in accordance with Federal Test Method Standard No. 191, method 5804 for not less than 1,200 hours, except that the black panel temperature shall be maintained at 155° F, plus or minus 3° F. The black panel temperature shall be read during the final 10 minutes of a cycle just before the water spray period starts. At the completion of 1,200 hours exposure to accelerated weathering, the specimens shall again be conditioned for 24 hours at the standard conditions specified in Federal Test Method Standard No. 191. After conditioning, the exposed specimens shall be tested for breaking strength in accordance with Federal Test Method Standard No. 191, method 5100.1. An average breaking strength of less than 70 percent of the initial average breaking strength recorded for its respective warp or fill yarn direction shall constitute failure of this test.

(6) *Ends of heat cut sheets and/or spiral sewn bags.* Heat cut ends of cotton bale cover sheets and spiral tubing shall be evaluated for heat cut strength as specified in ASTM Method D 751. Pin test values of less than 40 pounds, as per this method, shall constitute failure of this test.

(7) *Air permeability.* The fabric shall be tested for air permeability as specified in ASTM D 737-46. Air permeability values of less than 5 or more than 50 cubic feet per minute per square foot will constitute failure of this test.

(l) *Additional test procedures for T2 type new jute bagging.* Tensile strength, breaking loan shall be determined for T2 type new jute bagging by a ravel strip method. Strip tests shall be performed on a pendulum type strength tester (or equivalent) having a constant rate of traverse operated at 46 cm (18 inches) per minute, with test specimen dimensions between the grips of the tester being 20 cm by 10 cm.

This subpart is effective for all loans made on the 1978 and subsequent crops of cotton.

Signed at Washington, D.C., on April 26, 1978.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

PART 1430—DAIRY PRODUCTS

Subpart—Price Support Program For Milk

1977-1978 PRICE SUPPORT

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: Pursuant to the Food and Agriculture Act of 1977 and based on an estimated 4.8 percent increase in the parity index from October 1, 1977, to April 1, 1978, the support price was increased from $9 per hundredweight to $9.43, effective April 1, 1978. The announced price is for milk with the national average milkfat content of 3.67 percent. The equivalent support price for milk with 3.5 percent milkfat is $9.21.

The manufacturing margins used in calculating CCC purchase prices for butter-nonfat dry milk and cheese also were increased by 10 cents per hundredweight to reflect increases in manufacturing costs since the margins were last changed on October 1, 1976.

EFFECTIVE DATE: April 1, 1978.

ADDRESS: Procurement and Sales Division, ASCS, USDA, 5741 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Donald E. Friedly, Agricultural Economist, Dairy Branch, Procurement and Sales Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, 5741 South Building, P.O. Box 2415, Washington, D.C. 20013, 202-447-3571.

SUPPLEMENTARY INFORMATION: Section 201 of the Agricultural Act of 1949, as amended by the Food and Agriculture Act of 1977, requires that the price of milk be adjusted at midyear to reflect any estimated change in the parity index during the first six months of the marketing year. In that regard, it was estimated that the parity index would increase 4.8 percent between October 1, 1977, the beginning of the marketing year, and April 1, 1978.

On January 31, 1978, a notice was published in the FEDERAL REGISTER (43 FR 4049) inviting comments concerning the semiannual adjustment in the support price for milk and the prices and terms of purchase by CCC of butter, cheese, and nonfat dry milk. A similar notice was also issued in a USDA press release.

DISCUSSION OF COMMENTS

The Department received 49 written comments from dairy farmers, dairy cooperatives and associations, farm organizations, dairy product dealers, consumers, other farm-interested persons and organizations. Thirty-three comments included recommendations to increase the support price. Of these, two commenters recommended an increase to 80 percent of parity, six to 90 percent of parity, and ten to 100 percent of parity (one comment had 24 signatures). Fifteen commenters recommended an increase without specifying the amount. In addition, three commenters recommended continuing the $9 support price, four commenters were against a support price increase, and three commenters recommended lowering the support price. Of the 14 dairy farmer cooperatives and associations responding, their recommendations are summarized as follows: Eight recommended announcing the support price on a 3.5 percent butterfat basis (the announced price is for milk with the national average butterfat content of 3.67 percent), eight recommended increasing the manufacturing margins used in calculating Commodity Credit Corporation's (CCC's) purchase prices, eight recommended increasing CCC's prices for unrestricted use sales of dairy products to 115 percent of their current purchase prices, seven recommended purchasing process cheese at an announced price, five recommended dividing the support increase equally between the purchase prices for butter and nonfat dry milk, and two recommended establishing a purchase price for butter at the West Coast equal to that announced for Chicago. Recommendations were received from three consumers concerning the level of support, one recommended lowering the support price, and two were against increasing support.

SUPPORT PRICE ADJUSTMENT

The parity index was 685 on October 1, 1977, and 716 on February 1, 1978. In March, the parity index was estimated to be 718 on April 1, 1978, a 4.8 percent increase over the index during the first six months of the marketing year. Thus, a 4.8 percent increase in the $9 support price resulted in a $9.43 per hundredweight support price for milk effective April 1, 1978.

The results of the semiannual support price adjustment were described in a USDA press release. The latest available statistics of the Federal Government were used in making determinations under this rule.

MANUFACTURING MARGINS

A USDA multi-agency report, "Dairy Product Manufacturing Margins," was submitted to the CCC Board of Directors on March 1, 1978. The report indicated that the costs to manufacturers had increased about 10 cents per hundredweight since October 1, 1976, the last time the margins were changed.

V 43 | 87

Therefore, the manufacturing margins were increased 10 cents for butter-nonfat dry milk and 10 cents for cheese in order to provide greater assurance that the U.S. average price received by farmers will equal the announced support price.

CCC PURCHASE PRICE FOR BUTTER ON THE WEST COAST

The CCC purchase price for butter in the West was decreased 2 cents per pound in 1974. Butter purchases in the Pacific Coast States increased substantially in the early 1970's, and such purchases in the 1973-74 marketing year represented about two-thirds of the total CCC butter purchases in the U.S. The purpose of the 2-cent reduction was as an incentive to keep the butter in commercial channels. Since April 1, 1974, CCC purchases of butter on the West Coast have averaged only about 15 percent of U.S. purchases.

The maximum freight rate deduction subtracted from the CCC purchase price for butter at New York City was reduced from 3 cents to 2.5 cents per pound, effective April 1, 1978. As a result, CCC purchase prices of butter in the South and West are now approximately the same as CCC's purchase prices in the heart of the midwestern butter production area.

RELATIVE INCREASES IN THE CCC PURCHASE PRICES FOR BUTTER AND NONFAT DRY MILK

Since nonfat dry milk and butter are made from the same whole milk, manufacturers must receive enough revenue from the sale of both products to pay a given price for milk to producers. Since 1970, the relative support increases have been divided between the two products based on the relative demand and supply for the two products. The support increase on April 1, 1977, was divided equally between the two products and in the year ending September 30, 1977, CCC purchased quantities of fat and nonfat solids roughly in proportion to their respective production. This indicates that the purchase prices were in about the proper relationship to each other. Therefore, effective April 1, 1978, the increases in the support price and the manufacturing margins were divided about equally per hundredweight of milk between the purchase prices of butter and nonfat dry milk.

FINAL RULE

Based on the $9.43 support price, subparagraphs (a)(1), (b)(1), and (b)(2) of 7 CFR § 1430.282 are revised to read as follows:

§ 1430.282 Price support program for milk.

(a) (1) The general level of prices to producers for milk will be supported from April 1 through September 30, 1978, at $9.43 per hundredweight for manufacturing milk, subject to adjustment as provided for by law.

* * * * *

(b) (1) Commodity Credit Corporation will consider offers of butter, Cheddar cheese, and nonfat dry milk in bulk containers meeting specifications in the announcements at the following prices:

(Dollars per pound)

Commodity and location	Produced before Apr. 1, 1978	Produced on or after Apr. 1, 1978
Cheddar cheese—Standard moisture 37.8 to 39.0 percent:[1]		
40-lb blocks, U.S. grade A or higher	0.9800	1.0325
500 lb in fiber barrels, U.S. extra grade[2]	.9500	1.0025
Nonfat dry milk, spray process, U.S. extra grade:[3]		
Unfortified	.6800	.7100
Fortified (vitamins A and D)	.6950	.7250
Butter—U.S. grade A or higher: New York, N.Y., and Jersey City, Newark, and Secaucus, N.J.	1.0275	1.0875

[1] The price per pound for cheese which contains less than 37.8 pct moisture shall be as specified in form ASCS-150. Copies are available in offices listed in (a)(4).

[2] Also includes granular cheese.

[3] If upon inspection bags do not fully comply with specifications, the price paid will be subject to a discount of 0.50 ct (½ cent) per pound of nonfat dry milk.

(2) Offers to sell butter at any location for which a price is not specifically provided for in this section will be considered at the price set forth in this section for New York City, less 80 percent of the lowest published domestic railroad through freight rate for frozen butter per pound gross weight for a 60,000 pound carlot, in effect at the beginning of the 1977-78 marketing year (October 1), from such other point to New York City. The minimum price at any location shall be the price at New York City minus 3.0 cents per pound before April 1, 1978, and minus 2.5 cents per pound on or after that date. Bulk butter offered in the area consisting of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia, must have been produced in such States. Butter produced elsewhere is ineligible for offering to CCC in such States.

(Sec. 201, 401, Pub. L. 439, 81st Cong., 63 Stat. 1052, 1054, as amended (7 U.S.C. 1446, 1421) Secs.4,5, Pub. L. 806, 80th Cong., 62 Stat. 1070, 1072, as amended (15 U.S.C. 714b, (c)).)

Signed at Washington, D.C., on April 26, 1978.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

[4910-13]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airworthiness Docket No. 78-ASW-15, Amdt. 39-3203]

PART 39—AIRWORTHINESS DIRECTIVES

Bell Model 212 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) requiring modification of Bell Model 212 helicopters, equipped with emergency float kits, prior to further flight under conditions that require ditching capability or aircraft flotation devices. The modification must assure that the passenger emergency exists may be opened in the event of ditching and deployment of the emergency floats. After ditching of two Bell Model 212 helicopters, it was reportedly found that the passenger emergency exits were partially obstructed and could not be opened by the occupants. It is essential to passenger safety that the required passenger exits be operable and usable after ditching.

EFFECTIVE DATE: May 9, 1978. Modification of the forward and aft passenger emergency exits is required before further operation in situations that require ditching capability.

ADDRESSES: Design information and data for modification of the exits to comply with the AD may be submitted to Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Southwest Region, P.O. Box 1689, Fort Worth, Tex. 76101. Bell Helicopter Textron service information may be obtained from Service Manager, Bell Helicopter Textron, P.O. Box 482, Fort Worth, Tex. 76101.

FOR FURTHER INFORMATION CONTACT:

J. H. Major, Airframe Section, ASW-212, Engineering and Manufacturing Branch, FAA, 4400 Blue Mound Road, Fort Worth, Tex. 76101, telephone No. 817-624-4911, extension 515.

SUPPLEMENTARY INFORMATION: As a result of two ditchings, reports were received of alleged partial obstruction of the passenger emergency exits on Bell Model 212 helicopters equipped with Bell emergency floats. This partial obstruction allegedly prevented prompt opening of the required emergency exits. A recent demonstration confirmed that the present Bell design passenger emergency exits are partially obstructed by the float bags and cannot be opened. It is essential to passenger safety that the required passenger exits be readily usable after a ditching for prompt evacuation of the helicopter.

Since the passenger emergency exits are likely to be obstructed and cannot be opened after ditching the Bell Model 212 equipped with emergency float kits 212-706-021 or 212-706-042, an airworthiness directive (AD) is being issued which precludes further operation of the Model 212 helicopters in situations that require ditching capability unless the forward and aft passenger exits are modified to assure their usefulness after a ditching. The exit modifications must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Southwest Region.

The FAA has approved design changes to the passenger emergency exits, including STC No. SH2746SW issued April 4, 1978, which move the present Bell exit fixed pins from the top to the bottom edge of the exit and the retractable pins and their mechanism from the bottom to the top part of the exits. This design change assures the exits may be promptly opened and are usable after a ditching even though the exit may be partially obstructed.

Since a situation exists that requires immediate adoption of the amendment, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days. The Helicopter Association of America verbally concurs with the agency's action.

DRAFTING INFORMATION

The principal authors of this document are James H. Major, Aerospace Engineer, Flight Standards Division, and James O. Price, General Attorney, Southwest Region, FAA.

ADOPTION OF THE AMENDMENT

BELL. Applies to Bell Model 212 helicopters, certificated in all categories, that are equipped with emergency float kits 212-706-021 or 212-706-042 and that are operated under conditions that require ditching capability or aircraft flotation devices.

Compliance required as indicated.

To permit opening of the passenger emergency exits in the event of a ditching and deployment of the emergency float bags, accomplish the following, unless already accomplished in accordance with data previously approved by the FAA (including STC No. SH2746SW issued April 4, 1978):

Prior to further flight, after the effective date of this AD, modify the forward and aft passenger emergency exit on each side of the helicopter in accordance with information and/or data approved by the Chief, Engineering and Manufacturing Branch, FAA, Southwest Region, except that the helicopter may be flown in accordance with FAR 21.197 to a base where the work may be performed.

This amendment becomes effective May 9, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on April 24, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc. 78-12125 Filed 5-3-78; 8:45 am]

[4910-13]

[Docket No. 78-GL-2; Amdt. 39-3207]

PART 39—AIRWORTHINESS DIRECTIVES

Detroit Diesel Allison, Model 501-D13/D13A/D13D/D13E/D13H Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires that third stage turbine wheels Part Number (P/N) 6788833, 6842143, 6841223, and 6846553 and fourth stage turbine wheels P/N 6738424 and 6843014 installed in Detroit Diesel Allison 501-D13 series engines be inspected and replaced as necessary in accordance with maximum cyclic life limits specified herein. This AD is being adopted in response to two instances of third stage turbine wheel failure in 501-D13 series engines. Compliance with this AD will significantly reduce the probability of turbine wheel failure due to low cycle fatigue which may result in non-containment of turbine wheel fragments.

DATE: Effective May 12, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: Copies of Detroit Diesel Allison service information referenced herein may be obtained by contacting: Detroit Diesel Allison, Division of General Motors Corp., P.O. Box 894, Indianapolis, Ind. 46206. Copies of the service information incorporated in this AD are contained in the Rules Docket, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Ill. 60018, and at FAA Headquarters, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

W. Ashworth, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, extension 308.

SUPPLEMENTARY INFORMATION: There recently have been two instances of third stage turbine wheel failure on 501-D13 series turboprop engines. In each instance non-containment of turbine wheel fragments was experienced.

In at least one of these instances the cause of failure was determined to be the existence of a carbide precipitation network in the microstructure of the wheel which has been linked to accelerated fatigue crack propagation. Since stop/start cyclic stresses are directly related to this failure mode and because it has been determined that this condition is likely to exist in third and fourth stage turbine wheels on other engines of this type design, an airworthiness directive is being issued which imposes new cyclic life limits on third and fourth stage turbine wheels with certain carbide precipitation classifications.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and good cause exists for making this amendment effective in less than 30 days.

In accordance with Departmental Regulatory Reform, dated March 23, 1976, and evaluation of the anticipated impacts has been made and it is expected that within a normal range of pertinent considerations the proposal will be neither costly nor controversial.

DRAFTING INFORMATION

The principal authors of this document are W. Ashworth, Flight Stand-

ards Division, Great Lakes Region, and J. McLaughlin, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

DETROIT DIESEL ALLISON. Applies to 501-D13/501-D13A/501-D13D/501-D13E, and 501-D13H engines equipped with third stage turbine wheel P/N's 6788833, 6842143, 6841223, and 6846553 or fourth stage turbine wheel P/N's 6738424 and 6843014 installed in aircraft certificated in all categories.

Compliance required as follows unless previously accomplished: To preclude possible engine failure resulting from third or fourth stage turbine wheel failure: Remove and classify all third and fourth stage turbine wheels with unknown carbide precipitation classifications in accordance with the compliance times specified in (a) and (b) below, and the procedures specified in Detroit Diesel Allison Commercial Overhaul Information Letter No. 349 Rev. 1 or later FAA approved revision. Wheels both newly and previously classified with carbide precipitation classifications of "Heavy" must be removed from service in accordance with the maximum life limits specified in (a) and (b) below. Wheels both newly and previously classified with carbide precipitation classifications of "Medium Heavy" must be removed from service in accordance with the maximum life limits specified in (c) through (h) below. Wheels of all other classifications may be returned to service and operated in accordance with the existing hourly life limits.

(a) For wheels of "Heavy" and unknown carbide precipitation classification which exceed 8000 total cycles upon the effective date of this AD, compliance is required within 300 cycles.

(b) For wheels of "Heavy" and unknown carbide precipitation classification which do not exceed 8000 total cycles upon the effective date of this AD, compliance is required prior to reaching 8300 total cycles.

(c) For wheels of "Medium Heavy" carbide precipitation classification which exceed 16,000 total cycles upon effective date of this AD, compliance is required within 200 cycles.

(d) For wheels of "Medium Heavy" carbide precipitation classification which have from 14,000 to 16,000 total cycles upon the effective date of this AD, compliance is required within the next 400 cycles or prior to exceeding 16,200 cycles whichever occurs first.

(e) For wheels of "Medium Heavy" carbide precipitation classification which have from 10,500 to 14,000 total cycles upon the effective date of this AD, compliance is required within the next 1000 cycles or prior to exceeding 14, 400 total cycles whichever occurs first.

(f) For wheels of "Medium Heavy" carbide precipitation classification which have from 8000 to 10,500 total cycles on the effective date of this AD, compliance is required within the next 2000 cycles or prior to exceeding 11,500 total cycles whichever occurs first.

(g) For wheels of "Medium Heavy" carbide precipitation classification which have from 7000 to 8000 total cycles on the effective date of this AD, compliance is required prior to exceeding 10,000 cycles.

(h) For wheels of "Medium Heavy" carbide precipitation classification which do not exceed 7000 total cycles upon the effective date of this AD, compliance is required prior to exceeding 8000 cycles.

NOTE.—For purposes of this airworthiness directive a cycle is defined as one takeoff.

The Detroit Diesel Allison Commercial Overhaul Information Letter identified in this directive is incorporated herein and made part hereof pursuant to 5 U.S.C. 552(a)(1). The Detroit Diesel Allison Commercial Overhaul Information Letter incorporated herein may be obtained upon request to Detroit Diesel Allison, Division of General Motors Corp., P.O. Box 894, Indianapolis, Ind. 46206. This document may also be examined at the FAA Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018 and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and the Great Lakes Region. (Detroit Diesel Allison Commercial Service Letter 501-D13 CSL-253 also pertains to this subject.)

This amendment becomes effective: May 12, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on April 24, 1978.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the FEDERAL REGISTER on June 19, 1967.

JOHN M. CYROCKI,
Director,
Great Lakes Region.

[FR Doc. 78-12127 Filed 5-3-78; 8:45 am]

[4910-13]

[Docket No. 77-GL-13; Amdt. 39-3208]

PART 39—AIRWORTHINESS DIRECTIVES

Champion Spark Plug Company Part Numbers CH48108 and CH48109 Oil Filters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment modifies an existing airworthiness directive (AD) by allowing affected filters which have been inspected and reidentified to be utilized in service. This notice amends airworthiness directive 77-12-05 which required the inspection and removal from service of certain oil filters identified by manufacturing codes. The FAA has determined that the manufacturer's inspection procedures, which was developed for this purpose, would provide an acceptable verification of the integrity of the affected oil filters.

DATES: Effective May 12, 1978. Compliance schedule—Not applicable.

FOR FURTHER INFORMATION CONTACT:

Kevin Mullin, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, extension 308.

SUPPLEMENTARY INFORMATION: This notice amends Amendment 39-2923, 42 FR 31151, AD 77-12-05 which required the inspection and removal from service to two models of oil filters identified by a specific manufacturing code. After issuing Amendment 39-2923, 42 FR 31151, AD 77-12-05 the FAA determined that the manufacturer's inspection procedure, which was developed for this purpose, would provide an acceptable verification of the integrity of the affected oil filters. Therefore, the FAA is amending Amendment 39-2923 by changing the applicability to exclude affected filters which have been reidentified in accordance with this amendment.

Since this amendment relieves a restriction and imposes no additional burden on the public, notice and public procedure hereon are unnecessary and this amendment may be made effective in less than 30 days.

In accordance with Departmental Regulatory Reform, dated March 23, 1976 an evaluation of the anticipated impacts has been made and it is expected that within a usual range of pertinent considerations the proposal will be neither costly nor controversial.

DRAFTING INFORMATION

The principal authors of this document are Kevin Mullin, Flight Standards Division, Great Lakes Region, and Joe McLaughlin, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Amendment 39-2923, 42 FR 31151, AD 77-12-05 by revising its applicability statement to read:

CHAMPION SPARK PLUG COMPANY. Applies to Part Numbers CH48108 and CH48109 oil filters as installed in aircraft certified in all categories, identified by the following manufacturing date codes, 1A7E and 2A7C for the Part Number CH48108 filters, and 1A7G and 1A7I for the Part Number CH48109 oil filters, except for those affected filters which are identified with the symbol "Insp OK 5G7A" stamped adjacent to the manufacturing date code. The manufacturing date code is located on the outside of the filter housing adjacent to the filter installation instructions. Champion Spark Plug Company Aviation Sales Bulletin No. 77-13 also pertains to this subject.

This amendment becomes effective: May 12, 1978

(Secs. 313(a), 601, and 603 Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on April 26, 1978.

JOHN M. CYROCKI,
Director, Great Lakes Region.

[FR Doc.78-12186 Filed 5-3-78; 8:45 am]

[4910-13]

[Docket No. 77-WE-11-AD; Amdt. 39-3197]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC-8-62, -62F, -63 and -63F Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes a currently affective airworthiness directive (AD) which requires inspection and repair of the wing structural components on certain McDonnell Douglas Model DC-8 airplanes. This amendment requires additional inspections and is needed because experience has revealed that inspection procedures specified in the original AD were not adequate to detect cracks in a critical area.

DATE: Effective Date: May 1, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: Persons affected by this AD may obtain copies of applicable McDonnell Douglas service information cited in this AD by writing to: McDonnell Douglas Corp., 3855 Lakewood Boulevard, Long Beach, Calif. 90846, Attention: L. A. Eisenberg, CI-750-60. Also, a copy of the service information may be reviewed at, or a copy obtained from: Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: Amendment 39-2979 (42 FR 24751), AD 77-15-11 as amended by Amendment 39-3029 requires inspection and repair of cracks in the wing lower skin, tee doubler and lower front spar cap at the pylons attach points on McDonnell Douglas Model DC-8-62, -62F, -63 and -63F airplanes.

After issuing Amendment 39-3029 the FAA has concluded, based on service experience that the X-ray inspections presently specified do not adequately detect cracks in a critical area of the lower spar cap forward tang. Therefore the FAA is superseding AD 77-15-11 with a new AD which requires additional ultrasonic inspection procedures and expands X-ray inspection procedures of the wing structure on McDonnell Douglas Model DC-8-62 and -63 series airplanes.

Since a situation exists requiring immediate adoption of this regulation, notice and public procedure thereon are impracticable and good cause exists for making the airworthiness directive effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Everett W. Pittman, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) Amendment 39-2979 (42 FR 24751) AD 77-15-11 as amended by Amendment 39-3029, (42 FR 44981) is superseded by adding the following new airworthiness directive:

MCDONNELL DOUGLAS: Applies to Model DC-8-62, -62F, -63, and -63F airplanes, certificated in all categories.

Compliance required as indicated.

To detect cracks and prevent failure of the wing lower forward spar cap, tee doubler, and wing skin, comply with the following:

(a) For airplanes with 35,000 or more hours time in service on the effective date of this AD, within the next 800 hours time in service, unless already accomplished within the last 2,400 hours, and thereafter at intervals not to exceed 3,200 hours time in service, accomplish paragraph (d).

(b) For airplanes with 25,000 to 34,999 hours time in service on the effective date of this AD, within the next 2,000 hours time in service, unless already accomplished within the last 1,200 hours, and thereafter at intervals not to exceed 3,200 hours time in service, accomplish paragraph (d).

(c) For airplanes with 15,000 to 24,999 hours time in service on the effective date of this AD, within the next 3,200 hours time in service, and thereafter at intervals not to exceed 3,200 hours time in service, accomplish paragraph (d).

(d) Perform an X-ray and ultrasonic inspection of lower wing structure at all four pylon areas for cracks as specified in Phase I of McDonnell Douglas DC-8 Service Bulletin 57-83, Revision 2 dated March 30, 1978, or later FAA approved revision; (hereinafter referred to as SB 57-83.)

(e) Within the next 3,200 hours time in service after July 28, 1977, (the effective date of superseded AD 77-15-11), unless already accomplished within the last 3,200 hours, and thereafter at intervals not to exceed 6,400 hours time in service, perform an X-ray inspection of the lower wing structure at all four pylon areas for cracks as outlined in Phase II of McDonnell Douglas DC-8 SB 57-83.

(f) If cracks are found in the wing spar cap and/or wing skin as a result of the inspections of paragraph (d) and (e), repair before further flight in accordance with the provisions of either McDonnell Douglas DC-8 Service Bulletin 57-83, or Option I of Service Bulletin 57-84, dated August 12, 1977, or later FAA approved revision. Cracked pylon tee doublers shall be replaced before further flight if the cracks exceed the limits in McDonnell Douglas DC-8 Service Bulletin 54-58, dated May 15, 1970, or later FAA approved revision.

(g) Airplanes modified in accordance with Option I of McDonnell Douglas DC-8 Service Bulletin 57-84 dated August 12, 1977, or later FAA approved revision are no longer subject to the repetitive inspection requirements of this AD.

(h) If no cracks are found as a result of the inspections of paragraph (d) and (e), operators may rework the airplane in accordance with Option II of McDonnell Douglas Service Bulletin 57-84 dated August 12, 1977, or later FAA approved revision, and may then discontinue the repetitive inspection requirements of this AD for a period not to exceed 15,000 hours time in service after rework. Before accumulating, 15,000 hours time in service after the rework and thereafter at intervals not to exceed 4,000 hours time in service, accomplish the inspection requirements of paragraph (e).

(i) Equivalent inspections and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(j) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections required by this AD.

This supersedes Amendment 39-2979 (42 FR 24751), AD 77-15-11 as amended by Amendment 39-3029.

This amendment becomes effective May 1, 1978.

V 4 3 — 1 8 7 M Y 7 8 UMI

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

[Docket No. 77-WE-27-AD; Amdt. 39-3198]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC-8 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) applicable to McDonnell Douglas Model DC-8 series airplanes by requiring that a specific pre-takeoff operational procedure be used to detect and prevent takeoff with a jammed elevator, pending incorportion of an elevator position indicator system.

DATE: Effective date: June 1, 1978. Compliance schedule—As prescribed in body of AD.

ADDRESSES: Persons affected by this AD may obtain copies of applicable McDonnell Service information by writing to: McDonnell Douglas Aircraft Co., 3855 Lakewood Boulevard, Long Beach, Calif. 90846, Attention: L. A. Eisenberg, C1-750, 54-60. Also, a copy of the service information may be reviewed at, or a copy obtained from: Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591; or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 39-3118 (43 FR 1299), AD 78-01-15; which currently requires the installation of an elevator position indicator system and modifications to improve clearances on McDonnell Douglas Model DC-8 series airplanes. After issuing Amendment 39-3118, the FAA has determined that a preflight elevator operational check procedure should be instituted as an interim safeguard to detect jamming until such time as an elevator position indicator system is installed. Based on this, a notice was issued in the FEDERAL REGISTER at 43 FR 6807 which proposed to amend the existing AD by requiring a specific preflight elevator operational check procedure on McDonnell Douglas Model DC-8 series airplanes.

Interested persons have been afforded an opportunity to participate in the making of the amendment. Several of the comments received suggested that a pre-takeoff check was already standard procedure as covered in the operating manual and that many operators currently utilize adequate procedures. The AD as adopted includes recognition of operations manual instructions in conjunction with a pre-flight check list as a satisfactory alternate means of compliance with the intent of the AD as regards a placard.

One commenter suggested the placard be reworded to reflect permanent advisory information to the crew in the event the elevator position indicator, even though installed, should become inoperative. The FAA does not believe such information is necessary, as the present AD contains provisions to be followed to allow the flight to continue with an inoperative elevator position indicator until a base is reached where the repair can be accomplished.

Two commenters felt the control check during the takeoff roll would degrade safety. The FAA disagrees. The freedom-of-movement check is to be accomplished during the takeoff roll only if it is impossible to turn the airplane into the wind to do the check while taxiing. Additionally, the FAA believes that the takeoff roll check can be done safely if the procedures and restrictions in Alert Service Bulletin A27-264 are followed.

Several commenters thought the placard was confusing and that the wording was not acceptable, primarily because the pilot wouldn't have Service Bulletin A27-264 available in the cockpit. They suggested that the operations manual was a better place to call out such a procedure. The FAA expects that each operator will develop his own method for advising the crew of the requirements of Service Bulletin A27-264. The AD as adopted includes a provision allowing the operator to use an operations manual instruction plus a check list item in lieu of a placard installation.

DRAFTING INFORMATION

The principal authors of this document are Everett W. Pittman, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Amendment 39-3118 (43 FR 1299) AD 78-01-15, by adding the following new paragraph (f):

(f) Within 30 days after the effective date of this AD as amended, unless already accomplished, and until paragraph (b) of this AD is accomplished, either:

(1) Install the following placard in full view of both pilots:

PRIOR TO EACH TAKEOFF, PERFORM AN ELEVATOR CONTROL SYSTEM CHECK IN ACCORDANCE WITH DC-8 SERVICE BULLETIN A27-264.

(2) or, include an instruction in the DC-8 Operations Manual and a check list item which specifies those control checks identified in SB A27-264.

This AD becomes effective June 1, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on April 17, 1978.

ROBERT H. STANTON,
Director,
FAA Western Region.

[FR Doc. 78-11857 Filed 5-3-78; 8:45 am]

[4910-13]

[Docket No. 73-WE-9-AD; Amdt. 39-3201]

PART 39—AIRWORTHINESS DIRECTIVES

Rockwell International Model NA-265 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) applicable to Rockwell International NA-265 series airplanes by

amending the aircraft effectivity. The FAA has determined that inspection of wing spars and related areas for stress corrosion cracking is not required in airplanes whose spars have been manufactured from 7049-T73 aluminum.

DATES: Effective May 5, 1978. Compliance schedule—as prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from: Rockwell International, Sabreliner Division, 827 Lapham Street, El Segundo, Calif. 90245.

Also, a copy of the service bulletin may be reviewed, at or a copy obtained from: Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Kyle L. Olsen, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: This notice amends Amendment 39-1707 (38 FR 23513), AD 73-18-3, which currently requires inspection of the wing spars and related areas for stress corrosion cracking on Rockwell International Model NA-265 series airplanes. After issuing Amendment 39-1707, Rockwell International changed the material used in the manufacture of the wing spar and related areas to 7049-T73 aluminum, which is less susceptible to stress corrosion cracking than the original 7079-T6 aluminum. Therefore, the FAA is amending Amendment 39-1707 to require inspections only on the Rockwell International Model NA-265 series airplanes, with 7079-T6 aluminum wing spars and related areas.

Since this amendment relieves a restriction and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and good cause exists for making the amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Stanton R. Wood, Aircraft Engineering Division, and Mark T. McDermott, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by amending the applicability statement of Amendment 39-1707 (38 FR 23513), AD 73-18-3 as follows:

ROCKWELL INTERNATIONAL. Applies to Model NA-265-40 Serial Nos. 282-1 and subsequent; Model NA-265-50 Serial No. 287-1; Model NA-265-60 Serial Nos. 306-1 through -139; Model NA-265-70 Serial Nos. 370-1 through -9; and Model NA-265-80 Serial Nos. 380-1 through -61.

This amendment becomes effective May 5, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on April 20, 1978.

W. R. FREHSE,
Acting Director,
FAA Western Region.

[4910-13]

[Docket No. 77-EA-45, Amdt. 39-3205]

PART 39—AIRWORTHINESS DIRECTIVES

Bendix

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule (AD) requires an inspection and replacement where necessary of the impulse coupling components of Bendix S-20, S-1200 Series, and D-2000/D-2200 Series magnetos. This procedure will preclude magneto impulse coupling failure which may cause engine failure. There have been reports of such failures due to wear beyond serviceable limits.

EFFECTIVE DATE: May 9, 1978.

ADDRESSES: Bendix Service Bulletins may be acquired from the manufacturer at the Bendix Electrical Components Division, Sidney, N.Y. 13838.

FOR FURTHER INFORMATION CONTACT:

A. T. Farrar, Propulsion Section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-2894.

SUPPLEMENTARY INFORMATION: There have been reports of Bendix S and D Series magnetos whose magneto impulse coupling cam assembly, when worn beyond serviceable limits tends to lock up and prevent magneto rotation. This can result in engine failure. Since this is a deficiency which can exist or develop in similar type designed magnetos, an airworthiness directive is being issued which will require repetitive inspection or replacement of the components. Since the deficiency affects air safety, notice or public procedure hereon are impractical and good cause exists for making the rule effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are A. T. Farrar, Flight Standards Division, and Thomas C. Halloran, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, as follows:

Applies to Bendix S-20 Series, S-1200 Series and D-2000/D-2200 Series magnetos.

Compliance required as indicated unless previously accomplished.

To preclude magneto or engine failure resulting from magneto impulse coupling failure, accomplish the following:

a. On magnetos having less than 975 hours in service since new or overhaul on the effective date of this AD, accomplish the provisions of paragraph "C", of this AD prior to 1,000 hours in service and each 1,000 hours in service thereafter.

b. On magnetos having 975 or more hours in service since new or overhaul on the effective date of this AD, accomplish the provisions of paragraph "C", of this AD within the next 25 hours in service and each 1,000 hours in service thereafter.

c. Inspect and replace, if necessary, impulse coupling components in accordance with paragraph "Detailed Instructions" contained in Bendix Electrical Components Division, Service Bulletin Number 599 or an equivalent inspection or procedure.

d. After accomplishing the instructions of this AD, make a log book entry showing the compliance time. Include the magneto make, model and serial number. Except for new or zero time overhauled magnetos, any magneto not accompanied by a record of operating time must be in compliance with paragraph "C" upon installation on an approved engine.

e. Equivalent inspections and procedures must be approved by the Chief of the Engineering & Manufacturing Branch, FAA Eastern Region.

f. As permitted by FARs 21.197 and 21.199, aircraft may be flown to a base where maintenance required by this Airworthiness Directive can be accomplished.

Effective date. This amendment is effective May 9, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document

V 4 3 — 8 7

does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on April 25, 1978.

L. J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc. 78-12009 Filed 5-3-78; 8:45 am]

[4910-13]

[Docket No. 78-WE-5-AD, Amdt. 39-3204]

PART 39—AIRWORTHINESS DIRECTIVES

Lockheed 188A and 188C Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires repetitive inspections, provides a terminating action for the inspection requirements and provides for repair if necessary of the wing front spar lower cap on the Lockheed 188. The purpose of this AD is to detect fatigue cracks and thus preclude failure that could result in loss of strength capability of the wing.

DATES: Effective date: May 9, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from: Lockheed-California Co., P.O. Box 551, Burbank, Calif. 91520, Attention: Commercial Support Contracts, Department 63-11, U33, B-1. Also, a copy of the service information may be reviewed, at or a copy obtained from: Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board. Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: There has been a reported instance of a fatigue crack in the wing front spar lower cap and adjacent wing plank on a Lockheed L-188 aircraft that results in a reduction of the wing strength capability. The manufacturer has issued Alert Service Bulletin 88/SB-699 which details an inspection procedure to detect fatigue cracks in the front spar lower cap and adjacent wing plank, repair instructions if a crack is detected and a modification that reinforces the cap thus reducing the susceptibility to fatigue cracking. Since this condition is likely to exist or develop on other airplanes of the same type design, an airworthiness directive is being issued which requires repetitive inspections, repair if a crack is detected and provides a terminating action for the inspection requirements.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Stanton R. Wood, Aircraft Engineering Division, and Mark T. McDermott, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

LOCKHEED-CALIFORNIA COMPANY: Applies to all Model 188A and 188C airplanes certificated in all categories.

To present loss in strength capability of the wing due to fatigue cracking accomplish the following; unless previously accomplished:

(a) Before accumulating 25,000 hours time in service or within the next 100 hours time in service on those airplanes with 35,000 or more hours time in service, unless accomplished within the last 400 hours:

(1) Inspect wing front spar lower cap per paragraph (d) and:

(2) Reinspect per paragraph (d) prior to accumulating 500 hours time in service since the inspection required by paragraph (a)(1).

(b) Within 400 hours time in service since the inspection required in (a)(2) and thereafter at intervals not to exceed 2,000 hours time in service inspect per paragraph (e).

(c) When the inspections per paragraph (a) (1) and (2) are required by this AD the operator may conduct inspection per paragraph (b), (including the 2,000 hour repetitive inspection), in lieu of inspection per paragraph (a) (1) and (2).

(d) Inspect per paragraph 2.B., Method (1) of Lockheed Alert Service Bulletin 88.SB-699 dated March 23, 1978 or later FAA approved revision, (hereinafter referred to as ASB 88/SB-699).

(e) Inspect per paragraph 2.B. Method (2), or per paragraph 2.C or per paragraph 2.D of Lockheed ASB 88/SB-699.

(f) Repair any detected crack prior to further flight per Lockheed ASB 88/SB-699. Upon accomplishment of this repair the inspection requirements of this AD are terminated.

(g) The inspection requirements of this AD may be terminated upon accomplishment of modification per Lockheed-California Drawing Number 842185 dated March 8, 1978, or later FAA approved revision.

(h) Equivalent inspections and/or repair procedures may be used when approved by Chief, Aircraft Engineering Division, FAA Western Region.

This amendment becomes effective May 9, 1978.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on April 24, 1978.

ROBERT H. STANTON,
Director, FAA Western Region.

[FR Doc. 78-12006 Filed 5-3-78; 8:45 am]

[4910-13]

[Docket No. 74-WE-32-AD, Amdt. 39-3206]

PART 39—AIRWORTHINESS DIRECTIVES

General Dynamics Models 340 and 440 Series Airplanes Including those modified for Turbo-Propeller Power

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) by modifying the inspection requirements of fuselage stringers and by extending the third and subsequent repetitive inspection intervals on certain General Dynamics Model 340 and 440 series airplanes. The amendment is necessary to provide relief by conditionally extending certain repetitive inspections, without compromising safety.

DATE: Effective May 4, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESS: The applicable service bulletin may be obtained from: General Dynamics, P.O. Box 80877, San Diego, Calif. 92138, Attention: Larry Hayes, Manager Product Support, Convair Division. Also, a copy of the service bulletin may be reviewed, at or a copy obtained from: Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Kyle L. Olsen, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009, telephone: 213-536-6398.

SUPPLEMENTARY INFORMATION: This notice amends Amendment 39-1904, AD 74-16-01, which currently requires repetitive inspections of the fuselage stringers in areas adjacent to beltframe attachments on General Dynamics Model 340 and 440 series airplanes.

The FAA has been requested to extend the third and subsequent inspection intervals. This proposed extension is based upon data that shows the reinspection interval after the second inspection for stringer cracks in all areas except the aft, lower fuselage may be extended to 7,500 hours time in service. This is applicable to aircraft operated up to a maximum gross weight of 55,000 pounds without a main deck cargo door.

Therefore, the FAA is amending Amendment 39-1904 by modifying the third and subsequent repetitive inspection intervals on certain General Dynamics Model 340 and 440 series airplanes.

Since this amendment relieves a restriction and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Stanton R. Wood, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by amending Amendment 39-1904 (39 FR 27314), AD 74-16-01 as follows:

1. Amend paragraph (a) to read, as follows:

(a) For airplanes with more than 52,000 hours time in service as of the effective date of this AD, perform an initial inspection of the stringer to frame attachments per (g)(1), within 300 hours additional time in service, unless already accomplished within the last 4,700 hours time in service, in addition:

(1) Aircraft certificated at a maximum gross weight of 55,000 pounds or less, and without a main deck cargo door, within 5,000 hours time in service from the initial inspection, inspect per paragraph (g)(2), and thereafter:

(i) Within 5,000 hours time in service from the inspection accomplished per paragraph (g)(2), and thereafter at intervals not to exceed 5,000 hours time in service from the last inspection, inspect per paragraph (g)(3); and,

(ii) Within 7,500 hours time in service from the inspection accomplished per paragraph (g)(2), and thereafter at intervals not to exceed 7,500 hours time in service from the last inspection, inspect per paragraph (g)(4).

(2) Aircraft with a main deck cargo door and aircraft certificated at a maximum gross weight of more than 55,000 pounds, within 5,000 hours time in service from the initial inspection and thereafter at intervals not to exceed 5,000 hours time in service from the last inspection, inspect per paragraph (g)(2).

2. Amend paragraph (b) to read as follows:

(b) For airplanes with more than 42,000 hours time in service, up to and including 52,000 hours time in service as of the effective date of this AD, perform an initial inspection of the stringer to frame attachments per (g)(1), within 1,500 hours additional time in service, unless already accomplished within the last 3,500 hours time in service, and reinspect in accordance with paragraph (a)(1) or (a)(2).

3. Add a new paragraph (g)(3) as follows:

(g)(3) Perform a close visual inspection of all stringer to frame attachment for evidence of cracks below the floor between stations 681 and 889.

4. Add a new paragraph (g)(4) as follows:

(g)(4) Perform a close visual inspection of all stringer to frame attachment for evidence of cracks between stations 140 and 889 above the floor and between stations 140 and 681 below the floor.

5. Reidentify old paragraph g(3) as g(5).

This amendment becomes effective May 4, 1978.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on April 25, 1978.

ROBERT H. STANTON,
Director, FAA Western Region.

[Airspace Docket No. 78-ANW-02]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Controlled Airspace, Transition Area

AGENCY: Federal Aviation Commission.

ACTION: Final rule.

SUMMARY: This amendment alters the designation of controlled airspace in the vicinity of Twin Falls, Idaho. This rule designates additional airspace as 1,200-foot-transition area. This action is necessary to provide controlled airspaced for a planned VOR/DME RWY 7 standard instrument approach procedure to the Twin Falls City-County Airport.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Dale C. Jepsen, Airspace Specialist (ANS-533), Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, Northwest Region, FAA Building, Boeing Field, Seattle, Wash. 98108; telephone 206-767-2610.

SUPPLEMENTARY INFORMATION:

HISTORY

A notice of proposed rule making (NPRM) was published in the FEDERAL REGISTER on Tuesday, February 21, 1978, which described the proposed Twin Falls, Idaho, transition area. Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. Three comments were received, two favorable, and one which objected to the proposal.

The comment which objected to the proposal was submitted by the Idaho Air National Guard (IDANG). This objection was based upon the fact that the proposal transition area extension would overlap the edge of a low altitude training route, TR-409.

An analysis of this objection disclosed that TR-409 is a VFR route only and is scheduled to be terminated on January 1, 1979. Based upon the fact that TR-409 is strictly a VFR route, it has been determined that this airspace overlap would not adversely affect the proposed transition area extension.

THE RULE

This amendment to part 71 of the Federal Aviation Regulations (FAR) designates additional 1,200-foot-transi-

M Y 4 — 7 8 UMI

V 43 — 87 MAY 4 78 UMI

tion are as controlled airspace to encompass aircraft executing the proposed VOR/DME RWY 7 standard instrument approach to the Twin Falls City-County Airport.

DRAFTING INFORMATION

The principal authors of this document are Dale C. Jepsen, Airspace Specialist, Operations, Procedures and Airspace Branch, and Jonathan Howe, Regional Counsel, Northwest Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, the Twin Falls Transition Area in § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT, July 13, 1978, as follows:

TWIN FALLS, IDAHO

By amending the fourth and fifth lines of the description contained at 43 FR 613 (January 3, 1978) to read as follows:

"• • • of the VORTAC; that airspace extending upward from 1,200 feet above the surface within a 16.5-mile radius of the Twin Falls VORTAC, extending clockwise from the VORTAC 121° radial to the VORTAC 311 radial; within • • •".

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Seattle, Wash., on April 26, 1978.

C. B. WALK, JR.,
Director, Northwest Region.

[FR Doc. 78-12126 Filed 5-3-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-GL-5]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Alteration of Federal Airways, Reporting Points, Area High Routes and Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments change the name of the Milwaukee, Wis., VORTAC (an air navigation aid) to Badger, Wis., VORTAC in the description of airways, reporting points, jet routes and area high routes. These actions will eliminate the possible confusion of using the same name for two locations. These amendments contain no changes in the designation of airspace or its use.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: The purpose of these amendments to Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) is to change the name Milwaukee to Badger wherever it appears in the following airways, reporting points, jet routes and area high routes:

1. Airways: V-2, V-9, V-30, V-63, V-170, V-191 and V-217.
2. Reporting Points: Domestic Low Altitude Reporting Points and Domestic High Altitude Reporting Points.
3. Jet Routes: J-16, J-34, J-36, J-68, J-70, J-89, J-101 and J-105.
4. Area High Routes: J805R, J821R, J822R, J846R, J866R, J883R, J884R, J887R, J937R and J940R.

Because these actions merely rename an existing air navigation aid without changing the designation of any airspace or its use, these amendments are a minor matter on which the public would have no particular interest; therefore, notice and public procedure thereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) as republished (43 FR 307, 3548, 4421, 42 FR 58930, 43 FR 631, 638, 714, 730) are amended, effective 0901 G.m.t., July 13, 1978, as follows:

1. In § 71.123 (43 FR 307, 3548, 4421, 42 FR 58930) "Milwaukee" is deleted and "Badger" is substituted therefor, wherever it appears in airways numbered V-2, V-9, V-30, V-63, V-170, V-191 and V-217.
2. In § 71.203 (43 FR 631) "Milwaukee, Wis." is deleted and "Badger, Wis." is substituted therefor.
3. In § 71.207 (43 FR 638) "Milwaukee, Wis." is deleted and "Badger, Wis." is substituted therefor.
4. In § 75.100 (43 FR 714) "Milwaukee" is deleted and "Badger" is substituted therefor, wherever it appears in jet routes numbered 16, 34, 36, 68, 70, 89, 101 and 105.
5. In § 75.400 (43 FR 730) "Milwaukee" is deleted and "Badger" is substituted therefor wherever it appears in area high routes numbered J805R, J821R, J822R, J846R, J866R, J883R, J884R, J887R, J937R and J940R.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on April 25, 1978.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 77-EA-94]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: State College, Pa.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the State College, Pa., transition area. This alteration will provide protection to aircraft executing a new instrument approach which has been developed for the University Park Airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

EFFECTIVE DATE: 0901 G.m.t., August 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-3391.

SUPPLEMENTARY INFORMATION: The notice of proposed rulemaking was published in the FEDERAL REGISTER on February 13, 1978 (43 FR 6095). Interested parties were given 30 days in which to submit comments on the proposal. No objections were received.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, subpart G of part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended, effective 0901 G.m.t., August 10, 1978, as published.

(Sec. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(c)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on April 20, 1978.

L. J. CARDINALI,
Acting Director, Eastern Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the description of the State College, Pa., transition area by inserting after the phrase, "extending clockwise from a 280° bearing to a 020° bearing from the airport;", the following; "within 3.5 miles each side of the University Park Airport ILS Runway 24 localizer course, extending from the OM to 10.5 miles northeast of the OM;"

[FR Doc. 78-12010 Filed 5-3-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-EA-15]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: Georgetown, Del.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule will establish additional controlled airspace (transition area) so as to protect aircraft using a revised RNAV RWY 22 instrument approach procedure for Sussex County Airport, Georgetown, Del. The revision of the approach is small and only requires a minimum amount of additional controlled airspace.

EFFECTIVE DATE: 0901 G.m.t. June 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-3391.

SUPPLEMENTARY INFORMATION: The addition to the transition area is approximately 2 square miles. As a result, the effect of the rule is minor in nature and thus notice and public procedure hereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t. June 1, 1978, as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by amending the description of the Georgetown, Del., 700-foot floor transition area by adding the following to the description: "and within 2.5 miles each side of a 033° bearing from a point 38°41'42" N., 75°21'18" W., extending from said point to 7 miles northeast of said point."

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(c)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on April 19, 1978.

L. J. CARDINALI,
Acting Director, Eastern Region.

[4910-13]

[Docket No. 78-SO-29]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Mobile, Ala., Control Zone (Formerly Aerospace Airport) and Mobile, Ala., Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Mobile, Ala., Control Zone (formerly Aerospace Airport) and the Mobile, Ala., transition area. The name of the Mobile Aerospace Airport has been changed to Brookley Airport. This action of the City of Mobile, officially changing the name, requires this to be reflected in the control zone and transition area descriptions.

EFFECTIVE DATE: 0901 G.m.t., July 13, 1978.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320; telephone 404-763-7646.

SUPPLEMENTARY INFORMATION: In a regular meeting, the City of Mobile officially changed the name of the Mobile Aerospace Airport to Brookley Airport. Therefore, it is necessary to alter the description of the Mobile, Ala. (Aerospace Airport), Control Zone and Transition Area to reflect the name change. Since this alteration is editorial in nature, notice and public procedures hereon are not necessary.

DRAFTING INFORMATION

The principal authors of this document are William F. Herring, Airspace and Procedures Branch, Air Traffic Division, and Keith S. May, Office of Regional Counsel.

ADOPTION OF AMENDMENT

Accordingly, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., July 13, 1978, as hereinafter set forth:

In Subpart F, § 71.171 (43 FR 355), the Mobile, Ala. (formerly Aerospace Airport, now Brookley Airport), control zone is amended as follows:

"• • • Mobile Aerospace Airport is deleted and Brookley Airport • • •" is substituted therefor.

In Subpart G, § 71.181 (43 FR 440), the Mobile, Ala., transition area is amended as follows:

"• • • Mobile Aerospace Airport • • •" is deleted and

"• • • Brookley Airport • • •" is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

[Docket No. 17890, Amdt. No. 1110]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

FOR EXAMINATION

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

FOR PURCHASE

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

BY SUBSCRIPTION

Copies of all SIAPs, mailed once every 2 weeks, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER A—GENERAL

PART 1009—GENERAL STATEMENTS OF POLICY OR INTERPRETATION

Policy Regarding the Granting of Emergency Exemptions from Commission Regulations

AGENCY: Consumer Product Safety Commission.

ACTION: Statement of Policy on which comment is solicited.

SUMMARY: This document sets forth the policy of the Commission regarding the granting of emergency exemptions to companies which inadvertently produce products that do not conform to Commission regulations. The policy statement lists several criteria which the Commission considers in deciding whether to grant or deny any exemption request. While the Commission is reluctant to grant such requests, it believes that the public should be apprised of the manner in which it rules on exemption requests and therefore is publishing the policy for codification.

DATES: The policy is effective May 4, 1978. Comments may be submitted to the Office of the Secretary of the Commission until June 5, 1978.

ADDRESS: Comments to: Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT:

Carole Roth, Office of the General Counsel, Consumer Product Safety Commission, 1111 18th St. NW., Washington, D.C. 20207, 202-634-7770.

SUPPLEMENTARY INFORMATION: The purpose of this notice is to set forth the policy of the Consumer Product Safety Commission with respect to emergency requests for exemptions from companies which inadvertently produce products that do not conform to Commission regulations issued under the five acts the Commission administers. The notice lists criteria the Commission considers in deciding whether to grant or deny a request for exemption and therefore, should provide guidance to companies on the types of information to be submitted with requests. In addition, published Commission procedures regarding petitioning for amendments to regulations may assist companies in determining what supporting data to submit with a request. (See, for example, existing Commission procedures at

V 4 3 — 1 8 7 M Y 4 7 8 UMI

16 CFR Part 1110, 16 CFR 1607.14, 16 CFR 1500.82, and 16 CFR 1500.201). The exemption requests themselves should be filed with the Office of the Secretary of the Commission.

The policy is effective on an interim basis, May 4, 1978. However, the Commission is interested in public views as to this policy and solicits comments on the policy until June 5, 1978. Since this matter is a general statement of policy, it is exempt from the notice and public procedure provisions of the Administrative Procedure Act (5 U.S.C. 553). However, in view of the importance of the policy, the Commission has decided to solicit public comment and may amend the policy as a result of the comments. In publishing this policy for comment, the Commission does not intend to set a precedent for future policy statements.

The Consumer Product Safety Commission issues the following policy effective May 4, 1978, under the provisions of the Consumer Product Safety Act (15 U.S.C. 2051), the Federal Hazardous Substances Act (15 U.S.C. 1261), the Flammable Fabrics Act (15 U.S.C. 1191), the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1471), and the Refrigerator Safety Act (15 U.S.C. 2111). Accordingly, the Commission amends Title 16 of the Code of Federal Regulations by adding to Chapter II, Part 1009 a new § 1009.9 as follows:

§ 1009.9 Policy regarding the granting of emergency exemptions from Commission regulations.

(a) This document states the Consumer Product Safety Commission's policy with respect to emergency requests for exemptions from companies which inadvertently produce products that do not conform to Commission regulations issued under the five acts the Commission administers. These acts are the Consumer Product Safety Act, the Federal Hazardous Substances Act, the Flammable Fabrics Act, the Poison Prevention Packaging Act of 1970 and the Refrigerator Safety Act. While the Commission is reluctant to grant such requests, it believes that the public should be apprised of the manner in which it rules on exemption requests and therefore is publishing the policy to provide guidance to industry and others making such requests. The publication of the policy will also serve to inform the public of the criteria that the Commission uses in ruling upon such requests. This policy is intended to cover emergency requests for exemptions and, while relevant, is not intended to limit the discretion of CPSC staff to close or not to open cases in the routine enforcement of CPSC regulations.

(b) The policy governs requests for exemption from any regulation under any act the Commission administers. The policy lists criteria the Commission considers in deciding whether to grant or deny an exemption request and therefore, should provide guidance to companies on the types of information to be submitted with requests. In addition, published Commission procedures regarding petitioning for amendments to regulations may assist companies in determining what supporting data to submit with a request. (See, for example, existing Commission procedures at 16 CFR Part 1110, 16 CFR 1607.14, 16 CFR 1500.82 and 16 CFR 201). The exemption requests themselves should be filed with the Office of the Secretary of the Commission.

(c) It is the general policy of the Commission that when a particular exemption request is made and granted, all similarly situated persons are accorded the same relief as the person who requested the exemption. Therefore, when any amendment to a Commission regulation is proposed or a statement of enforcement policy is issued, the document to the extent practicable will be phrased in objective terms so that all similarly situated persons will be able to determine whether their products would fall within the relief.

(d) In deciding whether to grant or deny an exemption request, the Commission considers the following general criteria:

(1) *The degree to which the exemption if granted would expose consumers to an increased risk of injury.* The Commission does not believe it should exempt products which would present a significantly greater risk to consumers than complying products. Therefore, the Commission will not grant exemption requests in such cases.

(2) *The cost to the Commission of granting emergency requests.* Granting emergency exemption requests will in most cases require drafting a proposed and a final amendment or a statement of enforcement policy for publication in the FEDERAL REGISTER. Such action may also require the Commission to monitor the sale or distribution of the products. These activities consume scarce Commission resources. In some instances, the costs to the Commission may exceed the benefit to be derived by a company and similarly-situated companies. If so, the Commission may deny the request on this ground.

(3) *The precedential effect of exempting some products.* The Commission recognizes that decisions to exempt some products set precedents in at least two ways. First, they indicate to companies that the CPSC will permit deviations to a given regulation. Second, they indicate to companies that the CPSC will permit deviations to regulations in general. Both precedents, if set carelessly by the CPSC, could result in many requests for exemption and could undermine the stability and integrity of the Commission's regulations.

(e) In deciding whether to grant or deny an exemption request, the Commission also considers the following factors which relate specifically to the company making the request: (If the request is granted, however, all similarly-situated companies will be accorded the same relief).

(1) *The nature of the emergency exemption request.* The Commission will not reward bad quality control or faulty design work by permitting companies to market their mistakes. Although it is difficult to detail specific instances, the Commission is sympathetic to companies that produced noncomplying products due to factors beyond their immediate control or despite their best efforts.

(2) *The economic loss which a company will suffer if its emergency request is denied.* The greater the loss a company may suffer the more likely the Commission will favorably consider an exemption. However, the Commission does not believe economic loss alone should be determinative of an emergency exemption request.

(3) *The fairness to competitors.* The Commission is reluctant to grant relief if it could place the company at an unfair competitive advantage over other companies which have successfully complied with the same regulation. Therefore, the Commission will afford the same relief to similarly-situated companies, and will decline to grant a request where unfair competitive advantage may result.

All interested persons are invited to submit written comments, preferably with five copies, to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, by June 5, 1978. Comments received after that date will be considered insofar as practicable. Received comments will be available for inspection in the Office of the Secretary, third floor, 1111 18th St. NW., Washington, D.C. during working hours Monday through Friday.

Effective date: May 4, 1978.

Dated: April 28, 1978.

SADYE E. DUNN,
Acting Secretary, Consumer Product Safety Commission.

[6355-01]

PART 1032—COMMISSION INVOLVEMENT IN VOLUNTARY STANDARDS ACTIVITIES

General Statement of Policy

AGENCY: Consumer Product Safety Commssion.

ACTION: Revisions to Statement of Policy.

SUMMARY: The Commission in this document responds to comments on its statement of policy on Commission Involvement in Voluntary Standards Activities published in the FEDERAL REGISTER of November 10, 1977. The Commission also makes several revisions to the policy statement based on the comments. The revisions include establishing a time limit on the three meeting limitations for Commission involvement at the liaison level; requiring the Office of Program Management to include in its quarterly summary of voluntary standards activities a description of the extent to which the guidelines for Commission involvement in voluntary standards activities is being met; and establishing a procedure for organizations to submit to the Commission an existing voluntary standard for evaluation, with a request that the Commission make a commitment to defer mandatory standard development for the product addressed by the voluntary standard.

EFFECTIVE DATE: As amended, the policy takes effect on May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. MacKay, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6557.

SUPPLEMENTARY INFORMATION: On November 10, 1977, (42 FR 58726), the Consumer Product Safety Commission published in the FEDERAL REGISTER a statement of policy for the Commission's involvement in the development of voluntary consumer product safety standards and the role of voluntary standards activities in the development of mandatory standards by the Commission. The policy provides for three levels of Commission involvement in voluntary standards activities: Liaison, monitoring, and participating. It describes the level of support the Commission offers to voluntary standards activities and establishes guidelines for Commission participation. It also addresses the situation where the Commission is considering development of a mandatory standard for a product and there is an existing voluntary standard or a voluntary standard under development which addresses the same risk of injury associated with the product.

Although the statement is a statement of policy and thus did not require the Commission to solicit public comment, the Commission nevertheless sought such comment and provided 60 days for the submission of comments. (The policy became effective May 4, 1978, and the Commission indicated it might make changes in the policy based on the comments received.) The Commission received 25 comments on the policy statement. Comments were submitted by consumers, voluntary standards organizations, trade associations, testing laboratories, and manufacturers of consumer products. The commentors, with one exception, generally supported the Commission's policy statement.

The substantive comments with the Commission's response are discussed below.

EXTENT AND FORM OF COMMISSION INVOLVEMENT IN THE DEVELOPMENT OF VOLUNTARY STANDARDS

Part A of the policy statement (codified as § 1032.2) describes the form and extent of Commission involvement in the development of voluntary standards. The policy establishes three levels of Commission involvement: liaison, monitoring and participation. Several commentors specifically supported the statement concerning the three levels of involvement. No commentors opposed these levels of involvement.

One commentor suggests in regard to Commission dissemination of information as part of its liaison function that it specifically recognize in its policy statement the rights of manufacturers under section 6(b) of the Consumer Products Safety Act, 15 U.S.C. 2055(b) (CPSA) when it disseminates information on consumer products.

Section 6(b) generally provides that the Commission must notify a manufacturer or private labeler in advance of publicly disclosing product safety information from which its identity will be readily ascertainable by the public. The Commission believes that all of its disseminations of information comply with the provisions of section 6(b) and that there is no need to include specific reference to that section of the CPSA in the policy statement. The Commission has published proposed regulations under section 6(b) (42 FR 54304), that specifically address the rights of manufacturers and private labelers under that section of the CPSA and provides a means for them to object to disseminations of information they believe to be inaccurate or misleading.

One commentor urges the Commission to establish a procedure whereby a voluntary standards group could formally petition the Commission for CPSC involvement in a voluntary standard development activity, and that there be a mechanism to appeal an unfavorable decision by the Executive Director on CPSC involvement.

The Commission suggests that any organization that desires CPSC involvement in a voluntary standards activity may request such involvement through the Office of the Executive Director. The Executive Director is responsible for the day-to-day operations of the Commission and in consultation with the Office of Program Management would consider the appropriateness of the request, the availability of staff resources, and Commission priorities. If the Executive Director determines that the staff should not be involved in a particular voluntary standards activity, the requesting organization can always request the Commission to reconsider the request. The Commission believes this informal procedure, which has been followed in the past, has worked effectively. Therefore, the Commission does not consider it necessary at this time to adopt a formal procedure for seeking CPSC staff involvement in voluntary standards activities or for appealing an adverse decision on involvement by the Executive Director.

The description of liaison activities in the policy statement (codified as § 1032.2(b)(1)) limits staff attendance at meetings concerning the development of voluntary standards to not more than three meetings. One commentor suggests that there be a time limit imposed on the three meeting limit for Commission involvement at the liaison level.

The Commission agrees that a time limitation is appropriate in order to ensure that liaison functions which involve a minimal commitment of Commission resources can be effectively carried out. Without a time limitation, a request by a voluntary standards organization for a fourth meeting over an extended period of time would be deemed "monitoring" even though the involvement sought by the organization would, in fact, fall within the definition of "liaison." To minimize the possibility of this situation occurring, the Commission has imposed a 3-year time period on the three meeting limitation. The Commission believes the 3-year period for attendance at meetings for the purpose of liaison is reasonable because many committees meet on an annual basis and it is unlikely that staff attendance at these voluntary standards activities would be necessarily more than once a year. It should be noted that if the Commission wishes at the outset of a voluntary standards development activity to be more involved than provided by liaison, it may decided to monitor or participate without going through the liaison process as long as the staff obtains approval for monitoring or participating in accordance with § 1032.3.

One commentor suggests that the Commission establish a specific time period for responding to requests for Commission involvement in the development of voluntary standards. Additionally, the commentor suggests that the Commission should make known to the committee making the request its reasons for denying any request for involvement.

V 4 3 | 8 7 MAY 4 78 UMI

The Commission appreciates the concern of a committee for receiving a timely response to a request for Commission involvement in voluntary standards development activities. It is unlikely, however, that a decision to provide either "liaison" or "monitoring" will consume any great amount of time since the Executive Director has the authority to make such decisions. A request for "participation" may require the staff to obtain additional information to support a staff request to the Commissioners for approval to participate in a voluntary standards effort. This additional information may be necessary to justify commitment of Commission resources. Once the Commission has adequate information to make a decision on participation it is unlikely that it would take the Commission a great deal of time to reach a decision. Thus, the Commission does not believe it is necessary to establish a time limit in this policy statement at this time.

In handling requests for Commission involvement in voluntary standards development activities, the Commission will normally explain its reasons for the denial of any requests and, therefore, does not believe it necessary to incorporate such a requirement in the policy statement.

DETERMINATION OF COMMISSION INVOLVEMENT IN VOLUNTARY STANDARDS ACTIVITIES

The Commission received two comments concerning the contents of section B, (codified as § 1032.3) "Determination of Commission Involvement in Voluntary Standards Activities". This section provides that the Executive Director shall approve Commission activities that are within the definition of "liaison" and "monitoring", and that the Commissioners shall approve activities defined as "participating". It also provides that the Commission's Office of Program Management (OPM) is responsible for filing with the Commission a quarterly summary of its voluntary standards activities.

One commentor suggests that the quarterly summary that the Office of Program Management provides the Commission on its voluntary standards activities include a statement as to the extent to which the guidelines set out in section D of the policy (now § 1032.5) governing Commission participation in voluntary standards activities are being met. The Commission agrees with this recommended change and the policy statement has been revised to incorporate this change.

Another commentor requests that the requirement that the Commissioners approve activities within the definition of "participation" be clarified. The commentor suggests this provision could be read to mean approval must be given by all of the Commissioners then in office.

The Commission acts by vote of a majority of its members except in those situations where there are only three sitting Commissioners. When there are 4 or 5 Commissioners in office, a majority vote of the Commissioners would be sufficient to approve participation activities. Where there are only three sitting Commissioners, the Commission's internal voting policy provides that an action can be approved with two affirmative votes and one abstention. The Commission does not believe it is necessary to explain its voting procedure in the policy statement.

COMMISSION SUPPORT OF VOLUNTARY STANDARDS PROGRAMS

Section C of the policy statement (codified as § 1032.4) describes the actions the Commission may take to support voluntary standards programs.

One commentor expresses the view that the policy statement is an attempt to create product safety standards outside the provisions of section 7 of the CPSA, 15 U.S.C. 2056. Section 7 authorizes the Commission to issue mandatory consumer product safety standards. The commentor bases this view on section C of the policy statement which states in relevant part that the Commission may support voluntary standards activities by encouraging the initiation of voluntary standards activities and encouraging state and local governments to reference or incorporate the provisions of a voluntary standard in their regulations or ordinances. The commentor apparently equates these activities with issuance of a mandatory standard under section 7 of the CPSA. Apparently the commentor has misconstrued the intent of the policy with regard to the use of voluntary standards in reducing injury associated with consumer products. The Commission's involvement in voluntary standards activities is not equivalent to issuing a mandatory standard under section 7 of the CPSA since the Commission through this involvement is not issuing mandatory standards.

One commentor suggests that the Commission revise its policy to openly invite the development of voluntary standards by industries as a means of avoiding a mandatory standard proceeding.

The Commission has always encouraged the development of voluntary consumer product safety standards to improve the level of safety associated with consumer products. Section C(2) of the policy statement (now § 1032.4(b)(2)) specifically provides for Commission encouragement of the initiation of voluntary standards for specific consumer products. The Commission does not believe it is necessary to specifically invite the development of voluntary standards in this policy statement.

Two commentors suggest that the Commission should have a program to educate consumers in the safe use of various consumer products.

The Commission's information and education program is directed to providing information to consumers on hazards associated with the use of specific consumer products and the safe selection and maintenance of consumer products.

One commentor suggests that the Commission provide a more detailed statement of actions it would take in the dissemination of information and educational materials regarding a voluntary standard or its use. Another commentor suggests that the Commission should, in cooperation with voluntary standards groups and others, "design and implement" methods of disseminating information and education about the voluntary standard, as well as the product covered by the voluntary standard and the standards use.

The Commission, in issuing its policy statement, considered the role it would play in disseminating information concerning a voluntary standard. The Commission believes that it would generally not be appropriate for it to promote a voluntary standard through dissemination of information and education programs, or to design or implement programs which are intended to provide information to the public about voluntary standards or their uses. Rather that is a function more appropriately carried on by standards organizations, trade associations and individual manufacturers. The Commission in its policy statement did agree that it could provide assistance on methods of disseminating information and education about the voluntary standard or its use. The Commission believes this provision is sufficient at this time as a general policy.

GUIDELINES FOR COMMISSION PARTICIPATION IN VOLUNTARY STANDARDS ACTIVITIES

Section D of the policy statement (codified as § 1032.6) identifies criteria to be considered by the Commission in evaluating requests for staff participation in voluntary standards development activities. This section now provides that a Commission decision to participate in a voluntary standards activity will be dependent upon the extent to which the guidelines specified are met. One commentor suggests that these criteria also apply throughout the voluntary standards development activity, and not just when reviewing requests to participate. The Commission agrees with this comment and the suggested change has been made.

Two commentors state it was their understanding that the criteria in section D are only intended to be used for

"participation" activities. This view is correct.

One commentor questions the criteria for Commission participation in voluntary standards activities in D(1) (now § 1032.5(a)) which provides for "meaningful representation for small business and ultimate consumers" and the further requirement that such individuals have "technical expertise in the areas under consideration." The commentor suggests that it is not always possible to find such persons with the necessary expertise to work on these committees. The commentor suggests that the statement be revised to require the "opportunity" for these persons to have representation.

The Commission wishes to clarify its stated policy. It is not necessary that consumers or small businessmen or women themselves have the necessary technical expertise. Rather, the Commission believes it necessary that the persons representing the consumer or small business point of view have that expertise. Thus, consultants with appropriate expertise could be utilized to represent the consumer or small business point of view.

The Commission believes that merely providing an "opportunity" for consumers and small business to be represented is not sufficient for those voluntary standards development activities where the Commission is going to "participate". Therefore, no change in the policy statement is deemed necessary at this time.

One commentor suggests that the criteria in D(2) (now § 1032.5(b)), which conditions Commission participation in voluntary standards activities on voluntary standards not having requirements which will create undue anticompetitive effects or promote restraints of trade, are not completely appropriate for voluntary standards activities that concern safety matters. This commentor expressed the view that manufacturers who comply with the requirements of a voluntary safety standard are at a competitive disadvantage in the market place with those manufacturers who produce less expensive and more hazardous products that do not comply with a voluntary standard. The commentor argues that the production of safer products places some manufacturers in an anticompetitive position because of their increased costs.

The Commission recognizes that the development and implementation of voluntary safety standards may create, to some extent, anticompetitive effects or promote restraints of trade. The Commission also recognizes that requirements of voluntary safety standards that have such an effect may not necessarily be contrary to the public interest because of the increased safety benefits that are provided by those standards. Accordingly, the Commission has revised the criteria statement in subsection D(2) (now § 1032.5(b)) so that it provides that anticompetitive effects shall be excluded to the extent consistent with the public interest and the goal of product safety.

One commentor questions the authority of the Commission in section D(3) (now § 1032.5(c)) to review existing voluntary standards for anticompetitive effects. Apparently, the commentor did not realize that this provision was directed towards the standards development, organization. Thus, the Commission's statement in this area provides that the Commission, in deciding whether to participate in a voluntary standards development activity, will consider the extent to which the standards development group had made provisions for periodic and timely review of a voluntary standard including review for anticompetitive effects.

One comment concerns the guideline in D(4) (now § 1032.5(d)) for Commission participation in voluntary standards acitivities which provides that voluntary standards must be performance oriented and not design restrictive, to the maximum extent practical. The commentor suggests a performance oriented requirement may also be design restrictive and, therefore, recommends that the CPSC solicit private sector views as to the extent to which a performance oriented standard is design restrictive.

The Commission recognizes that performance oriented standards can be design restrictive. However, that is why the criteria provides for performance oriented and not design restrictive requirements "to the maximum practical extent." The Commission does not believe this comment necessitates any change in the policy statement.

One comment concerns the criteria in D(7) (now § 1032.5(g)) which provides that products identified as conforming to voluntary safety standards in which the Commission may participate, will be subjected to a testing and certification prodcedure that will provide assurance that the products conform to the standard. The commentor expresses the view that the standards writing committee should not be held accountable for compliance with the voluntary standards.

The Commission did not intend that the standards writing committee be responsible for the conformance of individual products to voluntary standards. The Commission was only attempting to encourage industry associations involved in the development of voluntary safety standards in which the Commission agreed to participate, to establish voluntary testing and certification programs that would provide the public, as well as the Commission, with the assurance that products that are identified as conforming to a voluntary standard actually meet the requirements of that standard. Indeed, in this provision the Commission states that self-certification of conformance in lieu of certification by independent testing laboratories may be an acceptable assurance of conformance.

EFFECT OF VOLUNTARY STANDARDS ACTIVITIES ON COMMISSION ACTIVITIES

Section E of the policy statement (codified as § 1032.6) describes the manner in which voluntary standards will be considered and reviewed in connection with mandatory standards activities.

EXISTING VOLUNTARY STANDARDS

Section E(1) (now § 1032.6(a)) discusses the effect of a voluntary standard on the Commission determination of whether a mandatory standard is necessary; describes circumstances under which the Commission may encourage conformance to a voluntary standard in lieu of initiating a mandatory standard development activity; and describes generally how the Commission will evaluate a voluntary standard for adequacy.

One commentor suggests that the Commission publish guidelines as to the basic elements that must be present in a voluntary standard for it to be acceptable to the Commission in lieu of a mandatory standard. These basic elements are described in section E(1) of the policy statement (now § 1037.6) and do not appear to need further description at this time.

The same commentor also suggests that it might be helpful for the Commission to set forth publicly its basic criteria for selecting candidates for a mandatory standard. The Commission has previously issued a policy that sets forth guidelines the Commission uses in establishing its priorities for action including the development of mandatory standards, 16 CFR 1009.8. The Commission believes its policy on priorities addresses this comment.

In section E(1) (now § 1032.6(a)(2)) of the policy statement, the Commission acknowledges that there are situations in which adequate voluntary standards in combination with independent certification programs may support a conclusion that a mandatory standard is not necessary. One commentor has suggested deletion of the word "independent" because that commentor believes "independent" laboratory certification does not warrant special consideration and such a requirement is anti-competitive and a restraint of trade.

In using the term "independent certification program," the Commission did not intend to restrict the acceptability of a voluntary standard to in-

V 4 3 — 8 7

stances where only "independent" certification programs were used. A voluntary standard in combination with an appropriate, though not necessarily independent, certification program may be sufficient to support a conclusion that a mandatory standard is not necessary. For this reason the Commission has replaced the word "independent" with the term "appropriate."

One commentor suggests that before the Commission finds that a mandatory standard is not necessary because an adequate voluntary standard exists, it also determine that the voluntary standard was drafted in a manner such that the criteria governing Commission participation in the development of voluntary standards (section D, now § 1032.5) were met. These criteria concern such things as openness of standards development meetings to all interested persons, meaningful participation by representatives of all affected interests, degree of industry conformance, and the like.

The Commission believes each of the criteria listed in section D (now § 1032.5) of the policy statement are important for Commission participation in the development of voluntary standards. The extent to which the criteria in section D (§ 1032.5), have been met, will be considered by the Commission in evaluating a voluntary standard. The Commission does not believe, however, particularly in regard to the procedural criteria in section D, that these criteria should necessarily be controlling factors in determining the acceptability of existing voluntary standards. If this were not the case, a voluntary standard that in fact eliminates or reduces an identified risk of injury but that was developed without widespread public participation, could not be considered to be adequate by the Commission. In view of foregoing, the requested change is not deemed appropriate.

One commentor suggests that Commission evaluation of voluntary standards specifically include input from the organization that developed the standard. Another commentor suggests that there be industry input in the evaluation of the voluntary standard.

In evaluating voluntary standards, the Commission staff will consider all relevant information including information provided by the oranization that developed the standard. Under the Commission's openness policy, such an organization or any other organization or individual would have the opportunity to discuss the standard with the staff and make written submissions concerning the voluntary standard prior to any formal evaluation being transmitted to the Commissioners. The Commission believes that since there already exists an adequate opportunity for interested persons to provide input into Commission evaluation of voluntary standards, no revision in the policy statement is necessary at this time.

One commentor suggests that in evaluating voluntary standards, the Commission specifically include input from staff members who have developed a technical expertise concerning the standard under evaluation through work in the development of that voluntary standard.

As the commentor recognized in his comment, the descriptions in the policy statement of the staff personnel to be involved in the evaluation of voluntary standards is not intended to be all inclusive or restrictive. As a general rule, those Commission staff with technical expertise in the area under evaluation including persons with standards development experience will normally be involved in the evaluation process. Thus, no change in this area of the policy statement is deemed necessary.

One commentor suggests that any Commission evaluation of a voluntary standard include a review of the extent to which the voluntary standard incorporates "state of the art" technology. The Commission believes any evaluation of a voluntary standard must by necessity include consideration of whether the voluntary standard reflects at least the current "state of the art." Therefore, the Commission does not consider any change to be necessary.

One commentor suggests that the evaluation of a voluntary standard completed by the staff be "turned over to the appropriate standards committee."

The Commission, operating under a liberal freedom of information policy, would make a document evaluating a voluntary standard available upon request to any interested party in accordance with the Commission's regulations (16 CFR Part 1015) under the Freedom of Information Act, 5 U.S.C. 552. Rather than burden the Commission with a requirement that the evaluation be transmitted to the appropriate voluntary standards committee, the Commission believes that any voluntary standards committee interested in the Commission's activities can request a copy of any document it desires. There may be situations, however, where the staff takes the initiative to send such a document to a standards committee with a request for review and comment or with a request for a response as to the action contemplated by the committee. The policy, as it is currently written, does not preclude such staff initiatives.

Two commentors suggest that there may be an existing voluntary standard that adequately addresses most of the identifiable risks of injury associated with a consumer product, but may not adequately address a few areas. In such a situation, one commentor suggests that the Commission give the developer of the voluntary standard an opportunity to revise the existing standard so that it adequately addresses these other areas.

The Commission believes that in some cases it may be appropriate to allow a voluntary standards organization to revise an existing voluntary standard so that it adequately addresses those areas deemed by the Commission to be inadequately addressed. The Commission agrees this approach may achieve the objective of injury reduction with minimal use of the Commission's limited resources. Accordingly, additional language has been added to section E(1) (now § 1032.6)(a)(4)) reflecting this suggestion.

Voluntary Standards Under Development

Section E(2) of the policy statement (codified as § 1032.6(b)) provides that the Commission will not delay beginning a mandatory rulemaking proceeding in order to permit the initiation of the development of a voluntary standard. The Commission believes a contrary policy might encourage industries to delay work on voluntary standards until mandatory government action seemed likely.

Several commentors suggest that the Commission should consider deferring mandatory standard development activities even where a voluntary standard development begins after the Commission determines that a product presents an unreasonable risk of injury. These commentors contend that a voluntary standard can be developed expeditiously and can accomplish as much as a mandatory standard and at a substantial savings in time and money.

The Commission continues to believe that a policy of always delaying the commencement of rulemaking to allow for the initiation of the development of a voluntary standard would not serve the public interest because industries may tend to delay work on voluntary standards until mandatory government action seemed imminent. The Commission recognizes, however, that before issuing a mandatory standard it must find that such a standard is necessary. If an adequate voluntary standard is developed prior to the issuance of a mandatory standard, even though the development of the voluntary standard was commenced after Commission determination that a product presents an unreasonable risk of injury, the Commission could decide not to issue the mandatory standard.

Section E(2) (now § 1032.6(b)(2)) also provides that the Commission may consider delaying the initiation of a mandatory standard if there is "clear evidence" to show that a voluntary standard was commenced prior to a Commission determination of unreasonable risk of injuries. Two commentors recommended deletion of the term "clear evidence" because in their view the term is ambiguous and unnecessary. The Commission agrees the term "clear" is not needed and that word has been deleted.

Deferral of Mandatory Standards

Section E(3) of the policy statement (codified as § 1032.6(c)) discusses the situation where the Commission may make a revocable commitment to refrain from beginning mandatory standards development for a specified period of time not to exceed three years. One commentor requests that procedures be established so that a group would know how to present a voluntary standard to the Commission for evaluation.

The Commission agrees that some procedure is appropriate and has modified section E(3) (now § 1032.6(c)(1)) to provide that requests that the Commission evaluate a voluntary standard and make a commitment to defer mandatory standard development shall be submitted to the Office of the Secretary. Any organization submitting such a request must provide the Commission with information that at least identifies the risk of injury addressed by the voluntary standard, analyses how the voluntary standard adequately addresses the identified risk of injury and provides a technical rationale statement that supports the provisions of the standard.

One commentor suggests that if the Commission makes a commitment to defer development of a mandatory standard, the Commission should actively work with the voluntary standards organization to insure the effectiveness of the voluntary standard.

When the Commission makes a commitment to defer mandatory standards development for a product addressed by a voluntary standard, it may take those actions described in section C and E of this policy statement (now §§ 1032.4 and 1032.6) to assure the effectiveness of the voluntary standard in reducing identified risks of injury. These actions may include providing assistance on methods of disseminating information and education about the voluntary standards, and its use; encouraging State and local governments to reference or incorporate the provisions of a voluntary standard in regulations or ordinances; monitoring the conformance of products subject to a voluntary safety standard; encouraging conformance to the voluntary standard and subsequently evaluating the effectiveness of the standard in terms of accident and injury reductions; and taking other actions the Commission believes appropriate. Section E(3) (now § 1032.6(c)(3)) has been expanded to reference these provisions.

Several commentors suggest that the 3-year maximum commitment to defer development and issuances of mandatory standards may be too short to adequately evaluate the effectiveness of a voluntary standard particularly with regard to products with a long life expectancy. These commentors recommend that a case-by-case approach to the deferral time period be used.

The Commission agrees that in some instances a 3-year deferral period may not be adequate for all products although it generally seems to be appropriate. The Commission will set a deferral period on a case-by-case basis up to a maximum of 3 years. The Commission, however, has modified the statement to provide that at the end of the deferral period, it will reevaluate its decision to defer a mandatory standard activity and decide whether a further deferral is appropriate. During the deferral period, the Commission will, of course, monitor the effectiveness of the voluntary standard in terms of accident prevention and injury reduction. If the Commission believes that a voluntary standard is effective in reducing or eliminating risks of injury associated with a product, it may, rather than renewing or extending the deferral period, drop consideration of the product addressed by the voluntary standard from consideration for mandatory standards development activity.

One commentor suggests not specifying any period of time during which the Commission makes a revocable commitment to defer mandatory standards activities.

The Commission believes it is appropriate and reasonable to specify the period of time during which it will defer mandatory standards activities. By specifying a period of time, the affected industry will have some incentive to undertake any retooling necessary to conform to the voluntary standard without fear of further retooling costs necessitated by a mandatory standard within the deferral period. Therefore, the Commission does not believe the change suggested is appropriate.

Development of Mandatory Standards

Section E(4) (now § 1032.6(d)) provides that once the Commission has initiated a mandatory standard proceeding for a product which is addressed by a voluntary standard, the Commission will encourage the offeror to accept for the mandatory standard those provisions of the voluntary standard deemed by the Commission to be adequate.

One commentor suggests that in the event the voluntary standard is revised to address the inadequate provisions, the Commission should also consider those revised sections of the voluntary standard for inclusion in the mandatory standard. The Commission is not precluded from taking such action. However, once a mandatory standard development proceeding is initiated, the Commission would encourage the voluntary standards organization to participate through the offeror process in the development of a mandatory standard rather than proceeding independently. Those provisions of a voluntary standard that are inadequate could be addressed during the offeror process.

Miscellaneous

Several commentors suggested the Commission recognize and/or endorse voluntary standards found by the Commission to be adequate in eliminating or reducing an identified risk of injury.

The Commission has not agreed on whether it should officially "recognize" or "endorse" voluntary safety standards that adequately address identified risks of injury. The Commission is continuing to study this matter.

Having considered the public comments on the policy statement, the Commission issues a revised, codified policy statement as set forth below:

Therefore, pursuant to the Consumer Product Safety Act, (Pub. L. 92-573, 86 Stat. 1207 *et seq.*; 15 U.S.C. 2051 *et seq.*) a new Part 1032 is added to Title 16, Chapter II, Subchapter A, as follows:

Sec.

1032.1 Background.
1032.2 Extent and form of Commission involvement in the development of voluntary standards.
1032.3 Determination of Commission involvement in voluntary standards activities; summary of activities.
1032.4 Commission support of voluntary standards programs
1032.5 Guidelines for Commission participation in voluntary standards activities.
1032.6 Effect of voluntary standards activities on Commission activities.
1032.7 Attendance at meetings.

Authority: Consumer Product Safety Act, Pub. L. 92-573, 86 Stat. 1212 *et seq.*; (15 U.S.C. 2051 *et seq.*)

§ 1032.1 Background.

(a) The Commission recognizes that there are many voluntary standard development activities that are directed toward the establishment of safety specifications for consumer products, both at the domestic level and at the international level. Such activities were reviewed in 1968-1970 by the National Commission on Product Safety, which reached generally critical conclusions regarding the performance of the voluntary standards system in the

M Y — 4 7 8 UMI

V 43 | 87 MY 4 78 UMI

field of consumer product safety. However, it is the Commission's perception that voluntary standards organizations have made progress since 1970 in the development of voluntary standards. For example, there has been an increase in the involvement of consumers in the development and review of voluntary standards for consumer products, procedures have been used to expedite the development of voluntary safety standards, a number of substantive revisions in existing voluntary consumer product safety standards have been made and new standards have been established to better address risks of injury associated with consumer products.

(b) The Commission thus recognizes the contribution which voluntary standards have made to increase consumer product safety and will not ignore the potential future contributions which voluntary standards can make in reducing hazards associated with consumer products. While there might be circumstances in which a particular voluntary standard can substitute for a mandatory standard, the Commission generally views voluntary standards as complementary to and not a substitute for mandatory standards. The Commission realizes that mandatory standards generally can only address unreasonable risks of injury associated with a product but that voluntary standards can address any level of risk of injury. Therefore, the Commission believes that a proper combination of voluntary and mandatory standards can have a higher "payoff" in increased product safety than either mandatory or voluntary activities alone will have. Moreover, the Commission believes that by encouraging the development and use of voluntary safety standards, the level of product safety in the marketplace can be increased with a relatively small expenditure of Commission resources, particularly when compared to the resources necessary to issue mandatory safety standards for consumer products.

(c) And finally, even though the Commission supports an effective voluntary standards program, encourages the initiation and development of safety standards, and supports the adoption and use of such standards, it does not give up the option to promulgate a consumer product safety rule in accordance with the provisions of the Consumer Product Safety Act, and the other acts which the Commission administers.

§ 1032.2 Extent and form of Commission involvement in the Development of Voluntary Standards.

(a) The extent of Commission involvement in the development and support of voluntary safety standards for consumer products will be dependent upon the Commission's interest in the particular standards development activity.

(b) The Commission's interest in a specific voluntary standards activity will be based in part on the frequency and severity of injuries associated with the product, the involvement of the product in the accident, the susceptability of the hazard to correction through standards, and the overall priorities of the Commission. Commission involvement in voluntary standards activities generally will also be guided by the Commission's Operating Plan, budget documents and hazard index. There are three levels of Commission interactions in voluntary standards activities, each of which reflects a different level of Commission involvement as set forth below:

(1) *Liaison.* Liaison involves responding to requests from voluntary standards organizations, standards development committees, trade associations and consumer organizations, by providing information concerning the risks of injury associated with particular products, NEISS data, summaries and analyses of in-depth investigation reports; discussing Commission goals and objectives with regard to voluntary standards and improved consumer product safety; responding to requests for information concerning Commission programs; and initiating contacts with voluntary standards organizations to discuss cooperative voluntary standards activities. Responding to requests for liaison may include the attendance of Commission staff at two or three meeting of an outside organization within a three year period. Attendance by Commission staff at more than three such meetings will be considered "monitoring" or "participation" and will require appropriate approval of the Executive Director or the Commission.

(2) *Monitoring.* Monitoring involves maintaining an awareness of the voluntary standards development process through oral or written inquiries, receiving and reviewing minutes of meetings and copies of draft standards, and attending meetings for the purpose of observing and commenting during the standards development process.

(3) *Participating.* Participating involves regularly attending meetings of the standards development committee or group and taking an active part in the discussions of the committee and in developing the standard, in accordance with the Commission's policy published in 16 CFR Part 1031. Under certain conditions, the Commission will contribute to the deliberations of the committee by expending resources to provide technical assistance including research, engineering support, and information and education programs which would support the development and implementation of voluntary standards.

§ 1032.3 Determination of Commission involvement in voluntary standards activities; summary of activities.

(a) The Executive Director shall approve Commission activities that are within the definitions of "liaison" and "monitoring".

(b) The Commissioners shall approve activities that are within the definition of "participation."

(c) The Office of Program Management is responsible for preparing a quarterly summary of such activities for the Commission. The summary shall set forth, among other things, voluntary standards meetings attended, dates of the meetings, staff members in attendance, location of the meetings, the status of the CPSC involvement, and the extent to which each of the criteria set out in section 1032.5 for staff participation is being met for each proceeding.

§ 1032.4 Commission support of voluntary standards programs.

(a) The Commission's support of voluntary safety standards development activities may include any one or a combination of actions. The level of support will be dependent upon the degree of Commission involvement as described in § 1032.2 above.

(b) These actions may include:

(1) Providing epidemiological information and explanations of hazards for consumer products.

(2) Encouraging the initiation of the development of voluntary standards for specific consumer products.

(3) Indentifying specific risks of injury to be addressed in voluntary standards.

(4) Performing or subsidizing technical assistance, including research and engineering support, in the development of a voluntary standards activity in which the Commission is participating.

(5) Providing assistance on methods of disseminating information and education about the voluntary standard or its use.

(6) Performing a staff evaluation of a voluntary standard to determine its adequacy and efficacy in reducing the risks of injury that have been identified by the Commission as being associated with the use of the product.

(7) Encouraging state and local governments to reference or incorporate the provisions of a voluntary standard in regulations or ordinances.

(8) Monitoring the conformance of products subject to a voluntary safety standard.

(9) Listing voluntary standards that address specific hazards associated with the use of consumer products.

(10) Taking other actions that the Commission believes appropriate in a particular situation.

§ 1032.5 Guidelines for Commission participation in voluntary standards activities.

The Commission will consider the extent to which the following criteria are met in evaluating requests for staff "participation" in the development of voluntary safety standards for consumer products and in determining whether to continue to allow such staff participation throughout the process.

(a) Openness to all interested parties and procedures which will provide for meaningful participation by representatives of producers, distributors, consumers, and general interests, with appropriate meaningful representation for small business and ultimate consumers. Meaningful representation by consumers and small business means, as a minimum, that among those representing such points of view are individuals having technical expertise in the areas under consideration.

(b) Exclusion to the maximum extent possible of the incorporation of requirements which will create undue anti-competitive effects or promote restraints of trade, which are contrary to the public interest and the goal of product safety.

(c) Provisions for periodic and timely review of the standard, including review for anti-competitive effects and revision or amendment as the need arises.

(d) Performance-oriented and not design-restrictive requirements to the maximum practical extent in any standards developed.

(e) Degree of industry conformance to the voluntary standard once it is issued, and ascertainability of conformance.

(f) Provisions in the standard for marking products conforming to the standard so that future in-depth investigation reports of the Commission can indicate the involvement of such products in accidents and injury patterns.

(g) Provisions for insuring that products identified as conforming to such standards will be subjected to a testing and certification (including self-certification) procedure which will provide assurance that the products conform to the standard.

§ 1032.6 Effect of voluntary standards activities on Commission activities.

(a) *Existing voluntary standards.* (1) The Commission, in determining whether to begin proceedings to develop mandatory standards under the acts it administers, considers whether mandatory regulation is necessary. In determining whether mandatory regulation is necessary, it considers whether there is an existing voluntary standard that adequately addresses the problem and the extent to which that voluntary standard is conformed to by the affected industry.

(2) The Commission acknowledges that there are situations in which adequate voluntary standards in combination with appropriate certification programs may support a conclusion that a mandatory standard is not necessary. The Commission may find that a mandatory standard is not necessary where an existing voluntary standard appears to be reasonably adequate to eliminate or reduce the risk of injury associated with the product, contains requirements and test methods that have been evaluated and found acceptable by the Commission, and there is a sufficiently high degree of conformance to the voluntary standard. Under such circumstances, the Commission may agree to encourage conformance to the voluntary standard and subsequently evaluate the effectiveness of the standard in terms of accident and injury reduction for products produced in conformance with the standard.

(3) In evaluating voluntary standards, the Commission will relate the requirements of the standard to the identified risks of injury and evaluate the requirements in terms of their effectiveness in eliminating or reducing the risks of injury. The evaluation of voluntary standards will be conducted by Commission staff members, including representatives of legal, epidemiological, engineering, and human factors interests. The staff evaluation will be conducted in a manner similar to evaluations of standards being considered for promulgation as mandatory standards.

(4) In the event that the Commission has evaluated an existing voluntary standard and found it to be adequate in all but one or two areas, the Commission may defer the initiation of a mandatory rulemaking proceeding and request the standards developed organizations to revise the standard to address the identified inadequacies expeditiously. In such cases, the Commission will monitor or participate in the development of these revisions.

(b) *Voluntary standards under development.* (1) As a general rule, once the Commission has made a determination to commence a standard development proceeding under section 7 of the CPSA, it will not delay the commencement of mandatory rulemaking in order to permit an outside party to develop a voluntary standard. The Commission believes that such a policy would simply encourage industries to relay work on voluntary standards until mandatory government action seemed likely.

(2) However, the Commission may consider delaying the initiation of a mandatory standard if there is clear evidence to show that development of a voluntary standard that adequately addresses the risk of injury presented by a consumer product was commenced prior to a Commission determination that a product presents an unreasonable risk of injury and development of the voluntary standard will be completed expeditiously. Under such circumstances, the Commission may agree to support and participate in the development of that voluntary standard.

(c) *Deferral of mandatory standards.* (1) Any organization may submit to the Commission an existing voluntary standard for evaluation, with a request that the Commission make a commitment to defer mandatory standard development for the product addressed by the voluntary standard. Such requests shall be submitted to the Office of the Secretary. The Commission will consider such requests on a case-by-case basis. The organization submitting a voluntary standard under this section, shall include with its submission, at a minimum, an identification of the risk of injury addressed by the voluntary standard, an analysis explaining how the voluntary standard adequately addresses the identified risk of injury; and a statement of technical rationale that supports the provisions of the standard.

(2) For purposes of this policy, a "commitment" to defer mandatory standards development shall be a Commission decision—revocable at any time—to refrain from commencing mandatory standards development for a specified period of time, not to exceed three (3) years. The commitment must be based upon a finding by the Commission that the voluntary standard adequately reduces risk(s) of injury associated with a product and that the standard was drafted in a manner such that the criteria in section D of this policy were satisfactorily met.

(3) When the Commission makes a committment to defer mandatory standards development for the product addressed by the voluntary standard, it may take actions described in §§ 1032.4 and 1032.6 of this policy statement to ensure the effectiveness of the voluntary standard in reducing the identified risks of injury.

(4) At the end of each three year period, the Commission may extend the committment to defer mandatory standards development if a review indicates that insufficient time has transpired in which to properly evaluate the effectiveness of the voluntary standard or for other appropriate reasons.

(d) *Development of mandatory standards.* The Commission will consider those provisions of a voluntary standard that have been reviewed, evaluated, and deemed to be adequate in addressing the specified unreasonable risks of injury when initiating a mandatory standard development proceeding under section 7 of the Con-

V 4 3 — 1 8 7

sumer Product Safety Act. Comments will be requested in the Notice of Proceeding on the adequacy of those provisions and the offerors will be encouraged to accept those provisions deemed adequate and to develop other provisions deemed necessary to complete the proposed regulation.

§ 1032.7 Attendance at meetings.

All meetings between Commission personnel and outside organizations shall be subject to the Commission's open meetings policy, 16 CFR Part 1012. The approval and authorization for attendance of Commission staff at meetings of standards groups and the participation of staff members in standards development activities shall be in accordance with the policy on "Employee Membership and Participation in Voluntary Standards Organization", 16 CFR Part 1031.

Dated: April 28, 1978.

SADYE E. DUNN,
Acting Secretary,
Consumer Product Safety Commission.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. IA-626, 34-14714]

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

Final Extension of Temporary Exemption From the Investment Advisers Act for Certain Brokers and Dealers

AGENCY: Securities and Exchange Commission.

ACTION: Final extension of temporary rule.

SUMMARY: Because some broker-dealers might have decided, as a result of the May 1, 1975 elimination of fixed commission rates on securities transactions, to impose charges for their investment advisory services which might have caused such broker-dealers to lose their exemption from the Investment Advisers Act of 1940 ("Advisers Act"), the Commission on a temporary basis exempted certain broker-dealers from the Advisers Act. The Commission now has determined that the temporary exemption will be allowed to expire at the end of an additional six-month period and that no permanent exemption will be adopted. Current staff views on the meaning of the term "special compensation" are also set forth and public comments are solicited on those views and on the question whether brokers or dealers who have discretionary authority over customers' accounts should, per se, be considered investment advisers with respect to such accounts.

DATES: Effective date of final extension—April 27, 1978; comments must be received on staff views on the meaning of "special compensation" and other issues on or before June 30, 1978.

ADDRESSES: Interested persons should submit their views and comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All submissions should refer to File No. S7-740, and will be made available for public inspection at the Commission's Public Reference Section, Room 6101, 1100 L Street NW., Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT:

Michael Berenson, Esq., Office of the Chief Counsel, Division of Investment Management, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202-376-20549.

SUPPLEMENTARY INFORMATION:

I. SYNOPSIS

The adoption of Rule 19b-3 (17 CFR 240.19b-3)[1] under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) ("Exchange Act"), if followed by the "unbundling" of brokerage commission charges and charges for research and other investment advice, could cause those brokers or dealers who unbundle to become investment advisers as that term is defined in the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 et seq.) ("Advisers Act"). Believing that the change from fixed to negotiated rates was itself a very significant change for brokers and dealers, the Commission adopted a series of temporary exemptions from the Advisers Act for certain brokers and dealers who had been registered pursuant to Section 15 of the Exchange Act prior to the May 1, 1975 effective date of Rule 19b-3 and who were not then registered as an investment adviser. The latest of such exemptions expires on April 30, 1978.

An adequate period has elapsed for broker-dealers to become familiar with the provisions of the Advisers Act and to adjust to the unfixing of commission rates. The Commission has considered the impact of the Advisers Act on all broker-dealers, including those previously exempt, and does not believe compliance with the Advisers Act is overly burdensome. This is especially true since the Commission has taken several actions since the temporary exemptions were first initiated to reduce the burdens regulation under the Advisers Act imposes on broker-dealers. In addition, the Commission believes that the Advisers Act provides individuals with certain protections not available under the Exchange Act. Accordingly, the Commission has concluded that neither a continuation of the temporary exemption, beyond a final extension to October 31, 1978, permitting broker-dealers to prepare for compliance with the Advisers Act, nor adoption of a permanent exemption from the Advisers Act for any or all broker-dealers is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Advisers Act.

II. BACKGROUND

On April 23, 1975, the Commission published notice of the adoption of temporary Rule 206A-1(T) (17 CFR 275.206A-1(T)) under the Advisers Act[2] effective May 1, 1975, to coincide with the effective date of Rule 19b-3 under the Exchange Act. The rule was adopted in order to allow brokers and dealers to become familiar with the Advisers Act and to afford them an adequate period of time to develop and test new pricing practices after May 1, 1975, without at the same time having to register under and comply with the Advisers Act. The rule also was adopted to provide for a thorough consideration by the Commission and the public of questions related to the applicability of the Advisers Act to brokers and dealers. Registration under and compliance with the Advisers Act might otherwise have been required of a broker or dealer who made a separate charge for investment advice since by doing so he might lose the benefit of the exclusion from the definition of investment adviser in Section 202(a)(11) (15 U.S.C. 80b-2(a)(11)) of the Advisers Act[3] provided by Section

[1]Rule 19b-3 prohibits any national securities exchange from adopting or retaining any rule that requires, or from otherwise requiring, its members to charge fixed rates of commission for transactions executed on, or by the use of the facilities of, such exchange after May 1, 1975 (May 1, 1976 as to rules of an exchange relating to floor brokerage commissions).

[2]Securities Exchange Act Release No. 11368, Investment Advisers Act Release No. 455, 40 FR 18424 (April 28, 1975).

[3]Section 202(a)(11) of the Advisers Act defines the term "investment adviser" to mean, with certain exclusions—any person who, for compensation, engages in the business of advising others, either directly or through publications or writings, as to the value of securities or as to the advisability

Footnotes continued on next page

202(a)(11)(C) (15 U.S.C. 80b-2(a)(11)(C)) for "any broker or dealer whose performance of such (investment advisory) services is solely incidental to the conduct of his business as a broker or dealer and who receives no special compensation therefor."

Rule 206A-1(T) provided a four-month exemption from the Advisers Act for any broker or dealer who was registered as such on May 1, 1975 pursuant to Section 15 (15 U.S.C. 78o) of the Exchange Act and who was not then registered with the Commission as an investment adviser. On August 20, 1975, the exemptive period was extended to April 30, 1976, and at that time the exemption was narrowed to exclude after November 30, 1975, broker-dealers performing investment supervisory services or investment management services for special compensation or not solely incidental to their business as broker-dealers.[4] Subsequently, the Commission amended Rule 206A-1(T) to provide two additional extensions of the rule, expiring April 30, 1977,[5] and April 30, 1978.[6]

III. STATUTORY PROTECTIONS PROVIDED BY THE ADVISERS ACT AND THE RULES THEREUNDER WHICH MAY NOT BE AVAILABLE UNDER THE EXCHANGE ACT AND THE RULES THEREUNDER

Both the Advisers Act and the Exchange Act provide a regulatory framework designed to protect investors and the public interest while permitting the provision of professional services in the financial marketplace. While the two statutes are similar, there are some differences, particularly with respect to their antifraud provisions. Both investment advisers and broker-dealers are subject to general antifraud provisions under their respective Acts. In light of several recent Supreme Court decisions, however, the Commission believes that the protections afforded investors under Rule 10b-5 (17 CFR 240.10b-5), the general antifraud rule adopted pursuant to Section 10(b) (15 U.S.C. 78j(b)) of the Exchange Act, may not be so broad as those afforded under the comparable provisions in Section 206 (15 U.S.C. 80b-6) of the Advisers Act, particularly with regard to a person who is not a purchaser or seller of securities. These differences are appropriately related to the obligations of persons required to be registered under the Advisers Act.

Other provisions of the Advisers Act have no equivalents in the Exchange Act. There are not any general requirements under the Exchange Act comparable to the consent requirement in Section 206(3) of the Advisers Act, nor are there specific provisions relating to contracts as in Section 205 (15 U.S.C. 80b-5) of the Advisers Act.[7]

IV. THE FEASIBILITY OF COMPLIANCE BY BROKERS AND DEALERS WITH BOTH THE ADVISERS ACT AND EXCHANGE ACT

A. GENERAL BURDENS

Public commentators on Rule 206A-1(T) have stated that it would be burdensome for brokers and dealers to become subject to the Advisers Act. There are, however, currently over 300 firms which are dually registered, apparently including fourteen of the fifteen largest brokers and dealers doing a primarily public business. The number and size of the dual registrants suggest that registration under and compliance with the Advisers Act is not unduly burdensome. Furthermore, as indicated below, the Commission has significantly alleviated certain burdens which have been brought to its attention.

B. SPECIFIC BURDENS

1. *Disclosures dual registrants must make in connection with securities transactions with clients.* A number of commentators on Rule 206A-1(T) suggested that it is not feasible for broker-dealers who are also investment advisers to comply with the standards set forth in two Commission pronouncements, Advisers Act Release No. 40, February 5, 1945, and *In the Matter of Arleen W. Hughes*, 27 SEC 629 (1948), *aff'd sub nom. Hughes* v. *S.E.C.*, 174 F. 2d 969 (D.C. Cir. 1949). In Advisers Act Release No. 40, the Commission set forth comprehensive disclosures it believed were necessary in circumstances to which Section 206(3) of the Advisers Act (15 U.S.C. 80b-6(3)) is applicable, i.e., when an investment adviser, acting as such, proposes either to act as principal, or as broker for another person, in a transaction with a client. The *Arleen Hughes* case was a proceeding based primarily on a broker-dealer/investment adviser's failure to make the disclosures required by Advisers Act Release No. 40.

The Commission has already recognized "that some modification is appropriate (of the position set forth in Release No. 40), which now appears inappropriate in light of the investment advisory business as it has evolved to the present time" and indicated that in any such situation the extent of the detailed disclosure required would depend on the facts of each case.[8]

Not only has the Commission adopted a more flexible approach concerning the disclosures a dual registrant must make when acting in a dual capacity in a transaction with a client, but, when persuasive arguments have been presented that Section 206(3) is unduly burdensome in particular circumstances, it has also adopted rules, such as Rules 206(3)-1 and 206(3)-2 (17 CFR 275.206(3)-1 and 206(3)-2) to eliminate those burdens.[9] The Commission would give serious and prompt consideration to providing further relief from any other undue burden that might be imposed by Section 206(3) or any other provision of the Advisers Act or the rules thereunder on brokers and dealers who are registered as investment advisers.

2. *Fiduciary Obligations of Brokers and Dealers who are Investment Advisers.* Another reason some broker-dealers have given for desiring an exemption from the Advisers Act is their

Footnotes continued from last page

of investing in, purchasing, or selling securities, or who, for compensation and as part of a regular business, issues or promulgates analyses or reports concerning securities.

[4]Securities Exchange Act Release No. 11807, Investment Advisers Act Release No. 471 (August 20, 1975), 40 FR 38157 (August 21, 1975).

[5]Securities Exchange Act Release No. 12297, Investment Advisers Act Release No. 506 (April 1, 1976), 41 FR 14507 (April 6, 1976).

[6]Securities Exchange Act Release No. 13454, Investment Advisers Act Release No. 581 (April 20, 1977), 42 FR 21769 (April 29, 1977).

[7]There are also advertising rules (Rule 206(4)-1 (17 CFR 275.206(4)-1)) and certain recordkeeping rules under the Advisers Act, e.g., Rules 204-2(a) (12) and (13) (17 CFR 275.204-2(a) (12) and (13)), for which there are no parallel provisions in the Exchange Act. Because of differences in the manner in which broker-dealers and investment advisers conduct their respective businesses, and because of certain common law protections and certain rules of self-regulatory organizations adopted pursuant to the Exchange Act, these differences may in some instances reflect alternative regulatory approaches under the two Acts and not necessarily differing levels of investor protection.

[8]Advisers Act Release No. 470 (August 20, 1975).

[9]Rule 206(3)-1 states that a broker or dealer will not be construed to be acting as an investment adviser with respect to a particular transaction (and therefore the disclosure obligations of Section 206(3) will not attach) if its advice has been furnished only by means of (1) publicly distributed written statements or publicly made oral statements; (2) statements or materials which are not directed to the needs of a specific individual; (3) statistical information which does not comment on the investment merits of a particular security; or (4) a combination of the foregoing services.

Rule 206(3)-2 provides an alternative means of compliance with Section 206(3) for those advisers who wish to effect agency cross transactions for their clients. The rule allows clients to provide advance consent authorizing such transactions for a period not exceeding one year, but requires the investment adviser to furnish the client certain disclosures concerning the compensation received in connection with such transactions on a transaction-by-transaction basis, as well as a cumulative basis, within thirty days prior to the expiration of the period covered by the blanket consent the rule envisions.

M Y 4 — 7 8 UMI

V 4 3 — 8 7

belief that an investment adviser, as such, may be held to have higher duties to his clients than does a broker or dealer to his customers. To the extent this may be true, no persuasive reason has been given to lower standards imposed by law. Moreover, since a dual registrant is not an investment adviser to brokerage clients to whom it provides advisory services on a solely incidental basis and without special compensation,[10] it does not appear that a dual registrant will owe such higher duties to any clients other than its advisory clients.

3. *ERISA.* Some commentators expressed concern that if broker-dealers were required to register as investment advisers, problems might arise with respect to the Employee Retirement Income Security Act of 1974 ("ERISA") (29 U.S.C. 1001 et seq.). In particular, those commentators were concerned that registration under the Advisers Act might bear on whether a broker-dealer would be deemed to be a "fiduciary" for purposes of ERISA. Determination of a broker-dealer's obligations under ERISA would not appear, however, to turn on whether the broker-dealer is also registered under the Advisers Act. The term "fiduciary" is defined in ERISA[11] and has been further refined in regulations adopted by the Department of Labor and the Internal Revenue Service.[12] The Commission will, of course, continue to work with the Department of Labor and the Internal Revenue Service regarding the interrelationship of ERISA and the federal securities laws.

4. *State regulation.* The Commission has also given attention to the concerns of some brokers and dealers that if they are required to register under the Advisers Act various states may impose their investment adviser regulations on such previously exempt brokers and dealers and that this will result in unnecessary, duplicative regulation. The Commission, of course, is anxious to avoid unnecessary regulatory burdens. It would be improper, however, for the Commission to conclude not to act in a manner necessary for the protection of investors on the ground that some States, whose actions are beyond the Commission's scope of authority, may as a consequence apply regulations which members of the brokerage industry believe are unnecessary.

V. Scope of Exclusion Provided by Section 202 (a)(11)(C)

When the temporary rule expires, a broker or dealer would still be excluded from the definition of investment adviser to the extent he could meet the statutory standards in Section 202(a)(11)(c) relating to the furnishing of advisory services solely incidental to the conduct of his business as a broker-dealer and without special compensation therefor.

The relationship of a broker or dealer to his brokerage customers does not become an investment advisory relationship merely because the broker or dealer is registered as an investment adviser. A broker or dealer who is registered as an investment adviser is not by reason of that fact an investment adviser to those of his brokerage clients to whom he provides advisory services on a solely incidental basis and without special compensation.

As early as October 28, 1940, the Commission, in Investment Advisers Act Release No. 2, made known the opinion of its General Counsel as to the meaning of the term "special compensation" in various circumstances in which a broker-dealer provided investment advice solely incidental to the conduct of his business as a broker or dealer.

The examples treated in this release suggest that "special compensation" for investment advice is compensation to the broker-dealer in excess of that which he would be paid for providing a brokerage or dealer service alone. However, because the existence or non-existence of "special compensation" in any particular circumstance may not be clear, the Commission considers it desirable that the current views of the Division of Investment Management on this subject be provided to broker-dealers for their guidance, while also calling for comment on this question.

The Division of Investment Management regards special compensation as existing only where there is a clearly definable charge for investment advice. This reflects the Division's position that a client who perceives that he is paying a charge specifically for investment advice is entitled to the protections of the Advisers Act.

The Division would not look outside the fee structure of a given firm to determine whether special compensation exists. That is, just because a "discount" firm offered lower rates than a "full-service" firm, the Division would not call the "full-service" firm's charges "special compensation."

If a firm negotiates different fees with its clients for similar transactions, the Division would not regard the differences in charges "special compensation" for investment advice since whether they were or were not based on the presence or absence of investment advice appears too hypothetical.

Nor would the Division regard as "special compensation" general differentials which exist because a firm provided, on the one hand, an unrestricted execution service and, on the other hand, a restricted execution service, such as one in which customers must have the necessary cash in their accounts at the time a purchase order is placed and must accept execution at the next day's opening price.

However, if a broker-dealer has in effect, either formally or informally, two general schedules of fees available to a customer, the lower without investment advice and the higher with investment advice and the difference is primarily attributable to this factor, or if a broker-dealer should separately bill a particular customer with a specific charge for investment advice, the Division would regard the extra charge as "special compensation" for investment advice. This is the position that was taken by the General Counsel in 1940 and it is the position that the Division believes would be taken by a court today. This would be the case even in a situation, currently nonexistent, in which a current "full-service" firm implements a "discount" or "execution-only" service. If the differential in general rate structure offered to a particular client could be said to be primarily attributable to the rendering of investment advice, the Division would deem at least part of the differential to be "special compensation" for investment advice.

The recently adopted Rule 11a2-2(T) under the Exchange Act (17 CFR 240.11a2-2(T)) in certain circumstances permits a broker-dealer (the "initiating broker-dealer") to retain compensation in connection with effecting transactions for an account as to which he exercises investment discretion. The rule requires the initiating broker-dealer to forward the orders to other broker-dealers for execution and also requires the initiating broker-dealer to furnish to a discretionary account at least annually a statement setting forth the total amount of transactional compensation retained by the initiating broker-dealer, exclusive of amounts paid to the executing broker-dealer.

The Division believes that, as indicated by Investment advisers Act Release No. 2, unless an initiating broker charged specifically for investment advice, the mere fact that he received compensation for advice and other services, in addition to the compensation paid to an executing broker, would not make such compensation "special compensation." Moreover, the mere report of such compensation should not cause such retained amounts to be "special compensation."

The views set forth above are the Division of Investment Management's current views on the meaning of the term "special compensation." The Commission requests comments and

[10] See Section V, infra.

[11] Section 3(21)(A) of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1002(21)(A) (1974).

[12] 29 CFR 2510.3-21 (1977).

M Y 4 — 7 8 UMI

suggestions from all interested persons on these views. The Commission also requests comments on whether the meaning of "special compensation" should be expanded or narrowed, by rule or interpretation, and the impact such action would have on brokers and dealers who would be affected thereby.

For example, on the one hand, the term "special compensation" might be interpreted to apply to a part of the fee negotiated between a broker-dealer and a customer if the fee is higher than the fee that would have been negotiated for an execution service alone and one reason the fee is higher is that it includes a fee for investment advice.[13] On the other hand, the meaning of special compensation might be interpreted as not includiing any charge for investment advice that is made on a transactional basis as part of a charge for a broker or dealer service.[14]

Under previous interpretations of the scope of the exclusion provided by Section 202(a)(11)(C) of the Advisers Act, broker-dealers who have exercised discretionary authority over the accounts of some of their customers were generally regarded as providing investment advice incidental to their business as a broker-dealer and were not considered subject to the Advisers Act with respect to these activities so long as the customers did not pay special compensation for these services.[15]

It appears, however, that relationships which include discretionary authority to act on a client's behalf have many of the characteristics of the relationships to which the protections of the Advisers Act are important. Accordingly, the Commission is considering whether it should take action, by rule or otherwise, to interpret the scope of the exclusion provided by Section 202(a)(11)(C) of the Advisers Act so that it is not available to a broker-dealer who exercises "investment discretion," as defined in Section 3(a)(35) of the Exchange Act[16] (15 U.S.C. 78c(a)(35)), **and so that all customers of a broker-dealer whose accounts are managed on a discretionary basis would be considered advisory clients. The Commission requests comments on the advisability of such action and the effects such action would have on brokers and dealers.**

VI. Conclusion

The Commission has considered the public comments received on Rule 206A-1(T) and has concluded that the temporary exemption from the Advisers Act should not be extended beyond October 31, 1978, and that no permanent exemption should be adopted. The Commission believes it is not onerous for an entity to register under and comply with the Advisers Act and it does not believe that those registered brokers or dealers who will be required to register as investment advisers will find the requirements of the Advisers Act unduly burdensome. Furthermore, the Advisers Act and the rules thereunder provide investors certain protections which are not available under the Exchange Act and the rules thereunder.

Authority

The amendment to Rule 206A-1(T) is adopted pursuant to Sections 206A, 211(a) and 211(b) of the Advisers Act (15 U.S.C. 80b-6a, 80b-11(a) and 80b-11(b)).

§ 275.206A-1(T) [Amended]

Accordingly, § 275.206A-1(T), paragraph (a), Part 275 of Chapter II of Title 17 of the Code of Federal Regulations is hereby amended to change the expiration date of the temporary exemption contained therein from April 30, 1978, to October 31, 1978.

The Commission finds, in accordance with the requirements of the Administrative Procedure Act (5 U.S.C. 553(d)), that notice of the amendment to Rule 206A-1(T) prior to adoption and public procedure thereon is unnecessary, and publication for 30 days prior to the effective date may be omitted, since the amendment continues an exemption from statutory requirements which otherwise would be applicable, and since it is in the public interest to facilitate compliance with the Advisers Act by those brokers and dealers who previously were exempt from the Advisers Act. Accordingly, the amendment to Rule 206A-1(T) shall become effective on the date hereof.

By the Commission.

George A. Fitzsimmons,
Secretary.

April 27, 1978.

[FR Doc. 78-12227 Filed 5-3-78; 8:45 am]

[13] This interpretation might most clearly give effect to the view that a person who clearly perceives that he is paying for investment advice should receive the protections of the Advisers Act.

[14] This interpretation might tend to reduce to the greatest extent any disincentive (because of potential Advisers Act regulation) for a "full-service" brokerage firm to introduce a discount service or for a discount house to introduce a "full-service" brokerage package.

[15] The staff of the Commission has taken the position that a broker-dealer whose business consists almost exclusively of managing accounts on a discretionary basis is not providing investment advice solely incidental to his business as a broker-dealer.

[16] Section 3(a)(35) states:
"A person exercises 'investment discretion' with respect to an account if, directly or indirectly, such person (A) is authorized to determine what securities or other property shall be purchased or sold by or for the account, (B) makes decisions as to what securities or other property shall be purchased or sold by or for the account even though some other person may have responsibility for such investment decisions, or (C) otherwise exercises such influence with respect to the purchase and sale of securities or other property by or for the account as the Commission, by rule, determines, in the public interest or for the protection of investors, should be subject to the operation of the provisions of this title and the rules and regulations thereunder."

[4210-01]

Title 24—Housing and Urban Development

SUBTITLE A—OFFICE OF THE SECRETARY, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-532]

PART 58—ENVIRONMENTAL REVIEW PROCEDURES FOR THE COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM

Applicants Lacking Legal Capacity to Assume NEPA Responsibilities

AGENCY: Department of Housing and Urban Development.

ACTION: Interim rule.

SUMMARY: This rule clarifies Department regulations to provide that special purpose units of Government, while being eligible to receive discretionary grants in behalf of new communities under the Block Grant Program, are deemed by HUD to lack the legal capacity to assume the environmental review responsibilities of that Program.

DATES: Effective date: May 4, 1978. Comments due: June 5, 1978.

ADDRESS: File all comments with the Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Robert B. Warner, New Community Development Corp., HUD, Room 7138, 451 7th Street SW., Washington, D.C. 20410; 202-755-6092.

SUPPLEMENTARY INFORMATION: Part 58 sets forth procedures governing the carrying out of the environmental review responsibilities by Community Development Block Grant (CDBG) applicants which would otherwise be the responsibility of the Secretary of HUD, under the National Environmental Policy Act of 1969 (NEPA). It is the policy of HUD, pursuant to section 104(h) of Title I of

V 43 | 87 MY 4 78 UMI

the Housing and Community Development Act of 1974, to require CDBG applicants to assume and carry out such responsibilities, unless the applicants lacks legal capacity to do so. If an applicant lacks such legal capacity, these environmental responsibilities remain the responsibilities of HUD.

HUD has previously determined in section 58.5(b) that private non-profit community associations and private developers approved under Title IV of the Housing and Urban Development Act of 1968 and Title VII of the Housing and Urban Development Act of 1970 are considered to lack the legal capacity to assume or carry out environmental review responsibilities.

HUD has now further determined, in consultation with CEQ, that the delegation of environmental responsibilites should be limited to general purpose governments having broad and comprehensive governmental powers. Section 58.5(b) provides exceptions to HUD's general policy that all applicants shall be required to assume responsibility for carrying out the environmental responsibilities.

The purpose of this rule is to expand these exceptions to include special purpose units of government as an additional class of applicants for discretionary grants in behalf of new communities which are deemed to lack the legal capacity to assume the environmental review responsibility.

HUD's ability to approve applications submitted by special purpose units of government on the basis of HUD's environmental review is technically restricted until this clarification is implemented; therefore, and on the basis that this amendment does not diminish any responsibilities under NEPA, the Secretary has determined that good cause exists for making this an interim rule to be effective on date of publication. However, the Department invites interested persons to submit comments with respect to this amendment. All comments should be filed with the Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

Section 104(h) of the Housing and Community Development Act of 1974 requires that this regulation may be issued only after consultation with the Council on Environmental Quality. Such consultation has been accomplished. Also, a Finding of Inapplicability with respect to any environmental impact of this regulation has been made in accordance with HUD Handbook 1390.1 (38 FR 19182). A copy of that finding and of all comments received respecting this regulation will be available for public inspection during business hours in the Office of the Rules Docket Clerk at the address indicated above.

Accordingly, § 58.5(b) appearing at 24 CFR Part 58 is amended by adding a new subparagraph (3), to read as follows:

§ 58.5 General policy.

* * * * *

(b) *Exception.* * * *

(3) Community associations, other applicants which are eligible for assistance pursuant to 24 CFR section 570.403(b)(4) unless such applicant is also described in the first sentence of 24 CFR section 570.3(v), and private developers approved under Title VII of the Housing and Urban Development Act of 1970 or Title IV of the HUD Act of 1968, are considered by HUD to lack the legal capacity to assume or carry out environmental review responsibilities.

(Title I Housing and Community Development Act 1974 (42 U.S.C. 5301 et seq.); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., April 26, 1978.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and Urban Development.

[4210-01]

CHAPTER V—OFFICE OF THE ASSISTANT SECRETARY FOR COMMUNITY PLANNING AND DEVELOPMENT, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-533]

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

Applications and Criteria for Discretionary Grants—New Communities

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This rule amends Department regulations to clarify that HUD will perform the environmental review for projects and activities proposed for funding under the Secretary's Discretionary Funds for New Communities where the applicant is a special purpose unit of government. This amendment reflects a corresponding clarification to the Environmental Review Procedures for the Community Development Block Grant Program (24 CFR Part 58).

EFFECTIVE DATE: May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert B. Warner, New Community Development Corp., Room 7138, 451 7th Street SW., Washington, D.C. 20410, 202-755-6092.

SUPPLEMENTARY INFORMATION: Section 102(a)(1) of the Housing and Community Development Act of 1974 includes State or local public bodies or agencies as defined in Section 711(e) of the Housing and Urban Development Act of 1970, under the term "unit of general local government" for the purposes of awarding grants under the Block Grant Program. Section 570.403(b)(4) of the Block Grant Regulations (24 CFR Part 570) implements Section 102 of the Act for the purposes of discretionary grants in behalf of new communities.

Section 104(h) of the 1974 Act provides for the delegation of HUD's environmental protection procedures to applicants under the Block Grant Program. The regulations implementing this provision are contained at 24 CFR Part 58 (Environmental Review Procedures for the Community Development Block Grant Program). Section 58.5(b) of the Environmental Review Procedures establishes a procedure by which an applicant may claim legal incapacity to assume the environmental review responsibility and also specifically sets forth those entities which are deemed by HUD to lack legal capacity to assume or carry out environmental review responsibilities. These include private new community developers and community associations.

HUD has determined that the delegation of environmental responsibilities should be limited to general purpose governments having broad and comprehensive governmental powers. Therefore, the exceptions currently included at 24 CFR §58.5(b) are being expanded by an amendment which will include special purpose units of government, as defined in 24 CFR §570.403(b)(4) of the Block Grant Regulations as being excepted from the delegation of environmental review responsibilities.

A change to 24 CFR §58.5 also requires this corresponding change to 24 CFR §570.403. The Secretary has determined that good cause exists for making this a final rule to be effective on date of publication since the new material does not extend or modify existing procedures, but rather, serves as a clarification. This clarification is urgently needed so that HUD can undertake the environmental review responsibilities in conjunction with grants to be awarded to special purpose units of government under the discretionary fund for new communities.

A finding of inapplicability of the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. It is available for public inspection in the Office of the Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

Accordingly, paragraph (c)(4) of 24 CFR §570.403 is amended to read as follows:

§ 570.403 New communities.

* * * * *

(c) * * *

(4) *Environmental review requirements.* (i) For activities proposed by an applicant eligible under section 570.403(b)(2)(3) or (4), other than an applicant which is also eligible under the first sentence of the definition contained in section 570.3(v), no new environmental review or clearance will be required by virtue of any such activity's proposed funding under this part if the activity is a part of a previously approved project for which environmental review clearances have been completed, which clearances adequately covered such activity, and for which circumstances including the availability of additional data or advances in technology have not changed significantly.

(ii) Applicants eligible under section 570.403(b) which are defined in the first sentence of the definition contained in Section 570.3(v) or are included in section 570.403(b)(1) shall conduct environmental review pursuant to 24 CFR Part 58.

(iii) For all other eligible applicants under 570.403(b), NCDC shall determine the need for environmental review in accordance with paragraph (i), and shall conduct any such reviews pursuant to HUD Handbook 1390.1 (38 FR 19182).

(Title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 et seq.), and Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., April 26, 1978.

ROBERT C. EMBRY, JR.,
Assistant Secretary for Community Planning and Development.

[FR Doc. 78-12233 Filed 5-3-78; 8:45 am]

[4210-01]

CHAPTER XIII—FEDERAL DISASTER ASSISTANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-445]

PART 2205—FEDERAL DISASTER ASSISTANCE

Disaster Legal Services

AGENCY: Federal Disaster Assistance Administration.

ACTION: Final rule.

SUMMARY: This rule sets forth policies governing provision of legal services to eligible low-income individuals as provided by section 412 of the Disaster Relief Act of 1974. The rule will assist eligible individuals in securing benefits provided by the Act and in resolving claims arising out of a major disaster.

EFFECTIVE DATE: June 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Agnes C. Mravcak, Federal Disaster Assistance Administration, Room B-133, 451 7th Street SW., Washington, D.C. 20410, 202-634-7860.

SUPPLEMENTARY INFORMATION: The Federal Disaster Assistance Administration published a proposed rule on January 10, 1977 (42 FR 5093) concerning promulgation of final regulations for disaster legal services. Five comments were received and have been evaluated carefully. The major comments and changes are covered in the following discussion.

DISCUSSION OF MAJOR COMMENTS

TIME LIMITATIONS

Two commenters urged that time limitations be set for the provision of disaster legal services. This suggestion has not been adopted because the need for legal services may not become known until some time after the disaster, and the setting of a time limit would eliminate the flexibility required to provide the needed services.

DEFINITION OF DISASTER LEGAL SERVICES

In response to two comments relative to providing a definition of "disaster legal services", paragraph (a) has been revised to include the types of legal services to be rendered.

FEE-GENERATING CASES

Several comments were received on the subject of fee-generating cases.

1. One commenter felt that paragraph (b), dealing with fee-generating cases, was overbroad in that "it would exclude any matter that 'would not ordinarily be rejected by local attorneys' even if in a given situation no local attorney could be found". It was suggested that provision be made so that disaster legal services could be provided in such circumstances. The Administrator feels that revised paragraph (b) offers the flexibility for this decision and for subsequent referral to the private sector.

2. The definition of "fee-generating case" has been shortened to clarify its meaning.

3. The regulation has been revised to show that the Regional Director makes the determination as to whether or not a case is fee-generating only in those situations where a question is raised and not, as interpreted by one commenter, in every instance.

4. The regulation has been revised to provide for referral of fee-generating cases by the Regional Director to private lawyers through existing lawyer referral services or, where that is impossible, the Regional Director may provide the disaster victim with a list of lawyers from which he or she may make a selection.

5. A provision added to paragraph (b) permits a lawyer who has provided volunteer disaster legal assistance to accept a fee-generating case as a private lawyer, when the case is referred in the manner discussed in paragraph 4 above.

LOW-INCOME INDIVIDUALS

1. In response to a comment, the definition of "low-income individuals" has been changed to provide that "low-income individuals" includes those persons who have insufficient resources to seek legal services, whether the insufficiency existed prior to the disaster or was the result of the disaster.

2. It is intended that the lawyer operating under these regulations will make the eligibility decision based upon professional judgment and the parameters of the Act.

The Regional Director shall make the determination of eligibility only in cases where the question of eligibility cannot be determined by the lawyer.

CONGRESSIONAL INTENT

One comment suggested that paragraph (e) be deleted. This suggestion was not adopted because paragraph (e), which confined the provision of disaster legal services to the securing of benefits under the Act and claims arising out of a major disaster, reflects the intent of Congress as spelled out in the legislative history of the Act.

METHOD OF PROVIDING SERVICES

A number of comments dealt with the manner in which the Administrator provides lawyers under the disaster legal services program. One State felt that it could provide adequate disaster legal services under its own authorities and through the use of State and community resources. Another State asked that decisions on implementation and delivery of disaster legal services follow consultation with the State.

The FDAA agrees that the States should decide whether they will provide the needed legal services or whether the Federal Government should implement the Section. Paragraph (c) has been revised to require the Regional Director to consult with the State Coordinating Officer to determine if implementation of this Section is necessary.

Two commenters requested that their organizations be given a role in providing disaster legal services. The

V 43 | 87 MY 4 78 UMI

provisions of paragraph (c), particularly (1) and (4), would provide the Regional Director with a wide range of sources for legal services, including the commenters' organizations.

One commenter questioned possible conflicts of interests for Federal lawyers who provide legal services. Two provisions have been added to subparagraph (c)(2) to address this concern. Nothing here relieves individual lawyers from having to determine for themselves, in conformity with applicable rules of conduct, whether providing legal services in each case will create a conflict of interest.

Paragraph (c) has also been revised to provide that the Administrator coordinate with the appropriate Federal agencies and appropriate national, state and local bar associations, as necessary, in the implementation of the disaster legal services program.

Findings of inapplicability regarding environmental and economic impact were prepared for the proposed rule ands copies are available in the Office of Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Since the Department has previously determined that adoption of this rule will not affect the quality of the human environment or the national economy, and since no change adopted herein changed that determination, no further environmental or economic determination is being made.

Since republication of the temporary housing assistance regulations (24 CFR 2205.45) has made 24 CFR 2205.46 available, this rule is designated § 2205.46 and adopted as follows:

§ 2205.46 Disaster legal services.

(a) Legal services, including legal advice, counseling, and representation in non fee-generating cases, except as provided in paragraph (b) of this Section, may be provided to low-income individuals who require them as a result of a major disaster. For the purpose of this Section, "low-income individuals" means those disaster victims who have insufficient resources to secure adequate legal services, whether the insufficiency existed prior to or results from the major disaster. In cases where questions arise about the eligibility of an individual for legal services, the Regional Director or his/her representative shall make a determination.

(b) Disaster legal services shall be provided free to such individuals. Fee-generating cases shall not be accepted by lawyers operating under these regulations. For purposes of this section, a fee-generating case is one which would not ordinarily be rejected by local lawyers as a result of its lack of potential remunerative value. Where any question arises as to whether a case is fee-generating as defined in this section, the Regional Director or his/her representative, after any necessary consultation with local or State bar associations, shall make the determination. Any fee-generating cases shall be referred by the Regional Director or his/her representative to private lawyers, through existing lawyer referral services, or, where that is impractical or impossible, the Regional Director may provide a list of lawyers from which the disaster victim may choose. Lawyers who have rendered voluntary legal assistance under these regulations are not precluded from taking fee-generating cases referred to them in this manner while in their capacity as private lawyers.

(c) When the Regional Director determines after any necessary consultation with the State Coordinating Officer, that implementation of this section is necessary, provision of disaster legal services may be accomplished by:

(1) Use of volunteer lawyers under the terms of appropriate agreements;

(2) Use of Federal lawyers, provided that these lawyers do not represent an eligible disaster victim before a court or Federal agency in a matter directly involving the United States, and further provided that these lawyers do not act in a way which will violate the standards of conduct of their respective agencies or departments;

(3) Use of private lawyers who may be paid by the Federal Disaster Assistance Administration when the Regional Director has determined that there is no other means of obtaining adequate legal assistance for qualified disaster victims; or

(4) Any other arrangement the Regional Director deems appropriate.

The Administrator shall coordinate with appropriate Federal agencies and the appropriate national, state and local bar associations, as necessary, in the implementation of the disaster legal services program.

(d) In the event it is necessary for the Federal Disaster Assistance Administration to pay lawyers for the provision of legal services under these regulations, the Regional Director, in consultation with State and local bar associations, shall determine the amount of reimbursement due to the lawyers who have provided disaster legal services at the request of the Regional Director. At the Regional Director's discretion, administrative costs of lawyers providing legal services requested by him or her may also be paid.

(e) Provision of disaster legal services is confined to the securing of benefits under the Act and claims arising out of a major disaster.

(f) Any disaster legal services shall be provided in accordance with § 2205.13, Non-discrimination in disaster assistance, of these regulations.

(Sec. 412, Pub. L. 93-288, 88 Stat. 157 (42 U.S.C. 5182); Sec. 601, Pub. L. 93-288 (42 U.S.C. 5201); Executive Order 11795 as amended by E.O. 11910 at 41 FR 15681; Delegation of Authority, 41 FR 19365; amended by 43 FR 3627.)

Issued at Washington, D.C., April 26, 1978.

WILLIAM H. WILCOX,
Administrator, Federal Disaster Assistance Administration.

Title 32—National Defense

CHAPTER VII—DEPARTMENT OF THE AIR FORCE

[AF Reg. 12-35]

PART 806b—AIR FORCE PRIVACY ACT PROGRAM

Review of Initial Refusals

AGENCY: Department of the Air Force.

ACTION: Final rule.

SUMMARY: This rule gives individuals who have been denied access to their records a way to appeal that denial to the Secretary of the Air Force. The procedure parallels one that currently exists for appealing refusals to amend records. Our intent is to offer individuals an internal appeal procedure as an alternative to litigation.

EFFECTIVE DATE: May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Captain Robert N. Veeder, Air Force Privacy Act Office, HQ USAF/DADMP, Washington, D.C. 20330, phone: 202-767-4545.

SUPPLEMENTARY INFORMATION: On February 16, 1978, the Department of the Air Force published a proposed rule (43 FR 6813) to provide a process for appealing initial refusals to grant access. Interested persons were invited to participate in the proposed rulemaking change; however, no public comments were received. Accordingly, the proposed amendment is hereby adopted, as set forth below.

1. § 806b.13 of title 32 of the CFR is revised as follows:

§ 806b.13 Denial of access.

If, in the judgment of the Systems Manager, a legitimate purpose exists for denying access, within five workdays from receipt (not counting Saturday, Sunday, and legal holidays), the manager will forward a copy of the request, together with a copy of the record involved and the reason(s) for recommending denials, to the appropriate Denial Authority identified in § 806b.5(b). The Systems Manager will promptly notify the requesting individual of the referral. Only a Denial Authority is authorized to deny access. A Denial Authority who decides to deny access will:

(a) Promptly notify the requesting individual that the request has been denied and give the reasons for the denial.

(b) Tell the individual that he or she may ask for a review of the decision by sending an appeal, through the Denial Authority, to the Secretary of the Air Force.

(c) Send a copy of the refusal letter to the Systems Manager who has the records.

2. § 806b.18 of Title 32 of the CFR is revised as follows:

§ 806b.18 Review of initial refusals of access or amendment.

(a) An individual may request a review of the initial refusal in writing from the Office of the Secretary of the Air Force within 45 days of the denial. The request should be addressed to the Secretary of the Air Force, Washington, D.C. 20330, and sent through the Denial Authority. The Denial Authority will forward to HQ USAF/DA, Washington, D.C. 20330, a complete file consisting of: (1) The request for review and any reasons in support; (2) The request for access or amendment; (3) The initial refusal; (4) A copy of the record or portions involved; (5) Any records or coordination actions that relate to the initial refusal; (6) Denial Authority comments on any statements of reasons, arguments, or evidence submitted by the requester.

(b) The Chairman, who will be a representative of the directorate of Administration (HQ USAF/DA), or another official designated by the Vice Chief of Staff (HQ USAF/CV), will convene the Air Force Privacy Board to review the initial denial. Other members of the Board will be a representative from the office of The Judge Advocate General (HQ USAF/JA), and from an Air Staff function not having primary responsibility for the record in question. If the record is the primary responsibility of HQ USAF/DA or HQ USAF/JA, the Vice Chief of Staff will designate a member from another Air Staff organization to substitute on the Board. The Chairman may, when deemed appropriate, request the assistance of subject matter experts to advise the Board.

(c) Functions of the Board include:

(1) Reviewing requests submitted in accordance with § 806b.18(a); and (2) Providing recommendations to the Office of the Vice Chief of Staff of the Air Force.

(d) If the Office of the Vice Chief of Staff of the Air Force determines that:

(1) Access should be granted, the individual will be notified promptly, and the appropriate Systems Manager will be directed through the Denial Authority, to grant the individual access.

(2) The record should be amended, the individual will be advised promptly, and the appropriate Systems Manager will be directed, through the Denial Authority, to amend the record and direct previous recipients to amend their copies (§ 806b.17(b)).

(e) If the Office of the Vice Chief of Staff determines that a denial of either access or amendment is appropriate, the request will be forwarded through the Office of the Air Force General Counsel (SAF/GC) to the Office of the Administrative Assistant to the Secretary of the Air Force (SAF/AA) for a final decision.

(f) If SAF/AA determines that:

(1) Access should be granted, the individual will be notified promptly and the appropriate Systems Manager will be directed, through the Denial Authority, to grant the individual access to his or her records.

(2) The record should be amended, the individual will be advised promptly, and the appropriate Systems Manager will be directed, through the Denial Authority, to amend the record and direct previous recipients to amend their copies (§ 806b.17(b)).

(g) If, after conducting the review, SAF/AA upholds the Denial Authority's refusal to grant access or amend the record, SAF/AA will notify the individual that:

(1) The access or amendment request has been refused after review, with reasons for the refusal.

(2) For refusals of amendment only: that the individual has a right to file with the Systems Manager, a concise statement of why he or she disagrees with the Air Force's decision, and

(3) The disagreement statement will become a part of the record and will, thus, be available to anyone who subsequently uses the record, and

(4) Known prior recipients of the disputed record will be given a copy of the disagreement statement.

(h) A final determination of an individual's request for review of an initial refusal of access or amendment must be completed within 30 workdays (except Saturdays, Sundays, and legal holidays) after receipt by HQ USAF/DA, unless it is determined that a fair and equitable review cannot be completed in that time: If additional time is required, the individual will be told in writing the reasons for the delay and a date when he or she may expect the results of the review.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

MAY 1, 1978.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5633; CA-26501]

CALIFORNIA

Partial Revocation of Public Land Order No. 2301

AGENCY: Bureau of Land Management, Interior.

SUMMARY: This action will remove an administrative site restriction on 40 acres of forest land in Alpine County and restore them to such disposition as may be made of national forest land.

EFFECTIVE DATE: May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202-343-8731.

By virtue of the authority contained in section 204 of the Act of October 21, 1976, 90 Stat. 2751 (43 U.S.C. 1714), it is ordered as follows:

1. Public Land Order No. 2301 of March 14, 1961, which withdrew national forest land as administrative sites and recreation areas, is hereby revoked insofar as it affects the following described Heenan Lake Administrative Site (inadvertently shown as Menon Lake in PLO No. 2301):

TOIYABE NATIONAL FOREST

Mount Diablo Meridian

T. 9 N., R. 21 E.,
Sec. 4, NE¼SE¼.

The area described contains 40 acres in Alpine County.

2. At 10 a.m. on May 31, 1978, the land shall be open to such forms of disposition as may by law be made of national forest land.

GUY R. MARTIN,
Assistant Secretary of the Interior.

APRIL 25, 1978.

Title 50—Wildlife and Fisheries

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 611—FOREIGN FISHING REGULATIONS

Amendment of Foreign Fishing Fee Schedule and Codification of Regulations

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Amendment and codification of foreign fishing regulations.

SUMMARY: This document amends the foreign fishing fee schedule under provisions of the Fishery Conservation and Management Act of 1976 by adding five new species to the previously published list, provides an additional basis for determining vessel permit fees in nonretention fisheries, and incorporates the entire fee schedule into the foreign fishing regulations.

EFFECTIVE DATE: This amendment will become effective April 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard H. Schaefer, Chief, Fishery Management Operations Divisions, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20235, telephone 202-634-7454.

SUPPLEMENTARY INFORMATION: Pursuant to section 204(b)(10) of the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended, a fee schedule was published in the FEDERAL REGISTER on October 7, 1977, at 42 FR 54588. This schedule, which is applicable for 1978, lists the fees charged foreign governments for species of fish taken by their flag vessels which fish in the fishery conservation zone (FCZ) of the United States. This schedule also lists fees payable to the United States for foreign flag vessels which conduct or support fishery activities within the FCZ.

This schedule was first published as a draft fee schedule on June 15, 1977 (42 FR 30529). That publication solicited written comments or suggestions "from the public, concerned governmental agencies, the scientific community, industry, private interest, or any other interested party concerning any aspect of the proposed fee schedule • • •" This schedule was published as a final document in the FEDERAL REGISTER in the notice section on October 7, 1977 (42 FR 54588). It has since been determined, however, that the schedule should be incorporated into the foreign fishing regulations which appear in 50 CFR Part 611. One purpose of this publication is to correct earlier practice by republishing the fee schedule as a rule. A second purpose is to amend the October 7, 1977, fee schedule by adding five new species to the species list. This amendment was first published January 25, 1978 (43 FR 3420), as a proposed amendment. Comments were received from the Government of Japan in response to that publication. They urged that Japanese values for billfish and sharks, which are considerably lower than the prices in the United States, be substituted in computing the fees to be paid to the United States. This suggestion cannot be accepted because prices used in computing fees are based on U.S. landings data whenever possible. Only in the rare situation where no U.S. ex-vessel price data exist for a particular species are foreign prices used.

A third purpose is to publish a second amendment which establishes an appropriate permit fee for foreign fishing vessels engaging in "nonretention" fisheries within the fishery conservation zone (FCZ). This provision has been discussed with the foreign governments involved. Those governments contend that since the act does not control the taking of highly migratory species of tuna within the FCZ, it is unnecessary for foreign fishing vessels desiring to take only highly migratory species of tuna to apply for or to have on board a permit for that purpose.

Their position is not consistent with section 201(a) of the act which states, in part, "• • • no foreign fishing is authorized within the fishery conservation zone • • • unless such foreign fishing • • • is conducted under and in accordance with, a valid and applicable permit • • •". "Fishing" is defined, in relevant part, as "the catching, taking, or harvesting of fish; • • • any other activity which can *reasonably be expected to result in the catching, taking or harvesting of fish* • • •" [emphasis added].

Under the act, it is immaterial whether foreign fishermen desire to catch only tunas; intent of the fishermen is not relevant. Longline fishing gear, comprised as it is of a series of baited hooks suspended from a central "longline" which may extend for many miles, is inherently attractive to many species of fish (including billfishes and sharks) in addition to highly migratory species of tuna. It is inevitable that some of those other species, subject to U.S. jurisdiction under the act, will be caught. Setting a longline is thus an "activity which can reasonably be expected to result in the catching • • • of fish • • •". Therefore, it is clear that all foreign fishing vessels with nonselective gear operating within the FCZ must have a permit whether they have allocations or not. There is, moreover, a need to have information about the presence, the movements, and the catches of these other species by foreign longline vessels for conservation and management purposes.

The schedule of vessel permit fees charges $1 per gross registered ton for catching vessels, and is based on the premise that the fishing power (capacity to remove fish from the sea) of such vessels is related to the vessel's tonnage. Thus, a vessel of greater tonnage would be expected to pay a higher fee. That premise is inapplicable to vessels engaged in a fishery in which they may not retain the regulated species. Accordingly, for such vessels, appropriate vessel permit fees should be those charged to other vessels that neither catch nor process fish, namely, $200. This figure represents the approximate cost to process and issue a permit. Foreign longliners of nations with allocations will be charged vessel permit fees on the same basis as all other foreign vessels which catch fish (i.e., $1 per gross registered ton).

All nations having any interest in these fee schedules have already been individually notified of them. This schedule, which applies only to foreign nations and their fishermen, comes within the foreign affairs exemption of the Administrative Procedure Act.

NOTE.—The National Marine Fisheries Service has determined that this publication does not constitute a major action requiring preparation of an economic impact analysis under E.O. 11821 and 11949. The National Marine Fisheries Service has further determined that this publication does not constitute a major Federal action within the meaning of the National Environmental Policy Act of 1969 requiring the preparation of an environmental impact statement.

AUTHORITY: 16 U.S.C. 1801 et seq.

Signed at Washington, D.C., this 19th day of April 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

1. Amend 50 CFR Part 611 by inserting new § 611.22:

§ 611.22 Fee schedule for foreign fishing permits.

(a) The fee charges for fishing by foreign flag vessels for fish over which the United States exercises exclusive fishery management authority required by section 204(b)(10) of the act and § 611.3(c)(3) of this part are specified as follows:

(1) *Permit fees.* The owners and operators of all foreign vessels engaging in fishing as defined in § 611.2(p), are required to pay appropriate fees as specified in the following table. In the case of vessels described in more than one category, the highest applicable fee will be charged. Permit fees must be paid in advance and are not refundable. However, on a case-by-case basis, the Assistant Administrator for Fisheries may allow the substitution of like vessels when the original vessel has become disabled or otherwise cannot participate in the fishery.

TABLE I

Vessel activity	Permit fee
Catching (activities described in § 611.2(p) (1) or (2)) with an applicable national allocation (per gross registered ton)	$1.00
Catching (activities described in § 611.2(p) (1) or (2)) without an applicable national allocation, i.e., a nonretention fishery (per vessel)	200.00
Processing (activities described in § 611.2(p)(3)(i)) (per gross registered ton) (up to $2,500)	.50
Other support (activities described in § 611.2(p)(3) (ii) or (iii)) (per vessel)	200.00

(2) *Poundage fees.* (i) The poundage fee for each allocated species is calculated at 3.5 percent of the actual landed value per metric ton of the species to U.S. fishermen where U.S. landing data are available in 1976, the most recent year for which such data are available.

(ii) This fee must be paid in advance on the entire national allocation if the nation receiving the allocation chooses to accept it.

(3) *Method of payment.* (i) All payments received must be drawn in U.S. dollars, payable at a bank in the United States, and be made payable to the U.S. Department of Commerce, NOAA. In addition, payments from private firms or individuals should be in the form of a certified check.

(ii) Remittances should be sent to the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street NW., Washington, D.C. 20235, Attention: F3. To facilitate processing, each remittance should be accompanied by a copy of the applicable bill for collection for identification purposes.

(iii) Refunds of poundage fees will be made only upon written application to the address mentioned in (3)(ii) above. Refund requests should contain the following information:

(A) A statement that the amount involved is more than $100.

(B) An explanation of the difference between the amount of actual catch and the amount of catch authorized, and the reasons for the difference.

(b) The following ex-vessel prices to be used for computing fees are based on U.S. commercial landings as published in "Fisheries of the United States, 1976, Current Fishery Statistics No. 7200, National Marine Fisheries Service, April 1977," except where noted:

Species:	*Average ex-vessel value (per metric ton)*
Butterfish	$622
Cod, Pacific	282
Crab, tanner (snow)	441
Flounders Pacific	287
Hake, Pacific	32
Hake, red	185
Hake, silver (whiting)	184
Herring, Atlantic	67
Herring, Pacific	[1]100
Herring, river (alewives)	96

[3510-22]

PART 651—ATLANTIC GROUNDFISH (COD, HADDOCK, YELLOWTAIL FLOUNDER)

Interim Emergency Regulations and Request for Comments; Correction

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Correction of regulation.

SUMMARY: Emergency regulations governing the Atlantic groundfish fisheries (cod, haddock, and yellowtail flounder) were published in the FEDERAL REGISTER on March 31, 1978 (43 FR 13578). Those regulations were amended on April 10, 1978 (43 FR 14968). One part of the amendment which relates to fishermen engaging in fisheries other than the cod, haddock, or yellowtail flounder fisheries, but who catch those species incidental to their purposeful fisheries for other species, was inadvertently changed. The purpose of this correction is to delete that part of the amendment which was inadvertently changed and to reinstate the rule in effect before March 31, 1978.

EFFECTIVE DATE: This correction becomes effective May 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. William G. Gordon, Director, Northeast Region, National Marine Fisheries, 14 Elm Street, Gloucester, Mass. 01930, telephone 617-281-3600.

SUPPLEMENTAL INFORMATION: On March 31, 1978, interim emergency and proposed regulations implementing the fishery management plan for Atlantic groundfish (cod, haddock, and yellowtail flounder) were published in the FEDERAL REGISTER (43 FR 13578). Subsection 651.6(c) of those regulations and the amendment to the regulations published on April 10, 1978 (43 FR 14969), changed the incidental catch allowance which had been in effect since March 14, 1977 (42 FR 13999), of 5,510 pounds or 10 percent of the weight of all fish on board per trip, whichever is greater. This change inadvertently resulted in allowing vessels using small-mesh nets primarily for species other than regulated species to catch and land the same quantities of regulated species as vessels using large mesh nets primarily for regulated species. The restriction for small-mesh vessels of 5,510 pounds or 10 percent of all fish on board, whichever is greater, is therefore reinstated.

Fishermen should note that the landing restriction section of the regulations makes it unlawful for any vessel to land more cod, haddock, or yellowtail flounder than the stated amounts. Thus, the landing restrictions apply to vessels using small-mesh nets as they do to vessels of similar size using large-mesh nets and engaged in the fishery for the regulated species.

Fishermen are cautioned that the restrictions on landing cod, haddock, and yellowtail flounder are subject to revision by the Assistant Administrator for Fisheries and will be revised from time to time.

Signed at Washington, D.C., this 28th day of April, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

Correct 50 CFR 651.6(c), as amended, by striking the paragraph in its entirety and substituting the following:

V 4 3 | 8 7

(c) This mesh size regulation will not apply to vessels taking haddock, cod, or yellowtail flounder as by-catch so long as such vessels do not have on board (either at sea or at the time of off-loading) cod, haddock, or yellowtail flounder in amounts in excess of 5,510 pounds (2.5 metric tons) for each species or 10 percent by weight of all fish on board such vessel for each species, whichever is greater.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

[7 CFR Part 632]

RURAL ABANDONED MINE PROGRAM

Public Hearings; Extension of Comment Date

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of public hearings; extension of dates for comments.

SUMMARY: The Soil Conservation Service previously proposed at 43 FR 15312, April 11, 1978, policy and requirements to carry out the rural abandoned mine program (RAMP) providing long-term Federal, technical, and financial assistance to land users to reclaim, conserve, and develop certain abandoned coal-mined lands in rural areas. This document announces three public hearings to be held on the proposed rules for implementing section 406 of Pub. L. 95-87, 91 Stat. 460 (30 U.S.C. 1236).

DATES: Because of the dates of the public hearings, the deadline for receiving comments on the proposed RAMP rules is extended to June 5, 1978. Public hearing dates: May 23, 1978—Denver, Colo.; May 26, 1978—St. Louis, Mo.; May 30, 1978—Washington, D.C.

ADDRESSES: Send comments to David P. Overholt, Director, Conservation Operations Division, Soil Conservation Service, USDA, Room 6132-S, P.O. Box 2890, Washington, D.C. 20013.

The RAMP public hearings will be held at the following locations:

Denver, Colo., May 23, 1978: Wyer Auditorium, Denver Public Library, 1357 Broadway, 8 a.m. to 4 p.m.

St. Louis, Mo., May 26, 1978: Federal Building (MART), 405 South 12th Street, 12th and Spruce Streets, 8 a.m. to 4 p.m.

Washington, D.C., May 30, 1978: South Agriculture Building, Jefferson Auditorium, Independence Avenue between 12th and 14th Streets SW., 8:30 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT:

David P. Overholt, telephone 202-447-7145.

(Catalog of Federal Domestic Assistance Programs number to be assigned.)

Dated: April 27, 1978.

EDWARD E. THOMAS,
Assistant Administrator for Land Resources.

[3410-02]

Agricultural Marketing Service

[7 CFR Part 915]

HANDLING OF AVOCADOS GROWN IN SOUTH FLORIDA

Notice of Proposed Amendment of Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: Consideration is being given to a proposal to add a new paragraph to the section Avocados not subject to regulation of the Rules and Regulations currently in effect under Marketing Order No. 915. The purpose of the proposal would be to permit the handling of avocados to be used for seed purposes exempt from assessments, regulations, and inspection and certification. The amendment to exempt avocados used for seed is needed because such avocados are immature, and it would require certification by the receiver that such avocados were used for the intended purpose, as a safeguard to prevent avocados so handled from entering commercial channels of trade.

DATES: Comments must be received on or before May 19, 1978.

ADDRESSES: Comments may be addressed to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments shall be submitted, and they will be made available for public inspection at the Office of the Hearing Clerk during business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATON CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department is considering a proposed amendment, as hereinafter set forth, of the Rules and Regulations (7 CFR Part 915.110-915.155; Subpart—Rules and Regulations) currently in effect pursuant to the applicable provisions of the marketing agreement and Order No. 915, both as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. This is a regulatory program effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The amendment of the rules and regulations was proposed by the Avocado Administrative Committee, established under the amended marketing agreement and order as the agency to administer the terms and provisions thereof. The amendment would revise § 915.140 Avocados not subject to regulation by adding a new paragraph (d), so that after such revision such section reads as follows:

§ 915.140 Avocados not subject to regulation.

. . . . . .

(d) *Avocados for seed.* Any handler may ship avocados to be used for seed purposes exempt from the provisions of §§ 915.41, 915.51, and 915.54, and the regulations issued thereunder: *Provided,* That such handler make application to the committee for an exemption prior to the loading of each shipment and that the receiver of each such shipment shall certify, on a form provided by the committee, that such fruit was used for the intended purpose, and that the residue from the seed separation process will not be allowed to enter fresh channels of trade.

Dated: April 28, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegatable Division, Agricultural Marketing Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 78-AL-1]

GALENA, ALASKA

Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

V 43 | 87 MY 4 78 UMI

SUMMARY: This notice (NPRM) proposes to alter the Galena, Alaska, transition area by expanding the 700-foot portion to provide adequate controlled airspace to move and control terminal aircraft operations using radar ATC procedures. This action would lower the base of controlled airspace from 1,200 to 700 feet within a 19-mile radius of the Galena VORTAC. The present 700-foot floor of controlled airspace, extending from the control zone extension west boundary to 19 miles west and from the control zone extension east boundary to 12 miles east, has been found to provide less than optimum controlled airspace for radar ATC procedures.

DATE: Comments must be received on or before June 1, 1978.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Alaskan Region, Attention: Chief, Air Traffic Division, Docket No. 78-AL-1, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501.

The official docket may be examined at the following location: Office of the Regional Counsel, Alaskan Region, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501.

An informal docket may be examined at the Office of the Chief, Operations, Procedures and Airspace Branch, Air Traffic Division, at the above address.

FOR FURTHER INFORMATION CONTACT:

John G. Costello, Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501, telephone 907-265-4271.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Alaska Region, attention: Chief, Air Traffic Division, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501. All communications received on or before June 1, 1978, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public regulatory docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Operations, Procedures and Airspace Branch, Air Traffic Division, Alaskan Region, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska, or by calling 907-265-4271. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2, which describes application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations, (14 CFR Part 71) to redescribe the Galena, Alaska, transition area. This proposal would expand the 700-foot portion of the transition area to provide the flexibility needed to give more efficient ATC services beyond the limits of the control zone in a radar environment. There would be no change to the 1,200-foot portion of the transition area.

Drafting Information

The principal authors of this document are John Costello, Air Traffic Division, and Donald H. Boberick, Esq., Regional Counsel.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) by redescribing the 700-foot portion of the Galena, Alaska, transition area, as, "That airspace extending upward from 700 feet above the surface within a 19-mile radius of the Galena VORTAC."

(This amendment is proposed under the authority of § 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); § 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Anchorage, Alaska, on April 21, 1978.

LYLE K. BROWN,
Director, Alaskan Region.

[FR Doc. 11850 Filed 5-3-78; 8:45 am]

[4910-13]

[14 CFR Part 71]

[Airspace Docket No. 78-EA-21]

NEW CASTLE, PA.

Proposed Designation of Transition Area:

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes to designate a New Castle, Pa., transition area, over New Castle Municipal Airport, New Castle, Pa. This designation will provide protection to aircraft executing the new NDB RWY 22 instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before June 29, 1978.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430. All communications received on or before June 29, 1978, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430, or by calling 212-9955-3391.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area over New Castle Municipal Airport, New Castle, Pa. The area will commence at 700 feet above the surface extending out to a 5-mile radius around the center of the airport. There will be an extension to the northeast extending approximately 13 miles from the airport and 6 miles in width.

Drafting Information

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a New Castle, Pennsylvania, 700-foot floor transition area as follows:

New Castle, Pa.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the center, 41°01'30" N., 80°24'45" W., of New Castle Municipal Airport, New Castle, Pa.; within 3.5 miles each side of the 042° bearing from the New Castle, Pa. RBN (41°04'06" N., 80°21'49" W.), extending from the 5-mile radius area to 11.5 miles northeast of the RBN.

Sec. 307(a), Federal Aviation Act of 1958 (72 Stat. 749; (49 U.S.C. 1348 (a))) sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Issued in Jamaica, N.Y., on April 19, 1978.

L. J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc. 78-12014 Filed 5-3-78; 8:45 am]

[14 CFR PART 71]

[Airspace Docket No. 78-EA-16]

LEHIGHTON, PA.

Proposed Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making.

SUMMARY: This notice proposes to designate a Lehighton, Pa., transition area. This designation will provide protection to aircraft executing a new instrument approach which has been developed for the Carbon County Airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before June 29, 1978.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, ARE-7, Federal Building, J. F. K. International Airport, Jamica, N.Y. 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J. F. K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J. F. K. International Airport, Jamaica, N.Y. 11430. All communications received on or before June 29, 1978, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430, or by calling 212-995-3391.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area over Carbon County Airport, Lehighton, Pa. The designation will control an area varying from 10 miles to the southwest to 12 miles to the west to 5 miles to the north. Additional area will be controlled to the northeast for a distance of approximately 17 miles extending over Beltzville, Pa. and Neeb Airport.

Drafting Information

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Lehighton, Pa. 700 foot floor transition area as follows:

Lehighton, Pa.

That airspace extending upward from 700 feet above the surface within a 8-mile radius of the center, 40°48'34" N, 75°45'43" W of Carbon County Airport, Lehighton, Pa.; within a 12-mile radius of the center of the airport, extending clockwise from a 182° bearing from the airport to a 270° bearing from the airport; within a 15-mile radius of the center of the airport, extending clockwise from a 270° bearing from the airport to a 339° bearing from the airport; within a 14-mile radius of the center of the airport, extending clockwise from a 339° bearing from the airport to a 024° bearing from the airport; within a 15-mile radius of the center of the airport, extending clockwise from a 024° bearing from the airport to a 060° bearing from the airport; within a 12-mile radius of the center of the airport, extending clock-

V 4 3 — 1 8 7

wise from a 060° bearing from the airport to a 121° bearing from the airport; within 9.5 miles north and 4.5 miles south of a 070° bearing from the Carbon RBN (40°48'43" N, 75°45'34" W) extending from the RBN to 18.5 miles east of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958 (72 Stat. 749; (49 U.S.C. 1348(a))); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Ecomomic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Issued in Jamaica, N.Y., on April 19, 1978.

L. J. CARDINALI,
Acting Director,
Eastern Region.

SPECIAL USE AIRSPACE

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to increase the periods of designation of two restricted areas identified as R-2304, Gila Bend, Ariz., and R-2305, Gila Bend, Ariz. This proposed action will provide the additional hours of U.S. Air Force training programs while providing for the safe and efficient use of the navigable airspace by probibiting unauthorized flight operations within the designated area during those periods.

DATES: Comments must be received on or before June 1, 1978.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Western Region, Attention: Chief, Air Traffic Division, Docket No. 78-WE-9, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591. An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. All communications received on or before June 1, 1978, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart B of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to alter two restricted areas identified as R-2304, Gila Bend, Ariz., and R-2305, Gila Bend, Ariz. This proposed amendment would increase the time of designation of R-2304 from sunrise to 2400 local time, Monday through Friday, to continuous and R-2305 from sunrise to sunset to continuous. Extending the time of designation would permit the Department of the Air Force to more effectively use these restricted areas by providing additional training hours in the existing restricted areas. R-2304 and R-2305 would continue to be designated as joint use and IFR/VFR operations in the areas may be authorized by the controlling agency when it is not being utilized by the using agency.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as republished (43 FR 659) as follows:

In § 73.23 (43 FR 664), under R-2304, Gila Bend, Ariz., "Sunrise to 2400 local time, Monday through Friday." would be deleted and "Continuous." would be substituted therefor; under R-2305, Gila Bend, Ariz., "Sunrise to sunset." would be deleted and "Continuous." would be substituted therefor.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on April 27, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and
Air Traffic Rules Division.

FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE BENEFITS AND SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Rules for Adjudicating Disability Claims in Which Vocational Factors Must Be Considered; Extension of Comment Period

AGENCY: Social Security Administration, HEW.

ACTION: Extension of comment period.

SUMMARY: This notice extends the period for comments to the notice of proposed rulemaking, published in the FEDERAL REGISTER on March 7, 1978 (43 FR 9284), which proposed rules for adjudicating disability claims in which vocational factors must be considered.

Several legal advocacy groups have requested an extension of time for submitting comments on these proposed rules. These groups believe that a 60-day comment period is inadequate in view of the importance and controversial nature of these proposed rules.

The Social Security Administration is asking for maximum public participation in the evaluation of these rules for adjudicating disability claims. In order to obtain the views and opinions of members of the public, three public meetings were held to discuss these proposed regulations prior to their publication in the FEDERAL REGISTER as a notice of proposed rulemaking. The Social Security Administration has also invited comments from many different segments of the public to provide for more extensive public participation. To insure that all interested parties will have sufficient time to submit data, views, and arguments, the comment period is being extended an additional 30 days as shown below.

DATES: Comments must be received on or before June 8, 1978.

ADDRESSES: Prior to final adoption of the proposed amendments to the regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Commissioner of Social Security, Department, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Md. 21203.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 5131, 330 Independence Avenue SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION:

William J. Ziegler, Legal Assistant, Office of Policy and Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Md. 21235, telephone 301-594-7415.

Dated: April 24, 1978.

DON WORTMAN,
Acting Commissioner
of Social Security.

Approved: May 1, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health,
Education, and Welfare.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 65]

[FRL 888-1]

STATE AND FEDERAL ADMINISTRATIVE ENFORCEMENT OF IMPLEMENTATION PLAN REQUIREMENTS AFTER STATUTORY DEADLINES

Proposed Approval of a Delayed Compliance Order Issued by the New York Department of Environmental Conservation to the United States Gypsum Co. Oakfield, N.Y.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an Administrative Order issued by the Commissioner of the New York State Department of Environmental Conservation (DEC) to the United States Gypsum Co. The order requires the company to bring air emissions from its gypsum mill in Oakfield, N.Y., into compliance with certain provisions of the federally-approved New York State Implementation Plan (SIP) by August 1, 1978. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act. If approved by EPA, the Order will constitute an addition to the SIP and will alter the rights of persons to bring judicial actions against the source for violations of the SIP. The purpose of this notice is to invite public comment on EPA's proposed approval of the Order as a delayed compliance order.

DATES: Written comments must be received on or before June 5, 1978.

ADDRESSES: Comments should be submitted by writing to: Eckardt C. Beck, Regional Administrator, U.S. Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, N.Y. 10007. The State Order, material supporting the order, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Walter Mugdan, Attorney, General Enforcement Branch, Enforcement Division, U.S. Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, N.Y. 10007, 212-264-4434.

SUPPLEMENTARY INFORMATION: The United States Gypsum Co. operates a gypsum mine and manufacturing plant in Oakfield, Genessee County, N.Y. The Order under consideration concerns emissions from emission points No. 3, 5 through 10, 13 and 14 of the company's Mill Building, which are subject to the requirements of Part 212, Title 6, Official Compilation of Codes, Rules and Regulations of the State of New York. This regulation limits the emission of particulate matter, and is part of the federally-approved State Implementation Plan for the Air Quality Control Region in which the source is located. The Order requires that, on or before November 1, 1977, the source shall award purchase contracts for major pollution control equipment; on or before April 1, 1978, it shall obtain delivery of such equipment; on or before May 1, 1978, it shall commence construction and installation of such equipment; on or before August 1, 1978, it shall complete construction and attain operational level; and on or before October 1, 1978, it shall submit an approvable stack test report to the DEC if it is required by that Department to do so. The source has consented to the issuance of the Order and to its terms, and it has satisfied those increments of progress which have fallen due as of this date.

The purpose of this notice is to invite public comment on EPA's proposed approval of this Order as a DCO. If approved, the Order would constitute an addition to the New York State Implementation Plan for the purposes of sections 110 ("Implementation Plans"), 304 ("Citizen Suits"), and 307 ("General Provisions Relating to Administrative Proceedings and Judicial Review") of the Act. After the public comment period, and after EPA has reviewed any comments received in response to this notice, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the Order in 40 CFR Part 65. The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedures for EPA's issuance, approval, or disapproval of an order under section 113(d) of the Act. In addition, Part 65 will contain sections listing or including orders issued, approved, or disapproved by EPA. A prior notice proposing regulations for Part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

Because this Order has been issued to a major source of particulate emissions and permits a delay in compliance with the requirements of 6 NYCRR Part 212, it must be approved by EPA before it becomes effective as a delayed compliance Order under section 113(d) of the Act. EPA may approve the Order only if it satisfies the appropriate requirements of this subsection.

This Agency believes that the Order does satisfy the applicable requirements of section 113(d), and therefore proposes to approve it as a delayed compliance Order. If the Order is approved, source compliance with its terms would preclude further EPA enforcement against it for violation of 6 NYCRR Part 212 during the period the Order is in effect (so long as the source complies with terms). Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether EPA should approve the Order as a delayed compliance Order. Final action on this proposal will be published in the FEDERAL REGISTER.

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Proposed Tolerance for the Pesticide Chemical Chlorothalonil

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that tolerances be established for residues of the fungicide chlorothalonil on bananas. The amendment to the regulations was requested by Diamond Shamrock Corp. This proposed rule would establish a maximum permissible level for residues of chlorothalonil on bananas.

DATE: Comments must be received by May 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. Eugene Wilson, Product Manager (PM) 21, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460, 202-426-2456.

SUPPLEMENTARY INFORMATION: On April 18, 1978, notice was given (43 FR 16400) that Diamond Shamrock Corp., 1100 Superior Avenue, Cleveland, Ohio 44114, had filed a pesticide petition (PP 8F2067) with the EPA.

This petition proposed that 40 CFR 180.275 be amended to establish tolerances for residues of the fungicide chlorothalonil (tetrachloroisophthalonitrile) and its metabolite 4-hydroxy-2,5,6-trichloroisophthalonitrile in or on the raw agricultural commodities bananas and plantains at 0.5 part per million (ppm) with no more than 0.05 ppm of combined residues in the edible pulp of banana and plantain fruit. No comments were received in response to this notice of filing. It is noted, however, that plantains are included in the definition of bananas as set forth in 40 CFR 180.1(h). For purposes of this notice, therefore, the proposed tolerances on bananas and plantains and the edible pulps of their fruit are expressed as bananas and the edible pulp of the banana fruit.

The tolerance of 0.5 ppm in or on bananas with no more than 0.05 ppm of combined residues in the edible pulp of banana fruit is being proposed at this time because the Agency wishes to provide information in addition to that provided in the April 18, 1978 notice published earlier.

The data submitted in the petition and other relevant material have been evaluated, and the pesticide is considered to be useful for the purpose for which the tolerance is sought.

The toxicological data considered in support of the proposed tolerance included two-year rat and dog feeding studies with no-observable-effect levels (NOEL) of 60 ppm with a 100-fold safety factor, a rat acute toxicity study, a rabbit teratogenicity study, and a three-generation rat reproduction study. An oncogencity study in a second mammalian species is missing. However, the existing toxicology data do not show any evidence of an undue human health hazard and thus support establishment of the proposed tolerance.

The acceptable daily intake (ADI) of chlorothalonil and its metabolite has been established at 0.015 milligram (mg/kilogram. (kg) of body weight (bw) based on the two-year dog feeding study with an NOEL of 60 ppm. Existing tolerances result in a maximum theoretical exposure of 81.05 percent of the ADI. Establishment of the proposed tolerance would not exceed the ADI and a maximum permissible intake (NPI) of 0.9 mg/day/60-kg human. The proposed tolerance in or on bananas will not contribute a significant amount (approximately 0.001 mg/day) to the daily diet. The ADI will be practically unaffected by this amount.

Tolerances have previously been established for residues of chlorothalonil and its 4-hydroxy metabolite in or on a variety of raw agricultural commodities, ranging from 15 ppm to 0.1 ppm. Adequate analytical methods (gas liquid chromatography) are available to enforce the tolerance established by this amendment. Tolerances currently pending for residues of chlorothalonil and its metabolite in or on raw agricultural commodities include mint at 500 ppm; spinach at 42 ppm; chicory, endive, garden beet greens, mustard greens, peaches, and turnip greens at 25 ppm; cherries at 15 ppm; garden beet roots, parsnip roots, and turnip roots at 1 ppm; and soybeans at 0.2 ppm.

Meat and milk tolerances are not necessary to cover secondary residues resulting from the proposed use because there are no feed items involved. It has been determined that the tolerance established by amending 40 CFR 180.275 will protect the public health, and it is proposed, therefore, that the tolerance be established as set forth below.

Interested persons are invited to submit written comments on the proposed regulation. As provided for in the Administrative Procedure Act (5 U.S.C. 553(d)(3)), the time for the comment period is shortened to less than 30 days because (1) the notice of filing of April 18, 1978 (43 FR 16400) invited the submission of written comments on the proposed tolerance, and (2) there is an epidemic of banana leaf spot disease (Black Sigatoka) in Honduras against which chlorothalonil is effective. The comments must bear a notation indicating both the subject and the petition/document control number, "PP 8F2067/P85". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

AUTHORITY: Section 408(d) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346a(d)].

Dated: May 1, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

It is proposed that Part 180, Subpart C, section 180.275 be amended by alphabetically inserting in the table a tolerance on bananas at 0.5 ppm to read as follows:

§ 180.275 **Chlorothalonil tolerances for residues.**

. . . . . .

Commodity:	*Parts per million*
Bananas (NMT 0.05 ppm in edible pulp)	0.5

. . . . . .

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[BC Docket No. 78-139; RM-3064]

FM BROADCAST STATION IN BEAVERTON, MICH.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to Beaverton, Mich., as that community's first FM assignment, in response to a petition filed by Mid West Communications. The proposed assignment could bring a first FM service to Beaverton.

DATES: Comments must be filed on or before June 20, 1978. Reply comments must be filed on or before July 10, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTAL INFORMATION

Adopted: April 21, 1978.

Released: April 27, 1978.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Beaverton, Mich., BC Docket No. 78-139, RM-3064.

1. *Petitioner, proposal, comments.* (a) Petition for rule making,[1] filed by Mid West Communications, proposing the assignment of FM Channel 249A to Beaverton, Mich., as that community's first FM assignment. No responses to the petition were filed.

(b) The channel could be assigned in conformity with the minimum distance separation requirements.

2. *Community Data*— (a) *Location.* Beaverton, in Gladwin County, is located approximately 64 kilometers (40 miles) northwest of Bay City, Mich.

(b) *Population.* Beaverton, 945; Gladwin County, 13,471.[2]

(c) *Local broadcast service.* There is no local aural broadcast service in Beaverton.

(d) *Economic considerations.* Petitioner states that Beaverton is the second largest community in Gladwin County, and according to a recent Beaverton school survey, it has had a substantial gain in resident population. We are told that its present industries include plastic thermo-forming equipment, plastics maufacturing, precision cutting tools, lumbering and livestock and dairy farming. In support of its proposal, petitioner has submitted information with respect to population, form of government, medical and recreational facilities, transportation and education. Petitioner asserts there is only one weekly newspaper to serve the county and the proposed station would provide residents with news of interest in the area in addition to entertainment and educational benefits.

3. Since Beaverton is located 420 kilometers (250 miles) of the U.S.-Canada border, proposed Channel 249A to Beaverton, Mich., requires coordination by the Canadian Government.

4. In light of the above information and the fact that the proposed FM channel assignment would provide for a first local aural broadcast service to Beaverton, the Commission believes it appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Rules, with regard to Beaverton, Mich., as follows:

City and Channel No.		
Beaverton, Mich.;	Present:—;	Proposed: 249A.

5. Authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix below and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 20, 1978, and reply comments on or before July 10, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, Section 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filing in this proceeding.

(a) Counterproposals advanced in this proceedilng itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons action on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[BC Docket No. 78-138; RM-3067]

FM BROADCAST STATION IN GREENSBORO, GA.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to Greensboro, Ga. The proposal for that community's first FM assignment was made in a petition filed by Boswell and Dingler.

DATES: Comments must be filed on or before June 20, 1978. Reply comments must be filed on or before July 10, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: April 21, 1978.

Released: April 27, 1978.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Greensboro, Ga.), BC Docket No. 78-138, RM-3067.

1. *Petitioner, proposal, comments.* (a) Petition for rule making[1] filed by Boswell and Dingler ("petitioner"), seeking the assignment of Class A FM Channel 280A to Greensboro, Ga., as its first FM assignment. No responses to the petition were received.

[1]Public Notice of the petition was given on March 7, 1978, Report no. 1106.

[1]Public Notice of the petition was given on March 7, 1978, Report No. 1106.

[2]Population figures are taken from the 1970 U.S. Census.

V 4 3 | 8 7 M Y 4 7 8 UMI

(b) The channel could be assigned in conformity with the minimum distance separation requirements.

(c) Petitioner states that if the channel is assigned, it will apply for authority to construct and operate the FM broadcast facility.

2. *Community data.*—(a) *Location.* Greensboro, the seat of Greene County, is located in the east central part of Georgia, approximately 109 kilometers (68 miles) east of Atlanta and 104 kilometers (65 miles) northeast of Macon, Ga.

(b) *Population.* Greensboro, 2,583; Greene County, 10,212.[2]

(c) *Local broadcast service.* There is no local aural broadcast service in Greensboro or Greene County.

3. *Economic considerations.* Petitioner states that Greensboro and Greene County have been experiencing a change in population and employment trends over the past few years. It asserts that the area which is now supporting a gradual and economically sound transition to manufacturing, industry and services, has had, between 1960-1970, and 18 percent growth in services, 25 percent growth in wholesale and retail trade, a 63 percent growth in contract construction, and a 176 percent growth in finance, insurance and real estate. Petitioner has submitted detailed information in support of the need for a first local full-time broadcast service in Greensboro and Greene County.

4. In view of the fact that the proposed FM station could provide the community as well as Greene County with a first FM service, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the rules, with regard to Greensboro, Ga., as follows:

City and Channel No.	
Greensboro, Ga.:	Present: —; Proposed: 280A.

5. Authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix below and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 20, 1978, and reply comments on or before July 10, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[2]Population figures are taken from the 1970 U.S. Census.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

(5) *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[Docket No. HM-161; Notice No. 78-4]

COMMERCIAL DETONATORS AND DETONATING PRIMERS

Proposed Rulemaking

AGENCY: Materials Transportation Bureau, Department of Transportation.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to provide more suitable and proper shipping descriptions and classifications of many detonators which are widely used commercially. The need for this action is the lack of proper shipping descriptions for many small explosive devices and the fact that blasting caps are not divided into class A explosives and class C explosives on a technically firm basis. Many explosives producers have complained about these deficiencies in the DOT regulations. The intended effect of this action is to correct the deficiencies noted above.

DATES: Comments must be received on or before September 1, 1978.

ADDRESS COMMENTS TO: Docket Section, Office of Hazardous Materials Operations, Department of Transportation, Washington, D.C. 20590. It is requested that five copies be submitted.

FOR FURTHER INFORMATION CONTACT:

Alan I. Roberts, Director, Office of Hazardous Materials Operations, 2100 2nd Street SW., Washington, D.C. 20590, 202-426-0656.

SUPPLEMENTARY INFORMATION: The purpose of this notice of proposed rulemaking is to propose amendments to Parts 172, 173, 174, 175, 176, 177, and 178 of the Department of Transportation's hazardous materials regulations applicable to blasting caps, electric blasting caps and other commercial detonating devices. These amendments are being proposed for the following reasons:

1. The present division of blasting caps into class A explosives and class C explosives, based on whether there are more than 1,000 caps in a shipment, is unrealistic from the point of view of safety. Fuse caps, as now packaged, will explode en masse, if one cap is set off, regardless of the number of caps in the package. On the other hand, testing has shown that electric blasting caps having leg wires 4 feet or more in length will not explode en masse when packaged as presently required.

2. There is no provision in the regulations for properly describing many types of small detonating devices. These devices must be described as "Detonation fuze, Class C explosive" even though they do not meet the definition for that shipping name. This proposal would make it possible to properly describe and classify products of this type. Provision would be made for adequate time to reclass items now described as "Detonating fuzes, Class C explosives."

The most significant aspects of this proposal are:

1. Class A, type 7 explosives in § 173.53(g) would be retitled "Initiating Devices" since this description best defines their function. Three categories of initiating devices would be defined:

(a) *Commercial detonator.* This would include all commercial initiating devices that contain not more than 10 grams of explosives per unit.

(b) *Detonating primer.* This would include all commercial initiating devices that contain more than 10 grams of explosives per unit.

(c) *Detonating fuze.* This description would be reserved for ordnance items that are used in military rather than commercial applications.

2. Provision has been made for classifying commercial detonators and detonating primers which comply with certain requirements relating to maximum explosive weight and limited propagation effects as class C explosives, instead of basing the class on the number of devices in a shipment.

3. In revising the packaging regulations, the requirements of existing § 173.67 would be incorporated in the revised § 173.66 which covers commercial detonators. Section 173.67 would be deleted. Section 173.68 would be revised and continue to apply to detonating primers.

It is proposed to revise the packaging regulations in order to:

(a) Simplify the present regulations;

(b) Coordinate them with the newly defined "commercial detonator" and "detonating primer"; and

(c) Include the packaging requirements of certain DOT exemptions so that their use will no longer be necessary. These exemptions are identified as Nos. E-5243, E-6466, and E-6477.

The primary drafters of this document are Charles W. Schultz, Technical Services Branch, Office of Hazardous Materials Operations, and Evan C. Braude, Office of the Chief Counsel, Research and Special Programs Directorate.

In consideration of the foregoing, Parts, 172, 173, 174, 175, 176, 177, and 178 of 49 CFR would be amended as follows:

PART 172—HAZARDOUS MATERIALS TABLE AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

1. Section 172.101 would be amended as follows:

§ 172.101 Hazardous materials table.

(1)	(2)	(3)	(4)	(5) Packaging		(6) Maximum net quantity in one package		(7) Water shipments		
				(a) Exceptions	(b) Specific requirements	(a) Passenger carrying aircraft or rail car	(b) Cargo only aircraft	(a) Cargo vessel	(b) Passenger vessel	(c) Other requirements

2. In § 172.203 paragraph (c) would be deleted as follows:

§ 172.203 Additional description requirements.

• • • • • •

(c) [Deleted]

• • • • • •

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

3. In § 173.53 the introductory text of paragraph (g) would be revised; paragraph (g)(1) would be deleted; paragraph (g)(2) would be redesignated (g)(3) and new paragraphs (g)(1) and (g)(2) would be added; notes 1 through 5 following paragraph (h)(1) would be moved to the end of the section following paragraph (v); note 5 would be revised and a new note 6 would be added to read as follows:

§ 173.53 Definition of class A explosives.

• • • • • •

(g) *Type 7.* An initiating device is a metal or plastic casing containing initiating or priming explosives, Class A—Type 4, either with or without other explosives. It is activated by any of the several means, including an electrical pulse, a flame, a shock or detonation wave, mechanical impact (percussion), pressurized gas, or high intensity light beam. It produces an explosive output that may be used to initiate another explosive or to perform work. A time delay may be incorporated in the means of applying the stimulus, or in the initiating device itself. Any device of this type which was previously approved by the Bureau of Explosives may be transported under the description and class assigned at that time until January 1, 1980.

(1) A commercial detonator (see note 5) is an initiating device for commercial use which contains not more than 10 grams of total explosives weight, excluding ignition and delay charges per unit. There are several different kinds of detonators such as the following:

(i) Blasting caps which are activated by safety fuse.

(ii) Blasting caps which are percussion activated.

(iii) Blasting caps which are activated by flexible detonating cord. This type can be further subdivided into four types as follows:

(A) Delay connectors in plastic sheaths which consist of a plastic sleeve that contains a suitable delay system with receptor and donor explosive charges in the center portion. Each end of the sleeve is made so that flexible detonating cord can be inserted into and locked to the connector;

(B) Delay connectors in metal tubes which consist of a system with a receptor and donor charge positioned between two detonators with the entire assembly placed in a metal tube having both ends open for the insertion of flexible detonating cord;

(C) Delay connectors with detonating cord pigtails which consist of delay connectors as described in paragraph (g)(1)(iii)(B) of this section that have short lengths of detonating cord inserted into both ends and crimped in place; and

(D) Nonelectric instantaneous and delay caps which consist of blasting caps to which is assembled a length of 8.0 or less grains/ft. detonating cord that may have a transfer explosive charge at the opposite end.

(iv) Blasting caps which are activated by gas pressurization or reaction.

(v) Blasting caps which are activated by a shock tube.

(vi) Electric blasting caps which are activated by an electric current.

(2) A detonating primer (see note 6) is an initiation device for commercial use which contains more than 10 grams of total explosive weight, excluding ignition and delay charges per unit.

• • • • • •

NOTE 5.—See § 173.100(gg) for criteria that determine whether a particular type of commercial detonator can be classed as Class C explosive.

NOTE 6.—See § 173.100(hh) for criteria that determine whether a particular type of detonating primer can be classed as a Class C explosive.

4. § 173.66 would be deleted and a new § 173.66 would be added to read as follows:

§ 173.66 Commercial detonators.

(a) Blasting caps (including percussion activated) and delay connectors in metal tubes must be snugly packed in strong inside containers. When blasting caps or delay connectors in metal tubes are packed vertically in metal inside containers, their open ends must be covered by a suitable cushioning material. The inside containers must then be snugly packed in intermediate packagings consisting of paper, plastic, or pasteboard cartons or wrappings. All intermediate packages must be packed in an outside packaging specified in paragraph (e) of this section. The intermediate packages must be separated from the outside container by at least 1 inch of tightly packed sawdust, excelsior, or equivalent cushioning material.

(1) The maximum number of these devices containing not more than 3.0 grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container is 110 and in one outside packaging is 5,000. The gross weight of the package may not exceed 110 pounds, or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(2) The maximum number of these devices containing more than 3 but not more than 10 grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container is 50 and in one outside packaging is 500. The gross weight of the package may not exceed 100 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(b) Electric blasting caps, delay connectors in plastic sheaths, and blasting caps with empty plastic tubing must be packed in pasteboard carton type inside containers. An inside container is not required for electric blasting caps that are contained in inside pasteboard tubes, or which have their leg wires wound on spools with the caps either placed inside the hub of the spool, or securely taped to the wire on the spool. The inside container, tubes, or spools must be packed in an outside packaging specified in paragraph (e) of this section.

(1) The maximum number of these devices, containing not more than 3.0 grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container is 100 and in one outside container is 1,000. The gross weight of the package may not exceed 150 pounds, or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(2) The maximum number of these devices containing more than 3, but not more than 10 grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container is 50 and in one outside packaging is 500. The gross weight of the package may not exceed 150 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(c) Blasting caps with safety fuse, blasting caps with metal clad mild detonating cord, blasting caps with 8.0 or less grains/ft. detonating cord, and blasting caps with shock tubes may be packed in inside containers, although this is not required. The blasting caps with attachments, or blasting caps in inside containers must be packed in an outside packaging specified in paragraph (e) of this section. No hand holes are permitted in outside packagings. The blasting cap and corresponding configuration should be such as to restrict freedom of movement of the cap and to protect it from impact forces. The blasting caps are not required to be attached to the safety fuse, metal clad mild detonation cord, shock tubes, or 8.0, or less, grain/ft.

(1) The maximum number of these devices, containing not more than 3

M Y 4 | 7 8 UMI

V 43 | 87 MY 4 78 UMI

grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container, if used, is 50 and in one outside packaging is 500. The gross weight of the package may not exceed 100 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(2) The maximum number of these devices, containing more than 3, but not more than 10 grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container, if used, is 10 and in one outside packaging is 100. The gross weight of the package may not exceed 100 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(d) Delay connectors with detonating cord pigtails must be snugly packed in pasteboard cartons, or pasteboard tube inside containers. The inside containers must be packed in an outside packaging specified in paragraph (e) of this section.

(1) The maximum number of these devices containing not more than 3.0 grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container is 50 and in one outside packaging is 500. The gross weight of the package may not exceed 150 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(2) The maximum number of these devices containing more than 3, but not more than 10 grams of explosives each, excluding ignition and delay charges, that may be packed in one inside container is 50, and in one outside packaging is 500. The gross weight of the package may not exceed 150 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(e) Commercial detonators either with or without inside containers, as provided for in this paragraph, must be packed in one of the following outside packagings:

(1) DOT specification 14, 15A, or 16A (§§ 178.165, 178.168, 178.185 of this subchapter) wooden box.

(2) DOT specification 12H, 23F, or 23H (§§ 178.209, 178.214, 178.219, of this subchapter) fiberboard box.

(f) Each outside packaging of commercial detonators must pe plainly marked "Commercial Detonators—Handle Carefully" and must bear the appropriate explosives label specified in § 172.411 of this subchapter.

(g) Nothing in this section shall prohibit the consolidation of properly prepared packages by banding together, palletizing, or placing in an overpack or freight container, providing all applicable requirements of this subchapter are met.

§ 173.67 [Amended]

5. § 173.67 would be deleted in its entirety.

6. § 173.68 would be deleted and a new § 173.68 would be added to read as follows:

§ 173.68 Detonating primers.

(a) Blasting caps with 8.0 or less grains/ft. detonating cord must be packed in on outside packaging specified in paragraph (d) of this section. No hand holes are permitted in outside packaging. No inside container is required. The blasting cap and its corresponding coil configuration shall be such as to restrict freedom of movement of the cap and to protect it from impact forces.

(1) The maximum number of these devices that may be packed in one outside packaging is 500. The gross weight of the package may not exceed 150 pounds, or the maximum gross weight allowed in the specification for the outside packaging, whichever is less.

(b) Delay connectors with detonating cord pigtails must be snugly packed in pasteboard cartons or pasteboard tube inside containers. The inside containers must be packed in an outside packaging specified in paragraph (d) of this section.

(1) The maximum number of these devices that may be packed in one inside container is 50 and in one outside packaging is 500. The gross weight of the package may not exceed 150 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(c) All other unspecified types of detonating primers must be packed in pasteboard cartons or in individual pasteboard, metal, plastic or wooden tube inside containers. The inside containers must be packed in an outside packaging specified in paragraph (d) of this section.

(1) The maximum number of unspecified detonating primers that may be packed in one inside container is 50 and in one outside packaging is 500. The gross weight of the package may not exceed 150 pounds or the maximum gross weight allowed in the specification for the outside packaging used, whichever is less.

(d) Detonating primers either with or without inside containers, as provided for in this paragraph, must be packed in one of the following outside packagings:

(1) DOT specification 14, 15A, or 16A (§§ 178.165, 178.168, 178.185 of this subchapter) wooden box.

(2) DOT specification 12H, 23F, or 23H (§§ 178.209, 178.214, 178.219 of this subchapter) fiberboard box.

(e) Each outside packaging of detonating primers must be closed or sealed in such a manner as to discourage pilferage and to prevent loss of the contents.

(f) Each outside packaging of detonating primers must be plainly marked "Detonating Primers—Handle Carefully," and must bear the appropriate label specified in § 172.411 of this subchapter.

(g) Nothing in this section shall prohibit the consolidation of properly prepared packages by banding together, palletizing, or placing in an overpack or freight container providing all applicable requirements of this subchapter are met.

7. In § 173.100 paragraph (bb) would be amended by removing the words "or commerical users" in the third sentence; paragraphs (gg), (hh), and (ii) would be added to read as follows:

§ 173.100 Definition of Class C explosives.

• • • • • •

(gg) Commercial detonators (§ 173.53 (g)(1)), that contain an explosive charge, excluding delay and ignition charges, of not more than 3.0 grams per unit and when packed for shipment will undergo only limited propagation care classed as Class C explosives. Limited propagation means that if one commercial detonator, near the center of a shipping container is exploded, the aggregate weight of explosives, excluding ignition and delay charges in this and all additional commerical detonators in the shipping container that explode may not exceed 25 grams. Commercial detonators which mass detonate in the shipping container may not be classed as Class C explosives.

(hh) Detonating primers (§ 173.53 (g) (2)) in which the total explosive charge per unit does not exceed 25 grams and, which when packed for shipment, will undergo only limited propagation, are classed as Class C explosives. Limited propagation means that if one detonating primer near the center of a shipping container is exploded, the aggregate weight of explosives, excluding ignition and delay charges, in this and all additional detonating primers in the shipping container that explode may not exceed 25 grams. Detonating primers which mass detonate in the shipping container may not be classed as Class C explosives. For the purposes of this paragraph, "mass detonate" means that more than 90 percent of the devices tested in a package explode practically simultaneously.

(ii) It must be demonstrated by actual tests that commercial detonators and detonating primers which are to be offered for transportation as Class C explosives meet the requirements of paragraph (gg) or (hh) of this section, as appropriate. Testing must be done or approved by:

(1) Bureau of Explosives, or

(2) Department of Energy.

(3) A copy of the test data must be filed with the Office of Hazardous Materials Operations before any type of commercial detonator or detonating primer is offered for transportation as a Class C explosive.

8. § 173.103 would be deleted and a new 173.103 would be added to read as follows:

§ 173.103 Commercial detonators, Class C explosives and detonating primers, Class C explosives.

Commercial detonators, Class C explosives and detonating primers, Class C explosives must be packed according to the applicable requirements of § 173.66 and § 173.68.

PART 174—CARRIAGE BY RAIL

9. In § 174.81(a), the table would be amended by deleting the heading "blasting caps, with or without safety fuze (including electric blasting caps), detonating primers" in the fourth entry of both vertical and horizontal columns and substituting therefor "commercial detonators, detonating primers;" footnotes a and e would be revised to read as follows:

§ 174.81 Segregation and separation requirements for hazardous materials in rail cars.

(a) • • •

•Commercial detonators, Class C explosives may also be loaded and transported with articles named in vertical and horizontal columns 3, 9, 10, 11, 12, and 13. Loading and transportation of commercial detonators, or detonating primers in any quantity with articles named in vertical or horizontal columns b, c, e, or f is prohibited.

• • • • • •

•Does not include nitro carbo nitrate or ammonium nitrate, fertilizer grade, which may be loaded, transported, or stored with high explosives, or with commercial detonators containing not more than 3 grams of explosives each, excluding ignition and delay charges.

• • • • • •

10. In § 174.101 the first sentence of paragraph (h) would be amended; paragraph (m) would be deleted as follows:

§ 174.101 Loading explosives.

• • • • • •

(h) At stations or other loading points, packages containing any explosives for which a certified and placarded car is prescribed (see § 174.104), any commercial detonators or detonating primers must be securely blocked and braced to prevent the packages from changing position, falling to the floor, or sliding into each other, under conditions normally incident to transportation. • • •

(m) Deleted

• • • • • •

11. § 174.106 paragraphs (a) and (b) would be revised to read as follows:

§ 174.106 "Order-Notify" or "C.O.D." shipments, Class A explosives.

(a) A carrier may not accept for transportation Class A explosives, commercial detonators, or detonating primers in any quantity when consigned to "order-notify" or "C.O.D.," except on a through bill of lading to a place outside the United States.

(b) A carrier may not accept for transportation Class A explosives, commercial detonators, or detonating primers which the shipper consigns to himself unless the shipper has a resident representative to receive them at the delivery point.

• • • • • •

12. In § 174.115 paragraph (a) would be revised to read as follows:

§ 174.115 Loading Class C explosives.

(a) Class C explosives may be loaded into any closed car in good condition, or into any container car in good condition. No car certificates are required. Packages of Class C explosives must be blocked and braced to prevent their movement and possible damage due to movement of other freight during transportation. For methods of recommended blocking and bracing, see Bureau of Explosives pamphlet No. 6.

• • • • • •

PART 175—CARRIAGE BY AIRCRAFT

13. In § 175.320 paragraph (a), the table would be amended by deleting the first two entries and adding the following in place thereof:

§ 175.320 Cargo-only aircraft; only means of transportation.

(a) • • •

Material description	*Class and conditions*
Commercial detonators and detonating primers.	Class A explosives—Permitted only when no other cargo is aboard the aircraft. However, if the commercial detonators or detonating primers are packed in an IME 22 container (see 49 CFR 171.7(d)(9), of this subchapter), they may be transported in the same aircraft with materials that are not classed as hazardous materials.
Do	Class C explosives—Permitted only when no other cargo is aboard the aircraft. However, if the commercial detonators or detonating primers are packed in a DOT MC 201 container (see 178.318 of this subchapter) or an IME 22 container (see 171.7(d)(9) of this subchapter), they may be transported in the same aircraft with materials other than class A or class B explosives.

• • • • • •

PART 176—CARRIAGE BY VESSEL

14. In § 176.9 the introductory text of paragraph (a) would be revised to read as follows:

§ 176.9 "Order-Notify" or "C.O.D." shipments.

(a) A carrier may not transport Class A explosives, commercial detonators, or detonating primers which are——

• • • • • •

§ 176.83 [Amended]

15. In § 176.83 paragraph (a), the table would be amended by deleting the words "blasting caps, with or without safety fuse, (including electric blasting caps)" in the fourth entry of both the vertical and horizontal columns and in place thereof add the words "commercial detonators."

16. In § 176.105 paragraph (d) would be revised to read as follows:

§ 176.105 Loading and unloading explosives.

• • • • • •

(d) Commercial detonators, detonating primers, detonating fuzes, fulminate of mercury, and other initiating or priming explosives defined in this subchapter constitute a distinct type of explosives. They must be handled with extreme care. A chute and mattress may not be used when loading or discharging this type of explosives.

• • • • • •

17. In § 176.177 paragraphs (c) and (e) would be revised to read as follows:

§ 176.177 Magazine vessels.

• • • • • •

(c) *Location of explosives.* Class A and Class B explosives in excess of 5,000 pounds stored in any magazine vessel must be stowed below deck. No explosive may be stowed on deck unless the vessel is fitted with a deck house having a stowage area which meets the requirements in this subpart for the stowage of explosives. Commercial detonators, Class A explosives and detonating primers, Class A explosives, may not be stored on the same magazine vessel with other Class A explosives or Class B explosives.

• • • • • •

(e) *Initiating explosives, commercial detonators and detonating primers.* No initiating or priming explosive may be stowed in the same compartment with any other explosives when there is any high explosive on the same magazine vessel. Commercial detonators and

V 4 3 — 8 7 M Y 4 7 8 UMI

detonating primers must be stowed at least 25 feet from any bulkhead forming a boundary of a compartment containing any other explosives.

. . . . .

PART 177—CARRIAGE BY PUBLIC HIGHWAY

18. In § 177.835 the introductory text of paragraph (g), paragraphs (g)(2) (i), and (m) would be revised to read as follows:

§ 177.835 Explosives.

. . . . .

(g) No detonating primer may be transported on the same motor vehicle with any other type of Class A explosive or any Class B explosive. No commercial detonator may be transported on the same motor vehicle with any other type of Class A explosive or any Class B explosive unless——

. . . . .

(2) • • •

(i) The commercial detonators are in packagings as prescribed in § 173.66 of this subchapter which in turn are loaded into suitable portable containers or separate compartments. Both the detonators and the container or compartment must meet the requirements of the Institute of Makers of Explosives Standard entitled, "IME Standard for the Safe Transportation of Electric Blasting Caps in the Same Vehicle With Other Explosives" dated November 5, 1971 (IME Safety Library Publication No. 22)."

(m) *Commercial detonators or other explosives.* Any explosive, including desensitized liquid explosives as defined in § 173.53(e) of this subchapter, other than liquid nitroglycerin, desensitized nitroglycerin or diethylene glycol dinitrate, transported on any motor vehicle transporting liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate, must be segregated, each kind from every other kind, and from tools or other supplies. Commercial detonators must be packed in specification MC 201 (§178.318 of this subchapter) containers.

19. In § 177.848 paragraph (a), the table would be amended by deleting the words "blasting caps, with or without safety fuse (including electric blasting caps)," in the fourth entry of both the vertical and horizontal columns and in place thereof add the words "commercial detonators;" footnotes a and e would be revised to read as follows:

§ 177.848 **Loading and storage chart of hazardous materials.**

(a) • • •

•Commercial detonators, Class C explosives may also be loaded and transported with articles named in vertical and horizontal columns 3, 9, 10, 11, 12, and 13. Loading and transportation of commercial detonators or detonating primers except as prescribed in § 177.835, in any quantity with articles named in vertical or horizontal columns b, c, e, or f is prohibited.

. . . . .

•Does not include nitro carbo nitrate or ammonium nitrate, fertilizer grade, which may be loaded, transported, stored with high explosives, or with commercial detonators, containing not more than 3 grams of explosives each, excluding ignition and delay charges.

. . . . .

20. In § 177.870 paragraph (d) would be revised to read as follows:

§ 177.870 Regulations for passenger carrying vehicles.

. . . . .

(d) *Hazardous materials on passenger carrying vehicles; quantity.* Where no other practicable means of transportation are available, the following articles in the quantities as shown may be transported in motor vehicles carrying passengers for hire in a space other than that provided for passengers: Not to exceed 100 pounds gross weight of any or all of the kinds of explosives permitted to be transported by passenger-carrying aircraft or rail car may be transported on a motor vehicle transporting passengers: *Provided, however,* That samples of explosives for laboratory examination, not to exceed two samples, or a total of not more than 100 commercial detonators, Class C explosives at one time in a single motor vehicle, may be transported in a motor vehicle transporting passengers.

. . . . .

PART 178—SHIPPING CONTAINER SPECIFICATIONS

§ 178.318 **[Amended]**

21. § 178.318 would be amended by deleting the words "blasting caps" or "electric blasting caps" in Heading, § 178.318-1(a), § 178.318-2(a) and (b) and replace them with the words "commercial detonators."

AUTHORITY: 49 U.S.C. 1803, 1804, 1806, 1808; 49 CFR 1.53(e)

NOTE.—The Materials Transportation Bureau has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Issued in Washington, D.C. on April 27, 1978.

ALAN I. ROBERTS,
Director, Office of Hazardous Materials Operations.

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 78-08; Notice 1]

FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Motor Vehicle Lighting

AGENCY: National Highway Traffic Safety Administration DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes amendments of Motor Vehicle Safety Standard No. 108 that would increase the maximum permissible candlepower for single compartment taillamps while extending requirements for contrast between stop (signaling) and tail (marking) functions at test points below the horizontal in dual compartment lamps. This action is taken in response to a petition for rulemaking from industry. The candlepower limitation was established some years ago as an engineering design standard. The effect of the rule will be to relieve a burden on manufacturers who must monitor production to comply with the existing regulation.

DATES: Comments must be received on or before: June 19, 1978. Proposed effective date: Date of publication of final rule (single compartment lamps); 6 months after date of publication of final rule (dual compartment lamps).

FOR FURTHER INFORMATION CONTACT: Charles Kaehn, Crash Avoidance Division, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1315.

SUPPLEMENTARY INFORMATION: A limit on photometric output of 15 candlepower at test points on or above the horizontal is imposed on single compartment taillamps by 49 CFR 571.108 Motor Vehicle Safety Standard No. 108, Lamps, Reflective Devices, and Associated Equipment. The intent of this limitation is to eliminate the possibilitiy of excessive glare, and to insure that the ratio between stop lamp and taillamp output offers sufficient contrast that the stop function can be readily identified when it is actuated.

On February 18, 1977, Truck Safety Equipment Institute (TSEI) petitioned for rulemaking to amend Standard No. 108 to increase the permissible maximum output to 18 candlepower. This figure is derived from SAE Recommended Practice J256a Service Performance Requirements for Motor Vehicle Lighting Devices and Components, June 1972, which permits taillamp output to be 120 per cent of the maximum value specified in SAE Standard J585d Tail Lamps (Rear Position Light) August 1970. The reason for the request is that the 15 candlepower limitation was established about 15 years ago as an engineering design standard and has become "an unnecessary burden on manufacturers who must attempt to monitor their production in an attempt to insure strict compliance with this maximum output". TSEI argues that an increase will have no detrimental effect upon safety because there has been no limitation on candlepower output below the horizontal and it is reasonable to assume that there must be countless driving situations every day "where the following driver is exposed to lamp candlepower outputs from approximately 15 cp to 22 cp" without any evidence of hazardous driving conditions because of glare. The basis of the petition therefore is that a restriction should be relaxed for economic reasons, and that the relaxation will have a neutral effect upon safety. The NHTSA has granted TSEI's petition for rulemaking and is proposing that the maximum output of single compartment taillamps be raised to 18 candlepower, and that the current ratio of candlepower output by stop and taillamps in combination lamps be maintained at test points above the horizontal and extended to test points below the horizontal to minimize problems of glare. NHTSA is proposing the extension of the ratio to tests points below the horizontal to provide protection equivalent to that at points above the horizontal. Standard No. 108 allows combination stop and taillamps to be mounted as high as 72 inches above the road surface while in today's passenger cars the driver eye point is much lower, only 38 inches to 48 inches above the road surface.

In consideration of the foregoing it is proposed that 49 CFR 571.108 Motor Vehicle Safety Standard No. 108 be amended in the following respects:

§ 571.108 [Amended]

1. In Figure 1, in the last line "Maximum rear lamps only" the figure "15" under the column headed "Tail Lamp One" would be changed to "18".

2. A new paragraph S4.1.1.13 (presently reserved) would be added to read:

S4.1.1.13 Taillamps shall be designed to conform to SAE Standard J585d Tail Lamp (Rear Position Lamps) August 1970, except that the photometric output of a single compartment lamp at test points on or above the horizontal shall not exceed 18 candlepower. On a motor vehicle manufactured on or after —— 1, 1978, [6 months after date of publication of final rule] when a taillamp is combined with the turn signal lamp or stop lamp, the candlepower output of the turn signal lamp or stop lamp shall not be less than three times the candlepower of the taillamp at any test point, except that at test points H-V, H-5L, H-5R and 5U-V the candlepower output of the turn signal lamp or stop lamp shall not be less than five times the candlepower of the taillamp.

In accordance with Department of Transportation policy encouraging adequate analysis of the costs and other consequences of regulatory actions (41 FR 16201, April 16, 1976), the NHTSA has evaluated the economic and other consequences of this proposal on the public and private sectors and has concluded that there is no cost increase required by an allowance of an increase in candlepower in single compartment taillamps. While there should be no cost increase associated with maintenance of contrast ratios at test points below the horizontal in dual compartment lamps, the NHTSA requests comments on this factor.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

In the case of comments that contain materials for which confidential treatment is requested, those materials should be deleted from the copies submitted to the docket. A copy of the complete comments should be submitted to the Office of Chief Counsel of the above address, with an indication of which portions of the comments are the subject of the request for confidentiality.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

The program official and lawyer responsible for the development of this proposal are Charles Kaehn and Taylor Vinson, respectively.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 501.8.)

Issued on April 27, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

DEPARTMENT OF AGRICULTURE

Forest Service

NATIONAL FOREST SYSTEM ADVISORY COMMITTEE

Notice of Meeting

The National Forest System Advisory Committee will meet at 9 a.m. on June 6 and 7 in Room 3840-46, South Agriculture Building, U.S. Department of Agriculture, Washington, D.C.

This Committee, comprised of 12 members from a broad spectrum of geographic and interest areas, advises the Secretary of Agriculture and the Forest Service on the planning and management of the National Forests. Current management issues that will be discussed include RARE II, land management planning, timber harvest scheduling, and grazing fees. Dr. M. Rupert Cutler, Assistant Secretary for Consevation, Research and Education, will chair the meeting.

The meeting will be open to the public. Persons who wish to attend should notify the Committee's Executive Secretary, James C. Overbay, USDA-Forest Service, P.O. Box 2417, Washington, D.C. 20013, telephone 202-447-6341. Written statements may be filed with the Committee before or after the meeting.

CHESTER A. SHIELDS,
Associate Deputy Chief.

APRIL 28, 1978.

SAM HOUSTON UNIT PLAN

Availability of Draft Environmental Statement; Correction

On March 23, 1978 (43 FR 12052), a notice of availability was published pertaining to the Draft Unit Plan-Environmental Impact Statement for the Sam Houston Unit of the Sam Houston National Forest, Texas (USDA-FS-R8-DES[Adm]-78-01).

The last sentence of that notice is corrected to read: Comments must be received by June 1, 1978, in order to be considered in the preparation of the final environmental statement.

Dated: April 24, 1978.

ROBERT F. WILLIAMS,
Regional Environmental Coordinator.

Soil Conservation Service

CLEARWATER R-1 SCHOOL CRITICAL AREA TREATMENT RC&D MEASURE, MISSOURI

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Clearwater R-1 School Critical Area Treatment RC&D Measure, Wayne County, Mo.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Kenneth G. McManus, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include critical area planting, concrete lined waterways and outlets, and diversions to control water.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Kenneth G. McManus, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Mo. 65201, 314-442-2271, extension 3145. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 5, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program—Pub. L. 87-703, (16 U.S.C. 590a-f, q).)

Dated: April 21, 1978.

EDWARD E. THOMAS,
Assistant Administrator for Land Resources, Soil Conservation Service.

[3410-16]

DRAINAGE DISTRICT NO. 8, PEMISCOT COUNTY CRITICAL AREA TREATMENT RC&D MEASURE, MISSOURI

Intent Not to Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Drainage District No. 8, Pemiscot County Critical Area Treatment RC&D Measure, Pemiscot County, Mo.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Kenneth G. McManus, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include critical area planting and the installation of structures to conduct water from the field elevation to a lower elevation within the drainage ditch.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Kenneth G. McManus, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Mo. 65201, 314-442-2271, extension 3145. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 5, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program—Pub. L. 87-703 (16 U.S.C. 590a-f, q).)

[3410-16]

EAST CARROLL WATERSHED, LOUISIANA

Intent to Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the East Carroll Watershed, East Carroll Parish, La.

The environmental assessment of this federally-assisted action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Alton Mangum, State Conservationist, has determined that the preparation and review of an environmental impact statement is needed for this project.

The project concerns a plan for watershed protection, flood prevention, and drainage. The planned works of improvement include the installation of 300 miles of channels and appurtenances, 14 grade stabilization structures, and 4 water control structures (weirs).

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service invites participation of agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement will be developed by Mr. Alton Mangum, State Conservationist, Soil Conservation Service, 3737 Government Street, Alexandria, La. 71301; 317-448-3421.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program—Pub. L. 83-566 (16 U.S.C. 1001-1008).)

Dated: April 26, 1978.

JOSEPH W. HAAS,
Assistant Administrator for Water Resources, Soil Conservation Service, U.S. Department of Agriculture.

[3410-16]

EASTERN CARTER COUNTY R-2 SCHOOL DISTRICT CRITICAL AREA TREATMENT R.C. & D. MEASURE, MISSOURI

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Eastern Carter County R-2 School District Critical Area Treatment R.C. & D. Measure, Missouri.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Kenneth G. McManus, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include critical area planting, lined waterways and outlets, and diversions.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Kenneth G. McManus, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Mo. 65201, 314-442-2271, extension 3145. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 5, 1978.

NEWLAN CREEK WATERSHED, MONTANA

Intent To Prepare a Supplement to the Final Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that a supplement to the final environmental impact statement is being prepared for the Newlan Creek Watershed, Meagher County, Mont.

An environmental impact statement was prepared for this project and filed with the Council on Environmental Quality on August 11, 1970. Project construction is partially complete. The environmental reassessment of the remaining measures of this federally-assisted action indicates that there may be additional significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Van K Haderlie, State Conservationist, has determined that the final environmental impact statement previously prepared for this project now needs to be supplemented.

The project concerns a plan for irrigation, flood prevention, recreation, and fish and wildlife. The planned works of improvement include a multipurpose reservoir on Newlan Creek, enlargement and stabilization of the Sheep Creek Diversion Canal, improved irrigation delivery canals, and recreational facilities. The multipurpose reservoir has been constructed.

The supplement to the final environmental impact statement will be prepared and circulated to agencies and the public. The Soil Conservation Service invites participation of agencies and individuals with expertise or interest in preparation of the supplemental environmental impact statement. The supplemental environmental impact statement will be developed by Mr. Van K Haderlie, State Conservationist, Soil Conservation Service, Federal Building, P.O. Box 970, Room 410, Bozeman, Mont. 59715, 406-587-5271, extension 4322.

RUMFORD-SMITH CROSSING FLOOD PREVENTION R.C. & D. MEASURE, MAINE

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Rumford-Smith Crossing Flood Prevention R.C. & D. Measure, Oxford County, Maine.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Warwick M. Tinsley, Jr., State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for flood prevention. The planned works of improvement include two side hill diversions, two surface inlet structures, a subsurface closed conduit system with impact basin, and vegetative stabilization of the disturbed areas.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Warwick M. Tinsley, Jr., State Conservationist, Soil Conservation Service, USDA Office Building, Orono, Maine 04473, 207-866-3132. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 5, 1978.

SOUTHERN SEQUOYAH COUNTY CRITICAL AREA TREATMENT R.C. & D. MEASURE, OKLAHOMA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Southern Sequoyah County Critical Area Treatment R.C. & D. Measure, Sequoyah County, Okla.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Roland R. Willis, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include gully shaping and vegetation. Drop structures, erosion control dams, diversion terraces, and fencing will also be installed.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Roland R. Willis, State Conservationist, Soil Conservation Service, Farm Road and Brumley Street, Stillwater, Okla. 74074, 405-624-4360. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 5, 1978.

WESTFIELD BOROUGH FLOOD PREVENTION RC&D MEASURE PENNSYLVANIA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council On Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Westfield Borough Flood Prevention RC&D Measure, Tioga County, Pa.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Graham T. Munkittrick, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for flood prevention. The planned works of improvement include 2,500 feet of diversion with subsurface drains; 700 feet of waterways; and stabilization of the disturbed area with rock riprap and vegetation.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Federal Building, 228 Walnut Street, Harrisburg, Pa. 17108, 717-782-2202. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 5, 1978.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before May 24, 1978.

Regulations (15 CFR 301.9) issued under the cited act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00144. Applicant: The Johns Hopkins University, School of Hygiene and Public Health, 615 North Wolfe Street, Baltimore, Md. 21205. Article: Electron Microscope, Model JEM 100S, and accessories. Manufacturer: JEOL, Ltd., Japan. Intended use of article: The article is intended to be used in conducting the following research projects:

(1) Enzymatic repare of damaged DNA.
(2) Ongoing study of basophil leukocytes and mast cells in human allergic diseases.
(3) Replication of bacteriophage DNA.
(4) Cloning the human gene for hypoxanthine phosphoribosyltransferase in defective polyoma virus.
(5) Physical location of single genes by in situ hybridization at both methaphase chromosome level and at the DNA level.
(6) Ultrastructure of macrophages in tuberculous granulomas: Digestive and secretory enzymes and residual bacillary components, visualized by the peroxidase-antiperoxidase antibody technique.
(7) Biochemical and genetic study of human chromosomal diseases.
(8) Regulation of phosphatide metabolism in lung type II alveolar cells.
(9) Molecular mechanisms in DNA transport.
(10) The influence of membrane alterations on hepatic transport.

In addition, the article will be used for training of graduate students in the modern biochemical techniques of electron microscopy. Application received by Commissioner of Customs: April 18, 1978.

Docket No. 78-00172. Applicant: Massachusetts Institute of Technology, 77 Massachusetts Avenue, Cambridge, Mass. 02139. Article: Double Flash Photographic System. Manufacturer: University of Sheffield, United Kingdom. Intended use of article: The article is intended to be used to investigate the rate of fuel nitrogen emission under atmospheres of varying temperature, composition and relative velocity. The experiments will be conducted to determine the size and velocity of an atomized liquid fuel under pyrolysis and combustion conditions and their relationship to nitrogen oxide pollution. The article will also be used for educational purposes in the courses Graduate Thesis (10 ThG), Graduate Research Project (10.91). Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00187. Applicant: University of California School of Medicine, San Francisco, Calif. Department of Anatomy, 3rd and Parnassus Avenue, San Francisco, Calif. 94143. Article: Electron Microscope, Model EM 10A and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used in the research areas of the structure, function, and inherited degeneration of the retina and the cell biology of retrograde axonal transport in the central nervous system, in both intact and injured axons. Investigations will be conducted with the following objectives:

(a) To better understand normal photoreceptor-pigment epithelial cell interactions, particularly that of rod outer segment renewal.
(b) To define the cellular mechanisms that are vulnerable to mutant gene action so as to produce several of the forms of inherited retinal degeneration in mice and rats.
(c) To determine what and when secondary changes occur in the inner retina subsequent to photoreceptor cell degeneration in order to know at what stage(s) the disorders must be arrested to preserve functional vision.
(d) To work out the details of several cellular mechanisms of retrograde axonal transport in both normal a d injured neurons.

The article will also be used for research training by graduate and postgraduate students. Application received by Commissioner of Customs: April 14, 1978.

Dockct No. 78-00189. Applicant: Minnesota Department of Health, 717 Delaware Street SE., Minneapolis, Minn. 55440. Article: Hitachi Model HK-6 Large Angle Tilting Device with accessories. Manufacturer: Hitachi, Ltd., Japan. Intended use of article: The article is intended to be used for studies of environmental samples of micro-particulates including asbestos and other mineral particles. The crystal structure of the minerals will be

V 43 MY 4 78 UMI

identified through analysis of electron diffraction patterns taken at specific angles of specimen tilt. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00191. Applicant: Washington State University, Division of Purchasing, Pullman, Wash. 99164. Article: Particle Electrophoresis Apparatus, Mark II, and Accessories. Manufacturer: Rank Brothers, United Kingdom. Intended use of article: The article is intended to be used to examine cells from a variety of sources (red blood cells, bacterial cells and lymphocytes). Surface charge of the outer cell surface will be investigated. In addition, the article will be used by graduate students conducting Ph. D. thesis research in biochemistry. Application received by Commissioner of Customs: April 14, 1978.

Docket No. 78-00192. Applicant: The Pennsylvania State University, Department of Biology, 208 Life Sciences I, University Park, Pa. 16802. Article: Model M85 Microdensitometer with Complan and Microplan Objectives. Manufacturer: Vickers Instruments, Inc., United Kingdom. Intended use of article: The article is intended to be used for the investigation of embryonic derivation, morphological classification, and sequential maturation of hematopoietic cells found in several organs of embryonic leopard frogs. Experiments are conducted by transplanting tissue anlagen between diploid and triploid frog embryos 2 to 3 days of age. Application received by Commissioner of Customs: April 14, 1978.

[3510-25]

MEDICAL UNIVERSITY OF SOUTH CAROLINA

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles

The following is a consolidated decision on applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Decision: Applications denied. Applicants have failed to establish that instruments or apparatus of equivalent scientific value to the foreign articles, for such purposes as the foreign articles are intended to be used, are not being manufactured in the United States.

Reasons: Subsection 301.8 of the Regulations provides in pertinent part:

> The applicant shall on or before the 20th day following the date of such notice, inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article for the same intended purposes to which the denied application relates. The applicant shall then resubmit the new application on or before the 90th day following the date of the notice of denial without prejudice to resubmission, unless an extension of time is granted by the Deputy Assistant Secretary in writing prior to the expiration of the 90-day period. * * * If the applicant fails, within the applicable time periods specified above, to either (a) inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article to which the denial without prejudice to resubmission relates, or (b) resubmit the new application, the prior denial without prejudice to resubmission shall have the effect of a final decision by the Deputy Assistant Secretary on the application within the context of Subsection 301.11.

The meaning of the subsection is that should an applicant either fail to notify the Deputy Assistant Secretary of its intent to resubmit another application for the same article to which the denial without prejudice relates within the 20-day period, or fails to resubmit a new application within the 90-day period, the prior denial without prejudice to resubmission will have the effect of a final denial of the application.

None of the applicants to which this consolidated decision relates has satisfied the requirements set forth above, therefore, the prior denials without prejudice have the effect of a final decision denying their respective applications.

Subsection 301.8 further provides:

> * * * the Deputy Assistant Secretary shall transmit a summary of the prior denial without prejudice to resubmission, to the FEDERAL REGISTER for publication, to the Commissioner of Customs, and to the applicant.

Each of the prior denials without prejudice to resubmission to which this consolidated decision relates was based on the failure of the respective applicants to submit the required documentation, including a completely executed application form, in sufficient detail to allow the issue of "scientific equivalency" to be determined by the Deputy Assistant Secretary.

Docket No. 77-00251. Applicant: Medical University of South Carolina, 171 Ashley Avenue, Charleston, S.C. 29403. Article: Gas Chromatograph-Mass Spectrometer, Model MAT 112 and accessories. Date of denial without prejudice to resubmission: November 30, 1977.

Docket No. 77-00260. Applicant: Sandia Laboratories, Albuquerque, N. Mex. 87115. Article: Scanning Electron Microscope, Model Hiscan S-500 and accessories. Date of denial without prejudice to resubmission: December 12, 1977.

Docket No. 77-00271. Applicant: University of North Carolina, Department of Anatomy, 111 Swing Building 217H, Chapel Hill, N.C. 27514. Article: Scanning Electron Microscope, Model JSM-35U and accessories. Date of denial without prejudice to resubmission: November 4, 1977.

Docket No. 77-00353. Applicant: New York Zoological Society, Weston Road, Lincoln, Mass. 01773. Article: Continuous Recording Oscilloscope Camera (Model PC-3A) and accessories. Date of denial without prejudice to resubmission: January 19, 1978.

Docket No. 77-00366. Applicant: Rochester Institute of Technology, One Lomb Memorial Drive, Rochester, N.Y. 14623. Article: Phase Control Unit and AC-DC Conversion Unit. Date of denial without prejudice to resubmission: January 18, 1978.

National Oceanic and Atmospheric Administration

AQUARIUM OF CAPE COD, INC.

Issuance of Permit to Take Marine Mammals

On March 14, 1978, Notice was published in the FEDERAL REGISTER (43 FR 10615), that an application had been filed with the National Marine Fisheries Service by Aquarium of Cape Cod, Inc., Route 28, West Yarmouth, Mass. 02673, for a Permit to take two (2) Atlantic harbor seals (*Phoca vitulina vitulina*) for the purpose of public display.

Notice is hereby given that on April 20, 1978, and as authorized by the provisions of the Marine Mammals Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Public Display Permit for the above taking to Aquarium of Cape Cod, Inc., subject to certain conditions set forth therein.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Date of issuance: April 20, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc. 78-12242 Filed 5-3-78; 8:45 am]

[3510-22]

LICENSING PROCEDURES FOR U.S. VESSELS DESIRING TO FISH IN MEXICAN WATERS

Applications for permits to authorize U.S. vessels to fish shrimp or snapper/grouper in the Mexican Zone (12 to 200 miles off the Mexican coast) for August 1, 1978 through July 31, 1979 are now available. Applications for entering vessels in this fishery may be obtained by contacting the Fisheries Management Division (FSE72), National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Fla. 33702, telephone number, 813-893-3722. Applications are available also from the Brownsville Trawlers Association, Star Route Box 5, Brownsville, Tex. 78521, telephone number, 512-831-4862; the Southeastern Fisheries Association, 124 West Jefferson Street, Tallahassee, Fla. 32301, telephone number, 904-224-0612; and the Texas Shrimp Association, 403 Vaughn Building, 807 Brazos, Austin, Tex. 78701, telephone number, 512-476-8446.

Completed application forms must be received by the National Marine Fisheries Service or any of the three associations no later than May 30, 1978 for transmittal to the Mexican Government. License fees and charges per vessel for the fishing season are as follows:

	Permit fee	Catch charge	Performance bond or deposit
	SHRIMP		
Tampico	$80	$2,006	Up to $1,600.
Contoy	80	1,538	Do.
Campeche	(1)	(1)	
	SNAPPER AND GROUPER		
Mexican zone	$80	$500	Up to $1,600.

[1] No shrimp fishing permitted.

Signed at Washington, D.C., this 28th day of April-1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc. 78-12082 Filed 5-3-78; 8:45 am]

[3510-22]

MONTREAL ZOOLOGICAL PARK

Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: (a) Name, Montreal Zoological Park, Mr. Raymond Roth, director.

(b) Address, Montreal, Quebec, Canada.

2. Type of permit: Public display.

3. Name and number of animals: California sea lions (Zalophus californianus), 4.

4. Type of take: To obtain beached and stranded animals for permanent display.

5. Location of activity: Animals currently maintained at approved facilities.

6. Period of activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammal involved.

As a request for a permit to take living marine mammals to be maintained in areas outside the jurisdiction of the United States, this application has been submitted in accordance with National Marine Fisheries Service policy concerning such application (40 FR 11614, March 12, 1975).

In this regard, the application: (a) Was submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, through the Fishing Services Directorate, Fisheries and Marine Service, Environment Canada, that Department being responsible, among other things, for ensuring the suitable care of animals in captivity;

(b) Includes: i. a verification from the Fishing Services Directorate, of the information set forth in the application;

ii. a certification from the Ministry of Tourism, Hunting and Fishing that the Government of the Province of Quebec is prepared to monitor compliance with the terms and conditions of the permit, and will do so, if and when necessary; and

iii. a statement that the Fishing Services Directorate will have no objection to a NMFS decision to amend, suspend or revoke a permit.

In accordance with the above cited policy, the certification and statement of the Fishing Services Directorate and the Ministry of Tourism of the Province of Quebec have been found appropriate and sufficient to allow consideration of this permit application.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731.

Dated: April 3, 1978.

ROLAND FINCH,
Acting Deputy Assistant, Director for Fisheries Management.

[FR Doc. 78-12239 Filed 5-3-78; 8:45 am]

[3510-22]

NORTHWEST AND ALASKA FISHERIES CENTER

Modification of Permit

Notice is hereby given that pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammal (50 CFR Part 216), and § 222.25 of the regulations governing endangered species permits (50 CFR Part 222), Permit No. 180 issued to Northwest and Alaska Fisheries Center, National Marine Fisheries Service, 7600 Sand Point Way, NE., Seattle, Wash. 98115 on April 6, 1977 (42 FR 23675), is modified in the following manner:

Section B-2 is supplemented with,

d. Of the 220 animals authorized to be tagged in 1978, ten (10) healthy animals from French Frigate Shoals and ten (10) healthy animals from Laysan Island may be

V 43 | 87

physically restrained to obtain blood samples and tagged. Any moribund monk seals which are found may be tagged, examined and specimen samples collected.

This modification is effective May 4, 1978.

The permit as modified, and documentation pertaining to the modification are available for review in the following offices: Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731; and Regional Director, National Marine Fisheries Service, Northwest Region, 1700 Westlake Avenue, North, Seattle, Wash. 98109.

Dated: April 27, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[FR Doc. 78-12240 Filed 5-3-78; 8:45 am]

[3510-22]

PACIFIC FISHERY MANAGEMENT COUNCIL AND SCIENTIFIC AND STATISTICAL COMMITTEE

Public Meeting With Partially Closed Session

Pursuant to section 10(a)(2) of the Federal Advisory Committee, 5 U.S.C. Appendix I, as amended, notice is hereby given of a meeting of the Pacific Fishery Management Council established by section 302(a) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), and its Scientific and Statistical Committee established under section 302(g) of the Act.

The Council meeting will take place Thursday and Friday, June 8-9, 1978, at the Arcata Ramada Inn located at 4975 Valley West Boulevard, Arcata, Calif.

The Scientific and Statistical Committee will meet on Wednesday and Thursday, June 7-8, 1978, also at the Arcata Ramada Inn in Arcata, Calif., convening at 1 p.m. and adjourn about 10 p.m. on June 7. The Committee will tentatively reconvene, dependent on Council developments, at 8 a.m. and adjourn about 5 p.m. on June 8. The proposed agenda for the Committee is as follows:

(1) Consideration of development of fishery management plans;

(2) Organization of the Council, including fishery advisory panel and management development teams, and operational procedural matters;

(3) Other Committee business.

The Pacific Fishery Management Council will convene at 10 a.m. and adjourn about 5 p.m. on June 8. The Council will convene at 10 a.m. and adjourn about 5 p.m. on June 9. The meeting may be extended or shortened depending on progress on the agenda. The proposed agenda is as follows:

June 8

1. Closed 2-hour session (8 a.m. to 10 a.m.) to discuss classified material on the status of current maritime boundary and resource negotiations between the United States and Canada.

2. Organization of the Council, including its staff, advisory panels, and committees, and operational and procedural matters.

3. Consideration of reports from ad hoc committees.

4. Review of communications from other agencies and organizations.

5. consideration of fishery management plans under development.

June 9

1. Organization of the Council, including its staff, advisory panels, and committees, and operational procedural matters.

2. Consideration of reports from ad hoc committees.

3. Review of communications from other agencies and organizations.

4. Consideration of fishery management plans under development.

The SSC meeting will be open to the public, as will all but the first agenda item of the Council meeting. For more information on seating arrangements, changes to the agenda, and/or written comments, contact: Mr. Lorry M. Nakatsu, Executive Director, Pacific Fishery Management Council, 526 Southwest Mill Street, Second Floor, Portland, Oreg. 97201, telephone: 503-221-6352.

The closed session of the Council is planned for the early morning of the first day, June 8, from 8 a.m. through 10 a.m. to hear and discuss Department of State security classified material on the status of current maritime boundary and resource negotiation between the United States and Canada. Only those Council members and staff having security clearances will be allowed to attend this closed session.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined, on April 27, 1978, pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda items covered in closed session be exempt from the provisions of the Act relating to open meetings and public participation therein, because items will be concerned with matters that are within the purview of 5 U.S.C. 552b(c)(1) as information which is properly classified pursuant to Executive Order 11652. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 5317, Department of Commerce.)

Dated: April 28, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[3510-22]

MARINELAND OCEANARIUM AND AQUARIUMS

Issuance of Permit to Take Marine Mammals

On March 14, 1978, notice was published in the FEDERAL REGISTER (43 FR 10614), that an application had been filed with the National Marine Fisheries Service by Marineland Oceanarium and Aquariums, Morecambe, England, for a Permit to take two (2) Atlantic bottlenosed dolphins (*Tursiops truncatus*) for public display.

Notice is hereby given that on April 20, 1978, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Public Display Permit for the above taking to Marineland, subject to certain conditions set forth therein. The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Fla. 33702.

Date of Issuance: April 20, 1978.

WINFRED H. MEIBOHM,
Associate Director, National
Marine Fisheries Service.

[3510-22]

PACIFIC TUNA FISHERIES

Season Closure

The Director of Investigations of the Inter-American Tropical Tuna Commission recommended to the representatives of all member nations having vessels operating in the regulatory area defined in 50 CFR 280.1(g) that the yellowfin tuna fishing season be closed at 0001 hours local time, on May 6, 1978, to assure that the established catch limit of 175,000 short tons for 1978 will not be exceeded.

As authorized by 50 CFR 280.5, notice is hereby given that the 1978 season for taking yellowfin tuna without restriction as to quantity by persons and vessels subject to the jurisdiction of the United States will terminate at 0001 hours, local time, in the regulatory area, May 6, 1978.

Issued at Washington, D.C., and dated April 28, 1978.

WINFRED H. MEIBOHM
Associate Director, National
Marine Fisheries Service.

[3510-12]

REFINEMENT OF THE CALIFORNIA COASTAL MANAGEMENT PROGRAM TO INCORPORATE THE CALIFORNIA LNG TERMINAL ACT OF 1977

Opportunity for Comment

Notice is hereby given of opportunity for interested parties to comment on a recent action taken by the Office of Coastal Zone Management (OCZM) to incorporate as a refinement the California Liquified Natural Gas (LNG) Terminal Act of 1977 (SB1081) into the State of California's approved coastal management program.

Comment period. Interested parties have 30 days from date of issuance of this notice to submit comments. Comments should be addressed to:

Carol Sondheimer, Acting Pacific Regional Manager, Office of Coastal Zone Management, Page Building No. 1, 3300 Whitehaven Street NW., Washington, D.C. 20235, 202-634-1672.

Background. On January 31, 1978, the Acting Assistant Administrator for Coastal Zone Management, National Oceanic and Atmospheric Administration, approved a refinement to the California Management Program (CMP), which program originally was approved on November 7, 1977.

Notice of this action was issued in the FEDERAL REGISTER on Wednesday, February 22, 1978 (FR, Vol. 43, No. 36, page 7339, No. 3510-08).

The basis for treating this action as a refinement is contained in a finding signed by the Acting Assistant Administrator for Coastal Zone Management on January 31, 1978. This finding states, in part, that the request from the California Coastal Commission, dated January 16, 1978, is in accordance with (then) proposed OCZM procedures for refining an approved coastal management program (15 CFR 923.93, FEDERAL REGISTER, August 29, 1977; since superseded by 15 CFR 923.82, FEDERAL REGISTER, MARCH 1, 1978) FOR THE FOLLOWING REASONS:

1. The change does not affect the State's policy of permitting an initial LNG terminal to be sited in a remote area of the coastal zone, but relates primarily to techniques for carrying out this policy;

2. The change will not have a significantly different environmental impact in that the siting policy remains essentially the same, the resource policies of the Coastal Act will be considered and the State's environmental impact review procedures will be followed; and,

3. Although the change alters the intergovernmental relationships in the siting process described in the CMP, these new relationships between the Coastal Commission, the Public Utilities Commission, the Energy Commission and local governments for purposes of implementing the LNG Terminal Act have been approved by the State by virtue of its enactment of this new law.

OCZM's analysis of the State's request indicated that the effect of incorporation of the LNG Act would be to establish more specific procedures for carrying out the State's policy on siting an initial LNG terminal in California's coastal zone but not to change the State's basic policy with regard to preferred sites for such facility. The State's policy originally was established in section 30261(b) of the California Coastal Act of 1976 (SB 1277) and now is included in the California LNG Act of 1977 which, inter alia, supersedes section 30261(b) of the California Coastal Act.

The more detailed procedures established in the California LNG Terminal Act of 1977 can be summarized as follows:

1. In order to construct and operate an LNG terminal in the California coastal zone, any person must apply for and receive a permit from the California Public Utilities Commission (CPUC), which permit will be in lieu of all other State or local authorizations;

2. On or before March 15, 1978, the Energy Commission must complete and transmit to the CPUC a study of natural gas supplies and demands in the State;

3. On or before May 31, 1978, the Coastal Commission must complete and transmit to the CPUC a report which evaluates and ranks potential onshore sites in accordance with the LNG Terminal Act's policies on population density and the policies and objectives of Chapter 3 of the Coastal Act;

4. Not later than July 31, 1978, the CPUC must make a decision on a permit application for the initial LNG terminal which, in turn, must be based on the Coastal Commission's evaluation of the highest ranked site and must incorporate conditions recommended by the Coastal Commission, unless to do so would significantly curtail natural gas deliveries; and,

5. Within 12 months of the LNG Terminal Act's effective date, the Coastal commission must complete and transmit to the CPUC, the Energy Commission, the Governor and the Legislature, a study of the feasibility of offshore LNG terminals and an evaluation of potential offshore terminal sites.

Since issuance of notice on February 22, 1978, of the action of the Assistant Administrator for Coastal Zone Management, OCZM has received a number of objections to (1) the procedure followed in approving California's refinement request, and (2) the decision to treat that request as a refinement rather than an amendment (15 CFR 923.92, FEDERAL REGISTER, August 29, 1977; now 15 CFR 923.81, FEDERAL REGISTER, March 1, 1978).

PUBLIC REVIEW AND COMMENT

OCZM has reviewed its decision to treat incorporation of the California LNG Terminal Act into the California Coastal Management Program as a refinement and, based on information available at the time of the State's request and additional information provided subsequently, is satisfied that treatment of California's request as a refinement was appropriate. To assure, however, that all interested parties have a formal opportunity to comment on the appropriateness of treating this request as a refinement rather than an amendment, OCZM is providing this comment period.

The Assistant Administrator will review comments received with a view to reconsideration and possible recision of the refinement decision. Notice of the Assistant Administrator's decision will be published in the FEDERAL REGISTER.

FUTURE ACTIONS

To assure an open and informed process for changes to State coastal management programs, hereafter OCZM will issue notice of such changes in the FEDERAL REGISTER that will provide (i) a description of the proposed change(s) to a State's approved coastal management program, (ii) the Assistant Administrator's proposed treatment of the change(s) (i.e., refinement or amendment), and (iii) an opportunity for comment on the Assistant Administrator's proposed course of action.

Dated: April 25, 1978.

R. L. CARNAHAN,
Acting Assistant Administrator
for Administration.

WESTERN PACIFIC FISHERY MANAGEMENT COUNCIL

Public Meeting With Partially Closed Session

Pursuant to section 10(a)(2) of the Federal Advisory Committee, 5 U.S.C. Appendix, as amended, notice is hereby given of a meeting of the Western Pacific Fishery Management Council established by section 302(a) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The meeting will take place Monday and Tuesday, May 22-23, 1978, in the Conference Center, at the Rainmaker Hotel located in Pago Pago, American Samoa, convening at 1 p.m. and adjourn about 5 p.m. on May 22. The Council will reconvene at 9 a.m. and adjourn about 4 p.m. on May 23. The meeting may be extended or shortened depending on progress on the agenda. The proposed agenda is as follows:

May 22

1. Closed 2-hour session (9 a.m. to 11 a.m.) to discuss classified material on the status of current discussions between the United States and the United Kingdom concerning the Line and Gilbert Islands.

2. Administrative and financial reports.

3. Report on the last meeting of the Scientific and Statistical Committee.

4. Progress of fishery management plan for billfish.

V 4 3 | 8 7

May 23

1. Review of progress on fishery management plans for spiny lobster and precious coral.

2. Review of preparations on seamount groundfish and bottomfish fisheries.

3. Other Council business.

With the exception of the first agenda item on May 22, the meeting is open to the public. For more information on seating arrangements, changes to the agenda, and/or written comments, contact: Mr. Wilvan G. Van Campen, Executive Director, Western Pacific Fishery Management Council, Room 1506, 1164 Bishop Street, Honolulu, Hawaii 96813, telephone 808-523-1368.

The closed session of the Council is planned for the early morning of the first day, May 22, from 9 a.m. through 11 a.m. to hear and discuss Department of State security classified material on the status of discussions between the United States and the United Kingdom concerning the Line and Gilbert Islands. Only those Council members and staff having security clearances will be allowed to attend this closed session.

The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of the General Counsel, formally determined, on April 27, 1978, pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda item covered in closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein, because items will be concerned with matters that are within the purview of 5 U.S.C. 552b(c)(1) as information which is properly classified pursuant to Executive Order 11652. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 5317, Department of Commerce.)

Dated: April 28, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[FR Doc. 78-12225 Filed 5-3-78; 8:45 am]

[3510-17]

Office of the Secretary

TRANSFER OF RESPONSIBILITY FOR CERTAIN STATISTICAL STANDARDS FROM OMB TO COMMERCE

Notice is here given that implementation of certain responsibilities under section 103 of the Budget and Accounting Procedures Act of 1950 (64 Stat. 834, 31 U.S.C. 18b), including establishment and enforcement of statistical standards, having been transferred from the Office of Management and Budget (OMB) to the U.S. Department of Commerce pursuant to Executive Order 12013, October 7, 1977, the following OMB Circulars are discontinued:

1. OMB Circular No. A-39, "Providing of Statistical Information to Intergovernmental Organizations;"
2. OMB Circular No. A-46, "Standards and Guidelines for Federal Statistics;"
3. OMB Circular No. A-65, "Reports to the Department of Commerce on International Transactions;" and
4. OMB Circular No. A-91, "Prompt Compilation and Release of Statistical Information."

The standards associated with these circulars are hereby reissued and will be enforced by the Department of Commerce. A corresponding notice issued by OMB discontinuing these circulars and transferring their enforcement to the Department of Commerce appears in today's FEDERAL REGISTER.

The Department will soon be issuing the Statistical Policy Handbook which includes the standards (now called "Statistical Policy Directives") discontinued as OMB circulars.

Copies of the Statistical Policy Handbook will be available from the Office of Federal Statistical Policy and Standards, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-673-7959.

The statistical policy directives as reissued and enforced by the Department of Commerce are as follows: [Directives for the Conduct of Federal Statistical Activities.]

JUANITA M. KREPS,
Secretary of Commerce.

DIRECTIVES FOR THE CONDUCT OF FEDERAL STATISTICAL ACTIVITIES

Introduction.
Directive No. 1. Standards for Statistical Surveys.
Directive No. 2. Standards for the Publication of Statistics.
Directive No. 3. Guidelines for the Release of Principal Federal Economic Indicators.
Directive No. 4. Prompt Compilation and Release of Statistical Information.
Directive No. 5. Standard Reference Base Period for Federal Government General-Purpose Index Numbers.
Directive No. 6. Standard Federal Administrative Regions.
Directive No. 7. Standard Metropolitan Statistical Areas.
Directive No. 8. Standard Industrial Classification of Establishments.
Directive No. 9. Standard Industrial Classification of Enterprises.
Directive No. 10. Standard Occupational Classification.
Directive No. 11. Standard Data Source for Statistical Estimates of Labor Force and Unemployment.
Directive No. 12. Standard Definition of Payroll Periods for Employment Reports.
Directive No. 13. Standard Data Source of Total Population Used in Distributing Federal Benefits.
Directive No. 14. Definition of Poverty for Statistical Purposes.
Directive No. 15. Race and Ethnic Standards for Federal Statistics and Administrative Reporting.
Directive No. 16. Standard Classification of Fields of Science and Engineering.
Directive No. 17. Standard Gas Pressure Base.
Directive No. 18. Providing of Statistical Information to International Organizations.
Directive No. 19. Standard Reporting on International Transactions.

[FR Doc. 78-12040 Filed 5-3-78; 8:45 am]

INTRODUCTION

These Directives[1] establish uniform statistical standards and guidelines for the collection and compilation of statistical data and for the release and publication of Federal statistics. The Directives are supplemented by other guidelines and specifications issued by the Office of Federal Statistical Policy and Standards on selected statistical topics.

Any given statistical activity may be affected by several of the Directives. For example, a general standard such as Directive No. 2, "Standards for the Publication of Statistics" should be used with other Directives that contain a standard for classification of data such as No. 15, "Race and Ethnic Standards for Federal Statistics and Administrative Reporting" or No. 6, "Standard Federal Administrative Regions."

AUTHORITIES

Section 103 of the Budget and Accounting Procedures Act of 1950 contains the basic authorities for determining statistical policy. Executive Orders No. 10033 of 1949 and No. 10253 of 1951 as amended by No. 12013 of 1977, provide for the implementation of Section 103 by the Secretary of Commerce.

COVERAGE

The standards and guidelines prescribed by the Directives are to be followed by agencies in the executive branch of the Federal Government and by federally sponsored contractors and grantees in the direct collection, compilation, and publication of statistical data.

A Federal agency is considered to "sponsor" the collection of information under the following circumstances, subject to the qualifications and explanations indicated:

(1) *Collection by a contractor.*—A plan or report form used by a contractor to a Federal agency is deemed to be sponsored by the agency which awards the contract, except when the data collection is neither required by nor implied by the terms of the contract and no representation of Federal sponsorship or association is made to the respondents.

(2) *Collection by recipient of a grant.*—A plan or report form used by a recipient of a Federal grant is not deemed to be sponsored by an agency, except when:

(a) The recipient of a grant represents to respondents that the information is being collected for or in association with a Federal agency (However, this exception is not intended to preclude mention of Federal support in response to an inquiry, or acknowledgement of assistance from a Federal grant in any publication of the data.); or

(b) The recipient of a grant uses the plan or report form to collect information that the agency has requested for the planning, operation, or evaluation of its program; or

(c) The terms and conditions of the grant provide for approval by the agency of the survey design, questionnaire content, or data collection procedures; or

(d) The terms and conditions of the grant provide for either submission to the agency of the data for individual respondents or the preparation and submission of tabulations requested by the agency.

(3) *Other types of sponsorship.*—When a person or organization is requested by a Federal agency to collect specific information to be made available to the agency, the plan or report form or the part thereof used to collect this information must be regarded as sponsored, even though no contract or grant is involved. When a plan or report form is promulgated by a Federal agency as a standard for use by State or local governmental agencies, such a plan or report form is deemed to be sponsored, even though it is not used for reporting to the Federal agency. In the case of doubt as to whether a plan or report form is sponsored, inquiry should be made to the Office of Management and Budget.

These Directives should be brought to the attention of all offices and divisions of each agency, including offices in the field, which have statistical responsibilities. When so requested, the Secretary of Commerce will provide guidance to departments and agencies in interpreting and applying the standards and guidelines. Adherence to these Directives will be monitored by the Office of Federal Statistical Policy and Standards.

OBJECTIVES

Compliance with the Directives should result in the following benefits: greater efficiency in the design and conduct of statistical surveys; reduction in the reporting burden on respondents; greater uniformity and comparability among statistical series and studies; and improved accuracy and timeliness of Federal statistics.

RELATION TO OTHER STANDARDS AND GUIDELINES

Federal standards for data elements and representations to be used and interchanged in automated Federal data systems, issued as Federal Information Processing Standards (FIPS), should be used in the collection and processing of statistics where applicable. The National Bureau of Standards in the U.S. Department of Commerce provides FIPS codes for data elements in most statistical standards. It also develops standards in areas where no agency has responsibility for promulgating them. These standards approved for Government-wide use include Federal General Standards, such as for calendar dates and for country, State and county abbreviations and codes; and Federal Program Standards, which are prescribed for use in a particular program or system. The register of these standards is maintained by the National Bureau of Standards. Any questions on their interpretation or inquiries on their availability should be addressed to the Institute for Computer Sciences and Technology, National Bureau of Standards, U.S. Department of Commerce, Washington, D.C. 20234.

Agencies compiling statistics on physical quantities, such as energy, weight, volume, etc., should consider possible use of metric standards. Information regarding such standards may be obtained from the Office of Weights and Measures, National Bureau of Standards.

Federal data collection activities are subject to approval by the Office of Management and Budget (OMB) or the General Accounting Office. The Federal Reports Act, as implemented by OMB Circular No. A-40, permits the Director of OMB to disapprove any request from a Federal agency for collecting identical information from 10 or more respondents or a similar recordkeeping requirement. Specified independent Federal regulatory agencies request approval of their data collection plans from the General Accounting Office. Information on these requirements may be obtained from the Regulatory Policy and Reports Management Division, Office of Management and Budget, Washington, D.C. 20503 or from Regulatory Reports Review, General Accounting Office, Washington, D.C. 20548.

INQUIRIES

Inquiries regarding statistical Directives or other statistical guidelines should be addressed to the Office of Federal Statistical Policy and Standards, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-673-7965.

DIRECTIVE NO. 1.[2] STANDARDS FOR STATISTICAL SURVEYS

The standards in this Directive apply primarily to statistical surveys. As used here, a "statistical survey" is one in which the primary purpose of the individual returns is to supply data which can be aggregated to provide statistical or numerical information needed on a particular class, segment, activity or geographic area. Certain of the standards and recommended practices apply also to the compilation of statistics based on data from forms used in applying a Federal law or regulation to an individual or firm (such as tax returns or the financial and operating reports required by regulatory commissions), or applications and registrations, or administrative records. These standards have only limited relevance for administrative surveys designed to collect summary information needed by an agency in administering a specific program (such as summaries or procurements or production status, or fiscal accounting reports from the States or grant-in-aid programs).

Standards cannot be applied uniformly or precisely in all situations. Special considerations may be involved in exploratory, experimental, or methodological surveys or in pilot or preliminary surveys where the primary purpose is to test feasibility or to evaluate alternative approaches or techniques. Sponsors should be prepared, however, to justify any significant departures from these standards.

The standards in this Directive are minimal. The statistical agencies are encouraged to develop their own standards for surveys, which may be more detailed and in some cases more stringent.

1. PURPOSE OF THE SURVEY

Before any other steps are taken in planning a survey there must be a clear understanding of the precise purposes to be served in terms of information to be collected, hypotheses to be tested, or problems to be solved. Consultation with users may be helpful in defining these purposes. It may be necessary to modify the initial goal of measurement of a concept in order to define an objective statistic which can be measured; e.g., "health" is not objectively measurable, but "bed-days" may be. It is helpful in reaching an understanding to prepare a concise statement of the information needed and the purpose or purposes to be served.

2. RELATION TO OTHER SURVEYS OR PROGRAMS

Before the scope and content of a survey are determined, prior work and

---

[1] These Directives supersede OMB Circular No. A-46, with its Exhibits A through K, OMB Circular No. A-39, OMB Circular No. A-65, and OMB Circular No. A-91.

[2] Directive No. 1 supersedes section 7(a) and Exhibit A of OMB Circular No. A-46 dated May 3, 1974.

M Y 4 7 8 UMI

V 43 — 87 MAY 4 78 UMI

current activities in the field should be reviewed. Those planning the survey should satisfy themselves that part or all of the data (or approximations) which are needed are not available from some existing source (published or unpublished) either within or outside the Government or could not more appropriately be obtained by adding questions to an existing survey or by some other agency. If there were a previous survey, it may reveal deficiencies which can be corrected in the new survey.

3. DEVELOPMENT OF THE SURVEY PLAN

Decisions should be made on points noted in the subsections below in terms of the purposes to be served, costs involved, time required, degree of precision needed, and administrative limitations (established practices, location of field offices, etc.). When these decisions have been made it is useful to prepare a detailed technical description of specifications for the survey for use of analysts and other survey personnel and to facilitate the preparation of a technical appendix or bulletin (if the survey is of sufficient importance) for publication along with survey findings.

a. *Target populations and extent of coverage.* The target population or universe (i.e., all the people, establishments or other units that the survey designer wants to learn about) should be defined. Within the target population it must be decided whether coverage should be complete or partial. Consideration should be given to best ways of handling small units where these are likely to account for a very small proportion of the sales, consumption, cost or other value to be measured so no essential information will be lost by substantially reducing the coverage of such units.

Sample surveys have many advantages for most purposes over those involving complete enumeration. If the universe to be surveyed is large or geographically widespread and data are not required for small groups or areas, or if the report form or procedure is complex, sampling can be more economical for the agency, with consequent reduction in the reporting burden. Also, with sampling, nonresponse can usually be handled more effectively, the data can be processed more quickly, and in some instances the quality of the response can be improved. More attention can be given to developmental aspects of the survey since less time need be spent processing large numbers of responses.

Reasons for selection of a particular method of sampling should be included in the description of the survey plan.

b. *Sampling.* The first step is to develop and describe a frame, or sets of frames, i.e., the set of materials (lists, directories, records, maps, etc.) to enable the survey designer to deal with the universe. Ideally, the frame should include all the units in the universe. If the undercoverage in the frame is more than trivial a bias may be present in the survey results.

If the purpose of a survey is to develop estimates for a universe based upon a sample of the universe, the selection of the sample should be made in accordance with probability theory—that is, every sampling unit in the frame should have a known, nonzero probability of being chosen, although the probabilities may be unequal. In such cases, probability sampling is necessary to avoid unknown biases of selection and to permit one to arrive at estimates for the universe with accompanying measures of reliability. However, where the sample is restricted to a small number of respondents or geographic areas, as in pilot studies, pretests, or some types of feasibility studies, a judgment or purposive sample may be indicated.

When the nature of a survey or study indicates the need for probability sampling, the particular method to be used should be administratively feasible and should provide maximum precision for the funds available. The size of the sample and the nature of the sample design (including estimation procedures) will depend not only on available funds, but also on such considerations as the amount of detail required in the statistical estimates, the precision desired for key items, the variability of the data being sampled, availability of other data resources, and the size of the universe. Once the sample units have been selected, no substitutions can be permitted for reasons of convenience or because of nonresponse unless provision is specifically made in the basic survey for acceptable alternatives.

Because of the technical nature of sampling and the many ways of development of estimates from a sample, agencies proposing sample surveys should have available a statistician or a consultant trained in sampling theory with experience in the conduct of surveys. In the case of departments having primary statistical agencies this may be a person on the staff of one of these agencies. A trained statistician is also necessary for contractors or grantees conducting federally sponsored sample surveys.

The description of the sample design should cover such items as the primary units (description and number in universe), the sampling unit used (at each stage if there is multistage or multiphase sampling), the sampling frame (including any exclusion or constraints), and the criteria or stratification and clustering (if the sample is stratified or clustered). It should also include cost estimates, determination of size of sample, variance estimates used in the optimum allocation of the sample, the method of drawing the sample at each stage, the method of estimation, and the method of estimating sampling variances. The description should indicate methods for controlling and measuring nonsampling error and biases in data collection, processing and tabulating.

c. *Frequency and timing.* It must be determined whether the survey is to be single time, irregularly recurrent, or periodic. If periodic, consideration should be given to using a rotating sample basis at monthly, quarterly, annual or other intervals. The timing of a survey should be considered in relation to what is known about cyclical, seasonal or other variations over time in the data being studied, so that the survey results may be of maximum use.

d. *Method of collection.* A decision must be made as to whether the data are to be collected by mail, personal interview, telephone, telegraph, or other method, or by some combination of these methods. Nonsampling errors which can be expected in each of the methods should be considered and ways of measuring and minimizing them should influence the selection of the collection method. Experience from past experiments and surveys should be reviewed in making these decisions. If past experience is not helpful a pilot study to test alternatives may be advisable. The results of such a study should be made available to other interested agencies.

e. *Consideration of sampling and nonsampling errors.* If probability sampling is used, sampling error should be estimated, and whenever possible, total mean square error should be constructed in approximate terms. Potential nonsampling errors, including reporting errors, response variance, interviewer and respondent bias, nonresponse, imputation error and errors in processing the data should be carefully considered. This is important in designing the survey, in establishing controls over survey operations, and for the information of users of the data when they are published.

f. *Evaluation of survey data.* It is desirable to provide for the evaluation of survey results. This is especially important for repetitive surveys where the evaluation could provide future improvement of the data. Resources should be provided to carry out such evaluations.

g. *Plans for processing and tabulating the data.* The basic design of the survey plan should provide procedures (including quality control) for editing, coding, and tabulating the data. These are necessary to ensure uniform processing and to measure quality. Copies of editing instructions, codes, etc.

should be retained in the agency's files to answer inquiries and for possible use in future surveys. A decision, which will affect the form design, must be made on the manner in which the data will be processed—i.e., by use of punch cards, computer, optical scanning devices, etc. Tabulation plans, including dummy tables, should be worked out at this stage. This compels the agency to think through what it expects to get from the survey, and can result in changes in the survey design. The method of handling "unknowns" and refusals (e.g., whether distributed or shown separately) should be described. If the agency decides to have the data processing done under contract, the procedures to be followed must be clearly understood by both parties.

h. *Allowance for pretests.* It is desirable to test the feasibility of most new survey plans in advance, and the survey plan should include time and funds for this. A pilot study may be necessary to determine whether the survey is practicable or useful at all. The relative effectiveness and cost of alternative questionnaires, instructions, and operating procedures can be evaluated by means of a small-scale pretest. Pretesting can provide information on the probable refusal rate; the intelligibility to respondents (and interviewers) of the questions and instructions; and problems in compiling the survey results. The pretest is sometimes also used to provide estimates of variance which may aid in developing a more efficient sample design. The tabulations from the pretest should be limited to those necessary to answer the specific questions for which the pretest was designed, and generally should include additional tabulations for research purposes or preliminary findings only to the extent it is essential to allow sufficient time to make any changes indicated by the results of the pretest.

i. *Provision for follow-up.* In most surveys the response to the first attempt to collect the information is insufficient for final estimates and a plan for follow-up is needed. Usually, if the survey is conducted by mail, one or more mail follow-ups are made to the nonrespondents. If the rate of nonresponse is still unsatisfactory in terms of the nature and purposes of the survey, provision must be made for a more intensive type of follow-up, such as telephone calls or personal visits to a subsample of nonrespondents.

j. *Proposed calendar.* Approximate dates for the following steps in the conduct of the survey, as well as the estimated manhours for each step, should be determined in advance. This tests the feasibility of the survey as well as helping to ensure its orderly completion.

Beginning and completion of the preliminary survey design.
OMB clearance of pretest.
Beginning and completion of one or more pretests.
Analysis of the pretest results and modification of the survey design and questionnaire if indicated.
OMB clearance of survey.
Beginning of field work or mailing of questionnaires.
Completion of field work or due date for questionnaires.
Beginning and completion of follow-ups.
Completion of the editing and coding.
Completion of the tabulations.
Completion of the preliminary report.
Completion of the final report.

k. *Cost estimates.* An estimate should be made of the cost of the survey, including costs of personnel, travel, equipment, and supplies, etc. The total should include the costs of pretests and follow-ups; preparing and printing the forms; compilation of the list of respondents; mailing or enumeration; and editing, coding, tabulation, and publication of the data. When appropriate an allowance for research should also be included, as should the estimated share of overhead costs. A more detailed description of costs to be included, together with suggested methods for developing these costs, is included in the "Guide to Estimating Reporting Costs" issued by the Office of Records Management of the National Archives and Records Service, General Services Administration.

4. QUESTIONNAIRE AND INSTRUCTIONS

Even the best designed survey will produce disappointing results if the respondents do not understand the questions. The type and characteristics of the respondents should always be kept in mind. For example, particular care should be taken to keep questions simple when addressed to persons of limited education. In general, legal or technical terminology should be avoided unless the respondents are lawyers or technicians.

A clear, easy-to-read, and easy-to-complete form is important for a successful survey. If it is to be self-administered, the questions should be as brief and self-evident as possible.

The questions or items on a form should be arranged in logical order, with related items generally grouped together. It is sometimes desirable to guide the thoughts of the respondents from the general to the specific. If the data are to be transcribed or machine processed, this should also be considered in the questionnaire format, the arrangement of items, and in provision for responses.

Separate instructions included with mail surveys are sometimes ignored. If possible the questions should be self-explanatory or brief parenthetical instructions should be associated with each question in order to avoid separate instructions.

The title of the questionnaire or form is generally the first thing the respondent reads and care should be given to its selection. It should be sufficiently informative to be used in lists of forms compiled for publication. Subtitles may be used where necessary to supplement the title or to cite the authority under which the form is issued. Forms and other documents approved by the Office of Management and Budget under the Federal Reports Act must carry an OMB number. Other identification such as an agency form number or control symbol may be desirable.

Instructions for return should be on the questionnaire or form itself in a mail survey, as the form may become separated from the transmittal letter and the return envelope. These instructions should give the address to which the completed form is to be returned, and ordinarily should specify a target date for return. The importance of a response should be emphasized.

Persons planning surveys may find helpful the Household Survey Manual[3] issued in 1969 by the Office of Management and Budget. This Manual presents the major concepts and definitions and some of the questions used by Federal agencies to collect data on personal and family characteristics, education, employment and unemployment, income, and quality of housing.

Guidelines for the design of forms contained in the Records Management Handbook, Forms Design, issued by the National Archives and Records Service (NARS) of the General Services Administration in 1960, may be useful. This manual covers the mechanics of form design, including size, margins and spacing, type faces and rules for printing, and forms construction (type of paper, ink, perforating, etc.). The 1960 Handbook has very limited applicability to forms used in automatic data processing. The NARS Handbook, "Specialty Forms," may be useful for forms used in automated systems.

5. PRELIMINARY CLEARANCE

Although it is not necessary for an agency to request clearance until it is ready to collect data or promulgate recordkeeping requirements, many agencies have found it advantageous to take advantage of the proviso in OMB Circular No. A-40 which permits an agency to request "preliminary clearance" after they have formulated

[3]The Office of Federal Statistical Policy and Standards now has responsibility for this publication.

V 43 | 87 MY 4 78 UMI

their plan but before they have signed a data collection contract. A disapproval of a clearance request can be costly to an agency after a contract has been let. While preliminary clearance does not guarantee a final clearance, it does indicate to the agency that the data collection or recordkeeping requirements will not be disapproved on the basis that the need for the data has not been established.

6. CONTROL OF SURVEY OPERATIONS

For a successful operation, it is necessary not only that a good survey design be chosen, but also that the conduct of the survey be faithful to that design. Every phase of survey operation is subject to risks of deviation from intention. Positive procedures must be established to assure that these deviations are kept within tolerable limits. If sampling is used additional controls are needed to ensure that the selection of the sample, the collection of the data, and the tabulation and estimation are carried out as specified. Strenuous efforts should be made to collect data from every unit in the sample, using follow-ups where necessary. If the data are obtained by field enumeration the interviewer should not be permitted to make substitutions (see 3b, Sampling).

Allowance should be made for sufficient time to train enumerators if the data are collected by personal or telephone interview. For large-scale surveys manuals should be prepared for use of field workers and persons doing the editing and coding as well as carrying out quality control operations in order to ensure consistency and adherence to the survey design. Provision for adequate supervision must be made. Procedures should be prescribed for progress reporting. Quality control procedures consistent with the nature of the survey should be part of the planning process. This may include validity checks with subsamples of respondents. If a longitudinal survey is conducted, it is especially important to keep detailed records, because of probable attrition in the group studied and in the staff conducting the survey.

7. PREPARATION AND PUBLICATION OF FINAL REPORT

Good statistical practice for the conduct of a survey includes careful presentation of results. Graphic presentations, as well as statistical tables, are often desirable, particularly in reports intended for laymen. Graphs and charts should be clearly labeled with a title, the time period to which the data refer, the geographic area included, and the units used on the vertical and horizontal scales. Conventional types of tables are text tables, summary tables and detailed (or reference) tables. For easy legibility the printed copy should be no smaller than newsprint and preferably larger. Either the title or the subtitle should contain information on "what," "how classified," "where," and "when," for the data in the table.

In preparing the final report attention should be given to Directive No. 2, "Standards for the Publication of Statistics."

8. RELATIONS WITH THE PUBLIC

Finally, maintenance of good relations with the public is essential if Federal statistics are to continue to merit public support. Objectivity and integrity in the compilation and presentation of statistics is the surest means of obtaining such support. Particular attention, however, should be given to relations with respondents and users of the statistics.

a. *Respondents.* Good relations with respondents involve obtaining the information needed with the minimum burden, reassurring respondents that their interests are being protected, and in general dealing with them fairly and honestly.

As noted above, the burden on respondents must be considered in designing the survey. In drafting the questionnaire, avoid questions which do not contribute to the purposes of the survey. The reportability of the data from the respondent's knowledge or from his records must be considered and particular attention should be paid to requests for information for prior periods or dates long past. When a new or substantially changed request is made for data which may be difficult to provide, it is sometimes helpful to give advance notice to prospective respondents. Agencies are encouraged to consult with potential respondents or their representatives in developing survey plans and forms.

To the extent possible respondents should be reassured that their interests are being protected. Agencies collecting data for general statistical purposes are usually in a position to assure respondents that the information they supply will be used only for statistical tabulations, and that individual returns will be kept confidential. Respondents to other types of surveys should be informed of the users of the data and the extent of disclosure. Agencies collecting data from business respondents particularly should be aware of the provisions of the Freedom of Information Act Pub. L. 89-487) and may need to consult legal counsel on the extent to which confidentiality may be pledged. Agencies collecting data from individuals should be aware of the provisions of the Privacy Act of 1974 Pub. L. 93-579).

The Office of Management and Budget requires special justification for surveys coming under the Federal Reports Act which involve questions of a sensitive nature. This justification should include the reasons why the agency considers the questions necessary and the specific uses to be made of the data obtained. While the meaning of "sensitive" will vary, depending on the respondent and the circumstances, questions on sex behavior and attitudes, mental illness and psychological problems, religious beliefs, and income and assets are generally regarded as sensitive by individuals. Business respondents often regard as sensitive questions on profits and wage and salary scales—particularly executive scales, as well as questions which may involve trade secrets. If an individual or firm is given all relevant information about a project and is completely free to participate or not, invasion of privacy as such may not be a problem, but response may be affected. Where a survey calls for information of a sensitive nature the feasibility of anonymous replies should also be considered.

Care must be taken to avoid giving respondents the impression that they must respond to surveys which are voluntary. For this reason the Office of Management and Budget has prohibited a statement on the form or in the letter of transmittal that this survey is authorized by law in surveys where response is not mandatory. Where response is mandatory this should be indicated and the applicable statute should be cited.

If response is voluntary, cooperation can best be obtained by explaining the purposes for which the data are to be used and by stating clearly and persuasively the need for the data by the Government or the public. Even where an agency has mandatory authority it is better to secure the willing cooperation of the respondents. Where the respondents are business firms or institutions, a commitment to provide a copy of the published report is frequently useful.

b. *Users.* Consultation with users is important to ensure maximum usefulness of the survey. In developing the survey plan users often can make contributions not only on the data to be collected, but also on the timing and frequency of repetitive surveys, and the degree of precision needed. In the case of important statistical series it also is desirable occasionally to obtain user comments on the usefulness of the published data by means of user questionnaires, establishment of advisory committees, or in other ways.

A description of the survey plan, an assessment of the accuracy of the data published, and a statement explaining any limitations should be available to users of the data (see Directive No. 2, "Standards for the Publication of Statistics").

DIRECTIVE NO. 2.[4] STANDARDS FOR THE PUBLICATION OF STATISTICS

The growing use of Federal statistics in the determination and appraisal of public and private policies emphasizes the responsibility of Federal statistical agencies to maintain standards governing the publication of statistical data. Many users of Government statistics, particularly those who use the data infrequently, are not familiar with the basic characteristics of the data. To help guard against misunderstanding and misuse of the data, full information should be available to users about sources, definitions, and methods used in collecting and compiling statistics, and their limitations.

The following standards and procedures for the publication of statistics describe practices which should be followed whenever applicable. Because they cover many kinds of data and various types of publications, including single-time reports as well as historical series, they are necessarily somewhat general in character, and every standard and procedure is not applicable in every case. The statistical agencies are encouraged to issue their own supplimentary standards.

1. LABEL DATA AND DEFINE TERMS

Every release and publication of statistics, whether recurring or single-time, must clearly indicate the nature of the data and make reference to any detailed technical description. Forecasts and projections must be clearly labeled and preliminary figures noted. Data taken from other sources should be identified. The date of publication and the time period to which the data refer should be shown. Technical terms (except in publications designed solely for technicians) should be defined and the use of standard classifications should be noted, either in the report itself or in a separate technical source. In economic or social analyses there should be a clear distinction between actual data and inferences or interpretations drawn from the data.

2. DESCRIBE THE SURVEY DESIGN

If the data to be published are part of a statistical series, or present the results of a statistical survey, a description of the survey design and methods used in implementing the design should be available. If this is not done in the release or report, the reader should be referred to a technical source. The amount of detail in this description will depend upon the importance and complexity of the data. The description should include what is measured, the source(s) of information, the sampling plan if sampling is used, the method of collecting the data, the extent of nonresponse and other sources of bias, and the methods used to deal with the problem. (See Directive No. 1, "Standards for Statistical Surveys".) It is desirable to include a copy of the form and instructions used.

3. APPRAISE THE DATA

There should be available to the user an appraisal of the statistics which would make it possible to evaluate their appropriateness for any intended use. Conceptual or other limitations of the data should be pointed out, and comparison made with any statistics of similar title or scope with which the data are related or which they might be confused.

Accuracy of the data should be stated as far as possible. This should include not only the sampling error (where probability sampling is used) but also the nature and extent of nonsampling errors. "Standards for Discussion and Presentation of Errors in Survey and Census Data," published as Part II of the September 1975 Journal of the American Statistical Association presents the need to discuss the error information of published data, as well as illustrates methods of presenting error information. This information and illustrations should be taken into account by Federal agencies publishing statistical data. (The publication on "Standards for Discussion and Presentation of Errors in Survey and Census Data" can be obtained from the Office of Federal Statistical Policy and Standards, U.S. Department of Commerce, Washington, D.C. 20230.)

4. REVIEW BEFORE PUBLICATION

Before publication every statistical report of any importance should be reviewed by persons who are familiar with the subject matter to detect inconsistencies or other errors, as well as omissions. Such reports should also be reviewed by a statistical expert from the standpoint of the validity and reliability of statistical statements and conclusions. Analytical reports based on data from sample surveys should be carefully reviewed to avoid inclusion of statements which fail to take proper account of sampling errors and other limitations of the data.

5. EXPLAIN REVISIONS

When an established statistical series is revised, the character of the revision and its effect upon the series must be explained. If at all possible a full explanation should be availble with the first publication of such data. If part of the historical series is revised, data for both the old and the new series should be published for a suitable overlap period for the use of analysts.

DIRECTIVE NO. 3.[5] GUIDELINES FOR THE RELEASE OF PRINCIPAL FEDERAL ECONOMIC INDICATORS

These guidelines refer to the Principal Federal Economic Indicators listed in the Schedule of Release Dates in the Statistical Reporter. The objectives of the guidelines are to improve the accuracy of estimates of the indicators and to reduce the number of revisions issued on a current basis. Accomplishing these objectives may require balancing accuracy needs against controlling frequency of revisions. It is not intended that vital information important for making current policy decisions be withheld merely to reduce frequency of revisions, nor that stringent accuracy considerations result in delaying the issuance of important statistical information. Agencies are encouraged to develop their own guidelines for the release of principal current economic indicators in accordance with the broad guidelines noted below.

1. In general, no more than two estimates for a principal economic indicator should be regularly issued within 60 days after the end of the reference period.

2. Each survey regularly resulting in two estimates for the same reference period should be organized so that average differences between preliminary and revised figures for the principal aggregates are small relative to average month-to-month changes in the series. More relaxed standards may be applied, if necessary, to subaggregations.

3. If revisions in preliminary estimates tend to occur significantly more frequently in one direction than another, efforts should be made to reduce bias, or, if this is not feasible, adjustments for bias in the preliminary figures should be developed.

4. Revisions occurring for various reasons, such as benchmark revisions, annual updating of seasonal factors, and replacement of preliminary by revised figures, should, as far as policy and decisionmaking needs permit be consolidated and released simultaneously.

5. Irregularity in each series resulting from sampling error and measurement error should be reduced as much as budgetary and time constraints allow.

DIRECTIVE NO. 4.[6] PROMPT COMPILATION AND RELEASE OF STATISTICAL INFORMATION

The purpose of this Directive is to ensure that the principal statistical series which are issued by agencies to the public annually or more frequent-

[4] Directive No. 2 supersedes section 7(b) and Exhibit B of OMB Circular No. A-46 dated May 3, 1974.

[5] Directive No. 3 supersedes section 7(m) and Exhibit H of OMB Circular No. A-46, dated May 3, 1974.

[6] Directive No. 4 supersedes OMB Circular No. A-91 dated October 21, 1974.

V 43 — 87 MY 4 78 UMI

ly are released without unnecessary delay and that the publication dates for the principal weekly, monthly, and quarterly indicators are made publicly available in advance. Such prompt release of official statisitcs on a regular schedule is conducive to the proper management of both private and public affairs.

1. PROMPT RELEASE

The shortest practicable interval should exist between the date or period to which the data refer and the date when compilation is completed. Prompt public release of the figures should be made after compilation. In the case of principal indicators, the goal is to accomplish compilation and release to the public within 20 working days. Within this period no more than two working days should be allowed for the public release of data, unless other arrangements are approved by the Secretary of Commerce.

2. RELEASE SCHEDULE

Release dates for principal economic indicators will appear each month in the Office of Federal Statistical Policy Standards publication, *Statistical Reporter.* Care should be taken in scheduling these release dates so that they can be met and so that they do insure prompt release of the series as specified above.

3. RELEASE PROCEDURE

Unless otherwise authorized by the Office of Federal Statistical Policy and Standards, there shall be no release of data estimates prior to official press notification at either 10 a.m. or 4 p.m. on these specified release dates. An exception is the Chairman of the Council of Economic Advisers, who will receive pre-released information when available on behalf of the President. However, at the time of distribution of the materials to the press offices, statistical agencies are responsible for distribution of the full press release to the principal economic policymakers such as the Chairman of the Council of Economic Advisers, the Secretary of the Treasury, the Chairman of the Board of Governors of the Federal Reserve System, and the Director of the Office of Management and Budget. Each statistical agency is responsible for establishing procedures to assure that there will be no premature release of statistical series during the period of time required for preparation and duplication of press releases.

Figures which becomes available earlier than the published release date should be released when available unless specifically directed otherwise by the Secretary of Commerce. Economic advisers who receive a press release at the time it goes to the press-room should be alerted if early release is anticipated.

Initial release of statistical series should be made by the statistical agency in a written report. A press release should be issued if it would significantly speed up the release of the data to the public. For widely used series such as unemployment and other major economic indicators, a press conference may be scheduled to permit discussion of important technical features of the data being released. There should be a one-hour separation between the press conference or the issuance of the release by the statistical agency and related commentary by officials other than those discussing technical features.

4. RESPONSIBILITIES

Each agency is directed to review continually its practices in releasing statistical series to the public and to take such action as may be necessary to carry out the objectives of this Directive.

DIRECTIVE NO. 5.[7] STANDARD REFERENCE BASE PERIOD FOR FEDERAL GOVERNMENT GENERAL-PURPOSE INDEX NUMBERS

The year 1967 shall be the standard reference base period for general-purpose index numbers prepared by Federal agencies. This requirement conforms to Government practice of establishing a standard reference base period for use by Federal agencies. The base period is revised approximately every ten years.

1. CONVERSION FOR EARLIER YEARS

Each index should be converted to the 1967 reference base from the beginning of the index, where practicable.

2. WEIGHTS

The weight base period for an index should be as close as possible to the reference base period but they do not need to coincide. The relationship between reference and weight base periods should be indicated by appropriate description.

DIRECTIVE NO. 6.[8] STANDARD FEDERAL ADMINISTRATION REGIONS

Agencies which publish regional data compiled from information published by States and the District of Columbia shall as soon as practicable, publish these data on the basis of the ten Standard Federal Administrative Regions as established by the President and set forth in OMB Circular No. A-105, April 4, 1974. The names of the States composing each region are presented below.

Standard Federal Administration Regions

Region I—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont
Region II—New York, New Jersey, Puerto Rico, and the Virgin Islands
Region III—Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
Region IV—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
Region V—Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
Region VI—Arkansas, Louisiana, New Mexico, Oklahoma and Texas
Region VII—Iowa, Kansas, Missouri, and Nebraska
Region VIII—Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
Region IX—American Samoa, Arizona, California, Guam, Hawaii, and Nevada
Region X—Alaska, Idaho, Oregon, and Washington

Agencies may also publish data for regions composed of different groupings of States whenever necessary for special analytical purposes or to maintain continuity of historical series.

DIRECTIVE NO. 7.[9] STANDARD METROPOLITAN STATISTICAL AREAS

The general concept of a metropolitan area is an integrated economic and social unit with a recognized urban population nucleus of substantial size. A standard metropolitan statistical area (SMSA) is a statistical construct used to define metropolitan areas statistically in a standard way. Its purposes is to facilitate the production, analysis, and publication of statistical information on metropolitan areas by Federal agencies.

Two or more contiguous SMSA's which satisfy certain criteria of size, urban character, integration, and contiguity of urbanized areas may be designated as a standard consolidated statistical area (SCSA). The criteria followed in establishing and defining SMSA's and SCSA's are presented in the OFSPS publication, *Standard Metropolitan Statistical Areas,* revised edition 1975. This publication is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 041-001-00101-8.

1. USE FOR FEDERAL PROGRAM PURPOSES

Standard Metropolitan Statistical Areas shall not be used in the administration of any nonstatistical program unless the head of the agency has determined that such use is appropriate to achieve the program's objectives. Where the term "metropolitan area" is used in the definitions section of legislation or administrative regulations and reference is to SMSA's, the following language should be used to assure flexibility:

"A metropolitan area shall mean a standard metropolitan statistical area as defined by the Office of Federal Statistical Policy and Standards subject to such modifications as the head of the agency may determine to be appropriate for the purposes of the act (regulation)."

If the term "standard metropolitan statistical area" is used in a law or regulation without being separately defined, similar qualifying language should be used parenthetically immediately following "standard metropolitan statistical area."

2. TITLES, DEFINITIONS AND CODES

The titles, definitions, and codes for the SMSA's and the SCSA's as March 1978 are contained in Appendix C. Any future revisions to this list are available from the Office of Federal Statistical Policy and Standards.

DIRECTIVE NO. 8.[10] STANDARD INDUSTRIAL CLASSIFICATION OF ESTABLISHMENTS

The Standard Industrial Classification is to be used to classify reporting establishments by types of industrial activity in which engaged. Details are presented in the *Standard Industrial Classification Manual, 1972,* issued by the Office of Management and Budget as amended by the *Supplement* issued by the Office of Federal Statistical Policy and Standards, and any further revisions. A revision has been scheduled for 1982.

1. USE FOR FEDERAL NONSTATISTICAL PROGRAM PURPOSES

The Standard Industrial Classification shall not be used in the administration of any regulatory, administrative, or tax program unless the Secretary (Administrator) has first determined that the use of such industry definition is appropriate to the implementation of the program's objectives.

If the term, "Standard Industrial Classification" (SIC) is to be used in the operative text of the law or regulation to define industry (or trade or commerce), language similar to the following should be used to assure sufficient flexibility:

"An industry shall mean a Standard Industrial Classification industry or group of industries as defined by the Office of Federal Statistical Policy and Standards subject to such modifications with respect to individual industries as the Secretary (Administrator) may determine to be appropriate for the purpose of this Act (regulation)."

2. TITLES AND DESCRIPTIONS

The *Standard Industrial Classification Manual* includes titles and descriptions of the industries and alphabetic indexes to nonmanufacturing and to manufacturing industries. It is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 4101-0066. The Stock No. for the Supplement is 003-005-00176-0.

DIRECTIVE NO. 9.[11] STANDARD INDUSTRIAL CLASSIFICATION OF ENTERPRISES

The Enterprise Standard Industrial Classification is to be used to classify enterprises by kind of economic activity in which engaged. The classification of enterprises, rather than their constituent establishments, is required for purposes of compiling and analyzing financial and related statistics (such as income, expense and balance sheet items) which are commonly available only on an enterprise basis. The structure of the classification makes it possible to publish data on enterprises by industry on a division, two-digit, three-digit, or four-digit basis, according to the degree of industrial detail available and needed. The details of the classification are presented in *Enterprise Standard Industrial Classification 1974,* issued by the Office of Management and Budget and available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 4101-00093.

DIRECTIVE NO. 10. STANDARD OCCUPATIONAL CLASSIFICATION

The Standard Occupational Classification is to be used in statistical analysis, collection, and presentation of data on workers that are classified by type of occupational activity in which they are engaged. The classification should be used wherever occupational distinctions are needed in labor force, employment, personal income, and other demographic information programs. Its use will provide better analytic comparability to other occupational related data.

1. USE FOR FEDERAL NON-STATISTICAL PROGRAM PURPOSES

The Standard Occupational Classification shall not be used in the administration of any regulatory, administrative or tax program unless the Secretary (Administrator) has first determined that the use of such definitions are appropriate to the implementation of the program's objectives. The system was not developed to define any particular category of occupations that may be affected by existing or future administrative programs.

If the term, "Standard Occupational Classification" (SOC) is to be used in the operative text of the law or regulation to define occupations, language similar to the following should be used to assure sufficient flexibility:

"An occupation shall mean a Standard Occupational Classification group as defined by the Office of Federal Statistical Policy and Standards, Department of Commerce, subject to such modifications with respect to individual occupations as the Secretary (Administrator) may determine to be appropriate for the purposes of this Act (regulation)."

2. TITLES AND DESCRIPTIONS

Details on the classification system are presented in the *Standard Occupational Classification Manual, 1977* issued by the Office of Federal Statistical Policy and Standards, Department of Commerce. This Manual includes titles and descriptions of the occupational groups and is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 041-001-00153-1.

DIRECTIVE NO. 11.[12] STANDARD DATA SOURCE FOR STATISTICAL ESTIMATES OF LABOR FORCE AND UNEMPLOYMENT

Accurate, consistent, publicly available estimates of the labor force and of unemployment in the Nation, the States, and local areas are needed for use in the formulation, implementation, and evaluation of public policy.

1. SOURCE OF DATA

Federal executive branch departments, agencies, and establishments (hereinafter Federal executive branch agency) shall use the most current National, State, or local area labor force or unemployment data published by the Bureau of Labor Statistics, United States Department of Labor, with respect to all program purposes, including the determination of eligibility for and/or the allocation of Federal resources, requiring the use of such data unless otherwise directed by statute. In order to maintain equity among local areas, comparable data series are to be used for all program purposes. Further, unless otherwise required by statute, data adjusted for seasonal

[7] Directive No. 5 supersedes section 7(h) of OMB Circular No. A-46 dated May 3, 1974.
[8] Directive No. 6 supersedes section 7(g) and Exhibit D of OMB Circular No. A-46 dated May 3, 1974.
[9] Directive No. 7 supersedes section 7(f) and Exhibit C of OMB Circular No. A-46 dated May 3, 1974.
[10] Directive No. 8 supersedes section 7(d) of OMB Circular No. A-46, dated May 3, 1974.
[11] Directive No. 9 supersedes section 7(e) of OMB Circular No. A-46 dated May 3, 1974.
[12] Directive No. 11 supersedes Exhibit J of OMB Circular No. A-46 dated December 22, 1975.

V 43 | 87 MY 4 7 78 UMI

variation shall be used for all program purposes as soon as the Bureau of Labor Statistics shall have published such data for local areas being examined for the program purpose then under consideration.

No Federal executive branch agency shall begin or continue collecting or using State or local area labor force or unemployment data other than that published by the Bureau of Labor Statistics, without the written approval of the Secretary of Commerce. This does not preclude the collection of labor force and unemployment data by the Bureau of the Census, United States Department of Commerce, for the Bureau of Labor Statistics or in its conduct of a periodic or other census or statistical survey, and the publication or other distribution thereof.

2. DATA CONSISTENCY

With respect to any month, a consistent reference time period shall be used for all national, State, and local area labor force and unemployment data. The data for each State and area, to the extent technically feasible, shall be conceptually consistent with the data for the Nation as a whole and the State totals shall sum, within a range of acceptable sampling error, to the national total.

3. DATA PUBLICATION

The Bureau of Labor Statistics, in accordance with the provisions of Directive No. 4, Prompt Compilation and Release of Statistical Information, shall establish a monthly release date or dates for all regularly published labor force and unemployment data and shall provide the release date schedule to the Office of Federal Statistical Policy and Standards for publication in the *Statistical Reporter*.

The monthly publication or publications by the Bureau of Labor Statistics shall contain data for the Nation as a whole, and for each State and each local area for which the Bureau of Labor Statistics has agreed to publish data. No agreement between the Bureau of Labor Statistics and other Federal executive branch agencies shall be used to limit the number or types of areas for which data are developed and/or published by the Bureau of Labor Statistics. The data published by area shall at a minimum provide the current estimates before seasonal adjustment, and as soon as possible, and to the extent technically feasible, shall also provide the estimate adjusted for seasonality.

4. NOTIFICATION OF DATA NEED

Federal executive branch agencies requiring State and local area labor force or unemployment data shall notify the Commissioner, Bureau of Labor Statistics, United States Department of Labor, of their need for such data. The notification shall include information about the purpose for which the data are needed and the specification(s) (i.e., statistical reliability, geographic and other) for the the data.

Any Federal executive branch agency required by legislation to use labor force or unemployment data other than that directed by this Directive and any Federal executive branch agency notified by the Commissioner, Bureau of Labor Statistics that the needed data cannot be provided according to specification shall notify the Director, Office of Federal Statistical Policy and Standards, Department of Commerce of that fact. The notification shall include identification of the program(s) affected, legislation implemented by those programs, data specifications, and a report on consultations with the Bureau of Labor Statistics in respect to such data.

5. DEFINITIONS

a. *Labor Force and Unemployment Data.* The term labor force and unemployment data is defined to include all counts or estimates of the total labor force, the civilian labor force, total employment, total civilian employment, total unemployment, and total unemployment rates. The term excludes data, obtained solely from administrative records of the unemployment insurance system, pertaining to counts of covered employment, the insured unemployed, and to the insured unemployment rate.

b. *Current Data.* For the purposes of this Directive the term current data means the most current, complete data published by the Bureau of Labor Statistics.

c. *Local Area.* A local area, for purposes of this Directive, is any geopolitical unit of the United States of America and any combination or part of any such unit or units.

DIRECTIVE NO. 12.[13] STANDARD DEFINITION OF PAYROLL PERIODS FOR EMPLOYMENT REPORTS

Requests made to employers for statistical information from their payroll records on the number of employees, payrolls, hours worked, or related items should refer to the payroll period containing the 12th of the month.

DIRECTIVE NO. 13.[14] STANDARD DATA SOURCE OF TOTAL POPULATION USED IN DISTRIBUTING FEDERAL BENEFITS

The purpose of this Directive is to assure use of standard data on total population for all Federal programs which make use of total population data in the distribution of Federal benefits.

1. CURRENT DATA

For the purposes of this Directive the term current data means the most current, complete national series as published by the Bureau of the Census in *Current Population Reports*, P-25, P-26, or related series, except where data from a decennial census conducted by the Bureau of the Census is more current.

2. USE OF DATA OF TOTAL POPULATION

Executive departments and establishments, in distributing and/or determining eligibility for the benefits of an appropriation for a single year on the basis of data on total population, shall use data which refer to the same point or period of time for each class of eligible government. The data on total population shall be the most current and comprehensive published by the Bureau of the Census. Where total population is used as the denominator of a fraction, the data for both numerator and denominator will be the most recent for which both are available. Where total population is used as the numerator of a fraction, the data for both numerator and denominator will be the most recent for which both are available.

3. JUSTIFICATION FOR EXCEPTION

Agencies shall request approval by the Secretary of Commerce for use of data on total population other than the most current data published by the Bureau of the Census. The request will include indentification of the program(s) affected, legislation implemented by those programs, justification for use of alternative data, and a report on consultations with the Bureau of the Census in respect to data sources.

Any agency required by legislation to use data on total population other than those required by this Directive shall notify the Secretary of Commerce prior to such use.

4. PROPOSED LEGISLATION

Agencies developing proposed legislation involving the use of population data will be responsible for assuring that the provisions of such legislation are consistent with the principles outlined in this Directive or for identifying and justifying any departures from such principles at the time the proposed legislation is submitted to the OMB for review pursuant to OMB Circular No. A-19. As part of its review process under that Cirular, the OMB may request additional information and justification relating to the population data and their proposed use.

[13]Directive No. 12 supersedes section 7(c) of OMB Circular A-46 dated May 3, 1974.

[14]Directive No. 13 supersedes Exhibit I of OMB Circular No. A-46 dated June 6, 1975.

DIRECTIVE NO. 14 [15] DEFINITION OF POVERTY FOR STATISTICAL PURPOSES

For the years 1959-1968 the statistics on poverty contained in the Census Bureau's *Current Population Reports*, Series P-60, No. 68, shall be used by all executive departments and establishments for statistical purposes. For the years 1969 and thereafter, the statistics contained in subsequent applicable reports in this series shall be used.

A number of Federal agencies have been using statistical series on the number of persons and families in poverty, and their characteristics, in analytical and program planning work. The basis for these series has been the classification of income data collected by the Bureau of the Census in accordance with a definition of poverty developed by the Social Security Administration and revised by a Federal Interagency Committee in 1969. This definition provides a range of income cutoffs adjusted by such factors as family size, sex of family head, number of children under 18 years of age, and farm-nonfarm residences.

The Bureau of the Census series continues the Social Security Administration definition for the base year, 1963, except that the differential between poverty levels for farm and nonfarm families is reduced from 30 percent to 15 percent. Annual adjustments in Census series are based on changes in the average annual total consumer Price Index (CPI) instead of changes in the cost of the U.S. Department of Agriculture's Economy Food Plan.

The establishment of this standard data series does not preclude departments and agencies from more detailed analyses or from publication of tabulations for specialized needs although, where applicable, totals must agree with totals published by the Bureau of the Census. Other measures of poverty may be developed for particular research purposes, and published, so long as they are clearly distinguished from the standard data series.

The poverty levels used by the Bureau of the Census were developed as rough statistical measures to record changes in the number of persons and families in poverty and their characteristics, over time. While they have relevance to a concept of poverty, these levels were not developed for administrative use in any specific program and nothing in this directive should be construed as requiring that they should be applied for such a purpose.

[15]Directive No. 14 supersedes section 7(1) and Exhibit G of OMB Circular No. A-46 dated May 3, 1974.

DIRECTIVE NO. 15. [16] RACE AND ETHNIC STANDARDS FOR FEDERAL STATISTICS AND ADMINISTRATIVE REPORTING

This Directive provides standard classifications for recordkeeping, collection, and presentation of data on race and ethnicity in Federal program administrative reporting and statistical activities. These classifications should not be interpreted as being scientific or anthropological in nature, nor should they be viewed as determinants of eligibility for participation in any Federal program. They have been developed in response to needs expressed by both the executive branch and the Congress to provide for the collection and use of compatible, nonduplicated, exchangeable racial and ethnic data by Federal agencies.

1. DEFINITIONS

The basic racial and ethnic categories for Federal statistics and program administrative reporting are defined as follows:

a. *American Indian or Alaskan Native.* A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

b. *Asian or Pacific Islander.* A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

c. *Black.* A person having origins in any of the black racial groups of Africa.

d. *Hispanic.* A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

e. *White.* A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

2. UTILIZATION FOR RECORDKEEPING AND REPORTING

To provide flexibility, it is preferable to collect data on race and ethnicity separately. If separate race and ethnic categories are used, the minimum designations are:

a. *Race:*
American Indian or Alaskan Native
Asian or Pacific Islander
Black
White

b. *Ethnicity:*
Hispanic origin
Not of Hispanic origin

When race and ethnicity are collected separately, the number of White and Black persons who are Hispanic must be identifiable, and capable of being reported in that category.

If a combined format is used to collect racial and ethnic data, the minimum acceptable categories are:
American Indian or Alaskan Native
Asian or Pacific Islander
Black, not of Hispanic origin
Hispanic
White, not of Hispanic origin.

The category which most closely reflects the individual's recognition in his community should be used for purposes of reporting on persons who are of mixed racial and/or ethnic origins.

In no case should the provisions of this Directive be construed to limit the collection of data to the categories described above. However, any reporting required which uses more detail shall be organized in such a way that the additional categories can be aggregated into these basic racial/ethnic categories.

The minimum standard collection categories shall be utilized for reporting as follows:

a. *Civil rights compliance reporting.* The categories specified above will be used by all agencies in either the separate or combined format for civil rights compliance reporting and equal employment reporting for both the public and private sectors and for all levels of government. Any variation requiring less detailed data or data which cannot be aggregated into the basic categories will have to be specifically approved by the Office of Federal Statistical Policy and Standards for executive agencies. More detailed reporting which can be aggregated to the basic categories may be used at the agencies' discretion.

b. *General program administrative and grant reporting.* Whenever an agency subject to this Directive issues new or revised administrative reporting or recordkeeping requirements which include racial or ethnic data, the agency will use the race/ethnic categories described above. A variance can be specifically requested from the Office of Federal Statistical Policy and Standards, but such a variance will be granted only if the agency can demonstrate that it is not reasonable for the primary reporter to determine the racial or ethnic background in terms of the specified categories, and that such determination is not critical to the administration of the program in question, or if the specific program is directed to only one or a limited number of race/ethnic groups, e.g., Indian tribal activities.

c. *Statisical reporting.* The categories described in this Directive will be used as a minimum for federally sponsored statistical data collection where race and/or ethnicity is required, except when: the collection involves a sample of such size that the data on

[16]Directive No. 15 supersedes section 7(h) and Exhibit F of OMB Circular No. A-46 dated May 3, 1974, and as revised May 12, 1977.

V 4 3 — 8 7

the smaller categories would be unreliable, or when the collection effort focuses on a specific racial or ethnic group. A repetitive survey shall be deemed to have an adequate sample size if the racial and ethnic data can be reliably aggregated on a biennial basis. Any other variation will have to be specifically authorized by OMB through the reports clearance process (see OMB Circular No. A-40). In those cases where the data collection is not subject to the reports clearance process, a direct request for a variance should be made to the Office of Federal Statistical Policy and Standards.

3. EFFECTIVE DATE

The provisions of this Directive are effective immediately for all *new* and *revised* recordkeeping or reporting requirements containing racial and/or ethnic information. All *existing* recordkeeping or reporting requirements shall be made consistent with this Directive at the time they are submitted for extension, or not later than January 1, 1980.

4. PRESENTATION OF RACE/ETHNIC DATA

Displays of racial and ethnic compliance and statistical data will use the category designations listed above. The designation "nonwhite" is not acceptable for use in the presentation of Federal Government data. It is not to be used in any publication of compliance or statistical data or in the text of any compliance or statistical report.

In cases where the above designations are considered inappropriate for presentation of statistical data on particular programs or for particular regional areas, the sponsoring agency may use:

(1) The designations "Black and Other Races" or "All Other Races," as collective descriptions of minority races when the most summary distinction between the majority and minority races is appropriate;

(2) The designations "White," "Black," and "All Other Races" when the distinction among the majority race, the principal minority race and other races is appropriate; or

(3) The designation of a particular minority race or races, and the inclusion of "Whites" with "All Other Races," if such a collective description is appropriate.

In displaying detailed information which represents a combination of race and ethnicity, the description of the data being displayed must clearly indicate that both bases of classification are being used.

When the primary focus of a statistical report is on two or more specific identifiable groups in the population, one or more of which is racial or ethnic, it is acceptable to display data for each of the particular groups separately and to describe data relating to the remainder of the population by an appropriate collective description.

DIRECTIVE NO. 16[17] STANDARD CLASSIFICATION OF FIELDS OF SCIENCE AND ENGINEERING

Federal agencies collecting financial data on research and development are expected to use the classification scheme below when requesting information on fields of science. The entire classification is not required in every case, however. For some purposes, only major categories, such as physical sciences or life sciences, may be sufficient; for others, a more detailed breakdown may be needed. In either case, the titles and definitions used by the agency should conform to the standard, thus the data may be combined to produce compatible major field totals.

STANDARD CLASSIFICATION OF FIELDS OF SCIENCE AND ENGINEERING

	Code
Physical Sciences	
Astronomy	11
Chemistry	12
Physics	13
Physical sciences, not elsewhere classified[1]	19
Mathematics	21
Environmental Sciences (Terrestrial and Extrater restrial)

[1]To be used for multidisciplinary projects within the primary field and for single discipline projects for which a separate discipline code has not been assigned.

[2]To be used for multidisciplinary and interdisciplinary projects which cannot be classified within a primary field.

DISCIPLINES INCLUDED IN THE FIELDS OF SCIENCES AND ENGINEERING

Code

Physical Sciences

11 Astronomy: Laboratory astrophysics; optical astronomy; radio astronomy; theoretical astrophysics; X-ray, gamma-ray, neutrino astronomy

12 Chemistry: Inorganic; organometallic; organic; physical

13 Physics: Acoustics, atomic and molecular; condensed matter; elementary particles; nuclear structure; optics; plasma

21 Mathematics: Algebra; analysis; applied mathematics; computer science; foundations and logic; geometry; numerical analysis; statistics; topology

Environmental Sciences (Terrestrial and Extraterrestrial)

31 Atmospheric sciences: Aeronomy; solar; weather modification; extraterrestrial atmospheres; meteorology

32 Geological sciences; Engineering geophysics; general geology; geodesy and gravity; geomagnetism; hydrology; inorganic geochemistry; isotopic geochemistry; organic geochemistry; laboratory geophysics; paleomagnetism; paleontology; physical geography and cartography; seismology; soil sciences

33 Oceanography: Chemical oceanography; geological oceanography; physical oceanography; marine geophysics

Engineering

41 Aeronautical: Aerodynamics

42 Astronautical: Aerospace; space technology

43 Chemical: Petroleum; petroleum refining; process

44 Civil: Architectural; hydraulic; hydrologic; marine; sanitary and environmental; structural; transportation

45 Electrical: Communication; electronic; power

46 Mechanical: Engineering mechanics

47 Metallurgy and materials: Ceramic; mining; textile; welding

49 Engineering, NEC: Agricultural; industrial and management; nuclear; ocean engineering; systems

Life Sciences

Note: The Life Sciences include the following disciplines:

Anatomy; animal sciences; bacteriology; biochemistry; biogeography; biological oceanography; biophysics; dentistry; ecology; embryology; entomology; evolutionary biology; genetics; immunology; internal medicine; microbiology neurology; nutrition and metabolism; opthalmology; parasitology; pathology; pharmacology; pharmacy; physical anthropology; physical medicine and rehabilitation; physiology; plant sciences; podiatry; preventive medicine and public health; psychiatry; radiobiology; radiology; surgery; systematics; veterinary medicine

Research in some of these disciplines may be classed as biological, clinical medical, or medical, depending upon the nature of the particular project. Reference should be made to the following definitions in the classification of data on the funding of research in the Life Sciences:

Life

51 Biological: Those sciences which, apart from the clinical medical and other medical sciences as defined below, deal with the origin, development, structure, function, and interaction of living things.

52 Clinical medical: Study of the pathogenesis, diagnosis or therapy of a particular disease or abnormal condition in living human subjects under controlled conditions.

53 Other medical: Studies of the causes, effects, prevention, or control of abnormal conditions in man or in his environment as it relates to health, except for the clinical aspects as defined above.

(The above three classes exclude the psychological sciences as defined elsewhere.)

Psychology

61 Biological aspects: Experimental psychology; animal behavior; clinical psychology; comparative psychology; ethology

62 Social aspects: Social psychology; educational, personnel, vocational psychology and testing; industrial and engineering psychology; development and personality

Social Sciences

71 Anthropology: Archaeology; cultural and personality; social and ethnology; applied anthropology

72 Economics: Econometrics and economic statistics; history of economic thought; international economics; industrial, labor and agricultural economics; macroeconomics; microeconomics; public finance and fiscal policy; theory; economic systems and development

73 History: Cultural; political; social; history and philosophy of science

74 Linguistics: Anthropological—archaeological; computational; psycholinguistics; sociolinguistics

75 Political science: Area of regional studies; comparative government; history of political ideas; international relations and law; national political and legal systems; political theory; public administration

76 Sociology: Comparative and historical; complex organizations; culture and social structure; demography; group interactions; social problems and social welfare; sociological theory

79 Social sciences, NEC: Research in law and education, NEC; socioeconomic geography

Other Sciences, NEC

99 Other sciences, NEC: To be used for multidisciplinary and interdisciplinary projects which cannot be classified within a primary field

Questions on the interpretation of the classification or proposed changes in the classification should be referred to the Division of Science Resources Studies, National Science Foundation.

DIRECTIVE NO. 17.[18] STANDARD GAS PRESSURE BASE

The standard gas pressure base for Government use is 14.73 pounds per square inch absolute at 15.6° celsius (60° Fahrenheit). This base will be used by all Federal agencies when collecting or publishing information on natural gas.

DIRECTIVE NO. 18.[19] PROVIDING OF STATISTICAL INFORMATION TO INTERNATIONAL ORGANIZATIONS

This Directive outlines the procedure to be followed by all departments and establishments in dealing with official requests from international organizations for statistical information.

[17]Directive No. 16 supersedes section 7(j) and Exhibit E of OMB Circular No. A-46 dated May 3, 1974.

[18]Directive No. 17 supersedes section 7(i) of OMB Circular No. A-46, dated May 3, 1974.

[19]Directive No. 18 supersedes OMB Circular No. A-39, dated August 24, 1967.

1. DEFINITIONS

The following definitions will apply for purposes of this Directive.

a. "Statistical information" means any kind of summary numerical data other than technical data in engineering, physical, or biological science fields.

b. "International organization" means any intergovernmental organization of an international nature in which the United States is a member.

c. "Official request" means any statistical questionnaire, or any other form of request or inquiry from an international organization calling for statistical information, including ad hoc (single time) requests as well as repetitive or periodic requests.

d. "Director" refers to the Director of the Office of Federal Statistical Policy and Standards, Department of Commerce.

2. AUTHORITY OF DIRECTOR

The Director may waive requirements of this Directive, with certain exceptions. Requirements pertaining to requests from international financial institutions may be waived only with the concurrence of the National Advisory Council on International Monetary and Financial Policies. The Director may also revoke or modify any approval granted or determination made by him under the Directive. In making determinations authorized under this Directive, the Director is responsible for necessary consultation and clearance with appropriate Federal executive agencies.

3. PROCESSING OF REQUESTS

Any department or establishment furnishing statistical information to an international organization in response to an official request will do so only when pursuant to a prior determination by the Director. Exceptions to this provision, discussed below, concern the following: advance determinations; requests from international financial institutions; and special arrangements. All other requests subject to prior determination by the Director will be dealt with in the following manner:

a. *Submittal of requests.* Information concerning all such requests will be submitted promptly to the Director, including, as appropriate, the identity of the organization making the request; the nature of the information requested; the views, if any, of the department or establishment on whether or how the request should be answered; and identification of any statistics which the department or establishment proposes to submit in response to the request (but not necessarily the actual statistics).

Such information will ordinarily be submitted by letter or memorandum to the Director, but may be submitted orally in special circumstances or in the case of simple or routine requests.

b. *Director's action regarding requests.* The Director will determine—with the concurrence of the Secretary of State—what statistical information will be provided in response to such requests and will determine which departments and establishments will supply the information. Such determination may cover the continuing transmittal of recurrent data (for example, the transmittal of monthly data as they become available), and will continue in effect until otherwise determined by the Director.

The Director will promptly inform the departments and establishments concerned of his determination.

4. ADVANCE DETERMINATIONS

Statistical information may be provided in response to official requests, without further action under this Directive, whenever: (a) The statistical information requested is contained in a published document, or (b) the request is clearly informal in character and does not call for data for publication, citation in official documents, direct use in international conferences or negotiations, or other specific uses of a formal character.

5. REQUESTS FROM THE INTERNATIONAL MONETARY FUND, THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT, AND OTHER INTERNATIONAL FINANCIAL INSTITUTIONS

Under the provisions of Executive Order No. 10033, as amended, and Executive Order No. 11269, the National Advisory Council on International Monetary and Financial Policies is responsible for determining—after consultation with the Director of the Office of Federal Statistical Policy and Standards—what information is essential in order that the United States Government may comply with official requests for information received from the International Monetary Fund, the International Bank for Reconstructin and Development, and other international organizations the policy coordination of which is the responsibility of the National Advisory Council. The definitions and provisions concerning advance determinations as contained in this directive apply to determinations by the National Advisory Council. Requests subject to determination by the National Advisory Council will be dealt with in the following manner:

a. Any department or establishment which receives an official request for information from such an international organization will send promptly to the Council a statement or outline of the request, in duplicate. It may also send the Council its recommendations as to the response to be made.

M Y 4 7 8 UMI

V 43 | 87

b. The National Advisory Council will determine what information is essential in order that the United States Government may comply with such requests, and will notify the department or establishment concerned.

c. The Director will determine which department or establishment will collect or make available such information. Such department or establishment will consult with the Council as to the manner and form in which the information will be collected and prepared.

d. After the information has been collected and prepared in the manner and form prescribed by the Council, it will be submitted to the Council for presentation to the international organization concerned.

6. SPECIAL ARRANGEMENTS

The Director may make special arrangements relating to requests from international organizations for U.S. data with any department or establishment of any international body which has been assigned special responsibility relating to an international organization.

7. CHANNELS FOR COMMUNICATION

Section 1 of Executive Order No. 10033 provides that statistical information prepared in response to official requests from international organizations will be transmitted to the requesting international organizations through established channels by the Secretary of State or by the Federal executive agency authorized by the Secretary to transmit such information. Requests from the International Monetary Fund, the International Bank for Reconstruction and Development, and other international financial institutions are excepted from this provision. The Department of State will maintain established channels of communication for this purpose. The Director will notify the affected departments and establishments, in connection with his responsibilities under this Directive, of any changes by the Department of State with respect to channels of communication.

8. MATERIAL REQUESTED BY DIRECTOR

Each department or establishment will furnish to the Director such additional material pertaining to requests for information which are within the purview of this Directive as he may from time to time require. The department or establishment will notify the Director in writing of any budgetary restrictions, requirements of military security or confidentiality, or any other limitation which prevents substantial compliance with a determination by the Director under this Directive.

9. PLANS AND REPORT FORMS

A determination or approval by the Director under this Directive with respect to any matter involving the use of a plan or report form does not include clearance of the plan or report form. Plans or report forms are subject to clearance by OMB under Circular No. A-40.

DIRECTIVE NO. 19.[20] REPORTS OF THE DEPARTMENT OF COMMERCE ON INTERNATIONAL TRANSACTIONS

This Directive sets forth procedures for reporting to the Balance of Payments Division, Bureau of Economic Analysis, U.S. Department of Commerce, on international transactions, assets, and liabilities for use in compiling reports on balance of payments, international investments, and foreign grants and credits.

1. AGENCY COVERAGE

The provisions of this Directive apply to all agencies (executive departments and establishments where one or more of the following conditions prevail: (a) Reportable international transactions total $1,000,000 or more per year; (b) balances of foreign assets for liabilities total $500,000 or more; (c) transactions involving foreign grants or credits total $100,000 or more per year; or (d) balances of foreign credits total $100,000 or more.

2. AGENCY RESPONDENT

The head of each agency will designate an officer responsible for coordinating the activities of the agency in response to this Directive. The name, title, address, and telephone number of such officer (and of officers authorized to sign the Standard Form (see paragraph 5)) will be furnished to the Balance of Payments Division, Bureau of Economic Analysis, Department of Commerce.

3. REPORTING UNITS

Reports will be based on reporting units agreed upon by the agency and the Bureau of Economic Analysis and approved by the Office of Federal Statistical Policy and Standards. The reporting units must cover all bureaus or comparable organization components of the agency which have total international transactions of $50,000 or more of the following types in any quarter:

a. Expenditures from or reimbursements to U.S. dollar appropriation and fund accounts (general and special funds, public enterprise funds, trust funds, and deposit funds).

b. Receipts deposited to miscellaneous receipts (general and special funds) or trust funds.

c. Expenditures or receipts of foreign currencies charged or credited to other than U.S. dollar appropriation and fund accounts (such as to "FT" accounts).

d. Nonappropriated fund activities, such as commissaries, post exchanges, and officers clubs.

e. U.S. dollar balances held in foreign banks.

f. Foreign currency balances held under dollar or other accountability (such as in "FT" accounts).

g. Receipt or donations of commodities or services.

Generally, separate reporting units should be established for each major program area, which may represent a combination of appropriations or funds. As a minimum, programs which involve U.S. Government grants and credits must be reported separately from other programs of the bureau or agency concerned.

Whenever a change in reporting units is proposed, it should be submitted to the Office of Federal Statistical Policy and Standards. Such proposals should identify the coverage of each reporting unit.

4. REPORTS REQUIRED

Quarterly reports are required on Standard Form 13 for each established reporting unit showing transactions in total, on a world-wide basis. Negative reports should be submitted for any established reporting unit for which transactions in the quarter were less than $50,000. A Standard Form 13 will also be required for any transactions of $50,000 or more not covered by established reporting units which take place in any quarter. In cases where such a report is submitted, negative reports (unless there are further transactions to report) should be submitted for the remainder of that fiscal year, but need not be submitted thereafter.

The following supporting schedules may be required:

Tabular listing by country and international organization for each item reported on the summary Standard Form 13 (Exhibit A).
Reconciliation of foreign loan transactions (Exhibit B).
Private exports under Government contracts and agreements (Exhibit C).
Merchandise transactions (Exhibit D).
Government grants and credits (Exhibit E).
Changes in Government financial assets and liabilities abroad (Exhibit F).

Detailed reporting instructions and examples of supplemental exhibits that may be required for some types of international transactions are available from the Balance of Payments Division, Bureau of Economic Analysis, U.S. Department of Commerce.

[20] Directive No. 19 supersedes OMB Circular No. 65 dated March 5, 1968.

M Y 4 7 8 UMI

In addition, one copy of each report that is required by the Treasury Fiscal Requirements Manual (part 2, chapter 4500), issued pursuant to Treasury Department Circular No. 1080 on foreign grants, loans, and credits should be submitted with Standard Form 13.

5. TRANSMITTAL OF REPORTS

An original and one copy of the reports under this Directive should be transmitted to the Balance of Payments Division, Bureau of Economic Analysis, U.S. Department of Commerce, not later than 45 days after the close of the reporting period.

The original copy of the Standard Form 13 submitted for each reporting unit should be signed by an officer duly authorized by the head of the agency. The FTS telephone number of such authorized officer should be indicated on the Standard Form 13. Signatures and identifications on other sheets and copies may be affixed by stamp, typing, or other means.

6. ALTERNATIVE REQUIREMENTS

Substitute alternative requirements for those included in this Directive may be approved by the Office of Federal Statistical Policy and Standards, either upon request from the agency or on its own initiative. Such alternative requirements may include additional information to be provided on a continuing basis, or the substitution of other reports in lieu of those prescribed.

DEPARTMENT OF DEFENSE

Office of the Secretary of Defense

DEFENSE INTELLIGENCE AGENCY SCIENTIFIC ADVISORY COMMITTEE

Closed Meeting

Pursuant to the provisions of Subsection (d) of section 10 of Pub. L. 92-463, as amended by section 5 of Pub. L. 94-409, notice is hereby given that closed meetings of the DIA Scientific Advisory Committee will be held at the Pentagon, Washington, D.C. on: Thursday & Friday, 6 & 7 July 1978.

The entire meetings commencing at 0900 hours are devoted to the discussion of classified information as defined in section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. The Committee will receive briefings on and discuss several current critical intelligence issues and advise the Director, DIA on related scientific and technical intelligence matters.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

DEPARTMENT OF ENERGY

SOLAR ENERGY CONFERENCE

Public Meeting

The George Washington University of Washington, D.C., under a contract with the U.S. Department of Energy, will conduct a conference on the role of utilities in Solar Energy Commercialization.

This conference, open to invitees and the general public on a space-available basis, will be held May 10 and 11, 1978, at the Marvin Center in Washington, D.C., from 8 a.m. until 5 p.m. each day.

This will be a working conference to discuss the alternative roles of public and investor-owned utilities in the commercialization of solar energy technology. Invitees, including representatives from the solar industry, utilities, public utility commissions, and consumer organizations will seek consensus on what role the Federal Government can play to encourage the most apropriate action on the part of utilities interested in solar energy development.

A copy of the final report will be available at the Department of Energy Public Document Room, 20 Massachusetts Avenue NW., Washington, D.C. 20545, for review by the public.

Issued in Washington, D.C., May 2, 1978

WILLIAM P. DAVIS,
Deputy Director of Administration.

Federal Energy Regulatory Commission

[Docket No. CP78-305]

ARKANSAS LOUISIANA GAS CO.

Extension of Time

APRIL 25, 1978.

On April 13, 1978, thirteen landowners of the Ada Gas Storage Facility (Petitioners) filed a petition to intervene and a motion for further time to plead to the amended application filed by Arkansas Louisiana Gas Co. (ArkLa) on March 10, 1978, in the above referenced proceeding. By notice issued March 23, 1978, the Commission established April 12, 1978, as the date by which interested persons should file a petition to intervene or protest in this proceeding. The motion states that Petitioners had previously requested a copy of ArkLa's amended application, but such copy had not been received. In accordance with section 157.10 of the Commission's Regulations, ArkLa should promptly supply the Petitioners with a copy of the amended application.

Upon consideration, notice is hereby given that an extension of time is granted to and including May 12, 1978, within which Petitioners shall file an amendment to the petition to intervene.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12162 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket No. CP78-283]

BEACON GASOLINE CO.

Application

APRIL 26, 1978.

Take notice that on April 12, 1978, Beacon Gasoline Co. (Applicant), P.O. 1156, Minden, La. 71055, filed in Docket No. CP78-283 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities necessary to gather gas for United Gas Pipe Line Co. (United), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that United has contracted with Art Machin & Associates, Inc., et al., to acquire natural gas from the Red Rock Field in Columbia County, Ark., and the North Shongaloo Field in Webster, La. It is indicated that United would pay Art Machin & Associates, Inc., et al., for the subject gas a base price per Mcf of $1.509634 for the period ending April 1, 1978, and that this price would be increased $0.0102 upon the expiration of the April 1, 1978 period and would thereafter be increased $0.0102 each July 1, October 1, January 1, and April 1 from such date. It is stated that the reserves covered by the subject contract are estimated at 1,012,000 Mcf and that at the present gas produced from those reserves is being flared by the producer at the approximate rate of 2,000 Mcf per day.

Applicant indicates that United does not have a pipeline connection in either field and cannot take delivery of the gas from the producer without expensive and time-consuming construction. Applicant further indicates that United does have a pipeline connection at Applicant's gasoline plant

V 4 3 — 8 7

in Webster Parish, La., and a secondary connection with Applicant's pipeline in Webster Parish, La. Applicant states that it has a gathering system located in the vicinity of the wells producing the gas in question and can gather the gas which is subject to the contract. Applicant is willing to do so if it is reimbursed for the cost of extending its system, it is said. Consequently, Applicant and United have entered into an agreement dated February 13, 1978, providing for the proposed construction of facilities at an estimated cost of $150,000.00, which cost United would finance, it is said.

It is indicated that Applicant at present operates a gathering system consisting of approximately 115 miles of pipeline located in Columbia and Lafayette Counties, Ark., and in Western and Claiborne Parishes in Louisiana and a gasoline plant located in Webster Parish, La., which has the capacity to process 70,000 Mcf of gas per day. Applicant proposes to construct 6,300 feet of 2-inch, 10,500 feet of 3-inch, 8,300 feet of 4-inch O.D. pipeline and related facilities to connect Applicant's existing facilities with the wells producing the gas subject to the gas purchase contract.

The application states that the proposed construction and service is required for the following reasons:

a. The gas is being flared and would continue to be flared unless the proposed construction and service is provided;

b. There is a critical shortage of natural gas and United's customers are and will be severely curtailed; and

c. The proposed construction and service would result in an increase of the supply of natural gas to interstate commerce.

Applicant states that it would charge United 10 cents per Mcf for each Mcf of gas delivered to United at the tailgate of the Beacon Plant until the lesser of the sum of $150,000.00 or a sum equal to the actual cost of construction of the proposed facilities has been paid by United to Applicant, and that thereafter, the charge will cease.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-44]

COLUMBIA GULF TRANSMISSION CO.

Proposed Changes in FERC Gas Tariff

APRIL 26, 1978.

Take notice that on April 3, 1978, Columbia Gulf Transmission Co. (Columbia Gulf) tendered for filing the following proposed changes in its FERC Gas Tariffs, to be effetive May 3, 1978:

ORIGINAL VOLUME NO. 1

Fourth Revised Sheet No. 4C

ORIGINAL VOLUME NO. 2

Fourth Revised Sheet No. 1#, and Original Sheet Nos. 589 through 618

A copy of this filing was served on Tennessee Gas Pipeline Co. and Amoco Production Co.

Any person desiring to be heard or to make any protest with reference to said application, on or before May 10, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-288]

COLUMBIA GULF TRANSMISSION CO. AND CONSOLIDATED GAS SUPPLY CORP.

Application

APRIL 26, 1978.

Take notice that on April 14, 1978, Columbia Gulf Transmission Co. (Columbia), 3805 West Alabama Avenue, Houston, Tex. 77027, and Consolidated Gas Supply Corp. (Consolidated), 445 West Main Street, Clarksburg, W. Va. 26031 (Applicants), filed in Docket No. CP78-288 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Columbia to transport natural gas for Consolidated and authorizing the exchange of natural gas by Applicants, all as more fully set forth in the application on file with the Commission and open to public inspection.

Columbia requests authorization to transport through existing facilities gas for Consolidated pursuant to a transportation and exchange agreement dated April 3, 1978, between the two companies. It is stated that the subject gas would be received into existing facilities of Columbia at the terminus of a pipeline system owned by Sea Robin Pipeline Co. (Sea Robin) near Erath, La., and transported to Columbia's Rayne, La., Compression Station (Rayne Exchange Point) at which point Columbia would retain said gas as exchange gas. It is indicated that Columbia would deliver to Consolidated at the outlet of the existing measurement facilities of Columbia connecting to Consolidated's pipeline near Egan, La., the thermal equivalent of the gas received by Columbia at the terminus of the Sea Robin pipeline, less a pro rata share of the volume of gas unaccounted for and/or used as fuel in the facilities through which the gas is transported to the Rayne Exchange Point.

The application states that Consolidated would pay Columbia for the transportation portion of the service described herein a rate of 2.32 cents per Mcf (at 14.73 psia) of the gas (thermally adjusted as provided in the agreement) actually received by Columbia at the Consolidated Delivery Point or such other charge as may be determined by the Commission in an appropriate proceeding.

Applicant indicates that the natural gas volumes proposed to be transported and exchanged would be purchased

by Consolidated in South Marsh Island Blocks 142 and 143, offshore Louisiana, from its affiliate, CNG Producing Co., pursuant to authorizations granted in Docket No. CI78-234 and from Texas Gas Exploration Corp. (Exploration) pursuant to authorizations requested at Docket No. CI78-576.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP78-54]

EL PASO NATURAL GAS CO.

Tariff Filing

APRIL 26, 1978.

Take notice that on April 7, 1978, El Paso Natural Gas Co. ("El Paso") tendered for filing and acceptance the following tariff sheets to special Rate Schedule X-31 contained in El Paso's FERC Gas Tariff, Third Revised Volume No. 2:

Fifth Revised Sheet No.493
Third Revised Sheet No. 494
Fifth Revised Sheet No. 498
Fourth Revised Sheet No. 499

Special Rate Schedule X-31 is comprised of the San Juan Gathering Agreement ("Gathering Agreement") dated January 31, 1974, as amended, between El Paso and Northwest Pipeline Corp. ("Northwest") providing for the gathering of natural gas in the San Juan Basin area of northwestern New Mexico and southwestern Colorado.[1] El Paso states that the tendered tariff sheets will revise Exhibits A, B, C and D attached to special Rate Schedule X-31, and will add wells and units to the Gathering Agreement to reflect changes which have occurred in each party's respective operations during the twelve (12) month period preceding February 1, 1978. The basis for said additions is a Letter Agreement between the parties dated February 1, 1978, amending the Gathering Agreement.

El Paso states that inasmuch as the Gathering Agreement comprises special Rate Schedule X-31 to El Paso's Third Revised Volume No. 2 tariff and as well, special Rate Schedule X-24 to Northwest's Original Volume No. 2 tariff, the concurrent effectiveness of the revised Exhibits to El Paso's and Northwest's said special rate schedules is desirable. El Paso further states that Northwest will file its tariff tender of the identical revisions to Exhibits A, B, C and D to Northwest's special Rate Schedule X-24 on April 7, 1978, and will request therein an effective date coincident with the effective date authorized for El Paso's revised tariff sheets tendered as a part of the instant filing. El Paso has requested that the tariff sheets tendered herewith, as well as the aforementioned tariff sheets tendered by Northwest on April 7, 1978, be made effective as of May 7, 1978.

El Paso states that a copy of each of the tendered tariff sheets has been mailed to Northwest Pipeline Corp.

Any person desiring to be heard or to make any protest with reference to said tariff tender should, on or before May 4, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations Under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. CS71-876, *et al.*]

JONES-O'BRIEN, INCORP., ET AL.

Order Conditionally Accepting Small Producer Statement of Eligibility

APRIL 28, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977), and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "saving provisions" of Section 705(b) of the DOE Act provide that proceedings pending before the Federal Power Commission on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued, and further actions shall be taken by the appropriate component of DOE now responsible for the functions under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by Section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary of Energy and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR—, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On June 20, 1977, Jones-O'Brien (CS71-876), George L. Logan (CS71-812), B. C. McKeever (CS71-694), Dudley P. Meier (CS72-278), S. Lee Ware, Jr. (CS72-277), Nemours Corp. (CS72-213), Wheless Industries, Inc. (CS71-305), Butler-Johnson, Inc.

[1] The Gathering Agreement was necessitated by the divestiture of El Paso's former Northwest Division System to Northwest effective as of January 31, 1974. Authorization for such gathering arrangement was granted by Federal Power Commission order issued September 21, 1973, at Docket Nos. CP73-331, *et al.*

M Y 4 — 7 8
UMI

V 43 — 87 MY 4 78 UMI

(CS72-482), Lyons Petroleum, Inc., Agents for Succession of C. H. Lyons, Sr. (CS71-523), Sklar & Phillips Oil Co. (CS72-187) and Dr. J. S. Shelby (CS77-615), (hereinafter Jones-O'Brien) submitted a statement of eligibility, pursuant to Section 2.56a(p) of the Statements of General Policy and Interpretations of the Commission, for the sale of gas from the Davis SU'C' Unit, Tremont Field, Lincoln Parish, LA.

Jones-O'Brien spudded the O'Neal No. 1 Well on April 3, 1972, in the Davis SU'C' Unit, Tremont Field, Lincoln Parish, LA. An initial deliverability test at the time indicated that the well was capable of producing 770 Mcf of gas per day. Production subsequently declined so that by August 1976, the well produced an average of 457 Mcf per day.

Later development of the Tremont Field north of the O'Neal No. 1 Well, resulted in initial well capabilities ranging from 1,224 to 3,078 Mcf per day. Citing this fact as evidence of poor natural permeability in the formation underlying the O'Neal No. 1 Well, Jones-O'Brien filed on October 26, 1976, an applicaiton with the Louisiana Department of Conservation for permission to drill a substitute well in a more favorable portion of the proration unit. On November 19, 1976, the Department of Conservation issued an order establishing the new well, designated the O'Neal No. 2, as the substitute unit well for the Davis SU'C Unit.

Jones-O'Brien spudded the O'Neal No. 2 Well on March 1, 1977, and completed it on April 17. The initial deliverability test indicated a production capability of 2,704 Mcf per day and on April 27, 1977, the Department of Conservation granted a unit allowable of 3,000 Mcf per day. The O'Neal No. 1 was shut-in[1] and deliveries from the O'Neal No. 2 commenced on May 3, 1977. The O'Neal No 2 should add approximately 1.6 MMcf of additional recoverable reserves. Gas from this well is currently being sold at the small producer ceiling rate for old gas of 35 cents per Mcf at 14.73 psia, plus applicable adjustments.

Pursuant to Section 2.56a(p), Jones-O'Brien has now submitted a statement of eligibility requesting "that the Commission find it eligible to collect the rates established by Section 2.56a(a)(1) for gas produced from the Davis SU'C' O'Neal No. 2 Well".[2] The original well was producing 457 Mcf of gas per day at 35 cents an Mcf before being shut-in and now the same reserves will be produced from the replacement well at $1.48 an Mcf resulting in increased annual revenues of approximately $190,000.

If we were to allow all of the gas from the O'Neal No. 2 Well to be priced at the new gas price established in Opinion No. 770, as amended, our action may tend to encourage producers to drill new wells merely for the purpose of shutting-in old wells in the same proration unit where the old wells are still capable of some production.

We recognize, however, that Jones-O'Brien's actions have resulted in the development of an estimated 1.6 MMcf of additional recoverable reserves which could not have been produced by the O'Neal No. 1 Well.

Of the total recoverable reserves underlying the Davis SU'C' Unit, a certain amount was amount was originally developed, produced and brought onto the interstate marked by the O'Neal No. 1 Well. The remainder of the recoverable reserves were developed and brought onto the market through the drilling of the O'Neal No. 2 Well. The unit production should be priced at two separate rates because of the two different dates in which the underlying reserves were developed.

The method which we will require to allocate the unit production between the two base rates is based upon the estimated volumes of reserves developed by the individual wells. The volume of unit production attributable to the reserves developed by the O'Neal No. 1 Well and consequently sold at the 35 cents base rate will be calculated as a fraction of the total unit production, the numerator of which will be the amount of recoverable reserves in place prior to the completion of the O'Neal No. 2 Well, and the denominator of which will be the total amount of recoverable reserves subsequent to the completion of the O'Neal No. 2 Well. The remainder of the unit production will be attributable to the additional reserves developed through the drilling of the O'Neal No. 2 Well and will be considered as "new" gas which could be sold at the $1.48 base rate prescribed in Section 2.56a(a)(1). Such a pricing formula both rewards the producer for developing additional recoverable reserves and maintains the existing supply of lower-priced "old" gas previously sold in the interstate market.

The Commission Orders:

(A) The statement of eligibility filed June 20, 1977, by Jones-O'Brien, *et al.*, is accepted conditioned as stated hereinafter.

(B) The method of allocating the unit production between the two base rates will be based upon the estimated volume of reserves developed by the individual wells as hereinbefore described.

(C) Within 30 days of the issuance of this order Jones-O'Brien, *et al.*, will file with this Commission a statement setting forth the results of the application of the method set forth above.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12163 Filed 5-3-78; 8:45 am]

[1] In a letter dated May 6, 1977, to the Department of Conservation, Jones-O'Brien explained they did not want the O'Neal No. 1 Well plugged and abandoned because "if we encounter mechanical difficulties with the O'Neal No. 2 * * *, we will request that the O'Neal No. 1 be named the alternate unit well with production coming from the O'Neal No. 1 instead of the O'Neal No. 2".

[2] $1.49 per Mcf at 14.73 psia plus applicable adjustments effective April 1, 1978.

[6740-02]

[Docket No. CP77-176]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

Amendment to Application

APRIL 27, 1978.

Take notice that on April 17, 1978, Kansas-Nebraska Natural Gas Co., Inc. (Applicant), P.O. Box 608, Hastings, Nebr. 68901, filed in docket No. CP77-176 an amendment to its application filed January 28, 1977, pursuant to section 7 of the Natural Gas Act so as to authorize Applicant to reclaim approximately 1.7 miles of 6-inch gathering pipeline beginning at a point in sectin 1, township 38 north, range 91 west, of Fremont County, Wyo., and extending south to a point in section 12, township 38 north, range 91 west, and to take up and salvage the subject facilities, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

The new facilities and the abandonment of existing facilities proposed in the original application, as first amended were as follows:

(a) Install approximately 22 miles of 12-inch gathering pipeline beginning at a point in section 23, township 37 north, range 90 west of Fremont County, Wyo., and extending in a southerly direction to a point in section 36, township 34 north, range 90 west of Fremont County together with necessary pipeline appurtenances.

(b) Abandon approximately 2.3 miles of 4-inch and 29.3 miles of 6-inch gathering pipelines beginning at a point in section 5, township 38 north, range 90 west of Fremont County and extending west and south to section 1, township 33 north, range 91 west of Fremont County, Wyo.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before May 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12154 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket No. CP78-280]

MOUNTAIN FUEL SUPPLY CO.

Application

APRIL 26, 1978.

Take notice that on April 10, 1978, Mountain Fuel Supply Co. (Applicant), 180 East First South Street, Salt Lake City, Utah 84139, filed in docket No. CP78-280 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and exchange of up to 10,000 Mcf of natural gas per day with Northwest Pipeline Corporation (Northwest), all as more fully set forth in the application on file with the Commission and open to public inspection.

It is indicated that Applicant has entered into a gas purchase, transportation and exchange agreement dated November 14, 1977, with Northwest, which agreement provides for the transportation and exchange of up to 10,000 Mcf of natural gas per day with Northwest, and the purchase of up to 25 percent of the gas received for exchange. Applicant states that it has agreed to make available existing pipeline tap facilities on its main transmission lines in order to receive and transport gas for Northwest, and that it would redeliver the gas to Northwest at an existing point of pipeline interconnection located near Green River, Wyo.

It is stated that in return for Applicant's providing of this transportation service, Northwest has granted Applicant the right to purchase up to 25 percent of the volumes delivered for exchange. It is further states that the source of the natural gas which is to be exchanged is located in the Stateline area of Carbon County, Wyo., and Moffat County, Colo., and is being produced by Rainbow Resources, Inc., a small producer (docket No. CS74-388). Northwest would gather and transport the subject gas to the existing transmission line tap facilities of Applicant, it is said.

It is indicated that Applicant would pay Northwest a reasonable cost of service based gathering fee for gas which Applicant elects to purchase under the option arrangement, which initial such gathering charge is 23.44 cents per Mcf. It is stated that Applicant would pay Northwest the same purchase price for such volumes as is paid by Northwest to the producer. Northwest would pay Applicant 5.5 cents per Mcf for the volumes which Applicant transports and redelivers to Northwest, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 17, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP78-56]

NORTHERN NATURAL GAS CO.

Proposed Changes in FERC Gas Tariff

APRIL 26, 1978.

Take Notice that Northern Natural Gas Co. on April 21, 1978, tendered for filing proposed changes in its FERC Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2. The proposed changes would increase revenues from jurisdictional sales by $104,381,044 annually, based on sales volumes and costs for the 12 months ended December 31, 1977, as adjusted for the test period. Northern states the principal reasons for the proposed rate increase are: (1) Increased costs of obtaining new gas supplies, (2) increased costs associated with a growing need for additional storage capacity required to maintain peak day and winter period deliveries to high priority customers, (30 the need to provide a return of 11.375 percent on its utility investment, (4) increased annual depreciation expense, and (5) increased costs of operations.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8, 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests must be filed on or before May 17, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12156 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket Nos. RP72-154, (PGA78-1), RP76-115, (AP78-1), RP72-74, (DCA78-1)]

NORTHWEST PIPELINE CORP.

Filing of Revised Tariff Sheets

APRIL 26, 1978.

Take notice that on April 10, 1978, Northwest Pipeline Corp. ("Northwest") filed copies of the following two tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Designation	*Effective date*
Substitute 19th revised sheet No. 10.	Apr. 1, 1978.
First substitute 19th revised sheet No. 10.	Apr. 2, 1978.

Northwest states that the instant filing is made pursuant to the Commission's order of March 31, 1978, in the above-captioned proceeding which order, inter alia, suspended for 1 day the tariff sheet (19th revised sheet No. 10) which Northwest had filed on February 15, 1978, to be effective April 1, 1978. Said sheet provided for a net rate increase resulting from: (1) increased purchase gas costs; (2) a net decrease in the level of advance pay-

V 43 | 87 MY 4 78 UMI

ments; and (3) reduced demand charge credits.

In its order of March 31, 1978, the Commission found that a portion of the rate adjustment attributable to the advance payment of $425,000 to Provident Resources, Ltd., on October 21, 1977, had not been adequately justified, and so set that aspect of Northwest's filing for hearing.

Ordering paragraph (B) of the March 31, 1978, order permits Northwest to file, within 15 days of issuance thereof, a revised tariff sheet, to be effective April 1, 1978, without refund liability, in which is eliminated the rate effect of the advance payment of $425,000 made to Provident Resources, Ltd., referred to above. Northwest states that substitute 19th revised sheet No. 10 reflects such change and is otherwise consistent with the revised tariff sheet, as originally filed on February 15, 1978.

First substitute revised sheet No. 10, on the other hand, reflects inclusion of the subject advance payment adjustment and, with the exception of the April 2, 1978, effective date, is assertedly identical in all respects to Northwest's 19th revised sheet No. 10.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 12, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12157 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket No. RP78-50]

NORTHWEST PIPELINE CORP.

Proposed Changes in FERC Gas Tariff

APRIL 26, 1978.

Take notice that Northwest Pipeline Corp. ("Northwest") tendered for filing, on March 31, 1978, a proposed general rate increase applicable to rate schedules contained in its FERC Gas Tariff, volume No. 1. The proposed rate increase would increase revenues for jurisdictional sales and service by $32,621,067 annually based upon the 12-month period ending December 31, 1977, as adjusted. Northwest also proposes to increase its rates for transportation services rendered under rate schedules contained in volume No. 2 of its FERC Gas Tariff. Northwest has requested that the increased rates be made effective on May 1, 1978.

Northwest states that the requested rate increase is to recover its jurisdictional cost of service for the 12 months ended December 31, 1977, as adjusted for changes through September 30, 1978. Northwest claims that the principal reasons for the requested increase are:

(a) Increased cost associated with expansion of the Clay Basin Storage Project;
(b) Increased costs associated with expansion of gas supply and other facilities;
(c) Increased operation and maintenance expenses and taxes;
(d) Increase in rate of return to 11.26 percent in order to compensate for high cost of capital.
(e) Decreased sales volumes.

Copies of the filing were served on the Company's jurisdictional customers and affected state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington D.C. 20426, in accordance with section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1978. Protests will be considered by the Commission in determining the action to be taken, but will not serve to make protestants parties to this proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12158 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket No. CP78-284]

SOUTHERN NATURAL GAS CO.

Pipeline Application

APRIL 26, 1978

Take notice that on April 13, 1978, Southern Natural Gas Co. (Applicant), P.O. Box 2563, Birmingham, Ala. 35202, filed in docket No. CP78-284 an application in accordance with the provisions of section 7(c) of the Natural Gas Act, as amended, and the rules and regulations of the Federal Energy Regulatory Commission (Commission), for a permanent certificate of public convenience and necessity authorizing the transportation of gas, all as fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant states that it seeks a permanent certificate of public convenience and necessity authorizing the transportation of up to approximately 9,400 Mcf of natural gas per day (at 14.73 psia) and such additional volumes as Applicant may have capacity to transport from time to time on the best efforts basis for United Gas Pipe Line Co. (United). United has requested Applicant to take receipt of volumes of gas for United's account from the block 57 field, Eugene Island area, offshore Louisiana and transport said gas through Eugene Island area, offshore Louisiana and transport said gas through Applicant's capacity in facilities proposed to be constructed from the block 57 field to United's existing authorized facilities in block 32, Eugene Island area, offshore Louisiana. The transportation of gas for United's account will be on an Mcf-for-Mcf basis.

Pursuant to a transportation agreement dated April 5, 1978, United gas agreed to compensate Applicant for performing the transportation service described herein by paying Applicant a monthly demand charge transportation rate calculated to reimburse Applicant for that portion of Applicant's investment in the facilities proposed to be constructed from the block 57 field to block 32, Eugene Island area, offshore Louisiana, attributable to United's use of said facilities.

Any person desiring to be heard or to make any protest with reference to said application, on or before May 17, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate if required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP72-121; PGA78-2]

SOUTHWEST GAS CORP.

Change in Rates Pursuant to Purchased Gas Adjustment Clause

APRIL 26, 1978.

Take notice that Southwest Gas Corp. ("Southwest") on April 20, 1978, tendered for filing substitute 24th revised sheet No. 3A and 25th revised sheet No. 3A pursuant to section 9, purchased gas adjustment clause ("PGA"), of the general terms and conditions contained in its FERC gas tariff, original volume No. 1. The purpose of said filing is to: (1) Track the portions of Southwest's increased purchased gas costs effective on April 1, 1978, and April 2, 1978, in accordance with the Commission's letter order dated April 5, 1978, in docket No. RP72-121.

Southwest has requested waiver of its PGA provisions and applicable Commission regulations as necessary to permit Southwest to track each portion of its increased purchased gas costs on April 1, 1978, and April 2, 1978, respectively. Southwest states that a copy of this filing has been mailed to the Nevada Public Service Commission, the California Public Utilities Commission, Sierra Pacific Power Co., and California-Pacific Utilities Co.

Any person desiring to be heard, or to protest said filing, should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-42]

UNITED GAS PIPE LINE CO.

Filing of Original Tariff Sheets

APRIL 26, 1978.

Take notice that on April 3, 1978, United Gas Pipe Line Co. (United) tendered for filing with the Federal Energy Regulatory Commission (Commission) original sheet Nos. 1067 through 1084 to its FERC gas tariff, original volume No. 2, being a transportation agreement dated October 19, 1977, with Amoco Production Co. It is proposed that these tariff sheets become effective on March 13, 1978.

United states that copies of these tariff sheets have been mailed to Amoco Production Co.

Any person desiring to be heard or to make any protest with reference to said application, on or before May 10, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

Economic Regulatory Administration

[ERA Docket No. 77-006-LNG, FPC Docket No. CP77-330, etc.]

EL PASO EASTERN CO., ET AL.

Time for Filing Written Comments and Availability of Transcript of Oral Argument

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of time for filing written comments and availability of transcript of oral argument.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of the time in which parties and other interested persons may file written comments responding to or supplementing statements made at the oral argument in ERA Docket No. 77-006-LNG in Houston, Tex., on April 17 and 18, 1978. ERA also gives notice of the times and places the transcript of the oral argument may be inspected by the public.

DATES: Written comments to be filed by 4:30 p.m., May 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Finn K. Neilsen, Office of Fuels Regulation, 2000 M Street NW., Room 6318, Washington, D.C. 20461, 202-254-9730.

Martin S. Kaufman, Office of General Counsel, 12th and Pennsylvania Avenue NW., Room 5116, Washington, D.C. 20461, 202-566-9380.

SUPPLEMENTARY INFORMATION: ERA hereby gives notice that it will accept filing of written comments, which will become part of the public file in *El Paso Eastern Company, et al.*, ERA Docket No. 77-006-LNG. These written comments should address, respond to, or supplement statements made during the oral argument in this case held on April 17 and 18, 1978, in Houston, Tex. Such written comments should be filed with Finn K. Neilsen, the Office of Fuels Regulation, Room 6318, 2000 M Street NW., Washington, D.C. 20461, no later than 4:30 p.m. on May 16, 1978. The envelope and first page of the written comment should contain the designation "El Paso Eastern Co., et al."

ERA hereby gives further notice that the transcript of the oral argument in ERA Docket No. 77-006-LNG will be available for public inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except for Federal holidays, on April 25, 1978, at the following locations:

Department of Energy, Houston Joint Support Group, Suite 610, 1 Allen Center, 500 Dallas Street, Houston, Tex. Contact: Herbert F. Buchanan, Coordinator.
ERA Docket Room, 2000 M Street NW., Room 6317, Washington, D.C.

Issued in Washington, D.C., April 28, 1978.

DORIS J. DEWTON,
Acting Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

[Docket No. ER78-322]

Federal Energy Regulatory Commission

DUKE POWER CO.

Supplement to Electric Power Contract

APRIL 26, 1978.

Take notice that Duke Power Co. (Duke Power) tendered for filing on April 20, 1978 a supplement to the Company's Electric Power Contract with Rutherford Electric Membership Corp. Duke Power states that this contract is on file with the Commission

V 4 3 — 8 7

and has been designated Duke Power Co. Rate Schedule FPC No. 139.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following new delivery point; Delivery Point No. 13 with a designated KW demand of 2600 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeding the effective date. Duke Power proposes an effective date of April 19, 1978.

According to Duke Power copies of this filing were mailed to Rutherford Electric Membership Corp. and the North Carolina Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All Such petitions or protests should be filed on or before May 8, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ID-1829]

EDWARD AUSTIN CROOKE

Application

APRIL 26, 1978.

Take notice that on April 13, 1978, Edward Austin Crooke, filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Vice President and Secretary, Baltimore Gas & Electric Co., Public Utility.

Director, Safe Harbor Water Power Corp., Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 11, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Project No. 2635]

GREATER NORTHERN NEKOOSA CORP.

Application for License

APRIL 26, 1978.

Public notice is hereby given that an application for license was filed under the Federal Power Act, 16 U.S.C. §§ 791a-825r, on January 3, 1967, and supplemented on August 4, 1967, December 16, 1968, February 5, 1971, and February 8, 1971, by Great Northern Paper Co., now known as Great Northern Nekoosa Corp. (correspondence to: Mr. Ronald D. Jones, LeBoeuf, Lamb, Leiby & Macrae, 140 Broadway, New York, N.Y. 10005) for the constructed Caucomogomoc Headwater Storage Project, FERC No. 2635, located on the Caucomogomoc Stream, West Branch of the Penobscot River in Piscataquis County, Maine. The Penobscot River is a navigable waterway of the United States.

The existing Caucomogomoc Headwater Storage Project consists of: (1) a composite dam about 905 feet long and 12 feet high, made of rock filled timber crib spillway section 105 feet long which is tied to the right abutment by an earth dike 500 feet long and to the left abutment by a similar dike 300 feet long; (2) a reservoir with surface area of 5,728 acres at an elevation 993 feet, and usable storage capacity of 32,400 acre-feet at a drawdown of 10 feet; and (3) four 12-foot wide timber gates and one 6-foot wide timber gate at spillway section.

Any person desiring to be heard or to make protest with reference to said application should, on or before June 30, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR § 1.8 or § 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

The application is on file with the Commission and is available for public inspection.

The public should take further notice that on October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 05-91, 91 Stat. (August 4, 1977), and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. The functions which are the subject of these proceedings were specifically transferred to the FERC.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-317]

INDIANA & MICHIGAN ELECTRIC CO.

Extension of Duration of Initial Rate Schedule

APRIL 26, 1978.

Take notice that American Electric Power Service Corp. (AEP) on behalf of its affiliate, Indiana & Michigan Electric Co. (Indiana Co.) tendered for filing on April 19, 1978, an extension of duration of an initial rate schedule, Amendment No. 13 among Indiana Co., Consumers Power Co. (Consumers) and the Detroit Edison Co. (Detroit). AEP indicates that this Amendment provides for continuing the duration of Service Schedule H—Unit Power that is listed in Appendix I of Amendment No. 9, dated November 1, 1975. AEP states that Consumers and Detroit again desire to purchase Unit Power based on the availability of Gavin Station from Indiana Co. in the following amounts:

April 1, 1978—April 30, 1978..... 200,000KW
May 1, 1978—Sept. 30, 1978..... 400,000KW
Oct. 30, 1978—Oct. 31, 1978..... 200,000KW

Applicant has requested the Commission to accept the Amendment for filing to become effective on April 1, 1978 as it commenced the sale of Unit Power to the Michigan Co. on that date following the settlement of the coal strike, and in that connection has requested waiver of any requirements of the Commission's Regulations which may not have specifically complied with in the tendered filing.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before May 8, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12141 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket No. ER78-319]

IOWA PUBLIC SERVICE CO.

Proposed Interconnection Agreement

APRIL 26, 1978.

Take notice that Iowa Public Service Co. (IPS) on April 18, 1978, tendered for filing an Interconnection Agreement dated Mach 24, 1978, with the City of West Bend, Iowa.

IPS indicates that the Interconnection Agreement includes Service Schedules providing for transactions between the parties similar to those contained in Service Schedules under the Mid-Continent Area Power Pool Agreement. IPS further indicates that the Agreement contains one additional Schedule, in addition to those aforementioned, which provides for inadvertent energy exchange service.

IPS requests waiver of the Commission's notice requirements to allow for an effective date of May 1 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20425, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 8, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. E-8641, E-8476, E-8251 and E-8169]

NEW ENGLAND POWER CO.

Extension of Time

APRIL 25, 1978.

On April 4, 1978, New England Power Co. (NEPCO) filed a motion for an extension of time within which to flow-through to its customers the refunds from Boston Edison Co., as ordered by Opinion No. 803-B, issued February 6, 1978, in the captioned proceeding. By Opinion Nos. 809 and 809-A, issued July 6, 1977, and December 9, 1977, respectively, Boston Edison was ordered to refund to NEPCO and its other customers amounts collected, with interest, pursuant to the rates which were the subject of proceedings at Docket Nos. E-7738 and E-7784.

On February 23, 1978, the Commission noticed Boston Edison's revised tariff filings made February 10, 1978, in compliance with Opinion Nos. 809 and 809-A. No action has been taken to date by the Commission on Boston Edison's revised cost of service schedules and amendments.

In its April 4 motion NEPCO states that the amount of refunds, if any, which NEPCO is to receive from Boston Edison is unknown. Therefore, it is impossible to comply with the dates set by Opinion No. 803-B for the flow-through of refunds to NEPCO customers.

Upon consideration, notice is hereby given that an extension of time is granted to and including October 2, 1978, within which to comply with Opinion No. 803-B by making the ordered flow-through refunds. If, however, compliance cannot be achieved by October 2, 1978, NEPCO shall promptly file a further request for an extension of time.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-321]

NEW YORK STATE ELECTRIC AND GAS CORP.

Filing

APRIL 26, 1978.

Take notice that New York State Electric and Gas Corp. on April 17, 1978, tendered for filing a fuel cost adjustment clause applicable to their agreement with Peach Lake Utilities, Inc. (FPC Rate Schedule No. 26).

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 12, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-12143 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket No. RP78-46]

NORTHERN NATURAL GAS CO.

Order Accepting for Filing and Suspending proposed Emergency Storage Surcharge, Subject to Conditions, and Establishing Hearing Procedures

APRIL 26, 1978.

On March 6, 1978, Northern Natural Gas Co. (Northern) tendered for filing a revised tariff sheet[1] reflecting a proposed 5.23¢ per Mcf surcharge to the commodity portion of Northern's jurisdictional rates. The proposed surcharge, which would be effective during the period April 27, 1978, through December 26, 1978, is designed to recover $13,673,925, the jurisdictional portion of the total costs of $16,484,339, for an emergency storage service rendered to Northern by Northern Illinois Gas Co. (NI-Gas) during a 60-day period during the months of January and February, 1978. The gas will be redelivered to NI-Gas during a second 60-day period during the months of July and August, 1978. The transaction was made pursuant to Section 2.68 of the Commission's General Policy and Interpretations.

The filing was noticed on March 13, 1978, with petitions or protests to be filed on or before March 29, 1978. Several responses thereto were received.[2] Four parties request a hearing to determine the reasonableness of the charges by Northern for the emergency service. One of those parties also requested a suspension of the surcharge in conjunction with its request for a hearing. The Greely Gas Co. and the Department of Water and Gas of the city of Duluth filed letters in support of Northern's application.

In response to the requests for suspension and hearing, Northern, on April 13, 1978, filed a motion for a one-

[1] Fifteenth revised Sheet No. 4a. Third Revised Volume No. 1 to Northern's FERC Gas Tariff.

[2] See attachment.

M Y 4 7 8 UMI

V 43 | 87 MY 4 78 UMI

day suspension of its proposed emergency storage service surcharge. In support of its need to recover the storage service costs, Northern incorporates by reference the "revenue and expense schedules" contained in Northern's Docket No. RP77-56 general rate increase (which went into effect October 27, 1977) and the proposed Stipulation and Agreement in such Docket which was certified to the Commission by the Administrative Law Judge on April 6, 1978. Northern also incorporates by reference the "revenue and expense schedules" which will be contained in the general rate increase filing which Northern stated it would file on April 21, 1978.[3] Northern believes that its filing of March 6, 1978, contains factors which demonstrate the reasonableness and lawfulness of the proposed surcharge. If, however, the Commission cannot determine the reasonableness of the NI-Gas storage service on the basis of the information before it, Northern urges the Commission to suspend the effectiveness of the filed tariff sheet for one day or until April 28, 1978, in order to avoid any further delay in collection of these costs. Northern contends that it is presently incurring losses resulting from the cost of carrying the payments to NI-Gas. Northern states that its distribution customers are in accord with the desirability of timely collection of these costs and have adjusted their rates accordingly. Northern requests that the Commission grant such waivers of its Rules and Regulations as would allow Northern to begin collecting the 5.23¢ per Mcf surcharge.

DISCUSSION

As Northern notes in its filing, this Commission denied Northern's requests to collect the charges associated with this service in its general rate case filing in Docket No. RP77-56 and in its most recent PGA rate increase filing because those requests required a pre-approval of the rates, terms, and conditions of a specific proposal under Section 2.68 of the Commission's General Policy and Interpretations.[4] However, the Commission did state that the proposed transaction generally fell within the definition of Section 2.68.[5] now that the service has been rendered. Northern requests permission to recover the amounts charged for the service.

We note that Northern has no tracking authority to collect the costs associated with such service. However, Northern has requested incorporation by reference cost and revenue data from either or both its filed general rate case in Docket No. RP77-56 as well from its latest general rate case filed on April 21, 1978. Northern's proposed incorporation by reference does not constitute satisfactory compliance with Section 154.63 of the Regulations. However, the Commission shall permit Northern to collect its surcharge subject to refund after a one day suspension upon condition that Northern file a cost of service based upon the 12 months of most recently available actual cost and revenue experience accompanied by supporting testimony and exhibits to justify the necessity of increasing its overall rates to collect the emergency storage service costs. The Commission shall establish hearing procedures to resolve this issue as well as the issue of the prudency of the costs paid by Northern for the emergency storage service. The filing by Northern of the cost and revenue data discussed above shall be deemed good cause for waiver of the filing requirements of Section 154.63 of the Regulations.

For good cause shown, the petitions to intervene shall be granted.

The Commission finds: (1) Good cause exists to accept for filing and suspend for one day Northern's proposed surcharge filing as hereinafter ordered and conditioned.

(2) Good cause exists to grant waiver of Section 154.63 of the Commission's Regulations, as hereinafter conditioned.

(3) Participation in this proceeding of the parties listed in the Attachment to the order who petitioned to intervene in this case may be in the public interest.

The Commission orders: (A) Northern's March 6, 1978, filing is hereby accepted for filing and suspended for one day until April 28, 1978, when they shall become effective, subject to refund, upon filing of a motion pursuant to Section 4 of the Natural Gas Act and as further conditioned in Ordering Paragraph (B).

(B) Within 30 days from the date of issuance of this order, Northern shall file direct evidence to support its proposed surcharge. Such evidence shall include actual cost and revenue data for the twelve months of most recently available actual cost and revenue experience accompanied by prepared testimony and exhibits to support the necessity of increaseing its overall rates to recover the emergency storage service costs.

(C) The filing by Northern of the cost and revenue data in satisfactory compliance with Ordering Paragraph (B) above shall be deemed good cause for waiver of the filing requirements of Section 154.63 of the Regulations.

(D) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 14, 15, and 16 thereof, and the Commission's Rules and Regulations, a hearing shall be held in this proceeding to determine (1) the prudency of the costs paid by Northern for the emergency service and (2) the necessity of the proposed surcharge to ensure that Northern will collect the prudent costs of the storage service.

(E) The Commission Staff shall prepare and serve top sheets on all parties within 90 days of the date of service of Northern's direct case in this proceeding.

(F) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge pursuant to 18 CFR 3.5(d), shall convene a prehearing conference in this proceeding within 10 days after the service of top sheets by the Staff, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, for the purposes of establishing procedures for the investigation and hearing to be held pursuant to this order. The Presiding Judge shall be authorized to modify all procedural dates and to establish further procedures as may in his judgment be required for purposes of the investigation and hearing pursuant to this order. The Presiding Judge shall also be authorized to rule upon all motions except motions to consolidate, sever, or dismiss, as provided for in the Rules of Practice and Procedure.

(G) The above-noted petitioners to intervene are permitted to intervene in this proceeding subject to the Commission's Rules and Regulations; *Provided, however,* That the participation of the intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions to intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition that they might be aggrieved by any order entered in this proceeding.

(H) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RM77-14]

NORTHERN NATURAL GAS CO.

Proposed Changes in FERC Gas Tariff

APRIL 25, 1978.

Take notice that Northern Natural Gas Co. (Northern) on April 14, 1978, tendered for filing proposed changes in its FERC Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2. Northern states that such filing is in compliance with Opinion No. 11, in Docket No. RM77-14, issued on March 22, 1978 wherein the Commission approved the initial Research, Development and Demonstration Program of the Gas Research Institute (GRI).

Norhtern's filing consists of Second Revised Sheet Nos. 71 and 72, Third Revised Volume No. 1 and First Revised Sheet No. 1i and Original Sheet No. 1j for Original Volume No. 2. These tariff sheets establish a new section, "Annual Rate Adjustment to Reflect Gas Research Institute Charges," as a part of the General Terms and Conditions of Northern's tariff.

Northern has proposed a variation to the normal billing procedure for the 1978 payments to GRI by deferring the billing of the 1978 GRI payments until December 27, 1978, and to bill such amounts during 1979 to coincide with the next purchased gas cost adjustment. This is in compliance with a request of Northern's customers to avoid too frequent changes in their filed rates.

Northern further states that during the months of June through December, 1978, it proposed to apply the 1978 GRI surcharge to its "Program Funding Services" volumes and make payments to GRI of the resulting amounts. These amounts would be recorded in Account No. 186 (Miscellaneous Deferred Debts) and deferred.

Later in 1978, Northern will file to become effective December 27, 1978, the appropriate 1979 unit GRI surcharge as approved by the Commission plus the GRI surcharge to recover the actual amount of the GRI payments made for the months of June through September, 1978 and the estimated amounts for the GRI payments for the months of October through December, 1978.

Northern states that copies of its filing were served on all jurisdictional customers and affected State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 11, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. OR78-5 (formerly ICC Docket No. NOR 35794, et al.)]

NORTHVILLE DOCK PIPE LINE CORP. AND CONSOLIDATED PETROLEUM TERMINAL, INC., ET AL.

Extension of Time

APRIL 25, 1978.

On April 18, 1978, Staff Counsel filed a motion to extend the time for filing replies to the administrative appeals filed April 3, 1978, from orders issued by the Interstate Commerce Commission (ICC) on September 30, 1977. The motion states that none of the parties to this proceeding object to the requested extension.

Upon consideration, notice is hereby given that an extension of time is granted to and including May 15, 1978, within which to file replies to the administrative appeals filed April 3, 1978, in the above referenced proceeding.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-318]

OTTER TAIL POWER CO.

Rate Filing

APRIL 26, 1978.

Take notice that on April 18, 1978, Otter Tail Power Co. (Otter Tail) tendered for filing rate schedules covering scheduling and dispatching service provided to Cooperative Power Association (Association) and Central Power Electric Cooperative (Central). An effective date of April 1, 1978, is requested for the increase, estimated at approximately $4,527 per year, in rates to be charged the Association per Supplement No. 3 to Otter Tail's Rate Schedule FERC No. 154. An effective date of March 20, 1978, is requested for the increase estimated at approximately $3.071, in rates to be charged Central per Supplement No. 3 to Otter Tail's Rate Schedule FERC No. 121.

Otter Tail requests waiver of the Commission's notice requirements to allow these two Schedules to become effective on April 1, 1978, and March 20, 1978, respectively.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 8, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ID-1827]

RAYMOND E. DONOVAN

Application

APRIL 26, 1978.

Take notice that on April 4, 1978, Raymond E. Donovan, filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Vice President, The Connecticut Light and Power Co., public utility.
Vice President, The Hartford Electric Light Co., public utility.
Vice President, Western Massachusetts Electric Co., public utility.
Vice President, Holyoke Water Power Co., public utility.

[8]Requested rate suspension.

V 4 3 — 8 7

Vice President, Holyoke Power and Electric Co., public utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before May 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-281]

SOUTHERN NATURAL GAS CO. AND MID LOUISIANA GAS CO.

Joint Pipeline Application

APRIL 27, 1978.

Take notice that on April 11, 1978, Southern Natural Gas Co. (Southern), P.O. Box 2563, Birmingham, Ala. 35202, and Mid Louisiana Gas Co. (Mid Louisiana), 300 Poydras Street, New Orleans, La. 70130 (collectively referred to as Applicants), filed in Docket No. CP78-281 a joint application in accordance with the provisions of Section 7(c) of the Natural Gas Act as amended, and the rules and regulations of the Federal Power Commission as adopted by the Federal Energy Regulatory Commission (Commission), for temporary and permanent certificates of public convenience and necessity authorizing the exchange of gas, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

The Applicants state that Mid Louisiana has arranged to purchase up to 6,000 Mcf of natural gas per day produced from the Block 71, Chandeleur Sound Area near the Eloi Bay Field, St. Bernard Parish, Offshore, Louisiana. Pursuant to an Exchange Agreement between Mid Louisiana and Southern, dated March 22, 1978, Southern will take delivery of the gas for Mid Louisiana's account through its existing 6-inch Eloi Bay pipeline. As more fully stated in the application, Southern will exchange the gas with Mid Louisiana by redelivering a thermally equivalent volume of gas to Mid Louisiana at the existing authorized exchange points between Southern and Mid Louisiana at the Cargas Exchange Point, which is located at the outlet of Ashland Oil, Inc.'s existing Cargas Compressor Station near Perryville in Ouachita Parish, Louisiana, where Southern has available gas from the Monroe Field, Louisiana, and the Perryville Exchange Point, which is located at the existing interconnection of the facilities of Southern and Mid Louisiana at Perryville in Ouachita Parish, Louisiana. The volumes of gas proposed to be exchanged under the application and the Exchange Agreement, dated March 22, 1978 will be exchanged on a thermally equivalent basis at no charge to either party.

Any person desiring to be heard or to make any protest with reference to said application, on or before May 17, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. RP76-136 and RP77-26]

TRANSCONTINENTAL GAS PIPE LINE CO.

Order Remanding in Part Proposed Settlement Agreement

APRIL 26, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.[1]

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by Section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On November 1, 1977, Transcontinental Gas Pipe Line Co. (Transco) presented to the Presiding Administrative Law Judge in these proceedings a proposed settlement agreement which he certified to the Commission for its consideration on November 3, 1977. For the reasons stated below, the Commission shall remand the contested issues to the Presiding Judge for hearing and hold in abeyance the remainder for consideration later with the contested issues.

Proceedings in the captioned dockets were initiated on July 30, 1976, when Transco tendered for filing in Docket No. RP76-136 revised tariff sheets reflecting an $81.3 million rate increase, based on the twelve months ending April 30, 1976, as adjusted for known

[1] The "Commission" when used in the context of an action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

and measurable changes through January 31, 1977. Transco requested that the proposed rate increase become effective on September 1, 1976. By order issued August 30, 1976, the Federal Power Commission accepted the revised tariff sheets for filing and suspended their use for five months until February 1, 1977, when they were permitted to become effective, subject to refund.

On December 30, 1976, Transco tendered for filing in Docket No. RP77-26 revised tariff sheets to increase its rates for interruptible transportation services rendered under Order No. 533[2] to various industrial consumers. Transco had been charging 22 cents per Mcf plus fuel and line loss for transporting "533" gas anywhere on its system and had not proposed to increase this rate in its filing in Docket No. RP76-136. In Docket No. RP77-26, Transco proposed to increase its rates for interruptible transportation to 28.2 cents per dekatherm (dth) in Transco's rate Zone 1, 29.8 cents per dth in Zone 2, and 31.5 cents per dth in Zone 3, plus fuel. Transco requested an effective date of January 31, 1977. By order issued on January 31, 1977, the FPC accepted for filing the revised tariff sheets tendered December 31, 1976, and suspended them for one day, permitting them to become effective, subject to refund on February 1, 1977. Docket No. RP77-26 was consolidated with Docket No. RP76-136 for purposes of hearing and decision.

In addition to certain formal hearings, settlement conferences were held intermittently in these proceedings since January 4, 1977, which resulted in the settlement agreement. The proposed agreement, if approved would resolve all issues which had arisen in this proceeding except four: (1) rate base treatment of certain advance payments, (2) rate base treatment for unsuccessful alternate gas supply costs, (3) rate of return on equity, and (4) carrying charges on unrecovered demand charge credits. The issue of rate base treatment for certain advance payments was severed from this proceeding by order issued October 21, 1977, and is to be resolved in the consolidated proceeding in Transcontinental Gas Pipe Line Corporation, Docket Nos. RP74-48 and RP75-3 (AP76-1), et al. The unsuccessful alternate gas supply costs issue is to be determined by the outcome of *Transcontinental Gas Pipe Line Corporation* v. *Federal Energy Regulatory Commission*, No. 77-1712 in the United States Court of Appeals for the District of Columbia Circuit. The remaining two issues of rate of return and carrying charges on unrecovered curtailment credits are reserved and are the subjects of an initial decision issued February 13, 1978, by Presiding Judge Stephen L. Grossman.

The settlement agreement, in summary, provides for the following:

Article I presents the procedural history in the consolidated dockets and the issues not covered by the instant agreement.

Article II references the settlement cost of service, attached as Appendix A, and the rates based on the settlement cost of service using both historical zone differentials and revised zone differentials. The tariff sheets track various rates changes effective from February 1, 1977.

Article III provides for the tracking of supplier rate increases and decreases and the flow-through of supplier refunds, except for suppliers' storage service rate changes and refunds, pursuant to Section 22 of the General Terms and Conditions of Transco's FPC Gas Tariff, Second Revised Volume No. 1.

Article IV provides that the propriety of inclusion in the settlement cost of service of $3,300,237, which represents amortization and rate base treatment of expenditures by Transco in the unsuccessful search for alternate gas supplies, is reserved pending judicial review of that issue in Opinion No. 801.

Article V provides that the issue of advance payments is reserved for hearing, inasmuch as that issue has been severed from the instant proceeding and consolidated with other unresolved advance payments dockets of Transco into a single proceeding. Pending resolution of the issue in such separate proceeding, Transco is collecting subject to refund amounts related to the costs of advance payments.

Article VI provides that the issues reserved for decision in the proceeding are (1) the proper rate of return and (2) whether carrying charges on unrecovered curtailment credits should be permitted. This article would also permit Transco to revise its tariff to provide tracking curtailment credits on a current basis.

Article VII provides that Transco will reduce its rates for long-haul interruptible transportation services to 23.0 cents, 23.5 cents and 24.0 cents per dth in zones 1, 2 and 3, respectively and that it will refund at 9 percent interest all amounts collected in excess of the reduced rates. This article also provides for a moratorium until July 1, 1979, as an affective date of any proposed change by either Transco or a party in its interruptible transportation rates.

Article VIII provides that Transco will file, as part of its tariff, transportation service rate schedules which will be applicable to all interruptible transportation services which qualify.

Article IX provides that the rates to be charged for the transportation of emergency gas shall bear the same rate levels as for interruptible transportation services. Transco will refund excess revenues collected for emergency transportation service at 9 percent interest.

Article X provides for increased zone differentials of 5.0 cents per dth between zone 1 and zone 2, and 6.4 cents per dth between zone 2 and zone 3, effective as of October 1, 1977. Moreover, the article provides that the agreement is so conditioned that if the Commission does not accept the proposed differentials, the issue of zone differentials must be remanded for hearing. If approved, the revised zone differentials would remain in effect without change until July 1, 1979.

Article XI permits Transco to revise its tariff to provide for monthly carrying charges to be credited or debited for overcollections or undercollections of unrecovered purchased gas costs.

Article XII provides that Transco will refund without interest any excess transportation revenues which are above the amount credited to the settlement cost of service.

Article XIII permits Transco to track in its rates increases or decreases reflected in its cost of service for changes in the Federal income tax rate of 48 percent.

Article XIV provides for additional refunds by Transco in the event the Commission's decision on the reserved issues so requires.

Article XV contains a general reservation in connection with the negotiated settlement.

Article XVI provides for effectiveness of the agreement upon the Commission's permitting the proposed revised tariff sheets to become effective and accepting, except as permitted in article X, the agreement without modification.

Initial comments supporting, or not opposing, the proposed settlement agreement were filed by numerous parties.[3] Initial comments opposing

the settlement agreement were filed by the Public Service Commission of the State of New York (New York), Philadelphia Gas Works (PGW), and Mesa Petroleum Co. (Mesa) which also requested leave to intervene out of time in the proceeding.

New York states that it opposes Commission approval of the settlement agreement "* * * to the extent it purports in article X to enlarge the existing rate differentials between Transco's three zones, or otherwise reflects the provisions of article X." New York argues that the Commission could not lawfully prescribe a new and enlarged rate differential in a contested proceeding unless it can conclude that the existing rate differential is not just and reasonable. New York states that there is no substantial claim that there has been a change in circumstances to warrant changing the rate differentials. It is New York's position that the existing rate differentials should be maintained, not increased. Any increase in existing zone differentials, moreover, would be inconsistent with Commission policy favoring systemwide rates, according to New York.

Aside from the rate zone questions raised by article X, however, New York states that it finds the proposed settlement acceptable inasmuch as it would resolve certain cost of service issues, as well as the interruptible and emergency transportation rate issues. New York supports the settlement interruptible and emergency transportation rates, which with some minor increases, maintain the existing rate levels to Transco's customers. New York proposes that the Commission approve the settlement subject to the elimination of the zone allocation provisions of article X, and revision of appendices to reflect the existing rate zone differentials.

Philadelphia Gas Works (PGW) submitted comments opposing the settlement both as to the proposed transportation rates for long-haul interruptible service and the design of rates and zone rate differentials. PGW's objection to the interruptible transportation rate is predicated on what PGW states is its failure to recover the full cost of rendering such service. Adoption by the Commission of the settlement rates would cause the customers of Transco, through paying higher unit cost of transmission in Transco's rates, to subsidize those parties using the Transco system to transport interruptible and emergency gas, according to PGW, and would have a discriminatory effect. PGW argues additionally that the Commission's adopting the transportation rates would be contrary to the "national energy policy" inasmuch as the proposed settlement would subsidize the purchase of gas by commercial and industrial users and create an incentive to consume natural gas as opposed to an alternative source of fuel. PGW also contends that the settlement is contrary to Commission policy as set forth in *Crab Run Gas Company, et al.*, Docket Nos. CP76-24, et al., order issued July 22, 1976. PGW notes that in an order issued October 31, 1977, in the captioned proceeding, the Commission denied a motion of the North Carolina companies stating that it could not accept a rate of 22 cents per dth for interruptible transportation service because such rate would be less than fully compensatory. With respect to the proposed zone differentials, PGW asserts that the record does not support a finding that the rates currently in effect are unjust, unreasonable or discriminatory, nor does it contain substantial evidence supporting the revised zone differentials.

Mesa opposes the settlement on the ground that it would permit Transco to include in rate base an advance payment made to Mesa after the test year, as adjusted, in the instant proceeding. Mesa states that on February 4, 1977, Transco made an installment advance payment to Mesa in the amount of $1,325,568, pursuant to an advance payment agreement between the parties dated December 18, 1975. Mesa objects to Transco's inclusion in its rate base of advance payments booked between January 31 through August 31, 1977, a period extending 7 months beyond the test period as adjusted, which provides for a January 31, 1977, cut off date. Therefore, in addition to granting it leave to intervene in the proceedings, Mesa requests that the Commission deny Transco's proposed inclusion of the February 4, 1977 advance payment in its rate base, or alternatively, sever and direct a hearing on that portion of the settlement proposal.

We view Mesa's objection to the proposed settlement as without basis to support our rejecting the agreement as it relates to Mesa's advance payment. Nor would it be appropriate to sever the rate base treatment of that advance in order to hold a hearing on its propriety. As noted by several parties in their reply comments, a separate proceeding has been set for hearing on all Transco's pending advance payment matters,[1] including the tracker containing the contested Mesa advance.

Mesa's interests cited in its request for permission to intervene do not lie in this proceeding, but rather in the separate, consolidated proceeding which concerns advance payments issues. Accordingly, Mesa's petition to intervene out of time in this proceeding will be denied without prejudice to Mesa's petitioning to intervene in Docket Nos. RP74-48 and RP75-3 (AP76-1), et al.

Numerous parties filed reply comments urging the Commission's approval of the settlement agreement and in particular seeking to rebut the objections raised to the proposed interruptible transportation rates and zone differentials.

Prepared direct testimony was filed by several witnesses on these contested issues. On July 25, 1977, a hearing was convened for the purpose of submitting evidence and cross-examining witnesses. However, at the July 25, 1977, phase of the hearing, only testimony related to cost of service issues was cross-examined. Cross-examination of cost allocation and rate design issues, including the issue of interruptible transportation rates, was deferred until September. On September 27, 1977, the cost allocation and rate design phase of the hearing was convened. However, no cross-examination of those issues was held, and the hearing was recessed in order to permit the parties to continue settlement negotiations. On November 1, 1977, the parties requested that the presiding judge certify the subject settlement agreement to the Commission.

The prepared direct testimony on the issue of the proper interruptible transportation rate level reveals a wide variety of recommended rates ranging from less than 22 cents per Mcf, the rate Transco has historically charged, to the staff's recommendation that the rates be increased to 36.45 cents, 42 cents, and 47.48 cents per dth for zones 1, 2, and 3, respectively, including compressor fuel and line loss. In particular, the parties submitting testimony related to the interruptible long-haul transportation service disagree on the proper method of allocating fixed costs related to the transmission of gas.

Transco's witness Quinn recommends that the historic 22 cents per Mcf rate, plus fuel and line loss reimbursement, be continued systemwide for long-haul interruptible transportation rates (R-342). Transco argues that the historic rate represents a fair balancing of the interests of all customers in view of the significantly higher price of the separate gas supplies purchased by its customers pursuant to Order No. 533 in an attempt to ameliorate the effect of the heavy curtailment on the Transco system. Transco argues that the high priority uses of such gas, for which Transco provides transportation service, constrain Transco not to charge a transportation rate which would discourage use of the service.

Staff in its testimony, however, argues that the historic 22 cents per Mcf rate for transporting gas anywhere on Transco's system is inadequate to recover the costs to render that service and is unduly discriminatory and preferential toward Transco's customers (R- 128, 129). Whenever additional volumes of gas are transported, it adds, those volumes utilize the same facilities for the transmission of gas as other volumes and should share in the overall costs. Accordingly, staff objects to interruptible gas being given special consideration and contends that the transportation rate should be based on fully allocated transmission costs. Any additional volumes transported reduce the unit transmission cost to all customers, and the benefit resulting from greater utilization should be flowed back to each customer, asserts staff. Otherwise, a transportation rate which does not compensate for the costs of rendering that service is being subsidized by other customers not using the service. In addition, staff recommends that revenues received by Transco from these transportation services based on fully allocated rates be credited in Transco's PGA filing, when volumes exceed the total volumes estimated in this case (R-252).

Numerous customer groups also sponsored testimony on the proper rate level for interruptible transportation service. The North Carolina companies' witness Clay recommends rates developed on the basis of 40 percent of the fixed costs exclusive of fuel, resulting in charges of 1.1 cents per Mcf per 100 miles, or 21 cents per Mcf in Zone 2 (R-190). Mr. Clay argues that the rate should create an incentive to transport interruptible gas and that staff's assigning 100 percent of fixed costs to such transportation unduly penalizes the most heavily curtailed customers. Brooklyn Union recommends a rate of 25.5 cents per dth which represents a uniform systemwide rate based on Transco's fully allocated jurisdictional costs (R-203). A group of industrial customers of Transco which receive interruptible transportation service from Transco for gas they purchase in accordance with Order No. 533 recommends a rate for such services which includes 50 percent as much of the fixed costs per unit of gas transported as are included in the other rates of the pipeline. Their recommended rate, 23.19 cents per dth using Transco's cost of service, would also be applied systemwide (R-222). Their witness reasons that the pipeline capacity used for transportation of Order No. 533 gas would otherwise be idle and that it would be inequitable and contrary to the policy of Order No. 533 to charge purchasers of such gas a high transportation charge when they have already had to resort to purchasing higher priced natural gas. CNG Transmission Co., in its testimony, recommends that the rates charged by Transco for transporting Order No. 533 gas be set no higher than the historical 22 cents per Mcf level (R-228).

Similarly, with regard to the issue of zone differentials, the underlying record reveals a variety of positions. In its own direct case, Transco proposed no change from the historical zone differentials (R-86). The staff, however, in allocating jurisdictional costs to zones performed a two-step procedure: (1) Those costs related to volumes were allocated on the basis of gas sold and/or transported; and (2) those costs related to transmission of gas were allocated 50 percent on historical revenues and 50 percent on annual Mcf-miles (R-118). Staff states that it allocated 50 percent of the transmission costs on the basis of historical revenues to mitigate the impact of a straight Mcf-mile allocation and to give recognition to the contribution of each zone to the system (R-120). The North Carolina companies oppose maintaining historical zone differentials and favor adopting the Mcf-mile approach entirely in allocating transmission costs to zones (R-176). Brooklyn Union's witness, however, recommends retaining the historical rate zone differentials (R-196), as does the witness sponsoring rebuttal testimony on behalf of Brooklyn Union and seven other Transco customers in Zone 3 (R-271).

It is apparent from our review of the record, which reveals widely divergent testimony with respect to the contested issues under the settlement, that there is not sufficient investigation on the record of the contested issues to permit us to make a reasoned determination. Therefore, we shall establish a limited hearing for the purpose of taking evidence on the justness and reasonableness of the rate levels for emergency and interruptible transportation services and the revised zone differentials proposed in the settlement. Additional direct testimony should show what portion of the fixed transmission costs are allocated to solely transportation customers and what portion to sales customers. In addition, at the hearing parties will be afforded an opportunity to cross-exam those witnesses who have not yet been available for cross-examination on their direct testimony in the record. Any additional direct evidence should be filed on or before 30 days from the date of issuance of this order. Any rebuttal evidence should be served on or before 15 days from the date of service of direct evidence. A limited hearing on the justness and reasonableness of the contested portions of the settlement shall be scheduled by Presiding Judge Grossman. Following such hearing, the record shall be certified directly to the Commission.

The Commission will hold in abeyance consideration of the uncontested portions of the settlement agreement pending receipt of the record related to the limited hearing ordered herein. We are deferring action on the settlement to investigate and seek further evidentiary development of the contested issues addressed in the settlement agreement. However, the Presiding Judge may permit the parties to examine further the issues which have not been opposed in comments on the settlement, if the parties so desire. By holding in abeyance consideration of the uncontested issues, the Commission does not intend to impair any party's right to withdraw from the stipulation and agreement under article XVI, in the event it perceives the Commission's action herein to prejudice that party's position in the settlement.

The Commission finds: (1) It is necessary and appropriate in the public interest that hearing procedures be established for the purpose of receiving evidence and permitting cross-examination on the contested issues of the proposed settlement.

(2) Mesa's petition for leave to intervene out of time in this proceeding should be denied without prejudice to Mesa's seeking intervention in Docket Nos. RP74-48 and RP75-3 (AP76-1), et al.

The Commission orders: (A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Commission's rules of practice and procedure and the regulations under the Natural Gas Act, a public hearing shall be held concerning the justness and reasonableness of the proposed zone rate differentials and the proposed rates for long-haul interruptible transportation service under the settlement.

(B) Any additional direct testimony and exhibits concerning the issues set for hearing shall be filed on or before 30 days from the date of issuance of the order. Any rebuttal testimony and exhibits shall be filed on or before 15 days from the date of service of direct evidence. Presiding Judge Grossman shall establish a date for a limited hearing on those contested issues.

(C) Mesa's petition for leave to intervene out of time is hereby denied without prejudice to Mesa's petitioning to intervene in Docket Nos. RP74-48 and RP75-3 (AP76-1), et al.

(D) The secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission. Commissioner Hall, dissenting, filed a separate statement appended hereto.

KENNETH F. PLUMB,
Secretary.

HALL, COMMISSIONER, DISSENTING

I respectfully dissent.

I believe rejection of the entire proposed settlement would be both fairer and more likely to expedite resolution of this matter.

GEORGE R. HALL,
Commissioner.

[FR Doc. 78-12147 Filed 5-3-78; 8:45 am]

[6740-02]

[Docket No. ER78-323]

TUCSON GAS & ELECTRIC CO.

Filing

APRIL 26, 1978.

Take notice that Tucson Gas & Electric Co. ("TGE") on April 20, 1978, tendered for filing a Colorado-TGE 1978-1980 power sale agreement (the "agreement") dated March 3, 1978, between TGE and Public Service Co. of Colorado ("PSC"). Copies of the filing were served upon PSC on April 18, 1978.

The agreement is proposed to become effective June 1, 1978.

Any person desiring to be heard or to make application with reference to said agreement should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20425, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 12, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ID-1828]

VERNER H. CONDON

Application

APRIL 26, 1978.

Take notice that on April 12, 1978, Verner H. Condon filed an application, pursuant to section 305(b) of the Federal Power Act, to hold the following positions:

Vice president and director, Jersey Central Power & Light Co., public utility.

Vice president and director, Metropolitan Edison Co., public utility.

Any person desiring to be heard of to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before May 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-293]

UNITED GAS PIPE LINE CO.

Application

APRIL 27, 1978.

Take notice that on April 17, 1978, United Gas Pipe Line Co. (Applicant), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP78-293 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Transcontinental Gas Pipe Line Corp. (Transco), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to transport up to 4,000 Mcf of natural gas per day for Transco pursuant to an agreement dated March 17, 1978, between the two companies. The application states that Transco has acquired the right to purchase said volumes of gas from an affiliate, Transcontinental Exploration Co., which would make such sales pursuant to authorization issued in Docket No. CI77-515.

It is indicated that Transco would deliver the subject gas, or cause the subject gas to be delivered to Applicant at Applicant's existing pipeline in the North Hester Field, St. James Parish, La. Applicant states that it would redeliver equivalent volumes of gas to Transco, less an allowance for fuel and unaccounted for gas, at the following locations:

(1) The outlet side of Applicant's existing authorized measuring and regulating station located at Gibson, Terrebonne Parish, La.; or

(2) Other mutually agreeable existing authorized points of interconnection between the pipeline systems of Applicant and Transco located in Applicant's Southern Rate Zone.

It is stated that Transco would pay Applicant for gas transported hereunder an amount per Mcf equal to Applicant's average jurisdictional transmission cost of service in effect from time to time in Applicant's Southern Rate Zone, less any amount included in such average jurisdictional transmission cost of service which is attributable to gas consumed in the operation of Applicant's pipeline system. The current average Southern Zone jurisdictional transmission cost of service, exclusive of the cost of gas consumed in Applicant's operation, is 18.84 cents per Mcf, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be necessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-287]

WESTERN TRANSMISSION CORP.

Application

APRIL 26, 1978.

Take notice that on April 14, 1978, Western Transmission Corp. (Applicant), 2700 Fidelity Union Tower, Dallas, Tex. 75201, filed in Docket No. CP78-287 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Northwest Pipeline Corp. (Northwest), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that Northwest has acquired new sources of gas in certain acreage in Carbon County, Wyo., and that Northwest desires Applicant to transport the subject gas from said acreage to an existing point of interconnection between Colorado Interstate Gas Co's (CIG) and Applicant's pipeline in Sweetwater County, Wyo. It is stated that Northwest has executed an agreement with CIG for the transportation by CIG and exchange with Northwest of the gas to be transported hereunder.

Pursuant to a transportation agreement dated January 26, 1978, between Applicant and Northwest, Northwest would deliver the subject gas under its control to Applicant at a mutually agreeable point on Applicant's pipeline located in Carbon County, Wyo., and at other points on Applicant's pipeline located in Carbon County, Wyo. Applicant states that the gas would then be transported into its existing pipeline and delivered to CIG for the account of Northwest at an existing point of interconnection with CIG's transmission facilities in Sweetwater County, Wyo.

It is stated that Northwest would pay Applicant a transportation charge equal to the differential rate set forth in Applicant's Rate Schedule F between Applicant's gas cost and Applicant's selling price to CIG, which differential rate is currently 12.2 cents per Mcf at 14.65 psia.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

Intergovernmental and Institutional Relations

NATIONAL PETROLEUM COUNCIL

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the National Petroleum Council will meet Thursday, May 25, 1978, at 9 a.m. in the James Forrestal Building Auditorium, 1110 Independence Avenue SW., Washington, D.C.

The purpose of the National Petroleum Council is to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

The agenda for the meeting is as follows:

1. Opening remarks by Chairman of National Petroleum Council—Collis P. Chandler, Jr.
2. Guest speaker—Hon. Cecil D. Andrus, Secretary of the Interior.
3. Remarks and introduction of new members by Hon. James R. Schlesinger, Secretary of Energy.
4. Committee reports as appropriate.
5. Election of officers of the National Petroleum Council.
6. Memorial resolution: John M. Kelly; Harold M. McClure, Jr.
7. Discussion of any other matters properly brought before the National Petroleum Council.

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Georgia Hildreth, Acting Director, Advisory Committee Management, 202-566-9969, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

The transcript of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 2107, DOE, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on May 1, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

[DOE/EIS-0011]

Western Area Power Administration

NEW MELONES 230 KV ELECTRICAL TRANSMISSION LINE, CENTRAL VALLEY PROJECT, CALIFORNIA

Availability of Final Environmental Statement

Notice is hereby given that the U.S. Department of Energy (DOE) has issued a final environmental statment, New Melones 230 kV electrical transmission line, Central Valley project, California, DOE/EIS-0011. The statement was prepared pursuant to implementation of the National Environmental Policy Act of 1969. The draft of this statement, INT-DES-77-33, was issued by the Bureau of Reclamation of the Department of Interior. The responsibility for this activity was transferred to DOE under the Department of Energy Organization Act of 1977.

The statement assesses the anticipated environmental impacts that may be associated with the construction and operation of a 23-mile 230 kV electrical transmission line system from the proposed New Melones switchyard to the Pacific Gas & Electric Co. transmission line near Oakdale, Calif. The proposed route transcends corridors in Calaveras, Stanislaus, and Tuolumne Counties, Calif.

Copies of the final environmental statement are available for public inspection at the DOE locations:

V 4 3 — 8 7

DOE Headquarters, 20 Massachusetts Avenue NW., Washington, D.C.

Department of Energy, Western Area Power Administration, Sacramento Office, 2800 Cottage Way, Room W-117, Sacramento, Calif.

Department of Energy, San Francisco Operations Office, 1333 Broadway, Oakland, Calif.

Department of Energy, Denver Federal Center, Building 67, Room 1220, Denver, Colo.

Copies of the final statement have been furnished to those who commented on the draft statement that was issued by the Department of Interior.

A limited number of single copies are available for distribution by contacting the Western Area Power Administration at the address noted above or the Technical Information Center, P.O. Box 62, Oak Ridge, Tenn. 37380, 615-483-8611, extension 34672. The statement is also available from the National Technical Information Service, Springfield, Va. 22161.

For the Department of Energy.

Dated at Washington, D.C., this 1st day of May 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 890-8; OPP 30108B]

PESTICIDE PROGRAMS

Approval of Application to Register Pesticide Product Containing a New Active Ingredient

On February 27, 1976, notice was given (41 FR 8532) that Fisons Corp., Agricultural Division, 2 Preston Court, Bedford, Mass. 01730, had filed an application (EPA File Symbol No. 10065-L) with the Environmental Protection Agency (EPA) to register the pesticide product Nortron Herbicide containing 19 percent of the active ingredient 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate which was not previously registered at the time of submission. As stated in the February 27 notice, Fisons Corp. proposed that the product be classified for general use.

This application was approved on March 29, 1978 and the product has been assigned the EPA Registration No. 40546-5. As requested by the applicant, the pesticide product has been registered to Fisons Inc. under the product name of Nortron E.C. The company file number will now be 40548, instead of 10065. Nortron E.C. is classified for general use for the selective control of weeds in sugar beets.

A copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St. SW, Washington, D.C. 20460. The data and other scientific information used to support registration, except for the material specifically protected by section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), will be available for public inspection in accordance with section 3(c)(2) of FIFRA, within 30 days after the registration date of March 29, 1978. Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), EPA, 401 M St. SW, Washington, D.C. 20460. Such requests should: (1) Identify the product by name and registration number and (2) specify the data or information desired.

Dated: April 26, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

PESTICIDE PROGRAMS

Filing of Pesticide Petition

Shell Chemical Co., Suite 200, 1025 Connecticut Ave., NW., Washington, D.C. 20036, has submitted a petition (PP 7F2013) to the Environmental Protection Agency (EPA) which proposes that 40 CFR Part 180 be amended by establishing a tolerance for residues of the insecticide Cyano (3-phenoxyphenyl) methyl-4-chloro-alpha-(1-methylethyl) benzeneacetate in or on the raw agricultural commodities cottonseed at 0.2 part per million (ppm), and fat of milk and the fat of livestock at 0.02 ppm. The proposed analytical method for determining residues is by gas liquid chromatographic procedure using an electron capture detector. Notice of this submission is given pursuant to the provisions of section 408(d)(1) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St., SW, Washington D.C. 20460. Inquiries concerning this petition may be directed to Product Manager (PM) 17, Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at 202-426-9425. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: April 25, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

PESTICIDE PROGRAMS

Rebuttable Presumption Against Registration and Continued Registration of Pesticide Products Containing 2,4,5-T; Correction

In FR Doc. 78-10340 appearing at page 17116 in the issue of April 21, 1978, the following corrections should be made:

1. On page 17117, the title of section IV (center column) should be changed from "Registrations and Products Subject to the Notice" to "Rebuttal Submission Procedures;" and

2. On page 17117 in section IV, the following new paragraph should be inserted after the second paragraph:

Evidence submitted in rebuttal should conform to § 162.11(a)(4) rebuttal criteria which are re-stated in section I of this FEDERAL REGISTER notice. Registrants or other persons submitting rebuttal information should provide data and references to support the statements made in their rebuttal submissions, and they should submit reproducible copies of those publications and other materials cited in support of their rebuttal statements, which are not cited in the position document.

Dated: April 25, 1978.

PESTICIDE PROGRAMS

Withdrawal of Pesticide Petition

On May 12, 1976, the Environmental Protection Agency (EPA) gave notice (41 FR 19373) that Shell Oil Co., Suite 200, 1025 Connecticut Avenue NW., Washington, D.C. 20036 had filed a petition (PP 6F1771). This petition proposed the establishemnt of a tolerance limitation of 4.0 parts per million (ppm) for residues of the insecticide Hexakis (2-methyl-2-phenylpropyl)-distannoxane in or on the raw agricultural commodity strawberries.

Shell Oil Co. has withdrawn this petition without prejudice in accordance with the regulations (40 CFR 180.8) pertaining to section 408 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)).

Dated: April 25, 1978.

RESOURCE CONSERVATION COMMITTEE

Change in Meeting Time

The Resource Conservation Committee staff will be holding monthly informal discussion forums so that interested parties may participate in the Committee's study of a wide range of proposals aimed at improving the use of materials in the United States. These informal discussions are in addition to the formal public meetings which have been and will be held by the Committee.

These meetings take place monthly at the Environmental Protection Agency, 401 M Street SW., Washington, D.C. The second open forum will be held May 9, 1978, from 12 to 2 p.m. in room 2814. For further information and to request that an item for discussion be placed on the agenda, contact Susan Mann, Public Participation Liaison at 202-755-9145.

The objective of these sessions is to provide an opportunity for the exchange of ideas relting to resource conservation between interestred parties. As such, the format will be informal and provide for discussion rather than formal statements. No official record will be maintained. Participants are encouraged to propose innovative policy options for discussion.

The Resource Conservation Committee is the interagency committee set up under section 8002(j) of the Resource Conservation and Recovery Act (Pub. L. 94-580). The Committee is chaired by EPA Administrator Douglas Costle and includes the Secretaries of Commerce, Labor, Interior, and Treasury, Council on Environmental Quality, Office of Management and Budget, Council of Economic Advisors, and Department of Energy. The Committee will make recommendations to the President and the Congress later this year on the desirability and possible design of policy options including solid waste disposal charges, resource conservation subsidies, direct product regulation, local solid waste user fees, and other policy proposals. They would like to include the public in the decisionmaking process and are soliciting views on these potential legislative initiatives.

Dated: April 28, 1978.

BARBARA BLUM,
Deputy Administrator, Environmental Protection Agency.

[FRL 891-1]

SCIENCE ADVISORY BOARD STUDY GROUP ON ARSENIC AS A HAZARDOUS AIR POLLUTANT

Open Meeting

Under Pub. L. 92-463, notice is herewith given that a meeting will be held by a Study Group of the Science Advisory Board dealing with Arsenic as a Hazardous Air Pollutant. The meeting will be on May 22-23, 1978, in Room 1112A of Crystal Mall Building No. 2 (1921 Jefferson Davis Highway, Arlington, Va. 22209). The meeting will begin each day at 9:30 a.m.

The purpose of the meeting will be to review Agency documents related to the listing of arsenic as a hazardous air pollutant as required by the Clean Air Act Amendments of 1977. Three documents are involved: a general health assessment document, a cancer assessment document, and a population at risk document. Availability of the documents to the public is through the Criterion Division of the Office of Research and Development of EPA in Washington, D.C.

The meeting is open to the public. Because seating is limited, persons desiring to attend should pre-register by contacting the Study Group Officer, Dr. Joel L. Fisher at 703-557-7710, by close of business on May 15, 1978, to assure a reserved seat. Persons desiring to present written materials to the Study Group should provide eight (8) copies of the materials to the Study Group Officer by close of business May 18, 1978, to assure proper distribution to the Study Group members. Materials should be substantive and documented, but bulky references should be avoided. If other arrangements are needed, please contact the Study Group Officer as soon as possible.

Dated: April 26, 1978.

RICHARD M. DOWD,
Staff Director, Science Advisory Board.

[CC Docket No. 78-50]

TELECOMMUNICATION SERVICES FOR THE DEAF AND HEARING-IMPAIRED

Inquiry; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: Extension of time is being granted for the filing of comments and reply comments in the inquiry into the telecommunication needs of the deaf and hearing-impaired (CC Docket No. 78-50), which was published in the FEDERAL REGISTER of February 21, 1978 (43 FR 7263).

DATES: Comments must be received on or before June 26, 1978, and reply comments must be received on or before July 31, 1978.

ADDRESS: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James K. Smith, Common Carrier Bureau, 632-9342.

Adopted: April 27, 1978.

Released: April 27, 1978.

Order. In the matter of Telecommunication Services for the Deaf and Hearing-Impaired, CC Docket No. 78-50.

1. Petitions have been filed in this proceeding on behalf of the Hearing Industries Association (HIA) and the National Center for Law and the Deaf (NCLD) requesting that the time for filing comments and reply comments be extended from the current dates of May 1, 1978, and June 15, 1978, respectively.

2. HIA states that a meeting is currently scheduled for Wednesday, May 17, 1978, between it and representatives of the telephone industry. It believes that the Commission and the hearing-impaired will be better served if HIA is able to incorporate information drawn from this meeting in its comments, particularly with respect to the telephone/hearing aid incompatibility issue. NCLD requests a two month extension for the filing of comments due to the need to consult with members of the deaf community regarding the issues raised in the inquiry. It also notes that an extension is necessary in order to allow adequate time to publicize the Commission's TTY number in various publications of the deaf community.

3. An extension of time for the filing of comments would appear to be in the public interest. *Accordingly, it is ordered,* Pursuant to § 0.303 of the Commission's rules and regulations, that the time for filing comments and reply comments in this proceeding is extended. Comments may be filed on or before June 26, 1978, and reply comments may be filed on or before July 31, 1978.

WALTER R. HINCHMAN,
Chief, Common Carrier Bureau.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

STATEWIDE PROFESSIONAL STANDARDS REVIEW COUNCIL OF ILLINOIS

Request for Nominations for Public Member Positions on the Council

Nominations are being accepted for public member positions on the Illinois Statewide Professional Standards Review Council. A statewide council is being established because there are now six professional standards review organizations (PSROs) in Illinois.

PSROs review medical care services paid for under the medicare, medicaid, and maternal and child health and crippled children services programs in order to assure that those services are medically necessary, of acceptable quality, and provided at the appropriate level of care.

Statewide councils are established in States that have three or more PSROs to: (1) Help to coordinate PSRO activities and disseminate information among them; (2) assist the Secretary in the development of uniform data gathering and operating procedures; (3) review certain determinations and recommendations made by PSROs as a result of their reviews of medical care; (4) work with doctors and other practitioners and with medical facilities so that they will assure that medical care provided is necessary, appropriate, and of acceptable quality; and (5) assist the Secretary to carry out several of his responsibilities, including the evaluation of the PSROs' review activities and the designation of replacement PSROs when necessary.

Nominees for public representatives are considered on the basis of whether they are:

(1) Knowledgeable about health care provided in Illinois under the medicare, medicaid, and maternal and child health and crippled children services programs;

(2) Willing and able to represent the interests of the public; and

(3) Willing and able to discharge the responsibilities of membership in the Statewide Council.

Special consideration will be given to qualified individuals who are not affiliated with:

(1) Organizations and groups that must, under law, be represented on the Council (PSROs and physician groups); or

(2) Organizations and groups that are represented on the Council's Advisory Group (hospitals and other health care facilities and health care practitioners other than physicians).

Please include biographical data which demonstrate each nominee's qualifications, particularly their knowledge of health care in the State and their willingness and ability to represent the interests of the public. Persons or organizations may submit nominations to:

George R. Holland, Regional Administrator, Health Care Financing Administration, 300 South Wacker Drive, Chicago, Ill. 60606.

After consideration of all nominations received within 60 days of this notice, including nominees of the Governor of Illinois, the Secretary will appoint four public representatives, two of whom will have been recommended by the Governor.

For further information about the nature and functions of the Council and the role of public members in Council activities, please call the Office of the Regional Administrator, HCFA, 312-353-8057.

Dated: April 28, 1978.

ROBERT A. DERZON,
Administrator, Health Care Financing Administration.

[4110-35]

STATEWIDE PROFESSIONAL STANDARDS REVIEW COUNCIL OF INDIANA

Request for Nominations for Public Member Positions on the Council

Nominations are being accepted for public member positions on the Indiana Statewide Professional Standards Review Council. A statewide council is being established because there are now five professional standards review organizations (PSROs) in Indiana.

PSROs review medical care services paid for under the medicare, medicaid, and maternal and child health and crippled children services programs in order to assure that those services are medically necessary, of acceptable quality, and provided at the appropriate level of care.

Statewide councils are established in States that have three or more PSROs to: (1) Help to coordinate PSRO activities and disseminate information among them; (2) assist the Secretary in the development of uniform data gathering and operating procedures; (3) review certain determinations and recommendations made by PSROs as a result of their reviews of medical care; (4) work with doctors and other practitioners and with medical facilities so that they will assure that medical care provided is necessary, appropriate, and of acceptable quality; and (5) assist the Secretary to carry out several of his responsibilities, including the evaluation of the PSROs' review activities and the designation of replacement PSROs when necessary.

Nominees for public representatives are considered on the basis of whether they are:

(1) Knowledgeable about health care provided in Indiana under the medicare, medicaid, and maternal and child health and crippled children services programs;

(2) Willing and able to represent the interests of the public; and

(3) Willing and able to discharge the responsibilities of membership in the Statewide Council.

Special consideration will be given to qualified individuals who are not affiliated with:

(1) Organizations and groups that must, under law, be represented on the Council (PSROs and physician groups); or

(2) Organizations and groups that are represented on the Council's Advisory Group (hospitals and other health care facilities and health care practitioners other than physicians).

Please include biographical data which demonstrate each nominee's qualifications, particularly their knowledge of health care in the State and their willingness and ability to represent the interests of the public. Persons or organizations may submit nominations to:

George R. Holland, Regional Administrator, Health Care Financing Administration, 300 South Wacker Drive, Chicago, Ill. 60606.

After consideration of all nominations received within 60 days of this notice, including nominees of the Governor of Indiana, the Secretary will appoint four public representatives, two of whom will have been recommended by the Governor.

For further information about the nature and functions of the Council and the role of public members in Council activities, please call the Office of the Regional Administrator, HCFA, 312-353-8057.

Dated: April 28, 1978.

ROBERT A. DERZON,
Administrator, Health Care, Financing Administration.

National Institute of Education

INFORMATION AND DATA ACQUISITION ACTIVITY

Collection; Opportunity for Comments

Pursuant to section 406g(2)(B), General Education Provisions Act, notice is hereby given as follows:

The National Institute of Education is proposing an information and data acquisition activity which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to comply with paragraph (g)(2)(B) of the "Control of Paperwork" amendment which provides that each educational agency or institution subject to a request under the collection of information and data acquisition activity and their representative organizations shall have an opportunity, during a 30-day period before the transmittal of the request to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statistics on the collection of information and data acquisition activity.

This data acquisition activity as described below is also subject to review by the HEW Education Data Acquisition Council.

Written comments on the proposed activities are invited. Comments should refer to the form number and must be received on or before June 5, 1978, and should be addressed to the Administrator, National Center for Education Statistics, Attn: Management Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue SW., Washington, D.C. 20202.

Further information may be obtained from the Project Officer, Susan Abramowitz, Finance and Productivity Group, National Institute of Education, 202-254-5500.

Dated: April 28, 1978.

RICHARD S. WERKSMAN,
Forms Clearance Officer, National Institute of Education.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Agency form Number.—NIE 190.

2. Title of proposed activity.—Secondary School Follow-up.

3. Agency/bureau/office.—National Institute of Education.

4. Legislative authority for this activity.—"The Institute shall, in accordance with the provisions of this section, seek to improve education in the United States through concentrating the resources of the Institute on the following priority research and development needs:

(A) Improvement in student achievement in the basic educational skills, including reading and mathematics;

(B) *Overcoming problems of finance, productivity, and management in educational institutions* (emphasis added);

(C) Improving the ability of schools to meet their responsibilities to provide equal educational opportunities for students of limited English-speaking ability, women, and students who are socially, economically, or educationally disadvantaged;

(D) Preparation of youths and adults for entering and progressing in careers; and

(E) Improved dissemination of the results of, and knowledge gained from, educational research and development, including assistance to educational agencies and institutions in the application of such results and knowledge." (Section 405(b)(2) of the General Education Provisions Act as amended, 20 U.S.C. 1221e.)

"In order to carry out the objectives of the Institute, the Director is authorized, through the Institute, to conduct educational research; collect and disseminate the findings of educational research; train individuals in educational research; assist and foster such research, collection, dissemination, or training through grants, or technical assistance to, or jointly financed cooperative arrangements with, public or private organizations, institutions, agencies, or individuals; promote the coordination of such research and research support within the Federal Government; and may construct or provide (by grant or otherwise) for such facilities as he determines may be required to accomplish such purposes." (Section 405(e)(1) of the General Education Provisions Act as amended, 20 U.S.C. 1221e.)

5. Voluntary/obligatory nature of response.—Voluntary.

6. How information to be collected will be used.—The proposed study is a follow-up of the 1977 NIE/NASSP survey of Public Secondary Schools, in which a national stratified random sample of 2,000 high schools were surveyed in order to determine the nature of high school programs, organization, and management. An analysis of principal responses suggests that notions of bureaucracy are inadequate descripters of high school organization; rather high schools are better characterized as high participatory organizations in which formal mechanisms such as rules do not coordinate activity within the school. The purpose of the proposed study is to describe the nature of high school organization from the perspective of actors other than the principal, and to enhance our understanding of the nature of high school organization and work environment.

Research. The apparent inability of traditional rational models to capture high school organizational reality open up new fields of inquiry. To answer this requires the perspectives of teachers, counselors, students, and State officials. Therefore, follow-up studies with reports of these groups will take place in approximately one-third of the 1448 respondent schools. Examples of research questions to be addressed are: What is the nature of the secondary school organization as perceived by teachers, counselors, and students? Under what envoronmental conditions does the school attempt to organizationally control participant behavior or choose to allow occurrence to remain only loosely connected? Under what organizational conditions within the school are staff and students more satisfied or productive? To what extent do teacher, counselor, student, and principal perceptions differ or concur? Does the degree of congruence

V 43 | 87 MY 4 78 UMI

relate to the degree of looseness or tightness of structure, or to levels of satisfaction with school? Answers to such questions can help predict consequences of various reforms proposed for high schools.

Condition of education. Since this study generates information from actors other than principals we can describe teacher, counselor, and student perception of: (a) school organizational structure, (b) instruction and programs at the classroom level, (c) the effect of school rules at the classroom level, (d) participation in school decision making, and (e) SEA—LEA school relations in the implementation of statewide programs in high schools. The composite study and the report of its results will establish a wealth of information about American high schools from the perspectives of those most directly involved.

7. (a) Method of Collection: Mail, (b) time of collection: Fall 1978, (c) frequency: Single time.

8. (a) Type: Classroom teachers, public secondary schools, (b) number: sample (2,000), (c) estimated average person-hours per respondent: 0.5; (a) type: Guidance Counselors, public secondary schools, (b) number: 1,000, (c) estimated average person-hours per respondent: 0.5; (a) type: Students, public secondary schools, (b) number 60,000, (c) estimated average person-hours per respondent: 0.33; (a) type: Sex Education Teachers, public secondary schools, (b) number: 535, (c) estimated average person-hours per respondent: 0.33; (a) type: State Department of Education Official Responsible for Secondary School Programs, (b) number: 50, (c) estimated average person-hours per respondent: 0.33.

9. Information to be collected.—*Classroom teachers;* The survey of teachers will focus on three areas: (1) The discrepancy/congruence between teacher and principal perceptions, as indicated by teacher responses to some of the same items which principals had been asked; (2) technology at the classroom level will be explored, including questions about classroom organization and management, the level of teacher interdependence and teacher-principal contact in the area of instruction; (3) teacher satisfaction with their work environment will be investigated to determine how dependent teacher perceptions are on school structural arrangements.

Counselors. The counselor survey will investigate the extent to which the counselor's role is bureaucratized and the relationship between the counselor's role and school structure. Descriptive information will include the counselor's sources of information and their distribution of information to students and faculty. The nature and content of counselor-faculty communication will be explored. The survey will also inquire into control systems used to monitor or reward counselor behavior.

Students. The aim of the student survey is three-fold: (1) We want to examine student responses to some of the same questions asked of principals, teachers and counselors (this will give us an idea how students perceive school and classroom organization and managemenet and where their perceptions differ from the adults around them); (2) we want to know how student attitudes toward their school and classroom environments with regard to such variables as involvement, affiliation, competition, task orientation, order, organization, rule clarity, and innovation; (3) we will explore the nature of student participation in school life.

Teachers of sex education. 37 percent of the principals in the phase I sample reported that sex or family life education was offered as a separate course in their schools. NIE has been asked by the Office of Special Programs in OE if, in our follow-up work, we would survey these schools to determine the nature of the course offerings, the topics included in them and the clientele they serve. The product resulting from such a study would be a manual describing the state-of-the-art of sex education and family life courses.

State education agencies. The SEA survey will produce information on the variety of State-funded or State-initiated instructional programs operating in secondary schools, and on the nature and extent of State supervision and monitoring of such programs at the district and school levels. This survey will be administered through the National Center for Education Statistics' Fast Response Survey System.

Office of the Assistant Secretary for Health

NATIONAL COMMISSION FOR THE PROTECTION OF HUMAN SUBJECTS OF BIOMEDICAL AND BEHAVIORAL RESEARCH

Meeting

The National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research will meet next on June 9 and 10, 1978, in Conference Room 10, C Wing, Building 31, National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. The meeting will convene at 9 a.m. each day and will be open to the public, subject to the limitations of available space. Topics included in the mandate to the Commission under the National Research Act (Pub. L. 93-348), as amended, including the basic ethical principles that should underlie the conduct of research involving human subjects, the protection of patients receiving health services under programs conducted or supported by the Department of Health, Education, and Welfare, the Special Study (section 203 of Pub. L. 93-348), and other matters identified in the legislative mandate to the Commission, will be the agenda for this meeting.

Written materials of any length may be submitted to the Commission at any time. Requests for information should be directed to Ms. Betsy Singer, Information Officer, 301-496-7776, Westwood Building, Room 125, 5333 Westbard Avenue, Bethesda, Md. 20016.

Dated: April 17, 1978.

MICHAEL S. YESLEY,
Staff Director, National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research.

Office of Education

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Meeting

AGENCY: National Advisory Council on Indian Education.

Action: Notice.

SUMMARY: The notice sets forth the schedule and proposed agenda of the forthcoming meeting of the National Advisory Council on Indian Education. It also describes the functions of the Council. Notice of these meetings is required under the Federal Advisory Committee Act (5 U.S.C. Appendix I, Section 10(a) (2)). This document is intended to notify the general public of their opportunity to attend.

DATES: Full Council meeting: May 19-20, 1978, 9 a.m. to 5 p.m.—Open; and May 21, 1978, 9 a.m. to 3 p.m.—Closed.

ADDRESS: Student Union, Eastern Montana College, 1500 North 30th, Billings, Mont., on May 19-20, 1978, and Warbonnet Flag Inn, 2612 Belknap Avenue, Billings, Mont. 59101, on May 21, 1978.

FOR FURTHER INFORMATION CONTACT:

Stuart A. Tonemah, Executive Director, National Advisory Council on Indian Education, Suite 326, 425 13th Street NW., Washington, D.C. 20004, 202-376-8882.

The National Advisory Council on Indian Education is established under section 442 of the Indian Education Act, Title IV or Pub. L. 92-318 (20 U.S.C 1221g).

The Council is directed to: (1) Submit to the Commissioner of Education a list of nominees for the position of Deputy Commissioner of the Office of Indian Education/OE;

(2) Advise the Commissioner of Education with respect to the administration (including the development of regulations and of administrative practices and policies) of any program in which Indian children or adults participate from which they can benefit, including Title III of the Act of September 30, 1950 (Pub. L. 81-874) and section 810, Title VIII of the Elementary and Secondary Education Act of 1965 (as added by Title IV of Pub. L. 92-318 and amended by Pub. L. 93-380), and with respect to adequate funding thereof;

(3) Review applications for assistance under Title III of the Act of September 30, 1950 (Pub. L. 81-874), section 810 of Title VIII of the Elementary and Secondary Education Act of 1965 as amended and section 314, of the Adult Education Act (as added by Title IV of Pub. L. 92-318), and make recommendations to the Commissioner with respect to their approval;

(4) Evaluate programs and projects carried out under any program of the Department of Health, Education, and Welfare in which Indian children or adults can participate or from which they can benefit, and disseminate the results of such evaluations;

(5) Provide technical assistance to local educational agencies and to Indian educational agencies, institutions, and organizations to assist them in improving the education of Indian children;

(6) Assist the Commissioner of Education in developing criteria and regulations for the administration and evaluation of grants made under section 303(b) of the Act of September 30, 1950 (Pub. L. 81-874) as added by Title IV, Part A, of Pub. L. 92-318;

(7) Submit to Congress not later than June 30 of each year a report on its activities, which shall include any recommendations it may deem necessary for the improvement of Federal education programs in which Indian children and adults participate, or from which they can benefit, which report shall include a statement of the Council's recommendations to the Commissioner with respect to the funding of any such program; and

(8) Be consulted by the Commissioner of Education regarding the definition of the term "Indian," as follows:

SEC. 453 [Title IV, Pub. L. 92-318]. For the purpose of this title, the term "Indian" means any individual who: (1) Is a member of a tribe, band, or other organized group of Indians, including those tribes, bands, or groups terminated since 1940 and those recognized now or in the future by the State in which they reside, or who is a descendant, in the first or second degree, of any such member , or (2) is considered by the Secretary of the Interior to be an Indian for any purpose, or (3) is an Eskimo, or Aleut, or other Alaska Native, or (4) is determined to be an Indian under regulations promulgated by the Commissioner, after consultation with the National Advisory Council on Indian Education, which regulations shall further define the term "Indian."

The May 19-20, 1978, meeting of the National Advisory Coucil on Indian Education will be open to the public. The May 21, 1978, session shall be closed to the public, since the Council members will be reviewing applications that must be held in confidence, under the authority of section 10(d) of the Federal Advisory Committee Act (5 U.S.C. Appendix I) and under the exemptions contained in the Government in the Sunshine Act, section 552b(c) (4) and (6) of Title 5 U.S.C.

The proposed agenda includes:

(1) Action on previous meeting minutes.
(2) Executive Director's report.
(3) Indian education in the proposed new Department of Education.
(4) Fifth annual report.
(5) Reauthorization of Title IV.
(6) Committee and task force reports and discussions.
(7) Special reports from the field.
(8) Review of NACIE's fiscal year 1978 budget.
(9) Plans for future NACIE activities.
(10) Regular Council business.
(11)Review the Indian education applications submitted under section 423(a) of the act as added by Pub. L. 93-380.
(12) Recommendations to the Commissioner with respect to their approval.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on Indian Education. A summary of the closed session shall be available 14 days after the meeting to the public at the Office of the National Advisory Council on Indian Education located at 425 13th Street NW., Washington, D.C. 20004.

Date signed: Washington, D.C., April 27, 1978.

STUART A. TONEMAH,
Executive Director, National Advisory Council on Indian Education.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

BOISE, IDAHO, DISTRICT GRAZING ADVISORY BOARD

Meeting

In accordance with Pub. L. 92-463 and Pub. L. 94-579, notice is given that the Boise District Grazing Advisory Board will meet on June 7, 1978. The meeting will begin at 9 a.m. in the Bannock Room of the Rodeway Inn, 29th and Chinden Boulevard, Boise, Idaho.

The agenda for the meeting will include: (1) A discussion of the function of the Board; (2) the expenditure of range betterment and advisory board funds for range improvements; (3) a review of the current policy and program relating to allotment management plans; (4) election of officers; (5) discussion of the board's future involvement in the allotment management plan program; and (6) the arrangements for the next meeting.

The meeting is open to the public. Interested persons may make oral statements to the board between 2 and 3 p.m. or file written statements for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 230 Collins Road, Boise, Idaho 83702, by June 1, 1978. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproductions (during regular business hours) within 30 days following the meeting.

D. DEAN BIBLES,
District Manager.

Notice of Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

APRIL 24, 1978.

The Department of Agriculture, Forest Service, filed application Serial No. CA 391 on May 10, 1973, for a withdrawal in relation to the following described lands:

SIX RIVERS NATIONAL FOREST

SAYLER ROADSIDE REST

HUMBOLDT MERIDIAN, CALIFORNIA

T. 6 N., R. 6 E.,
Portion of unsurveyed Section 19, described as follows:
Beginning at Corner 4B of Tract 51; then S. 0°14'00" E., 89.07 feet; then N. 69°03'53" W., 246.64 feet; then N. 32°09'30" W., 686.59 feet; then S. 25°20'30" W., 250.00 feet; then S. 40°34'19" W., 471.94 feet; then S. 0°14'00" E., 100.00 feet; then S. 89°46'00" W., 378.00 feet; then N. 56°40'00" W., 74.22 feet; then S. 53°41'43" W., 382.37 feet; then S. 62°40'07" W., 177.56 feet; then S. 49°11'02" W., 127.14 feet; then S. 17°25'56" W., 121.22 feet; then S. 72°34'04" E., 50.00 feet; then S. 17°25'56" W., 200.00 feet; then N. 72°34'04" W., 200.00 feet; then N. 17°25'56" E., 200.00 feet; then S. 72°34'04" E., 50.00 feet; then N. 17°25'56" E., 149.66 feet; then N. 49°11'02" E., 179.56 feet; then N. 62°40'07" E., 177.56 feet; then N. 53°41'43" E., 328.63 feet; then N. 56°40'00" W., 224.72 feet; then S. 51°31'30" W., 425.00 feet; then S. 84°00'00" W., 590.00 feet; then N. 0°00'00", 170.00 feet; then N. 79°00'00" E., 690.00 feet; then N. 51°31'30" E., 510.00 feet; then N. 1°55'30" E., 123.43 feet; then N. 73°54'20" E., 183.85 feet; then N. 51°31'30" E., 129.46 feet; then along a curve to the right with a radius of 690 feet through an angle of 44°56', for a distance of 541.12 feet; then along a nontangent course N. 17°39'40" E., 142.26 feet; then S. 80°11'50" E., 41.53 feet; then S. 7°12'10" E., 175.31 feet; then from a tangent that bears S. 73°59'30" E., along a curve to the right with a radius of 666 feet through an angle of 48°28', for a distance of 563.37 feet; then S. 25°31'30" E., 105.62 feet; then along a curve to the left with a radius of 384 feet through an angle of 33°57', for a distance of 227.54 feet; then S. 59°28'30" E., 75.05 feet; then S. 0°14'00"

V 43 | 87 MY 4 78 UMI

E., 111.08 feet to the point of beginning.

The area described totals 26.71 acreas in Trinity County, Calif.

The applicant desires that the land be made available to the State of California, and developed by the State as a roadside rest adjacent to California State Highway 299.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on December 19, 1973, FR Doc 73-26780, pages 34824 and 34825.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the undersigned, Bureau of Land Management, E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, Calif. 95825, on or before June 5, 1978. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before June 5, 1978.

The above described lands are temporarily segregated from the operation of the United States mining laws (30 U.S.C., Ch. 2), to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications in connection with the pending withdrawal application should be addressed to the undersigned.

JOAN B. RUSSELL,
Chief, Lands Section Branch of Lands and Minerals Operations.

[4310-84]

[CA 5004]

CALIFORNIA

Notice of Proposed Withdrawal and Reservation of Land

APRIL 26, 1978.

The Department of the Army submitted a withdrawal application for filing on March 27, 1978, serial number CA 5004, for the following described lands from location, or entry under all of the general land laws, including the mining laws, subject to valid existing rights:

MOUNT DIABLO MERIDIAN

T. 30 S., R. 43 E.,
Secs. 5 to 8, inclusive;
Secs. 17 to 20, inclusive;
Secs. 29 and 30;
Sec. 31 (except the south half of Lot 2 in the SW quarter);
Sec. 32, All.

The area described aggregates 7,545.80 acres within San Bernardino County, Calif.

The Department of the Army desires the continued use of the land to provide space necessary for air to ground gunnery training of air crews in the basic fundamentals of conventional and nuclear weapons employment at the Cuddeback Lake Air Force Range, Calif.

On or before June 5, 1978, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the undersigned. Notice of the public hearing will be published in the FEDERAL REGISTER giving the time and place of such hearing. The public hearing will be scheduled and conducted in accordance with BLM Manual, section 2351.16.B.

The Department of the Interior's regulations provide that the authorized officer of the BLM will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of assuring that the area sought is the minimum essential to meet the applicant's needs, providing for the maximum concurrent utilization of the lands for purposes other than the applicant's, and reaching agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior, who will determine whether or not the lands will be withdrawn and reserved as requested by the applicant agency. The determination of the Secretary on the application will be published in the FEDERAL REGISTER. The Secretary's determination shall, in a proper case, be subject to the provisions of section 204(C) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2752.

For a period of two years from the date of publication of this notice in the FEDERAL REGISTER, the lands will be segregated from entry as specified above unless the application is rejected or the withdrawal is approved prior to that date. If the withdrawal is approved by the Congress, it will be segregated for a period of 20 years from date of approval, or for such period of time as designated in the Act.

All communications in connection with this proposed withdrawal should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, Calif. 98525.

JOAN B. RUSSELL,
Chief, Lands Section Branch of Lands and Minerals Operations.

Applications

APRIL 25, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for two 4½-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 25 N., R. 12 W.,
Sec. 5, lot 3.
T. 29 N., R. 12 W.,
Sec. 14, E½SW¼ and SW¼SW¼.

These pipelines will convey natural gas across 0.552 of a mile of public lands in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Mineral Operations.

RAWLINS DISTRICT GRAZING ADVISORY BOARD

Meeting

APRIL 25, 1978.

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Rawlins District Grazing Advisory Board will be held on May 31, 1978, at 11 a.m., in the conference room of the Bureau of Land Management Office at 1300 Third Street, Rawlins, Wyo.

The agenda for the meeting will include: (1) A discussion of the function of the Board; (2) the expenditure of range betterment funds for range improvements; (3) a review of the current policy and program relating to allotment management plans including the ongoing and future grazing environmental statement effort; (4) election of officers; (5) discussion of the Board's future involvement in the allotment management plan program, and; (6) the arrangements for the next meeting.

The meeting is open to the public. Interested persons may make oral statements to the Board between 3:30 and 4:30 p.m., or file written statements for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, by May 26, 1978. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the Board meeting will be maintained in the District Office and be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

FRED WOLF,
District Manager.

WYOMING

Application

APRIL 27, 1978.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northwest Pipeline Corp. of Salt Lake City, Utah has filed an application for a right-of-way to construct a 4½-inch pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 24 N., R. 111 W.,
Sec. 8, E½SE¼ and NW¼SE¼;
Sec. 16, N½NW¼, SE¼NW¼, NW¼SE¼ and NE¼SW¼;
Sec. 17, NE¼NE¼ and NW¼SE¼;
Sec. 25, W½E½.

The proposed pipeline will transport natural gas which will tie into the existing gathering systems within T. 24 N., R. 111 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Highway 187 North, P.O. Box 1869, Rock Springs, Wyo. 82901.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

WYOMING

Application

APRIL 24, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northwest Pipeline Corp. of Salt Lake City, Utah, has filed an application for a right-of-way to construct a 4½ inch pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 23 N., R. 111 W.,
Sec. 10, SW¼;
Sec. 14, S½NE¼ and NW¼ SE¼;
Sec. 15, NW¼NW¼;
Sec. 16, N½NE¼ and SW¼NE¼;
Sec. 18, SW¼SE¼;
Sec. 20, SW¼NE¼, NE¼SW¼, NW¼SE¼ and SE¼SE¼;
Sec. 21, S½SW¼, NE¼SW¼ and NW¼SE¼;
Sec. 28, SW¼SE¼;
Sec. 32, S½NE¼;
Sec. 33, NW¼NE¼ and NW¼.

The proposed pipeline will transport natural gas by tying into the existing gathering systems within T. 23 N., R. 111 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Highway 187 North, P.O. Box 1869, Rock Springs, Wyo. 82901.

WYOMING

Application

APRIL 25, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo., filed an application for a right-of-way to construct a 4½-inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 15 N., R. 92 W.,
Sec. 22, S½SE¼;
Sec. 26, NW¼NW¼, S½NW¼, NE¼SW¼ and N½SE¼;
Sec. 27, NE¼NE¼.

The proposed pipeline will transport natural gas from the Sinclair-Hamilton Federal No. 26-1 well located in the SE¼ of section 26, to a point of connection with Colorado Interstate's proposed F13 natural gas pipeline in the SE¼ of section 22, all within T. 15 N., R. 92 W., Carbon County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

Fish and Wildlife Service

ENDANGERED SPECIES PERMIT

Receipt of Application

Applicant: Field Museum of Natural History, Roosevelt Road at Lake Shore Drive, Chicago, Ill. 60605.

The USFWS seeks public comment on the initial development of an Endangered Species "blanket" permit. The purpose of such a permit would be to facilitate the exchange of non-live museum specimens. The permit would authorize the export and import of non-live museum specimens already contained (accessioned) in the collection of a recognized museum. New accessions or loans from foreign institutions would require separate, more restricted and specific Endangered Species permits in order to prevent the unauthorized acquisition of new specimens from the wild.

Previous applications for blanket permits were denied because the applicants were not able to provide all the information required in 50 CFR 17.22 at the time of application. However, the Service recently has developed a method whereby USFWS Agents in the field would validate a copy of the blanket permit when the information is supplied at the time of export. The general permit issued to the museum would be invalid until an Agent has stamped and validated the permit copy. The primary difference between this type of permit and those issued in the past is the waiver of FEDERAL REGISTER publication before each shipment. Instead, the public will be invited to comment on the initial request for the "blanket" permit to export and import non-live museum specimens already accessioned into the museum's collection.

Since this application is the first of its kind to be processed, we are soliciting comments for an extended period of 60 days from the date of publication of this notice. A copy of the proposed permit is included below to indicate the types of conditions and authorizations that are contemplated.

Dated: May 1, 1978.

DONALD G. DONAHOO,
Chief, Permit Branch,
Federal Wildlife Permit Office.

H. This permit is not valid until the information required in Item K is completed by the permittee and the permit has been validated by an agent of the U.S. Fish and Wildlife Service at a port designated in Block 10.

I. To facilitate validation and clearance, the permittee should contact the appropriate SAC office (see enclosed list) prior to export or upon import and advise the SAC of the method of shipment, approximate arrival or exit date, and the country of export.

J. The container in which the authorized wildlife is shipped must be plainly marked giving the names and addresses of the shipper and consignee and an accurate description of the contents including the common and scientific names and number of each within.

K. The following information must be entered on the permit and a validated copy signed in the original shall remain with the shipment as this copy will constitute the import permit upon return of the shipment:

FOR EXPORT

Consignee: (Receiver)		
Species (Scientific Names)	Number of Specimens	Description of Specimens

FOR IMPORT

Consignor: (Sender)		
Species (Scientific Names)	Number of Specimens	Description of Specimens

Documents and other information submitted with this application are available to the public during normal business hours in Room 534, 1717 H Street, NW., Washington, D.C., or by writing to the Director, U.S. Fish and Wildlife Service (WPO), Washington, D.C. 20240.

This application has been assigned file number PRT 2-1565. Please refer to the file number when submitted comments.

APPALACHIAN NATIONAL SCENIC TRAIL ADVISORY COUNCIL

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Applachian National Scenic Trail Advisory Council New England Region will be held at 9 a.m. e.d.t. on May 22, 1978 in the Drake Room at the Hanover Inn, Hanover, N.H.

The purpose of the meeting is to discuss new developments in the Applachian Trail programs in Connecticut, Maine, Vermont, New Hampshire, and Massachusetts. The impact of the passage of the new Appalachian Trail legislation on New England will be reviewed as well as the plans for its implementation. Also, Draft Management Principles for the Trail will be reviewed.

The meeting will be open to the public, although space will be limited. Persons will be accommodated on a first-come, first-served basis. Any person may file with the Council a written statement concerning the matters to be discussed. Persons wishing further information concerning this meeting or who will wish to submit written statements may contact David A. Richie, Project Manager, Appalachian Trail Project Office, National Park Service, Harpers Ferry, W.V. 25425; telephone, 304-535-6371, ext. 278.

Minutes of the meeting will be available for public inspection four weeks after the meeting at the Appalachian Trail Project Office, 596 Fillmore Street, Harpers Ferry, W.V. Copies of the Minutes may also be obtained by writing to the Appalachian Trail Project Office, National Park Service, Harpers Ferry Center, Harpers Ferry, W. Va. 25425.

Dated: April 26, 1978.

DAVID A. RICHIE,
Project Manager, Appalachian Trail, National Park Service.

CHILDS ASSOCIATES, INC. ET AL

Intention to Extent Four Concession Permits

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on June 5, 1978, the Department of the Interior, through the Director of the National Park Service, proposes to extend interim concession permits with the following concessioners authorizing them to continue to provide concession facilities and services for the public at Gateway National Recreation Area, New York, for a period of ten (10) months from January 1, 1978, through October 31, 1978:

Childs Associates, Inc., Robert F. Rogers, Mooringside Marina, Inc., Shields and Dean Concessions, Inc.

It has been determined that the proposed extension of these permits does not have potential for causing significant environmental impact and, therefore, preparation of an environmental assessment is not required.

The foregoing concessioners have performed their obligations under their former permits to the satisfaction of the National Park Service. Each of these permits provides that:

• • • the concessioner hereby relinquishes and waives its right of preference in the renewal or extension of this permit and in the negotiation of a new permit or authorization for (this) operation except that this permit may be extended at the discretion of the Superintendent as may be required to permit completion of planning for the continued operation of the facilities.

The Superintendent has determined that in order to provide continuity of operations and service to the public while prospectuses are issued inviting offers to provide these services beginning in 1979, extensions of permits as noted herein are necessary and in the public interest. However, pursuant to the Act of October 9, 1965, the Secretary is required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before June 5, 1978.

Interested parties should contact the Superintendent, Gateway National Recreation Area, Headquarters Building No. 69, Floyd Bennett Field, Brooklyn, N.Y., 11234, area code 212-252-9150, for information as to the requirements of the proposed extensions.

Dated: April 21, 1978.

DANIEL J. TOBIN, JR.,
Associate Director,
National Park Service.

GOLDEN GATE NATIONAL RECREATION AREA ADVISORY COMMISSION

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of Golden Gate National Recreation Area Advisory Commission will be held at 7:30 p.m. (PDS) on Tuesday, May 23, 1978, at Golden Gate National Recreation Area Headquarters (Visitor Center), Building 201, Fort Mason, San Francisco, Calif.

The Advisory Commission was established by Pub. L. 92-589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service system in Marin and San Francisco Counties.

Members of the Commission are as follows:

MY 4 78
UMI

V 43 — 87

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Secretary
Mr. Ernest Ayala
Mr. Richard Bartke
Mr. Fred Blumberg
Ms. Daphne Greene
Mr. Peter Haas, Sr.
Mr. John Jacobs
Ms. Gimmy Park Li
Mr. Joseph Mendoza
Mr. John Mitchell
Mr. Merritt Robinson
Mr. Jack Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The major agenda items will be presentation of the Fort Mason redesign plan and updates by Advisory Commission Committees on Fort Miley, Fort Mason, Pet Policy, Point Reyes field trip, Trails, and Transportation.

This meeting is open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing to receive further information on this meeting or who wish to submit written statements may contact Lynn H. Thompson, General Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, Calif. 94123, telephone 415-556-2920.

Minutes of the meeting will be available for public inspection by June 22, 1978, in the Office of the General Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, Calif.

Date: April 27, 1978.

STANLEY T. ALBRIGHT,
Acting Regional Director,
Western Region.

MANAGEMENT POLICIES

Availability

The Management Policies of the National Park Service have been reviewed during the past year and revised to incorporate changes called for by recent legislation and the establishment of the Heritage Conservation and Recreation Service. The Service has also discontinued use of management categories in its administration of the Park System, and this is reflected throughout the policies. Even though still in loose-leaf format, the entire document was reprinted this year to accommodate these changes.

The Management Policies provide guidance to Service managers, and deals with the National Park Service's role in preserving and managing the Nation's natural and cultural resources. The table of contents is as follows: (attached).

Copies of the Management Policies can be obtained after April 30 by writing the nearest regional office:

Mid-Atlantic Regional Office, National Park Service, 143 South Third St., Philadelphia, Pa. 19106.
Midwest Regional Office, National Park Service, 1709 Jackson Street, Omaha, Nebr. 68102.
North Atlantic Regional Office, National Park Service, 15 State Street, Boston, Mass. 02109.
Pacific Northwest Regional Office, National Park Service, 601 Fourth and Pike Building, Seattle, Wash. 98101.
Rocky Mountain Regional Office, National Park Service, 655 Parfet Street, P.O. Box 25287, Denver, Colo. 80225.

ROCKY MOUNTAIN OUTFITTERS, INC.

Intention to Negotiate Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on June 5, 1978, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Rocky Mountain Outfitters, Inc., authorizing it to provide concession facilities and services for the public at Glacier National Park for a period of five (5) years from January 1, 1978, through December 31, 1982.

An assessment of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the environment, and that it is not a major Federal action having a significant impact on the environment under the National Environmental Policy Act of 1969. The environmental assessment may be reviewed in the Office of the Superintendent, Glacier National Park, West Glacier, Mont. 59936.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1977, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants Rocky Mountain Outfitters, Inc., as the present satisfactory concessioner, the right to meet the terms of responsive offers for the proposed new contract and a preference in the award of the contract, if, thereafter, the offer of Rocky Mountain Outfitters, Inc., is substantially equal to others received. The Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before June 5, 1978.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

Dated: April 21, 1978.

DANIEL J. TOBIN, Jr.
Associate Director,
National Park Service.

NATIONAL COMMISSION ON EMPLOYMENT AND UNEMPLOYMENT STATISTICS

PUBLIC HEARING

Notice is hereby given that the National Commission on Employment and Unemployment Statistics will hold a public hearing on May 23, 1978, in Room 3560, 1515 Broadway, New York, N.Y. 10036.

The National Commission on Employment and Unemployment Statistics was established under section 13 of the Emergency Jobs Program Extension Act of 1976, Pub. L. 94-444. Its purpose is to advise the President and the Congress on reliable and comprehensive measurements of employment and unemployment by examining the procedures, concepts and methodology involved in employment and unemployment statistics, and suggesting ways and means of improving them.

Both producers and users of employment and unemployment statistics are invited to testify regarding the adequacy of current concepts and methods involved in producing these statistics for the nation, regions, states, and local areas. Testimony is invited on the usefulness of current statistics to policymaking and the specific needs of users.

The hearing will begin at 9:30 a.m. The public is invited to attend. Persons desiring to testify should submit a written request at least seven days before the hearing date. Written statements should be provided 24 hours in advance of the scheduled appearance. These materials and additional questions regarding the hearings or the National Commission on Employment and Unemployment Statistics may be addressed to:

Marc Rosenblum, Staff Economist, National Commission on Employment and Unemployment Statistics, 2000 K Street NW., Suite 550, Washington, D.C. 20006.

Signed at Washington, D.C., this 27th day of April 1978.

SAR A. LEVITAN,
Chairman.

[7590-01]

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS; SUBCOMMITTEE ON THE VERMONT YANKEE NUCLEAR POWER STATION

Meeting

The ACRS Subcommittee on the Vermont Yankee nuclear power station will hold a meeting on May 19, 1978, at the Governor Hunt House, Governor Hunt Road, Vernon, Vt., to review the operating history and fuel performance.

In accordance with the procedures outlined in the FEDERAL REGISTER on October 31, 1977, page 56972, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the designated Federal employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

FRIDAY, MAY 19, 1978, 10 A.M. UNTIL THE CONCLUSION OF BUSINESS

The Subcommittee may meet in executive session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the executive session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC staff, the Vermont Yankee Nuclear Power Corp., and their consultants, pertinent to this review.

The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

In addition, it may be necessary for the Subcommittee to hold one or more closed sessions for the purpose of exploring matters involving proprietary information. I have determined, in accordance with subsection 10(d) of Pub. L. 92-463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the designated Federal employee for this meeting, Mr. Elpidio G. Igne, telephone 202-634-1920, between 8:15 a.m. and 5 p.m., e.s.t.

Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vt. 05301.

Dated: April 28, 1978.

JOHN C. HOYLE,
Advisory Committee
Management Officer.

[Docket No. 50-10]

COMMONWEALTH EDISON CO.

Granting of Relief From ASME Section XI Inservice Inspection (Testing) Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME code, section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Commonwealth Edison Co. The relief relates to the inservice inspection (testing) program for the Dresden nuclear power station, unit No. 1 (the facility) located in Grundy County, Ill. The ASME code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of its date of issuance.

The relief is granted, on an interim basis, pending completion of our detailed review, from those inservice inspection and testing requirements of the ASME Code that the licensee has determined to be impractical within the limitations of design, geometry, and materials of construction of components, because compliance would result in hardships and unusual difficulties without a compensating increase in the level of quality or safety.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief. Prior public notice of this action was not required since the granting of this relief from ASME Code requirements does not involve a significant hazards consideration.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see: (1) The request for relief dated November 2, 1977, and (2) the Commission's letter to the licensee dated April 24, 1978.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Morris Public Library, 604 Liberty Street, Morris, Ill. 60451. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 24th day of April 1978.

For The Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[7590-01]

[Docket Nos. 50-329 and 50-330]

CONSUMERS POWER CO.

Availability of Applicant's Environmental Report; Consideration of Issuance of Facility Operating Licenses; and Opportunity for Hearing

Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has docketed the remainder of the application for facility operating licenses from Consumers Power Co. (the applicant) which would authorize the applicant to possess, use, and operate two light water nuclear reactors (the facilities), located on the applicant's site in Midland County, Mich. Each unit would operate at a core power level of 2,452 megawatts thermal with a combined output of approximately 1,300 megawatts electric.

In accordance with an exemption granted the applicant by the Commission on November 10, 1977, and pursuant to the National Environmental Policy Act of 1969, and the regulations of the Commission in 10 CFR Part 51, the applicant tendered his Environmental Report on March 1, 1978. The Environmental Report was docketed on April 14, 1978. The portion of the application docketed by the Commission on November 17, 1977, consisted of the Final Safety Analysis Report, which is currently undergoing review. A notice of receipt of this portion of the application was published in the FEDERAL REGISTER on March 3, 1978 (43 FR 8870). The Environmental Report, which discusses environmental considerations related to the proposed operation of the facility is being made available at the Office of Intergovernmental Relations, Department of Management and Budget, Lewis Cass Building, Lansing, Mich., for distribution to other State agencies that may wish to review the document.

After the Environmental Report has been analyzed by the Commission's Director of Nuclear Reactor Regulation or his designee, a Draft Environmental Statement will be prepared by the Commission's staff. Upon preparation of the Draft Environmental Statement, the Commission will cause to be published in the FEDERAL REGISTER a notice of availability of the draft statement, requesting comments from interested persons on the draft statement. Upon consideration of comments submitted with respect to the Draft Environmental Statement, the staff will prepare a Final Environmental Statement, the availability of which will be published in the FEDERAL REGISTER.

The Commission will consider the issuance of facility operating licenses to Consumers Power Co. which would authorize the applicant to possess, use and operate the Midland Plant, Units 1 and 2, in accordance with the provisions of the license and the technical specifications appended thereto, upon: (1) The completion of a favorable safety evaluation on the application by the Office of Nuclear Reactor Regulation; (2) the completion of the environmental review required by the Commission's regulations in 10 CFR Part 51; (3) the receipt of a report on the applicant's application for facility operating licenses by the Advisory Committee on Reactor Safeguards; and (4) a finding by the Commission that the application for the facility licenses, as amended, complies with the requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations in 10 CFR Chapter I. Construction of the facilities was authorized by Construction Permits Nos. CPPR-81 and CPPR-82, issued by the Atomic Energy Commission on December 15, 1972. The applicant anticipates that construction of Unit 1 will be completed by October 1, 1982, and Unit 2 by October 1, 1981.

Prior to issuance of any operating licenses, the Commission will inspect each facility to determine whether it has been constructed in accordance with the application, as amended, and the provisions of the construction permits. In addition, the licenses will not be issued until the Commission has made the findings reflecting its review of the application under the Act and has concluded that the issuance of the licenses will not be inimical to the common defense and security or to the health and safety of the public. As a condition to the licenses, the applicant will be required to execute an indemnity agreement as required by Section 170 of the Act and 10 CFR Part 140 of the Commission's regulations.

On or before June 5, 1978, the applicant may file a request for a hearing with respect to issuance of the facility operating licenses and any person whose interest may be affected by this proceeding may file a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed within the time prescribed in this notice, the Commission or an Atomic Safety and Licensing Board,

M Y 4 — 7 8

UMI

designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary of the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

A petition for leave to intervene must be filed under oath or affirmation in accordance with the provisions of 10 CFR § 2.714. As required in 10 CFR § 2.714, a petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how the interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any other which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularly both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by June 5, 1978. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Michael I. Miller, Esq., Isham, Lincoln & Beale, Suite 4200, One First National Plaza, Chicago, Ill. 60670, attorney for the applicant.

A petition for leave to intervene which is not timely will not be granted unless the Commission, the presiding officer, or the Atomic Safety and Licensing Board designated to rule on the petition determines that the petitioner has made a substantial showing of good cause for failure to file on time and after considering those factors specified in 10 CFR § 2.714(a)(1)-(4) and § 2.714(d).

For further details pertinent to the matters under consideration, see the application for the facility operating licenses dated August 29, 1977, and the applicant's Environmental Report dated March 1, 1978, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Grace Dow Memorial Library, 1710 West St. Andrews Road, Midland, Mich. 48640. As they become available, the following documents may be inspected at the above locations: (1) The Safety Evaluation Report prepared by the Office of Nuclear Reactor Regulation; (2) the Draft Environmental Statement; (3) the Final Environmental Statement; (4) the report of the Advisory Committee on Reactor Safeguards (ACRS) on the application for facility operating licenses; (5) the proposed facility operating licenses; and (6) the technical specifications, which will be attached to the proposed facility operating licenses.

Copies of the proposed operating licenses and the ACRS report, when available, may be obtained by request to the Director, Division of Project Management, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the Commission's staff Safety Evaluation Report and Final Environmental Statement, when available, may be purchased at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Va. 22161.

Dated at Bethesda, Md., this 17th day of April 1978.

For the Nuclear Regulatory Commission.

STEVEN A. VARGA,
Chief, Light Water Reactor Branch 4, Division of Project Management.

[7590-01]

[Project No. M-4]

EXTENSION OF COMMENT PERIOD

Draft Generic Environmental Impact Statement on Handling and Storage of Spent Light Water Power Reactor Fuel

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice has been given (March 24, 1978, 43 FR 12402) that a Draft Generic Environmental Impact Statement prepared by the Commission's Office of Nuclear Material Safety and Safeguards on Handling and Storage of Spent Light Water Power Reactor Fuel is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. Notice of the Commission's intent to prepare such a statement was published in the FEDERAL REGISTER on September 16, 1975 (40 FR 42801). The Draft Environmental Statement has also been made available at the State Clearinghouses and local Public Document Rooms. Requests for single copies of the Draft Environmental Statement (identified as NUREG-0404) should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control.

In response to numerous requests that the comment period for the Draft Environmental Statement be extended beyond the present date of May 8, 1978, the period is hereby extended to June 8, 1978.

Comments on the Draft Environmental Statement from interested persons should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Fuel Cycle and Material Safety.

Dated at Silver Spring, Md., this 28th day of April, 1978.

For the Nuclear Regulatory Commission.

RICHARD W. STAROSTECKI,
Chief, Fuel Reprocessing and Recycle Branch, Division of Fuel Cycle and Material Safety.

INTERNATIONAL ATOMIC ENERGY AGENCY DRAFT MANUAL OF GUIDANCE

Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is sponsoring the development of a manual of guidance for use by government officials who are responsible for preparing plans to cope with the offsite consequences of radiation accidents at nuclear facilities.

An IAEA Advisory Group has been meeting and preparing drafts of the manual since 1975. Mr. Harold E. Collins of the Nuclear Regulatory Commission is the Chairman of the Advisory Group. He has been assisted by Messrs. F. Raymond Zintz, Department of Energy, and Joe E. Logsdon, Environmental Protection Agency; and by representatives from Austria, Belgium, Denmark, Egypt, France, Hungary, Federal Republic of Germany, Israel, Netherlands, Soviet Union, Switzerland, United Kingdom, and the Nuclear Energy Agency of the Organization for Economic Cooperation and Development.

The IAEA staff has produced the third draft of the manual of guidance based on work of the Advisory Group. This draft has been sent to the Chair-

V 43 — 87

man of the Advisory Group and the chairmen of four Advisory Group working parties for review. As part of their review of the draft, the Chairman and the other U.S. representatives of the Advisory Group want to consider comments from Federal, State, and local government agencies, and private organizations and individuals.

For that reason, we are asking for comments from interested agencies, individuals and groups on AG-124, Planning for Offsite Response to Radiation Accidents in Nuclear Facilities, International Atomic Energy Agency, Third Revised Draft, February 1978. Comments should be forwarded to Mr. Harold E. Collins, Assistant Director for Emergency Preparedness, Office of State Programs (MS 7109), Nuclear Regulatory Commission, Washington, D.C. 20555, by June 1, 1978.

Copies of the document are available for review at the Nuclear Regulatory Commission Public Document Room, 1717 H Street NW., Washington, D.C. Single copies can be obtained from Mr. Collins, telephone 301-492-7210.

Dated at Bethesda, Md., this 28th day of April 1978.

For the Nuclear Regulatory Commission.

ROBERT G. RYAN,
Director,
Office of State Programs.

[7590-01]

[Docket No. 50-277/278]

PHILADELPHIA ELECTRIC CO.

Granting an Exemption From the Requirements for Reporting of Defects and Noncompliance

The U.S. Nuclear Regulatory Commission (the Commission) has granted a temporary exemption from the requirements of section 21.31 of 10 CFR 21, "Reporting of Defects and Noncompliance," to Philadelphia Electric Co. (the Licensee).

This exemption relates to the procuring of "Agastat" relays, terminal blocks and locking springs, from the Control Product Division of the Amerace Corp. for installation at Peach Bottom Units 2 and 3. This exemption is effective as of the date of its issuance and will expire on January 27, 1979. The basis for this exemption is set forth in the letter to the licensee granting the exemption dated April 27, 1978.

The Commission has determined that an exemption is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest.

The Commission has determined that the exemption granted neither increases the probability or consequences of accidents previously considered nor decreases safety margins and that, therefore, it does not involve a significant hazards consideration. Thus, prior public notice of the exemption was not required.

The Commission has determined that the granting of this exemption will not result in any significant environmental impact and that pursuant to 10 CFR section 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the licensee's request dated March 22, 1978, as supplemented March 28, 1978, and (2) the Commission's letter to the licensee dated April 27, 1978.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pa. 17126. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 27th day of April 1978.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

RADIATION TECHNOLOGY, INC.

Order Postponing Evidentiary Hearing

Radiation Technology, Inc. (Licensee), Lake Denmark Road, Rockaway, N.J. 07866, has through its President requested a postponement of one day of the evidentiary hearing scheduled to convene on May 3 to May 4, 1978, at the same time and place. The Regulatory Staff has no objection.

Wherefore, it is ordered, In accordance with the Atomic Energy Act, as amended, and the rules of practice of the Nuclear Regulatory Commission, that the evidentiary hearing scheduled to convene on May 3, 1978, is postponed one day and the evidentiary hearing in this proceeding shall convene at 9 a.m. on Thursday, May 4, 1978, in Courtroom No. 4 in the Morris County Courthouse, Morristown, N.J.

Issued: May 2, 1978, Bethesda, Md.

For the Nuclear Regulatory Commission.

SAMUEL W. JENSCH,
Administrative Law Judge.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 78-18]

STATISTICAL REPORT; SAFETY RECOMMENDATIONS; AND RESPONSES

Printed copies of the following report have recently been made available to the public by the National Transportation Safety Board:

Aircraft Accident Reports Brief Format, U.S. Civil Aviation, Issue No. 1 of 1977 Accidents (Report No. NTSB-BA-78-1).—This publication contains selected aircraft accident reports, in brief format, occurring in U.S. Civil aviation operations during calendar year 1977. The 897 General Aviation accidents contained in this publication represent a random selection. The brief format presents the facts, conditions, circumstances, and probable cause(s) of each accident. Additional statistical information is tabulated by type of accident, phase of operation, kind of flying, injury index, aircraft damage, conditions of light, pilot certificate, injuries, and casual factors.

NOTE.—The brief reports of accidents in this publication contain essential information; more detailed data may be obtained from the original factual reports on file in the Washington Office of the Safety Board. Upon request, factual reports will be reproduced commercially at an average cost of 25 cents per page for printed matter, $1.50 per page for black-and-white photographs, and $4 per page for color photographs, plus postage. Minimum reproduction charge is $1; an additional $4 user-service charge will be made for each order. Requests should be directed to the Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. The requester is asked to provide this information concerning the accident: (1) Date and place of occurrence, (2) type of aircraft and registration number, and (3) name of pilot.

Copies of Issue No. 1 may be purchased from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151.

SAFETY RECOMMENDATIONS

AVIATION

A-78-21-and 22.—During its investigation of the crash of a United Airlines cargoliner near Kaysville, Utah, on December 18, 1977, the Safety Board found that the cockpit voice recorder (CVR) had been inoperative during the entire flight. As a result, valuable accident-related information was lost. Further investigation revealed that the CVR unit, a Sundstrand Data Control, Inc., model V-557, had been inoperative for several days before the accident. Flightcrews are required to perform a preflight functional check; however, the Safety Board believes that current preflight testing procedures do not insure satisfactory operation of the CVR unit. Therefore, on April 13, the Safety Board recommended that the Federal Aviation Administration:

Review the adequacy of current cockpit voice recorder preflight testing procedures to assure satisfactory system operation. (Class II—Priority Action) (A-78-21)

Review the reliability of cockpit voice recorder units to assure that the mean time between failure is not excessive. (Class II—Priority Action) (A-78-22)

A-78-23 through 26.—On March 11, 1977, an Aerospatiale SA-318C Alouette II helicopter was involved in an accident near Coldfoot, Alaska. The Safety Board's investigation of the accident revealed a design feature of the cyclic grip which may compromise a pilot's ability to handle certain emergency situations. On April 13, the Board recommended that FAA:

Expand its proposed research plans on "Cockpit Human Factors Problems," particularly in the area of Human Capabilities and Limitations and Displays and Controls, to include problems peculiar to helicopter controls and displays. (Class II—Priority Action) (A-78-23)

Amend 14 CFR 133.23(c)(6) to require the pilot to demonstrate his ability to actuate the quick-release switch in normal and simulated emergency operations. (Class II—Priority Action) (A-78-24)

Issue an Advisory Circular advising rotorcraft external load operators that, whenever the cargo quick-release switch location or function on the pilot's primary control (usually the cyclic grip) is modified, the operators again have their pilots demonstrate their ability to actuate the switch in normal and simulated emergency operation without having to assume an unusual finger or thumb position which may induce unwanted control inputs. (Class II—Priority Action) (A-78-25)

Delete 14 CFR 133.23(d) which permits the Administrator to waive pilot test of skill. (Class II—Priority Action) (A-78-26)

A-78-30 through 32.—On September 22, 1976, a Grumman Gulfstream II, N500J, operated by Johnson & Johnson, Inc., crashed while making an instrument landing system approach to Ingalls Field Airport, Hot Springs, Va. During its investigation, the Safety Board discovered that the Johnson & Johnson flight department did not have, nor was it required to have, a flight operations manual which detailed the operational, administrative, and cockpit procedures which Johnson & Johnson required its flightcrew members to follow. Johnson & Johnson pilots conformed to well known, unwritten company procedures during the conduct of their flights. In view of the above, on April 24, the Safety Board recommended that FAA:

Develop the criteria to determine which corporate/executive flight departments are required to operate under formal flight operations manuals. (Class II—Longer Term Action) (A-78-30)

Amend 14 CFR Part 91 to require that corporate/executive flight departments which fall in certain categories be required to maintain and operate under a flight operations manual. (Class III—Longer Term Action) (A-78-31)

Amend 14 CFR Part 91 to establish the criteria for flight operations manuals for those corporate/executive flight departments which are required to have manuals. (Class III—Longer Term Action) (A-78-32)

A-78-33.—On August 25, 1977, the left main landing gear retracted on a Cessna 402, N9900F, as the aircraft turned off the runway onto a taxiway at Clovis Municipal Airport in New Mexico. The aircraft was owned and operated by Crown Aviation, Inc., an air taxi/commercial operator. Although there was no fire and the pilot and passengers were not injured, the aircraft was damaged substantially.

Because of the circumstances of this accident and the potential for future fatal accidents, the Safety Board, on April 27, recommended that the FAA:

Issue an Airworthiness Directive making the provisions of Cessna Service Letter ME 76-2 mandatory for 300/400 Series aircraft. (Class I—Urgent Action) (A-78-33)

PIPELINE

P-78-15, 16 and 17.—On October 14, 1977, an explosion and fire destroyed a two-family house at 4930 West Cortez Street in Chicago, Ill. One person was killed, three persons were injured, and two adjacent houses were damaged. Natural gas had entered the building through a broken service head adapter which was used to connect inserted plastic service lines to the riser and meter set on the inside of the building. The adapter was broken when a contractor, employed by the city to remove street curbs, pulled the 1¼-inch, plastic-encased service line operating at ¼ psig.

As a result of its investigation of this accident, the Safety Board on April 25, made recommendations to the Peoples Gas Light & Coke Co., and to the Mayor of Chicago, respectively.

To the Peoples Gas Light & Coke Co.:

Instruct its employees to respond immediately to reports of gas leaks that require prompt action to protect life and property and monitor its employees' response time to assure that these leaks reports receive immediate attention. (Class I—Urgent Action) (P-78-15)

Instruct its supervisors in each zone to schedule their servicemen so that emergencies can be handled promptly at all times. (Class I—Urgent Action) (P-78-16)

To the Mayor of Chicago:

Instruct its employees who monitor work of contractors performing construction for the city, to ascertain that the contractor has notified utilities of planned construction through use of the one-call notification system. (Class I—Urgent Action) (P-78-17)

RAILROAD

R-78-19 through 22.—On April 6, the Safety Board concluded a 3-day en banc hearing on railroad derailments and the carriage of hazardous materials. The hearing was prompted by the increasing number of derailments nationwide, especially those involving the release of hazardous materials from DOT 112A/114A "jumbo" tank cars. Forty-eight witnesses from the railroad industry, tank car builders and operators, shippers, other Federal agencies, and the public testified at the hearing.

Evidence at the hearing indicated that because tank car owners do not now bear the costs of accidents, they have no incentive to make their cars safe. The Safety Board believes that the Department of Transportation, in cooperation with the responsible regulatory agencies, should work to devise strategies to make safety profitable; and therefore, on April 24, recommended that the Department of Transportation:

Require that shelf couplers be installed on all DOT 112A/114A jumbo tank cars no later than December 25, 1978. (Class I—Urgent Action) (R-78-19)

Require that approved headshields be installed on all DOT 112A/114A tank cars by December 25, 1978. (Class I—Urgent Action) (R-78-20)

Require that thermal insulation be installed as soon as possible, but in no event later than the original deadline of January 1, 1982, contained in the Materials Transportation Bureau's Docket HM-144. (Class II—Priority Action) (R-78-21)

Assist the responsible Federal regulatory agencies to develop economic regulations that provide a strong economic incentive to install tank car safeguards quickly and a strong economic disincentive for delay. (Class I—Urgent Action) (R-78-22)

RESPONSES

A-76-105 through 115.—A Board letter of April 21 states that these recommendations were forwarded to the FAA as a result of its special study titled "General Aviation Accidents Involving Aerobatics, 1972-1974." Specifically, recommendations A-76-109, 114, and 115 discussed the problems associated with structural failures attributed to aerobatic maneuvers. FAA, on November 19, 1976, advised the Board that the failure rate did not justify action at that time.

The Board believes that the importance of the recommendations based on its study, and two studies on this subject conducted by NASA, merit further indepth review by the FAA, and therefore, requests that FAA reconsider its previous decision concerning these three recommendations.

M-77-7.—A Board letter of February 3, is a followup to the Commerce De-

MY 4 78
UMI

V 43 | 87

partment's letter of July 22, 1977. Recommendation M-77-7 asked the Department of Commerce to establish guidelines to provide for the use, at the earliest possible date, of Marine Radar Interrogation Transponders (MRIT) and Collision Avoidance Systems (CAS) by vessels that are navigating by radar on inland waters.

The Safety Board feels strongly that the evaluation of the use of existing CAS installations is necessary to identify problems that have been observed in the CAS equipment, its interface with other shipboard equipment, and in its operational patterns. The board also states that, even though MRIT may be used to augment the performance of both CAS and Vessel Traffic Systems (VTS), a conceptual plan or guide for the integrated use of these systems must be established before the development of MRIT can go further. The Board believes the Maritime Administration does have the proper authority to develop such a conceptual plan for MRIT use, is hopeful that the Maritime Administration will take the lead in developing these much needed guidelines, and awaits their further response.

P-77-24 and 25.—A Board letter of January 24 to the Connecticut Natural Gas Corp. acknowledges their prompt reply of October 31, 1977, to these recommendations, which resulted from the natural gas explosion at Greenwich, Conn., on May 25, 1977. The Board requests a copy of the revised written procedures, implemented by the Connecticut Natural Gas Corp., that require a complete review of existing records prior to beginning work and a previous determination as to whether or not a pipe is a gas carrier.

R-76-16.—In its letter of January 3, 1977, the Massachusetts Bay Transportation Authority (MBTA) responds to this recommendation by the Safety Board endorsing the recommendations made by the MBTA's investigating committee after investigation of the Red Line Collision in Boston on August 1, 1975. The Committee recommended corrections in each area which it determined to be causal in this accident.

MBTA states that dispatchers, master control operators, train starters, inspectors, motormen, guards, and signal maintainers have received reinstruction on operating rules, procedures, radio communications, equipment, emergency procedures, and flagging, as they relate to their specific areas. MBTA further states, among other responses to these recommendations, that the chief dispatcher constantly defines the authority and responsiblities of dispatchers to dispatchers and master control operators; instructors periodically check Rapid Transit personnel on their knowledge of rules, procedures and monitor their performance; flagmen from the Transportation Department flag for signal maintainers; and signal clerks record the actual time a call for a defective signal is received.

MBTA further states that, in the area of communications, attenuation and propagation tests were conducted and train radio reception and transmission is now excellent; and a video tape was prepared and is being used by the Training Department to train all personnel involved in the use of radio communications. New cars on order will be accessible from outside the cars, MBTS states; however, a means of opening side doors from outside the car has not been accomplished on existing equipment. Also, MBTA states that their rule book entitled "Rules for Rapid Transit and Other Employees" has been reviewed and updated.

NOTE.—The above notice summarizes Safety Board Documents recently released. The Board's safety recommendation letters in their entirety are available to the general public; single copies are obtainable without charge.

All requests to the Board for copies must be in writing, identified by the recommendation number and the date of publication of this notice in the FEDERAL REGISTER. Address requests to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

OFFICE OF MANAGEMENT AND BUDGET

TRANSFER OF RESPONSIBILITY FOR CERTAIN STATISTICAL STANDARDS FROM OMB TO COMMERCE

Notice is hereby given that implementation of certain responsibilities under section 103 of the Budget and Accounting Procedures Act of 1950 (64 Stat. 834) having been transferred from the Office of Management and Budget (OMB) to the U.S. Department of Commerce pursuant to Executive Order 12013, the following OMB Circulars are discontinued:

1. OMB Circular No. A-39, "Providing of Statistical Information to Intergovernmental Organizations";
2. OMB Circular No. A-46, "Standards and Guidelines for Federal Statistics";
3. OMB Circular No. A-65, "Reports to the Department of Commerce on International Transactions"; and
4. OMB Circular No. A-91, "Prompt Compilation and Release of Statistical Information."

The standards associated with these circulars will now be enforced by the Department of Commerce.

A corresponding submission including the statistical policy standards, now called Statistical Policy Directives, issued by the Department of Commerce, appears in today's FEDERAL REGISTER.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

CERTAIN IMPORTED CERAMIC TABLEWARE

Change of Date of Public Hearings in Connection with Consideration of Articles for Modification or Continuance of U.S. Duties or Additional Duties

In the FEDERAL REGISTER of April 27, 1978 (43 FR 18076), there was an announcement that the Trade Policy Staff Committee (TPSC) would hold a public hearing on May 23, 1978, in connection with the current consideration by the TPSC of possible modifications or continuances of U.S. import duties, or possible additional import duties, for certain imported ceramic tableware items. This hearing has been rescheduled, and will now be held on May 31, 1978, in Room 730 at the Office of the Special Representative for Trade Negotiations, 1800 G Street NW, Washington, D.C. 20506.

This hearing will begin at 10 a.m. Information regarding the hearing may be obtained from Mrs. Carolyn Frank, Secretary, Trade Policy Staff Committee, at the address given above, and at telephone number 202-395-7210.

Persons requesting to appear at the hearing should so advise the Secretary of the Trade Policy Staff Committee, in writing, not later than the close of business on May 24, 1978. This deadline replaces the one announced previously, which was May 17, 1978.

WILLIAM B. KELLY, Jr.,
Chairman, Trade Policy Staff Committee.

POSTAL RATE COMMISSION

[Docket No. R78-1]

POSTAL RATE AND FEE INCREASES, 1978

United States Postal Service Filing of a Request for a Recommended Decision on a Surcharge for Nonstandard Mail

APRIL 27, 1978.

Notice is hereby given that on April 25, 1978, the United States Postal Service (Postal Service), pursuant to § 3622 of the Postal Reorganization Act (39 U.S.C. § 3622), filed a request with the Postal Rate Commission for a recommended decision on a surcharge for nonstandard mail. This filing has been assigned Docket No. R78-1.

The Postal Service states that its request is filed in accordance with the Commission's rules of practice and contains such information and data which explain the nature, scope, significance, and impact of the proposed surcharge. The Postal Service further states that the surcharge request of 13 cents per-piece for nonstandard first-class and single-piece third-class mail is designed to meet the additional attributable and reasonably assignable costs incurred in handling nonstandard mail, as defined in Domestic Mail Classification Schedules §§ 100.21 and 300.21. The Postal Service estimates that the implementation of the recommended surcharge will increase postal revenues by $86 million.

Hearings will be held on the proposal submitted by the Postal Service in Docket No. R78-1. Any person desiring to be heard with reference thereto and to become a party to the proceeding, or to participate as a party in any hearing thereon, should file a petition for leave to intervene. Petitions for leave to intervene must be filed with the Secretary, Postal Rate Commission, Washington, D.C. 20268 on or before May 24, 1978, and must be in accordance with § 20 of the Commission's rules of practice (39 CFR § 3001.20). We direct specific attention to § 20(b) which provides that petitions for leave to intervene shall affirmatively state whether or not petitioner requests a hearing or, in lieu thereof, a conference; and further, whether or not the petitioner intends to participate actively in the hearing. Alternatively, persons seeking limited participation, but who do not wish to become parties may, on or before May 24, 1978, file a written request for leave to be heard as a "limited participator," pursuant to § 19a of the Commission's rules of practice (39 CFR § 3001.19a). In addition, persons wishing to express their views informally, and not desiring to become a party or limited participant, may file comments pursuant to § 19b of the Commission's rules, 39 CFR § 3001.19B.

The request of the Postal Service for a recommended decision on a surcharge for nonstandard mail is on file with the Commission and is available for public inspection during regular business hours.

DAVID F. HARRIS,
Secretary.

DEPARTMENT OF STATE

Agency for International Development

BOARD FOR INTERNATIONAL FOOD AND AGRICULTURAL DEVELOPMENT

Meeting

Pursuant to Executive Order 11769 and the provisions of section 10(a), (2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the nineteenth meeting of the Board for International Food and Agricultural Development on May 25, 1978.

The purpose of the meeting is to receive and discuss progress reports of the Joint Research Committee and the Joint Committee on Agricultural Development; to discuss progress in the development of a methodology for Baseline Studies in research, education and extension capabilities in developing countries; and to receive a progress report on the development of a program to strengthen universities' capabilities to participate in Title XII activities.

The meeting will begin at 9 a.m., adjourn at 4:30 p.m., and will be held in Room 1107, State Department Building, 21st and C Street NW., Washington, D.C. The meeting is open to the public. Any interested person may attend, may file written statement with the Board before or after the meeting, or may present oral statements in accordance with procedures established by the Board, and to the extent the time available for the meeting permits.

Dr. Erven J. Long, Director, Office of Title XII Coordination/University Relations, Development Support Bureau, A.I.D., is designated as A.I.D. Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at 703-235-2243.

Dated: April 28, 1978.

ERVEN J. LONG,
A.I.D. Advisory Committee Representative, Board for International Food and Agricultural Development.

[FR Doc. 78-12135 Filed 5-3-78; 8:45 am]

[4710-02]

PROVISION OF PESTICIDES TO LIBERIA

Waiver of Certain Requirements

On March 1, 1978, the Agency for International Development (A.I.D.) provided notice in the FEDERAL REGISTER (43 FR 8320) of its intention to waive certain requirements for provision of pesticides as set forth in the Interim Pesticide Procedures published in the FEDERAL REGISTER on January 7, 1976 (41 FR 1297). The reasons for the waiver were set forth in the notice and the public was requested to provide comments within twenty (20) days of publication. That time period has now elapsed and no comments have been received.

For the reasons set forth in the above mentioned notice published in the FEDERAL REGISTER on March 1, 1978 (43 FR 8320) and no new information having since come to my attention, I approve, under section (a) of the Interim Pesticide Procedures, the financing by A.I.D. of the following pesticides and uses:

Pesticide	Crop	Pest/disease
Cuprous oxide	Cocoa	Black pod disease.
Do	Coffee	Coffee berry disease.
Lindane	Cocoa	Cocoa mirids.

I determine that the benefits of

MY 4 78 UMI

V 43 — 87

using such pesticides for the purposes intended outweigh the potential adverse effects and that no preferably alternative is available.

This determination has been made in consultation with the Environmental Protection Agency as required under section (b) of the Interim Pesticide Procedures.

This determination shall be published in the FEDERAL REGISTER.

Dated: April 21, 1978.

JOHN J. GILLIGAN,
A.I.D. Administrator.

[FR Doc. 78-12098 Filed 5-3-78; 8:45 am]

[4910-13]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

CONSULTATIVE PLANNING CONFERENCE

Post-1980 Airport and Airway Development Legislation

The purpose of this notice is to announce a Consultative Planning Conference on Post-1980 Airport and Airway Development Legislation. (The establishment of annual consultative planning procedures was originally documented and publicized in 33 FR 1905, dated December 24, 1968, and 35 FR 17798, dated November 19, 1970.)

The Department of Transportation announces that this one day conference will commence at 9 a.m. on Thursday, June 1, 1978, in Room 2230 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C.

The conference will be open to the public and persons who wish to present oral views on this future legislation should notify the FAA no later than the day before the conference. Presentations will be scheduled on a first-come-first-served basis as time permits.

In addition, persons may submit written viewpoints either at the conference or no later than July 14, 1978. Such communications, as well as requests to make presentations or to receive further information, should be addressed to:

Associate Administrator for Policy Development and Review, Attention: ASP-10, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3912.

BACKGROUND

Current legislative authority for several FAA programs and the Airport and the Airway Trust Fund which provides support for these programs will expire on September 30, 1980. The Trust Fund was created by the Airport and Airway Revenue Act of 1970 (Title II of Pub. L. 910-258) and provides slightly more than one third of FAA's total annual budget. It provides full support for the following agency programs:

Airport Development Aid Program (ADAP)
Planning Grant Program (PGP)
Facilities and Equipment (F&E)
Research, Engineering and Development (R.E. & D.)

It also provides partial support for maintenance of the airway system. If these programs are to be continued, new legislation will be required. Over the next several months, the Department will be formulating Post -FY 1980 Airport and Airway legislation through a high-level task force. The preliminary results of this effort will be briefly addressed at the June 1 conference and agency spokepersons will outline the various options or alternatives being considered and the significant issues which need to be addressed. However, the main purpose of the conference will be to solicit views from the aviation community and the general public on such matters as:

Estimates of future airport and airway system needs;

The appropriate roles for local, State, and Federal governments and for sponsors in planning, capital development, and operations and maintenance;

Financing and delivery systems which could support the level of estimated needs;

Opinions on FAA-developed alternatives or options;

Recommendations on particular legislative provisions (program requirements, administration, eligible items, etc.);

Any further issues that need to be addressed.

To pre-register for the conference, please write to the above address giving: (1) name, (2) address, and (3) company/association, if any.

Issued in Washington, D.C., on April 28, 1978.

MARY M. ANDERSON,
Associate Administrator for Policy, Development and Review.

[FR Doc. 78-12136 Filed 5-3-78; 8:45 am]

[4910-59]

National Highway Traffic Safety Administration

[Docket No. EX77-3; Notice 3]

BRISTOL CARS, LTD.

Petition for Temporary Exemption From Motor Vehicle Safety Standard

Bristol Cars Ltd. of London, England, has petitioned for a temporary exemption of Bristol 412 passenger cars from 49 CFR 571.215 Motor Vehicle Safety Standard No. 215, Exterior Protection, on the basis that compliance would cause it substantial economic hardship.

Petitioner is a manufacturer whose annual production of motor vehicles has not exceeded 150 units in the past 3 years. In 1977 it applied for (42 FR 16014) and received (42 FR 42942) temporary exemptions from five Federal motor vehicle safety standards. Its request for exemption from Standard No. 215, however, was denied without prejudice on the basis that insufficient information had been submitted to support a finding that the company had, in good faith, attempted to comply with the standard. The company has applied once more for a 3-year exemption from Standard No. 215. It has submitted a drawing which purports to show that its bumper heights meet the impact height requirements of the standard. The bumpers themselves are made of fiberglass backed at the major mounting points by steel spreader plates. The petitioner believes that it is unlikely to experience problems with engine movement damage at low speed impact since it uses a Chrysler engine and motor mounts, and has no radiator fan in the impact area. Cost of engineering and testing for compliance is estimated at $75,000. Bristol had a net loss of approximately $92,000 in 1975 with a total accumulated loss of approximately $156,000 as of the end of that year. It argues that an exemption would be in the public interest in allowing it to continue in business and to purchase engines, transmissions, and drive trains from a U.S. corporation.

This notice of receipt of a petition for temporary exemption is published in accordance with NHTSA regulations on this subject (49 CFR 555.7), and does not represent any agency decision or other exercise of judgment concerning the merits of the petition. It should be noted that Standard No. 215 is revoked effective September 1, 1978, and that any exemption which may be granted to Bristol will expire at that time, and will not include exemption from 49 CFR Part 581, Bumper Standard.

Interested persons are invited to submit comments on the petition of Bristol Cars, Ltd. described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials and all comments received, are available for examination in the docket both before and after closing date. Comments received after the closing date will also be filed and will be considered to the extent possible. If the petition is granted, notice will be published in the FEDERAL REGISTER pursuant to the authority indicated below.

M Y 4 7 8 UMI

Comment closing date: June 5, 1978.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410); delegation of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on April 26, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

[FR Doc. 78-11833 Filed 5-3-78; 8:45 am]

[Docket No. LVM 77-05; Notice 1]

EXCALIBUR AUTOMOBILE CORP.

Petition for Exemption From Average Fuel Economy Standards

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Notice of receipt of a petition for exemption from average fuel economy standards.

SUMMARY: This notice announces the receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition submitted by Excalibur Automobile Corp. (Excalibur). The petition requests that the NHTSA exempt model year 1978-80 passenger automobiles manufactured by Excalibur from the generally applicable passenger automobile average fuel economy standards for those model years, and establish lower, alternative standards for those vehicles. In accordance with agency procedures, this notice summarizes the petition, describes the options available to the NHTSA in responding to the petition, and invites written public comment thereon.

COMMENT CLOSING DATE: May 29, 1978.

ADDRESS: Comments on the Excalibur petition should refer to Docket No. LVM 77-05 and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Douglas Pritchard, Office of Automotive Fuel Economy Standards, National Highway Traffic Safety Administration, Washington, D.C. 20590, 202-755-9384.

SUPPLEMENTARY INFORMATION: Part A of title III of the Energy Policy and Conservation Act (Pub. L. 94-163) amended the Motor Vehicle Information and Cost Savings Act (hereinafter referred to as "the Act") by adding a new title V. That title requires the Secretary of Transportation to implement and administer a program for improving the fuel economy of new automobiles sold in the United States. Authority to administer the program was delegated by the Secretary to the Administrator of the NHTSA; 41 FR 25015, June 22, 1976.

Section 502(a)(1) of the Act establishes average fuel economy standards for passenger automobiles at 18 miles per gallon (mpg) for 1978, 19 mpg for 1979, and 20 mpg for 1980. They then steadily rise to a level of 27.5 mpg for 1985 and thereafter. Under 49 CFR, part 523, Vehicle Classification, published at 42 FR 38362, July 28, 1977, passenger automobiles include station wagons, sedans, coupes, and sport cars.

Section 502(a) of the Act provides that a low volume manufacturer of passenger automobiles may be exempted from the generally applicable average fuel economy standards if those standards are more stringent than the maximum feasible average fuel economy achievable by the low volume manufacturer, and if the NHTSA establishes alternative standards for the low volume manufacturer at the manufacturer's maximum feasible level. A low volume manufacturer under the Act is one which manufactures (within or without the United States) fewer than 10,000 passenger automobiles in the model year for which the exemption is sought (hereinafter "the affected model year"), and which manufactured fewer than 10,000 passenger automobiles in the second model year preceding the affected model year. In its determination of the maximum feasible average fuel economy, the NHTSA is required by the Act to consider—

(1) Technological feasibility;

(2) Economic practicability;

(3) The effect of other Federal motor vehicle standards on fuel economy; and

(4) The need of the Nation to conserve energy.

Part 525 of title 49, Code of Federal Regulations, establishes the format and content requirements for petitions requesting exemption from the generally applicable passenger automobile average fuel economy standards and describes the procedures that the NHTSA follows in acting on these petitions (42 FR 38374, July 28, 1977). Section 525.8 of that rule states that the NHTSA will publish a notice announcing receipt of a petition for exemption and summarizing the content of that petition. This notice is published in response to that section.

Publication of this notice of receipt of a petition does not represent any agency decision or other exercise of judgment concerning the merits of Excalibur's petition.

EXCALIBUR'S PETITION

Excalibur, formerly known as SS Automobiles, Inc., is an independent automobile manufacturer headquartered in Milwaukee, Wis. The company produces automobiles which are "reproductions of the classic touring vehicle, i.e., the Mercedes Benz models of 1930-1935". Annual production has been about 250 vehicles, of which about 40 are exported.

In all model years through 1980, the company will manufacture only one vehicle configuration. A vehicle configuration is a classification of automobiles that includes all automobiles produced by the same manufacturer with the same inertia weight and which are equipped with the same engine, emissions control system, transmission type (e.g., manual, automatic, or semi-automatic) and axle ratio. This is a simplification of the Environmental Protection Agency's definition of the term, which can be found at 40 CFR 600.002-77(a)(24). This vehicle will comply with the 49-State emissions standards during each of the affected model years. The average fuel economy of this configuration will be Excalibur's average fuel economy, since there are no other configurations to be averaged with it.

Excalibur has been manufacturing automobiles since 1964. It makes major design changes in its automobiles every 5 years. Excalibur states that it is unable to make major design changes more frequently than every 5 years, for a number of reasons. First, its design staff consists of the company's president and one draftsman. The small staff must be certain that it will be producing a "truly Quality vehicle" before it makes any changes, according to the company. Second, the costs of retooling and remachining in Excalibur's plant are said to make it necessary for Excalibur to use the tools and machines for a sufficiently long production run to allow the company to gradually amortize those costs, rather than absorbing the costs in the space of a few model years. Third, Excalibur urges that its size requires that it depend upon the major manufacturers for technological advances, and that these advances are not generally available to companies like Excalibur as soon as they are applied by the major manufacturers. This lag requires Excalibur to wait for the latest technology.

Excalibur began producing its Series III vehicles in the 1975 model year, and plans to continue producing these through the 1979 model year. No technological changes will be made to the vehicles in the 1978 or 1979 model years. The final fuel economy numbers for 1978 Excaliburs have been reported by the Environmental Protection Agency as 9.7 mpg for the city cycle and 14.7 for the highway cycle, for a combined fuel economy of 11.5 mpg. Hence, Excalibur's 1978 and, barring any test procedure changes, 1979 average fuel economy will be 11.5 mpg.

The Excalibur uses a 454 cubic inch displacement engine in its Series III

V 4 3 — 8 7

7 8
UMI

vehicles. This engine was selected for use in Excalibur Series III automobiles after the Corvette drivetrain, which had been used in Excalibur before the 1975 model year, was changed to include a catalytic converter to pass the emissions standards for 1975. The design of the Excalibur would not allow Excalibur to simply incorporate the single converter used with the Corvette engine, because there would reportedly not be enough road clearance under the vehicle. Excalibur then modified the design of its cars to accommodate two catalytic converters with the Corvette engine, and prepared to conduct a 50,000 mile durability test. Before it conducted the 50,000 mile durability test on this vehicle, however, Excalibur discovered that General Motors produced a 454 cubic inch engine for its light trucks which would pass the emissions standards without the use of a converter. The company decided to use this engine in its Series III vehicles, since it would not then be required to run a 50,000 mile durability test on its vehicles. International Harvester reportedly told Excalibur that the cost for this test would be $80,000 to $85,000.

The other design factors of the Excalibur are constrained by the fact that the automobile is a full scale reproduction of the 1930-35 models of Mercedes-Benz, which limits changes in the body design or the concept of the vehicle. Excalibur also argues that it is unable to make any changes on its 1978 automobiles at this time, since it has ordered or bought all the components to be used on its 1978 vehicles. The value of the company's present inventory is estimated by the company to be $800,000.

For the 1980 model year, Excalibur projects an increase in its average fuel economy to 14.1 mpg. This increase will result from a redesign of the vehicle to permit the use of catalytic converters in that model year. The company did not specify any further improvements as necessary to achieve this increased fuel economy, although it did mention plans to use "catalytic converters and its greater designed efficiency systems in 1980."

Excalibur argues that its projected average fuel economy for each of the affected model years is its maximum feasible fuel economy for each model year. After pointing out its technological efforts, Excalibur notes that it already uses 222½ pounds of aluminum in its automobiles which is more than 5.1 percent of the vehicle curb weight. Further weight reduction is not possible, according to Excalibur, in the structural steel used in its automobiles. Excalibur uses type 1020 structural steel materials, which has relatively low strength values, and, therefore, requires greater section thickness and section size per piece to meet minimum strength requirements. Structural steel with greater strength, would would allow lesser thickness and size, is not available in standard tubing, channel, angle, and flat stock. Excalibur states that the costs associated with special ordering and tooling for the stronger structural steel would be prohibitive.

Excalibur presently uses a 2.73:1 axle ratio, which is the lowest gear ratio made by General Motors to fit the differential housing used by Excalibur. General Motors has discontinued use of the 2.73 ratio on new vehicles, but is still manufacturing it as replacement parts. Excalibur indicates in its petition that it will continue to use the lowest axle ratio manufactured by General Motors which is available to it and is compatible with the presently used differential housing.

The use of a smaller engine by Excalibur in the 1978 and 1979 model years is said to be impracticable because of leadtime considerations and the emissions certification situation described above. With respect to the 1980 model year, Excalibur states that it "has insufficient information at this time to indicate whether a reduction in engine displacement could be made consistent with 1980 emissions standards and the horsepower required to propel the vehicle."

Excalibur argues that it is unable to make any significant capital investments to improve fuel economy. It states that it showed a net loss of over $1,000,000 on the shareholders' original investment at the end of 1976. More current information was not provided.

Excalibur argues that other Federal standards have also reduced its potential fuel economy. Specifically, Excalibur argues that Federal safety and damageability standards have increased the weight of an Excalibur automobile by 1,325 pounds—causing increases of 875 pounds in the frame, 25 pounds in the bumpers, 150 pounds in the doors, 200 pounds in the engine, and 75 pounds in the side mount tire assembly.

Further, Excalibur urges that the Federal emissions standards have caused a decrease in its Series III automobiles' fuel economy, since it now must use a larger engine without a catalytic converter to comply with the emissions standards.

Regarding the need of the Nation to conserve energy, Excalibur states that it has conducted a survey of 200 owners of its automobiles which indicates that the average number of miles an Excalibur is driven annually is 5,000. Based on this figure, and a projected production of 250 vehicles in each of the affected model years, Excalibur estimates that its automobiles will consume approximately five additional barrels per day if they achieve the projected average fuel economy in each model year rather than the generally applicable average fuel economy standard.

Because of all these factors, Excalibur states that its currently planned average fuel economy is its maximum feasible average fuel economy for each of the affected model years, and thus petitions the NHTSA to exempt it from the generally applicable average fuel economy standards and establish alternative average fuel economy standards for Excalibur of 11.5, 11.5, and 14.1 mpg for model years 1978, 1979, and 1980, respectively.

NHTSA Options

The NHTSA will carefully evaluate the Excalibur petition and all comments received thereon. Following this evaluation, the NHTSA could find that Excalibur plans to use all reasonably available means and strategies for improving its average fuel economy and that its projected average fuel economy for each affected model year is its maximum feasible average fuel economy for that model year. Alternatively, the NHTSA could find that Excalibur has some additional means and strategies available to it to improve its average fuel economy above the projected level for one or all of the affected model years, and make a determination of the maximum feasible average fuel economy that could be achieved for each affected model year if those means and strategies were implemented.

If Excalibur's maximum feasible average fuel economy for any affected model year is determined by this agency to be equal to or greater than the generally applicable standard, Excalibur's petition will be denied for that model year. If Excalibur's maximum feasible average fuel economy for any affected model year is determined to be less than the generally applicable standard, Excalibur's petition may be granted for that model year.

If Excalibur's petition is granted for any affected model year, the NHTSA will establish an alternative average fuel economy standard applicable to Excalibur during that model year. The Act permits the NHTSA to establish that standard in one of three ways: (1) a standard may be established specifically for Excalibur; (2) classes, based on design, size, or other factors, may be established for the automobiles of exempted manufacturers, with a separate average fuel economy standard applicable to each class; or (3) a single standard may be established for all exempted manufacturers.

Copies of the Excalibur petition, as well as supporting materials, other information, and any comments received, are available for public inspection in the docket section between 8 a.m. and 4 p.m., Monday through Friday.

Comments on the Excalibur petition are invited from the public. These comments must be in writing, refer to Docket No. LVM 77-05, be submitted to the address for comments, and must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a sucinct and concise fashion. It is requested, but not required, that five copies of the comments be submitted.

All comments received before the close of business on the comment closing date indicated above will be considered. Comments received after the closing date will be considered to the extent practicable. Comments received too late for consideration in developing a proposed decision on this petition will be considered in reaching a final decision.

Issued in Washington, D.C. on April 28, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

[Docket No. IP78-5; Notice 1]

GENERAL MOTORS CORP.

Receipt of Petition for Determination of Inconsequentiality

General Motors Corp. of Warren, Mich., has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.205 Motor Vehicle Safety Standard No. 205, Glazing Materials. The basis of the petition is that the noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Paragraph S6.4 of Standard No. 205 requires each manufacturer who cuts a section of glazing material to which S6 applies, for use in a motor vehicle, to mark that material in accordance with section 6 of American National Standard Requirements Z26. General Motors has manufactured 36 Rapid Transit System coaches between September 1977 and January 1978 incorporating a rigid plastic partition behind the driver's seat that it failed to mark. The correct designation is "AS5" and the material is represented as meeting all other requirements of Standard No. 205 applicable to AS5 glazing materials. The company argues that the protection from injury intended by the standard is provided by the plastic which was installed, and that the nonconformance is therefore inconsequential as it relates to motor vehicle safety.

Interested persons are invited to submit written data, views and arguments on the petition of General Motors Corp. described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the FEDERAL REGISTER pursuant to the authority indicated below.

Comment closing date: June 19, 1978.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on April 26, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

NATIONAL HIGHWAY SAFETY ADVISORY COMMITTEE

Change in Meeting Time and Place

As published in the FEDERAL REGISTER on April 24, 1978, the National Highway Safety Advisory Committee's Executive Subcommittee is scheduled to meet on May 15. The time and place of the meeting has been changed from 3 to 7 p.m. on May 15. The meeting will be held at the Channel Inn, 650 Water Street SW., Washington, D.C., in room 250 in lieu of room 2230 of the DOT Headquarters Building as originally published.

This meeting is subject to the approval of the appropriate DOT officials. Additional information may be obtained from the NHTSA Executive Secretary, Room 5215, 400 Seventh Street SW., Washington, D.C. 20590, telephone 202-426-2872.

Issued in Washington, D.C., on May 1, 1978.

WM. H. MARSH,
Executive Secretary.

[4910-59]

WASHINGTON STATE COMMISSION ON EQUIPMENT

Denial of Petition for Rulemaking

This notice sets forth the reasons for denial of a petition for rulemaking to amend 49 CFR 571.108, Motor Vehicle Safety Standard No. 108, Lamps, Reflective Devices, and Associated Equipment. It is published in accordance with section 124 of the National Traffic and Motor Vehicle Safety Act which provides that the National Highway Traffic Safety Administration must grant or deny such petitions within 120 days, and that if a petition is denied the reasons for it shall be published in the FEDERAL REGISTER (sec. 124(d)).

On October 20, 1977, the Washington State Commission on Equipment petitioned for an amendment of Motor Vehicle Safety Standard No. 108 that would "allow the individual states to adopt ECE headlamp standards for motor vehicles registered with their State." The Commission was presented with the dilemma that the Washington Legislature had authorized it to approve such headlamps while NHTSA had informed it that the State was preempted from such authorization by 15 U.S.C. 1392(d). ECE headlamps do not meet the requirements of Standard NO. 108 in major respects. They are of unsealed construction, lack mechanical aiming capability, are available in such a proliferation of shapes and sizes that replacement may be difficult, and frequently exceed maximum allowable candlepower limits. Accordingly, the petition was denied on December 9, 1977, on the basis that to grant it would encourage States to adopt laws that differed from the Federal standards, with corresponding petitions to amend the standards to allow the States to maintain such laws, and that this would eventually result in a "multiplicity of diverse standards" rather than the "one set of criteria" envisioned as the beneficial result of the preemption clause (H. Rept. No. 1776, p 17, 89th Cong., 2nd Sess).

(Secs. 103, 119, Pub. L. 89-563, 80 Stat 718 15 U.S.C. 1392, 1907); Sec. 106 Pub. L. 93-492, 88 Stat. 1482 (15 U.S.C. 1410); delegations of authority at 49 CFR 1.50 and 501.8)

Issued on April 27, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

(Delegation Order No. 100 (Rev. 1)]

ASSISTANT COMMISSIONER (PLANNING AND RESEARCH) ET AL.

Delegation of Authority

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This delegation order authorizes certain officials of the Internal Revenue Service to enter into agreements to provide statistical and other information, services, or training and training aids on a reimbursable basis pursuant to Internal Revenue Code sections 6108, 6103, and 7516. The text of the delegation order appears below.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Gayle Morin, 1111 Constitution Avenue NW., Room 3238, Washington, D.C. 20224, telephone 202-566-4693.

R. C. BLANKENSHIP,
Director, Legislative Analysis Division.

1. The authority to furnish information on a reimbursable basis, provided by 26 U.S.C. 6108 and delegated to the Commissioner of Internal Revenue by Treasury Department Order No. 150-37, is hereby redelegated to the Assistant Commissioner (Planning and Research). Upon written request of any person and agreement by such person to pay the cost of the work or services to be performed, the Assistant Commissioner (Planning and Research) is authorized to provide special statistical studies and compilations involving return information (as defined in 26 U.S.C. 6103(b)(2)). Whereas these special statistical studies and compilations may be derived from return information, they do not, in and of themselves, constitute return information. No publication or disclosure of statistics or other information authorized under this delegation shall permit the disclosure of any information that would be associated with or otherwise identify, directly or indirectly, a particular taxpayer. This authority may not be redelegated below the level of Division Director.

2. The authority to enter into contracts to furnish information on a reimbursable basis under 26 U.S.C. 6103, and delegated to the Commissioner of Internal Revenue by Treasury Department Order No. 150-37, is hereby redelegated to the Assistant Commissioner (Data Services) (Accounts, Collection, and Taxpayer Service) (Compliance) or (Planning and Research). Upon written request by any person and agreement by such person to pay the cost of work to be performed, the Assistant Commissioner having functional responsibility over the resources to be utilized in filling this request may authorize the providing of services or the furnishing of return and return information upon determination by the Commissioner or his/her delegate that information to be furnished is disclosable under 26 U.S.C. 6103. Any return or return information (as defined in 26 U.S.C. 6103(b)(1) and (2)) provided under this paragraph is subject to disclosure laws, regulations, and internal operating instructions covering 26 U.S.C. 6103. Joint authorization may be appropriate if filling the request requires utilization of resources in more than one Assistant Commissioner area. This authority may not be redelegated below the level of Division Director.

3. The authority delegated to the Commissioner of Internal Revenue by 26 CFR 301.7516-1 is hereby redelegated to the Assistant Commissioner (Administration), within his/her discretion, upon written request, to admit employees and officials of any State, the Commonwealth of Puerto Rico, any possession of the United States, any political subdivision or instrumentality of any of the foregoing, the District of Columbia, or any foreign government to training courses conducted by the Internal Revenue Service and to authorize that they be supplied with texts and other training aids. The Assistant Commissioner (Administration) may require payment from the party or parties making the request of a reasonable fee not to exceed the cost of the training and training aids supplied pursuant to such request. This authority may not be redelegated below the level of Division Director.

4. Delegation Order No. 100, issued January 26, 1965, is superseded.

Issued: May 1, 1978.

Effective: May 1, 1978.

JEROME KURTZ,
Commissioner.

[FR Doc. 78-12237 Filed 5-3-78; 8:45 am]

[4830-01]

[Delegation Order No. 156, Amdt. 7]

DEPUTY COMMISSIONER ET AL.

Delegation of Authority

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This Amendment permits the Deputy Commissioner, Assistant Commissioner (Compliance), Deputy Assistant Commissioner (Compliance), and Director, Disclosure Operations Division, to disclose or authorize the disclosure of returns and return information to Committees of Congress and the Comptroller General pursuant to the provisions of IRC 6103 (f) and (i)(6). The text of the Amendment appears below:

EFFECTIVE DATE: April 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Howard T. Martin, CP:D, 1111 Constitution Avenue NW., Room 1603, Washington, D.C. 20224, telephone 202-566-3370 (not a toll-free telephone number).

HOWARD T. MARTIN,
Director, Disclosure Operations Division.

APRIL 27, 1978.

Pursuant to the authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 150-37, dated March 17, 1955, authority is hereby delegated as follows:

(1) The Deputy Commissioner, Assistant Commissioner (Compliance), Deputy Assistant Commissioner (Compliance), and the Director, Disclosure Operations Division:

(a) May disclose or authorize the disclosure of returns and return information to Congressional Committees, subject to the conditions prescribed in IRC 6103(f). This authority may not be redelegated.

(b) May disclose or authorize the disclosure of returns and return information to officers and employees of the General Accounting Office, subject to the conditions prescribed in IRC 6103(i)(6). This authority may not be redelegated.

(2) To the extent that authority previously exercised consistent with this Amendment may require ratification, it is hereby affirmed and ratified.

(3) This Amendment supplements Delegation Order No. 156. Delegation Order No. 156, issued May 19, 1976, is printed in the FEDERAL REGISTER dated May 21, 1976, Vol. 41, No. 100, Page 20898.

Issued: April 27, 1978.

Effective: April 27, 1978.

JEROME KURTZ,
Commissioner.

[FR Doc. 78-12236 Filed 5-3-78; 8:45 am]

[7035-01]

INTERSTATE COMMERCE COMMISSION

[Notice No. 652]

ASSIGNMENT OF HEARINGS

MAY 1, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. MC 141804 (Sub-No. 77), Western Express, Division of Interstate Rental, Inc., now assigned for hearing May 31, 1978, at San Francisco, Calif., is cancelled; application dismissed.

No. MC 109533 (Sub-No. 88), Overnite Transportation Co., is now assigned for continued hearing August 28, 1978, at the offices of the Interstate Commerce Commission, Washington, D.C.

No. MC 136786 (Sub-No. 113), Robco Transportation, Inc., now assigned May 16, 1978, at Des Moines, Iowa, June 13, 1978, at Greensboro, N.C., and June 26, 1978, at Washington, D.C., is cancelled and transferred to unopposed modified procedure.

No. MC 120781 (Sub-No. 6), Kraftours Corp., now assigned June 6, 1978, at Tulsa, Okla., is reassigned for June 6, 1978 (9 days), at Oklahoma City, Okla., in a hearing room to be later designated.

No. MC 94350 (Sub-No. 402), Transit Homes, Inc., now assigned May 9, 1978, at Washington, D.C., is cancelled and transferred to modified procedure.

No. AB 43 (Sub-No. 38), Illinois Central Gulf Railroad Co. abandonment near Rosedale and Greenville, in Washington and Bolivar Counties, Miss., now assigned June 5, 1978, at Rosedale, Miss., is postponed indefinitely.

No. MC-F-13314, Consolidated Freightways Corp. of Delaware—purchase (portion)—M & M Transportation Co.; MC 42487 (Sub-No. 873F), Consolidated Freightways Corp. of Delaware; MC-F-13333, Smith's Transfer Corp.—purchase (portion)—Nelson Freightways, Inc., and MC 110683 (Sub-No. 128F), Smith's Transfer Corp., are now assigned for hearing September 11, 1978 (2 weeks), at the Parker House, 60 School Street, Boston, Mass.

No. MC 138875 (Sub-No. 58), Shoemaker Trucking Co., now assigned May 3, 1978 at Portland, Oreg., is canceled and transferred to modified procedure.

No. MC 133841 (Sub-No. 4), Dan Barclay, now assigned June 5, 1978, at New York, N.Y., is postponed indefinitely.

No. MC 120981 (Sub-No. 24), Bestway Express, Inc., is assigned for hearing June 5, 1978 at Frankfort, Ky., and will be held at Holiday Inn, U.S. Highway 60 East.

No. MC 143589, Randleman's Pick-up & Delevery Service, Inc., is now assigned for hearing June 6, 1978, at the offices of the Interstate Commerce Commission, Washington, D.C.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-12230 Filed 5-3-78; 8:45 am]

[7035-01]

DECISIONS VOLUME NO. 1

Order-Notice

The following applications are governed by Special Rule 247 of the Commission's Rules of Practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement's of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission notice, order or letter which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication.

We find preliminarily that, with the exception of those applications involving duly noted impediments (e.g., unapproved common control, unresolved fitness questions, and jurisdictional problems) to authorization or proposed services, each applicant has demonstrated, in accordance with the applicable provisions of the Interstate Commerce Act and with the Commission's rules and regulations, that its proposed service should be authorized. This decision is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

It is ordered: In the absence of legally sufficient protests, filed within 30 days of publication of this order-notice (or, if at any prescribed time thereafter, the application becomes unopposed), an appropriate certifiate, permit, or license (which subsequently may reflect administratively acceptable restrictive amendments to the service proposed below) will be issued to each applicant upon compliance with certain requirements which will be set forth in a notification of effectiveness of this order-notice.

To the extent that the authority sought by each applicant below may duplicate its existing authority, such duplicating authorities shall be construed, for all purposes, as a single operating right. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Dated: April 24, 1978.

By the Commission, Review Board No. 1, Members Carleton, Joyce, and Jones.

H. G. HOMME, Jr.,
Acting Secretary.

No. MC 107403 (Sub-No. 1074F), filed April 10, 1978. Applicant: MATLACK, INC., Ten West Baltimore Avenue, Lansdowne, PA 19050. Applicant's representative: Martin C. Hynes, Jr., (same address as applicant). [Notice No. 35]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before June 5, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-F-C 77489, filed April 11, 1978. Transferee: GAIN'S EXPRESS, INC., 1635 Main Street, Jefferson, MA 01522. Transferor: Gain's Express, Inc., 84 Westborough Street, Worcester, MA 01604. Applicants' representative: Carl E. Baylis, 390 Main Street, Worcester, MA, 01608. Authority spught for purchase by transferee of the operating rights of transferor as set forth in certificate No. MC 55665, issued March 24, 1976, as follows: *General commodities*, with certain exceptions, over specified regular routes, between Jefferson, MA, and Worcester, MA, serving the intermediate point of Holden, MA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-C77607, filed April 3, 1978.

Transferee: DUANE E. WILKEN, doing business as DEW FILM SERVICE, Route No. 4, 110 North 4th, Norfolk, NE 68701. Transferor: Dale Hitz, Carol Gast, and Viola Retzlaff; a partnership, doing business as Pierce Film Service, 511 South 2nd Street, Pierce, NE 68767. Applicants' representative: Duane E. Wilken (same as transferee). Authority sought for purchase by transferee of the operating rights of transferor, as set forth in certificate No. MC 107473, issued November 26, 1965, as follows: *Motion picture films, repairs, and supplies and magazines and motion picture advertising*, over specified regular and irregular routes in NE. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-C77609, filed April 3, 1978. Transferee: BARNETT TRANSPORTATION, INC., Route No. 2, Box 183, Talladega, AL 35160. Transferor: Consolidated Freightways Corp. of Delaware, 175 Linfield Drive, Menlo Park, CA 94025. Applicants' representative: John P. Carlton, Attorney at Law, 727 Frank Nelson Building, Birmingham, AL 35203. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in certificates No. MC 76177 and sub numbers 250, 264, 265, 289, 299, 316, 323, and 327 issued in the name of Baggett Transportation Co. and acquired by transferor pursuant to MC-F 13224 granted December 19, 1977, and consummated January 3, 1978, as follows: Irregular routes: *Packinghouse products, groceries, and fresh fruits and vegetables*, from Gadsden, AL, to points within 35 miles of Gadsden, AL; *cotton yarn* from Sylacauga and Talladega, AL, to

Port Ewen, NY; Reynolds, White Haven, Reading, and Hazleton, PA, and Pompton Lakes, Yardville, and Mount Holly, NJ; *fruit juices*, from points in FL and TX to Birmingham, AL; *methyl vinyl pyridine*, in bulk, in tank vehicles, from Pasadena, TX, to Decatur, AL; *methyl vinyl pyridine*, in bulk, in tank vehicles, between Pace, FL, and Pasadena, TX; *nylon salt solution*, in bulk, in tank vehicles equipped with mechanical temperature-control devices, from Gonzalez FL, to Decatur, AL; *synthetic fibre yarn and containers* used for the transportation thereof, between Gonzales and Pensacola, FL, on the one hand, and, on the other, Atlanta, GA, with service at Atlanta, restricted as an interchange point; *tire cord yarn and containers* used in the transportation thereof, between Gonzales and Pensacola, FL, on the one hand, and, on the other, Barnesville, GA; *synthetic fiber, synthetic fiber yarns, and tire cord yarn*, from Decatur, AL, to points in GA, LA, MS, and TN; *synthetic fiber and synthetic fiber yarn*, from the plantsites and warehouses of Monsanto Co. at Decatur and Huntsville, AL, to points in NC, SC, and VA; from the plantsites and warehouses of Monsanto Co. at Gonzalez and Pensacola, FL, to points in GA, NC, VA, and SC; *textiles, textile products, equipment, materials, and supplies* used in the manufacture and distribution of textiles (except commodities in bulk and those which require the use of special equipment), between the plantsite of Monsanto Co. in Marshall county, AL, on the one hand, and, on the other, points in AL, GA, LA, MS, NC, SC, TN, and VA, (1) textiles and textile products, and (2) equipment, materials, and supplies, used in the manufacture and distribution of textiles, (except commodities in bulk and commodities requiring the use of special equipment in both (1) and (2) above), from the facilities of Monsanto Textiles Co., a division of the Monsanto Co., at Gonzalez and Pensacola, FL, to points in GA, NC, SC, and VA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-C 77612, filed April 5, 1978. Transferee: CARGO TRANSPORT, INC., 3101 Vera Street, Baltimore, MD 21226. Transferor: Carlton Reay Allender, doing business as Cargo Transport, 3101 Vera Street, Baltimore, MD 21226. Applicant's representative: Edward G. Wyatt, 2 East Fayette Street, Suite 501, Jefferson Building, Baltimore, MD 21202. Authority sought for purchase of the operating rights set forth in certificates Nos. MC 110461 and MC 110461 (Sub-No. 2), issued February 1, 1954, and February 12, 1957, respectively, as follows: *Specified commodities*, from specified points in MD to points in VA, WV, PA, MD, NY, DE, KY, OH, SC, TN, NC, AL, CO, FL, GA, IL, IA, ME, MA, MI, MN, MS, MO, NH, RI, VT, WI, and DC. Transferee holds no Commission authority and does not seek section 210a(b) authority.

No. MC-F-C 77615, filed April 7, 1978. Transferee: DEATH VALLEY TRUCKING, INC., 130 South Washington, P.O. Box 296, Lone Pine, CA. Transferor: V. B. Morgan Co., a corporation, 6106 Paramount Boulevard, Long Beach, CA. Applicant's representative: R. Y. Schureman, Attorney at Law, 1545 Wilshire Boulevard, Los Angeles, CA 90017. Authority sought for purchase by transferee of the operating rights of transferor as set forth in certificates Nos. MC 106022 (Sub-No. 9) and MC 106022 (Sub-No. 12), issued January 16, 1973, and July 6, 1972, respectively, as follows: *Bentonite*, in dump vehicles, between the facilities of New Discovery Mine, at or near Beatty, NV; Blanco Mine, at or near Coaldale Junction (Esmeralda County), NV; Vanderbilt Mine, at or near Lovelock, NV; and the Vanderbilt Mine, near Las Vegas, NV, on the one hand, and, on the other, Dunn Siding, at Rail Mill, near Baker, CA; and *raw talc*, from the site of the Nevada Talc Mine near Lida, NV, to Dunn Siding at Rail Mill near Baker, CA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-C 77620, filed April 27, 1978. Transferee: L. D. FONTAINE, doing business as L. D. FONTAINE TRUCKING, 504 Riverview Boulevard, Great Falls, MT 59404. Transferor: Western General Trucking, Inc., Internal Revenue Service, successor in interest, P.O. Box 20374, Billings, MT 59104. Applicant's representative: L. D. Fontaine, 504 Riverview Boulevard, Great Falls, MT 59404. Authority sought for purchase of the operating rights set forth in certificate No. MC 138988 (Sub-No. 2), issued May 2, 1975, as follows: *Fresh and frozen meat and fresh and frozen packinghouse products* from points of entry on the international boundary line between the United States and Canada and or near Peace Garden and Pembina, ND, and Noyes, MN, to points in AZ, CA, ID, NV, OR, UT, and WA. Transferee hold authority as a common carrier under certificate No. MC 142543 and does not seek temporary authority under section 210a(b).

No. MC-F-C 77630, filed April 17, 1978. Transferee: DAVID LLOYD WALLACE, doing business as DAVID WALLACE TRUCKING, 1829 7th Avenue, Belle Fourche, SD 57717. Transferor: Robert Wallace, Rural Route 1, West National Street, Belle Fourche, SD 57717. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in certificate Nos. MC 100404 and MC 100404 (Sub-No. 2), issued August 8, 1967, and September 18, 1969, as follows: *Bentonite*, in bulk, not milled, from points in MT south of U.S. Hwy 12, and those in Crook, Webster, and Campbell Counties, WY, to points in Pennington, Lawrence, Butte, Custer, and Meade Counties, SD; and *sand, gravel, aggregates, and crushed rock*, between points in Carter and Powder River Counties, MT, Crook County, WY, and Butte, Lawrence, Meade, and Pennington Counties, SD. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

H. G. Homme, Jr.,
Acting Secretary.

[Volume No. 86]

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

Motor Carrier, Broker, Water Carrier and Freight Forwarder Operating Rights Applications

April 26, 1978.

The following applications are governed by Special Rule 247 of the Commission's *General Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the Federal Register. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use a such authority to provide all or part of the service proposed), and shall specify with particularly the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protest not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served con-

V 43 | 87 MY 4 78 UMI

currently upon applicant's representative, or applicant if not representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(e)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the* FEDERAL REGISTER *of a notice that the proceeding has been assigned for oral hearing.*

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 340 (Sub-No. 48F), filed March 10, 1978. Applicant: QUERNER TRUCK LINES, INC., 1131-33 Austin Street, San Antonio, TX 78208. Applicant's representative: M. Ward Bailey, 2412 Continental Life Building, Fort Worth, TX 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paint*, from Chicago, IL to Laredo, TX. (Hearing site: San Antonio, TX or Chicago, IL.)

No. MC 2202 (Sub-No. 557F), filed March 17, 1978. Applicant: ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Boulevard, Akron, OH 44309. Applicant's representative: William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment serving the Black Fox Nuclear Plant located at or near Inola, OK as an off-route point in connection with applicant's regular routes. (Hearing site: Oklahoma City, OK or Dallas, TX.)

NOTE.—Common control may be involved.

No. MC 2202 (Sub-No. 558F), filed March 16, 1978. Applicant: ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Boulevard, Akron, OH 44309. Applicant's representative: William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment serving the facilities of Electric Hose & Rubber Co. located at or near Olney, TX, as an off-route point in connection with applicant's present regular routes. (Hearing site: Washington, DC.)

NOTE.—Common control may be involved.

No. MC 2860 (Sub-No. 167F), filed March 10, 1978. Applicant: NATIONAL FREIGHT, INC., 71 West Park Avenue, Vineland, NJ 08360. Applicant's representative: James C. Hardman, 33 North LaSalle Street, Chicago, IL 60602. (Hearing Site: Chicago, IL.)

NOTE.—Common control may be involved.

No. MC 2900 (Sub-No. 330F), filed March 8, 1978. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408, Jacksonville, FL 32203. Applicant's representative: S. E. Somers, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lawn and garden products*, from the facilities of O. M. Scott & Sons at or near Marysville, and Columbus, OH, to points in AL, AR, CO, CT, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NH, NJ, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, TX, VT, VA, WV and WI. (Hearing site: Columbus, OH or Washington DC.)

NOTE.—Common control may be involved.

No. MC 2900 (Sub-No. 332F), filed March 16, 1978. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408, Jacksonville, FL 32203. Applicant's representative: John Carter (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Air conditioning machines and machinery*, from Salisbury, NC to points in the United States (except AK and HI), restricted to the transportation of shipments originating at named origin and destined to points in named territory. (Hearing site: Charlotte NC or Atlanta, GA.)

NOTE.—Common control may be involved.

No. MC 29910 (Sub-No. 188F), filed March 13, 1978. Applicant: ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 South 11th Street, Fort Smith, AR 72901. Applicant's representative: Don A. Smith, P.O. Box 43, 510 North Greenwood, Fort Smith, AR 72902. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the Plant Vogtle facilities of GA Power Co., located in Burke County, GA, as an off-route point in connection with applicant's authorized regular route operations at Augusta, GA. (Hearing site: Atlanta, GA or Washington, DC.)

NOTE.—Common control may be involved.

No. MC 41406 (Sub-No. 65F), filed March 15, 1978. Applicant: ARTIM TRANSPORTATION SYSTEM, INC., 7105 Kennedy Avenue, Hammond, IN 46323. Applicant's representative: Alki E. Scopelitis, 815 Merchants Bank Building, Indianapolis, IN 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lead oxides*, from Hammond, IN to Zanesville, OH and points in KS, IA, MO and PA. (Hearing site: Chicago, IL.)

No. MC 42487 (Sub-No. 874F), filed March 17, 1978. Applicant: CONSOLIDATED FREIGHTWAYS CORP., OF DELAWARE, 175 Linfield Drive, Menlo Park, CA 94025. Applicant's representative: V. R. Oldenburg, P.O. Box 3062, Portland, OR 97208. Authority is sought to operate as a *common carrier*, by motor vehicle, over regular routes transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), serving the site of the K-Mart Distribution Center in Coweta County, GA as an off-route point in connection with carrier's authorized regular route operations. (Hearing site: Detroit, MI or Washington, DC.)

NOTE.—Common control may be involved.

No. MC 49387 (Sub-No. 52F), filed March 16, 1978. Applicant: ORSCHELN BROS. TRUCK LINES, INC., U.S. Hwy 24 East, P.O. Box 658, Moberly, MO 65270. Applicant's representative: George A. Vitt, P.O. Box 658, Moberly, MO 65270. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, commodities in bulk, household goods as defined by the Commission, commodities requiring special equipment), (1) Between Fort Madison, IA and Chicago, IL, as an alternate route for operating convenience only serving no intermediate points: from Chicago over Interstate Hwy 80 to junction Interstate Hwy 74, then over Interstate Hwy 74 to junction U.S. Hwy 34, then over U.S. Hwy 34 to junction U.S. Hwy 61, then over U.S. Hwy 61 to Fort Madison, and return over the same route; from Chicago over Interstate Hwy 80 to junction U.S. Hwy 34, then over U.S. Hwy 34 to junction U.S. Hwy 61, then over U.S. Hwy 61 to Fort Madison, and return over the same route; (2) between Peoria, IL and St. Louis, MO as an alternate route for operating convenience only serving no intermediate points: From Peoria over IL Hwy 29 to junction Interstate Hwy 55, then over Interstate Hwy 55 to St. Louis and return over the same route; from Peoria over Interstate Hwy 74 to junction IL Hwy 121, then over IL Hwy 121 to junction Interstate Hwy 55, then over Interstate Hwy 55 to St. Louis, and return over the same route; and (3) between the junction of U.S. Hwy 65 and Interstate Hwy 70 and Sedalia, MO, as an alternate route for operating convenience only serving no intermediate points from the junction of Interstate Hwy 70 and U.S. Hwy 65, then over U.S. Hwy 65 to Sedalia, and return over the same route. (Hearing site: Kansas City or St. Louis, MO.)

No. MC 50069 (Sub-No. 533F), filed March 20, 1978. Applicant: REFINERS TRANSPORT & TERMINAL CORP., 445 Earlwood Avenue, Oregon, OH 43616. Applicant's representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, OH 44114. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquefied petroleum gases*, in shipper-owned trailers, from East Chicago, IN, and Muskegon, MI, to points in the United States (except AK, AZ, CA, CO, HI, ID, MT, NV, NM, OR, UT, WA, and WY). (Hearing site: Washington, DC.)

NOTE.—Common control may be involved.

No. MC 50935 (Sub-No. 16F), filed March 14, 1978. Applicant: WOLVERINE TRUCKING CO., a corporation, 1020 Doris Road, Pontiac, MI 48057. Applicant's representative: William B. Elmer, 21635 East Nine Mile Road, St. Clair Shores, MI 48080. Section 5a—Application No. 46; Amdt. No. 13]

SOUTHERN MOTOR CARRIERS RATE CONFERENCE, INC.

Agreement

APRIL 26, 1978.

The Commission is in receipt of an application in the above proceeding for approval of amendments to the approved agreement.

Filed April 16, 1978, by: L. Vernon Farriba, Attorney-in-Fact, Southern Motor Carriers Rate Conference, Inc., 1307 Peachtree Street, NE., Atlanta, Ga. 30309; Sherman D. Schwartzberg, General Counsel, Southern Motor Carriers Rate Conference, Inc., 1307 Peachtree Street, NE., Atlanta, Ga. 30309.

The amendments involve: Changes to comply with Ex Parte No. 297, 349 ICC 811 and 351 ICC 437.

The complete application may be inspected at the Office of the Commission, in Washington, D.C.

Anny interested person desiring to protest and participate in this proceeding shall notify the Commission in writing on or before May 24, 1978. As provided by the general rules of practice of the Commission, persons other than applicants should fully disclose their interest, and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigate and determine the matters involved without public hearing.

H. G. HOMME, JR.,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of May 8, 1978, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meetings will be held on Tuesday, May 9, 1978, at 10 a.m. and on Thursday, May 11, 1978, immediately following the open meeting. An open meeting will be held on Thursday, May 11, 1978, at 10 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)(A) and (10) and 17 CFR 200.402(a)(8)(9)(i) and (10).

Commissioners Loomis, Evans, and Karmel determined to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, May 9, 1978, at 10 a.m., will be:

Formal orders of investigation.
Referral of investigatory files to Federal, State, or Self-Regulatory authorities.
Institution of administrative proceedings of an enforcement nature.
Settlement of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Settlement of injunctive actions.
Chapter XI proceeding.
Freedom of Information Act appeals.

Other litigation matters.

The subject matter of the closed meeting scheduled for Thrusday, May 11, 1978, immediately following the open meeting, will be:

Opinion.

The subject matter of the open meeting scheduled for Thursday, May 11, 1978, at 10 a.m., will be:

1. Proposed adoption of an amendment to Rule 145 under the Securities Act of 1933, which would eliminate the indefinite underwriter status attached to former affiliates of entities acquired under the rule, provided certain conditions are met.

2. Consideration of an application filed by Real Estate Investment Trust of California for an exemptive order from certain registration provisions of the Securities Exchange Act of 1934.

3. Consideration of a request by Liquid Transporters, Inc., for an extension of time within which to file an annual report on Form 10-K for the fiscal year ended December 31, 1977.

4. Affirmation of duty officer action concerning the extension of comment period on proposed Rule 17j-1 under the Investment Company Act of 1940 until May 30, 1978. The proposed rule would prohibit certain activities on the part of persons affiliated with registered investment companies or their investment advisers or principal underwriters.

5. Consideration of the issuance of an advance notice of proposed rulemaking, requesting public comment with regard to the conditions under which mutual funds might be permitted to bear distribution expenses.

6. Proposed issuance of a monitoring report incorporating data relating to recent financial experience of broker-dealers, trends in commission rates, and the financial condition of self-regulatory organizations.

7. Proposed release concerning the sale of foreign options in the United States.

FOR FURTHER INFORMATION CONTACT:

Lawrence A. Horn at 202-755-1286 or Margaret M. Topps at 202-376-8016

DEPARTMENT OF STATE

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits to Fish off Coasts of U.S.

V 43 | 87

[4710-09]

DEPARTMENT OF STATE

[Public Notice 607]

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits to Fish Off the Coasts of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Applications for fishing during 1978 have been received from the Governments of Korea and Mexico, and are published herewith.

Dated: April 25, 1978.

JAMES A. STORER,
Director,
Office of Fisheries Affairs.

FISHING VESSEL IDENTIFICATION FORM (FOREIGN) NO. MX-78-0027

1. Name of Vessel MONTE FURADO 2. Vessel Identifier (Call Sign) XCMV
3. Type of Vessel STERN TRAWLER 4. Length 44 MTS. (Maximum)
5. Gross Tonnage 512 Tons 6. Net Tonnage 440 7. Speed (knots) 15
8. Owner's Name and Address MEXICANA-ESPAÑOLA DE PESCA Y CONSERVAS, S.A.
HOMERO # 1804 7° PISO, MEXICO, D.F.
9. Types of Processing Equipment FREEZER

10. Fisheries for Which Permit is Requested:

Fishery	Target Species	Gear To Be Used	Activity: Catching	Processing	Other Support
NWA	Long-finned squid	Bottom Trawl	X	X	
NWA	Short-finned squid	Mid-water Trawl	X	X	

11. Are Fishing Activities Requested in Support of Vessels of a Different Flag:
☒ No ☐ Yes (If yes, attach supplemental sheet showing flag of other vessels, fishery, species, quantities, dates, locations and specific activities requested.)

FISHING VESSEL IDENTIFICATION FORM (FOREIGN) NO. MX-78-0028

1. Name of Vessel CARVISA II 2. Vessel Identifier (Call Sign) YEEV
3. Type of Vessel STERN TRAWLER 4. Length 29.9 mts. (Maximum)
5. Gross Tonnage 280 6. Net Tonnage 135 7. Speed (knots) 11
8. Owner's Name and Address MEXICANA-ESPAÑOLA DE PESCA Y CONSERVAS, S.A.

	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[6325-01]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Commerce, National Endowment for the Arts and the Humanities

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment (1) excepts under Schedule C a position at the Department of Commerce because it is confidential in nature, and (2) changes the title of a position at the National Endowment for the Arts and the Humanities to reflect the current title of the superior.

EFFECTIVE DATES: Department of Commerce April 26, 1978; National Foundation on the Arts and the Humanities April 24, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3314(a)(28) is added and 213.3382(1) is amended as set out below:

§ 213.3314 Department of Commerce.

(a) *Office of the Secretary.* • • •

(28) One Private Secretary to the Deputy Chief Economist.

• • • • •

§ 213.3382 National Foundation on the Arts and the Humanities.

• • • • •

(1) One Staff Assistant to the Deputy Chairman for Policy, Planning and Public Affairs, National Endowment for the Humanities.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

Title 7—Agriculture

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

[Amdt. No. 93]

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1969 and Succeeding Crop Years

CLOSING DATES

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: This is an extension of the final dates for the filing of applications for crop insurance for the 1978 crop year on barley, corn, oats, potatoes, sweet corn, and wheat having an

V 43 — 88 MY 5 78 UMI

April 30 or earlier closing date in those counties where such insurance is otherwise authorized to be offered. The extension will be until May 1 for all crops listed, except potatoes in North Dakota only, the closing date for which will be May 6, 1978. This extension will coincide with the ASCS Acreage, Offsetting Compliance, and Signup Period of April 30 and allow farmers more time to make decisions on their insurance plans along with signup intentions.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250, 202-447-3325.

SUPPLEMENTARY INFORMATION: On January 12, 1978, the Agricultural Stabilization and Conservation Service (ASCS) issued notification of Acreage, Offsetting Compliance, and Signup Period, which indicates the signup period for filing an intention to participate on farms with a crop subject to set-aside will be March 1 through April 30. Since April 30 is on a Sunday, intentions will be accepted by ASCS the following Monday, May 1, 1978.

The ASCS set-aside announcement will have significant impact on farm operations and farmers are presently involved in decision making regarding the set-aside acreage. Since crop insurance is involved in the overall farm operation decision making process and the closing dates for many crops insured by the Federal Crop Insurance Corporation falls long before the end of the ASCS signup date of May 1, 1978, the Corporation has determined that the closing dates for filing applications for crop insurance on barley, corn, oats, sweet corn, and wheat, having an April 30 or earlier closing date, should be extended to coincide with the end of the ASCS signup period. The closing date for potatoes in North Dakota only will be May 6, 1978. This will allow farmers more time to include plans for crop insurance on those crops subject to set-aside.

Accordingly, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), and in accordance with the applicable provision contained in the Federal Crop Insurance Regulations for the 1969 and Succeeding Crop Years (7 CFR 401.103(c), 32 FR 15911, November 21, 1967), allowing for such extensions, the Federal Crop Insurance Corporation is extending, effective for the 1978 crop year, the closing date for the acceptance of applications for crop insurance on barley, corn, oats, sweet corn, and wheat through May 1, 1978, and for potatoes in North Dakota only through May 6, 1978, as indicated below.

Since these extensions will benefit producers by providing more time to file applications for crop insurance, and since producers need to be informed of these extensions immediately, it is found and determined that compliance with the procedure for notice and public participation in the proposed rule making process would be impracticable and contrary to the public interest. Therefore, this amendment is issued without compliance with such procedure.

FINAL RULE

Accordingly, 7 CFR 401.103(a) is amended by adding at the end thereof the following:

§ 401.103 Application for insurance.

(a) * * * The time for filing applications for the 1978 crop year on the following crops in those states and counties so indicated is hereby extended until the close of business on Monday, May 1, 1978, and on potatoes in North Dakota only until the close of business on Saturday, May 6, 1978. Such applications received during this period will be accepted only after it is determined that no adverse selectivity will result.

BARLEY

Modoc and Siskiyou Counties, Calif. All counties in Colorado, Minnesota, Montana, North Dakota, South Dakota, Utah, and Wyoming. Klamath and Malheur Counties, Oreg. All Idaho counties south of Idaho County.

CORN

All counties in all States.

OATS

All counties in all States.

POTATOES

(Closing Date—In North Dakota only: May 6, 1978) Grant County, Wash., and Canyon County, Ida.

SWEET CORN

Renville County, Minn. and Dodge County, Wis.

WHEAT

All counties in Minnesota and North Dakota. The following counties in South Dakota: Aurora, Beadle, Bon Homme, Brown, Campbell, Clark, Codington, Corson, Day, Deuel, Douglas, Edmunds, Grant, Hamlin, Hutchinson, Jerauld, Kingsbury, McPherson, Marshall, Miner, Perkins, Roberts, and Spink.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended (7 U.S.C. 1506, 1516).)

Dated: April 26, 1978.

PETER F. COLE,
Secretary, Federal Crop Insurance Corporation.

Approved: May 1, 1978.

BOB BERGLAND,
Secretary.

[3410-05]

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 7]

PART 724—FIRE-CURED, DARK AIR-CURED, VIRGINIA SUN-CURED, CIGAR-BINDER (TYPES 51 AND 52), AND CIGAR-FILLER AND BINDER (TYPES 42, 43, 44, 53, 54, AND 55) TOBACCO

Subpart—Tobacco Allotment and Marketing Quota Regulations 1972–73 and Subsequent Marketing Years

LEASE AND TRANSFER OF TOBACCO ACREAGE ALLOTMENT—CIGAR-BINDER (TYPES 51 AND 52) AND CIGAR-FILLER AND BINDER (TYPES 42, 43, 44, AND 53) TOBACCO

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule permits the lease and transfer (heretofore prohibited) of cigar-binder and cigar-filler and binder farm acreage allotment to a farm if the farm acreage allotment for the receiving farm has been reduced to zero due to a violation of the tobacco marketing quota regulations. This change is being made because the current rule is believed to be unduly restrictive and unnecessary to the effective administration of the Cigar-Binder (Types 51 and 52) and Cigar-Filler and Binder (Types 42, 43, 44, and 53) tobacco marketing quota programs.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Maurice Reddick, Production Adjustment Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013, 202-447-4695.

SUPPLEMENTARY INFORMATION: Since the change provided in this rule is simply a relaxation of the eligibility requirements for transfer of acreage allotment to a farm and producers are making plans for leasing and transferring of allotment for the 1978 crop, it is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 is impracticable, unnecessary, and contrary to the public interest.

FINAL RULE

§ 724.69 [Amended]

Accordingly, 7 CFR part 724 is amended by revoking and reserving paragraph (n) of § 724.69.

AUTHORITY: Sec. 301, 313, 314, 316, 317, 363, 372-375, 377, 378, 52 Stat. 38, as amended, 47, as amended, 48, as amended, 75 Stat. 469, as amended, 79 Stat. 66, 52 Stat. 63, as amended, 65-66, as amended, 72 Stat. 995; sec. 401, 63 Stat. 1054, as amended, sec. 106, 122, 125, 70 Stat. 191, 195, 198, as amended, sec. 16(e) 76 Stat. 606 (7 U.S.C. 1301, 1313, 1314, 1314b, 1314c, 1363, 1372-1375, 1377, 1378, 1421, 1813, 1824, 1836) (16 U.S.C. 590p(e)).

Signed at Washington, D.C., on April 26, 1978.

RAY FITZGERALD,
Administrator, Agricultural Stabilization and Conservation Service.

[Amdt. 8]

PART 725—FLUE-CURED TOBACCO

Subpart—Flue-Cured Tobacco Acreage Allotment and Marketing Quota Regulations, 1973–74, and Subsequent Marketing Years

TRANSFER OF FLUE-CURED TOBACCO FARM MARKETING QUOTAS BY LEASE

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule permits the lease and transfer (heretofore prohibited) of flue-cured tobacco farm marketing quota to a farm if the farm marketing quota for the receiving farm has been reduced to zero due to a violation of the tobacco marketing quota regulations. This change is being made because the current rule is believed to be unduly restrictive and unnecessary to the effective administration of the flue-cured tobacco marketing quota program.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Maurice Reddick, Production Adjustment Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013, 202-447-4695.

SUPPLEMENTARY INFORMATION: Since the change provided in this rule is simply a relaxation of the eligibility requirements for transfer of marketing quota to a farm and producers are making plans for leasing and transferring of quota for the 1978 crop, it is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 is impracticable, unnecessary, and contrary to the public interest.

FINAL RULE

§ 724.69 [Amended]

Accordingly, 7 CFR part 724 is amended by revoking and reserving paragraph (n) of § 724.69.

AUTHORITY: Sec. 301, 313, 314, 316, 317, 363, 372-375, 377, 378, 52 Stat. 38, as amended, 47, as amended, 48, as amended, 75 Stat. 469, as amended, 79 Stat. 66, 52 Stat. 63, as amended, 65-66, as amended, 72 Stat. 995; sec. 401, 63 Stat. 1054, as amended, sec. 106, 122, 125, 70 Stat. 191, 195, 198, as amended, sec. 16(e) 76 Stat. 606 (7 U.S.C. 1301, 1313, 1314, 1314b, 1314c, 1363, 1372-1375, 1377, 1378, 1421, 1813, 1824, 1836) (16 U.S.C. 590p(e)).

Signed at Washington, D.C., on April 26, 1978.

RAY FITZGERALD,
Administrator, Agricultural Stabilization and Conservation Service.

PART 726—BURLEY TOBACCO

Subpart—Burley Tobacco 1971–72 and Subsequent Marketing Years

TRANSFER OF BURLEY TOBACCO FARM MARKETING QUOTAS BY LEASE

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule permits the lease and transfer (heretofore prohibited) of burley tobacco farm marketing quota to a farm if the farm marketing quota for the receiving farm has been reduced to zero due to a violation of the tobacco marketing quota regulations. This change is being made because the current rule is believed to be unduly restrictive and unnecessary to the effective administration of the burley tobacco marketing quota program.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Maurice Reddick, Production Adjustment Division, USDA, P.O. Box 2415, Washington, D.C. 20013, 202-447-4695.

SUPPLEMENTARY INFORMATION: Since the change provided in this rule is simply a relaxation of the eligibility requirements for transfer of marketing quota to a farm and producers are making plans for leasing and transferring of quota for the 1978 crop, it is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 is impracticable, unnecessary, and contrary to the public interest.

FINAL RULE

§ 726.68 [Amended]

Accordingly, 7 CFR part 726 is amended by revoking and reserving paragraph (q) of § 726.68.

AUTHORITY: Secs. 301, 312, 313, 314, 316, 318, 319, 362, 363, 372-375, 377, 378, 52 Stat. 38, as amended, 46, as amended, 47, as amended, 48, as amended, 62, as amended, 75 Stat. 469, as amended, 81 Stat. 120, as amended, 52 Stat. 63, as amended, 85 Stat. 23, 70 Stat. 206, as amended, 72 Stat. 995, as amended (7 U.S.C. 1301, 1312, 1313, 1314, 1314b, 1314d, 1314e, 1363, 1372-1375, 1377, 1378).

Signed at Washington, D.C., on April 26, 1978.

[3410-05]

SUBCHAPTER D—PROVISIONS COMMON TO MORE THAN ONE PROGRAM

PART 795—PAYMENT LIMITATION

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document amends the regulations which imposed a $20,000 payment limitation on disaster payments for the 1977 program year for wheat, feed grains, and upland cotton as required by the Agriculture Act of 1970 as amended by the Agriculture and Consumer Protection Act of 1973 and $55,000 for rice as required by the Rice Production Act of 1975.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert Coplin, Production Adjustment Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013, 202-447-4542.

SUPPLEMENTARY INFORMATION: This change will benefit producers who earned in excess of $20,000 in payments for wheat, feed grains, upland cotton and in excess of $55,000 for rice under the 1977 Disaster Program but because of the limitation imposed by

V 4 3 — 8 8 MY 5 7 8 UMI

the Agricultural Act of 1970 and the Rice Production Act of 1975 received only $20,000 for wheat, feed grains, and upland cotton and $55,000 for rice. Pub. L. 95-156, signed into law on November 8, 1977, exempted disaster payments from these limitations.

Since ASCS county offices are prepared to issue supplemental payments to producers earning payments in excess of these limitations it is essential that the amendment be made effective as soon as possible. It is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provision of 5 U.S.C. 553 is impractical and contrary to public interest. Therefore, this amendment shall become effective upon publication in the FEDERAL REGISTER.

FINAL RULE

Effective as to the 1977 and prior year crops, 7 CFR 795.1 (a) and (b) are amended to read as follows:

§ 795.1 Basis and purpose.

(a) Section 101 of the Agricultural Act of 1970, as amended by the Agriculture and Consumer Protection Act of 1973 and the Food and Agriculture Act of 1977, provides that the total amount of payments a person shall be entitled to receive under one or more of the annual programs for wheat, feed grains, and upland cotton for the 1974 through 1977 crops under the Act shall not exceed $20,000. Pub. L. 95-156, 91 Stat. 921, approved November 8, 1977, provides, however, that the term "payments" as used in the 1970 Act, shall not include any part of any payment which is determined by the Secretary to represent compensation for disaster loss with respect to the 1977 crops of wheat, feed grains, and upland cotton.

(b) Section 101 of the Agricultural Act of 1949, as amended by the Rice Production Act of 1975, provides that the total amount of payments which a person shall be entitled to receive during a crop year under the rice program for 1976 or 1977 under the Act shall not exceed $55,000. Pub. L. 95-156, 91 Stat. 921, approved November 8, 1977, provides, however, that the term "payments," as used in the 1970 Act shall not include any part of any payment which is determined by the Secretary to represent compensation for disaster loss with respect to the 1977 crop of rice.

• • • • •

AUTHORITY: Sec. 101, Pub. L. 91-524, 84 Stat. 1358 (7 U.S.C. 1307), as amended by Pub. L. 93-86, 87 Stat. 221, and Pub. L. 95-113, 91 Stat. 913; sec. 101, Pub. L. 81-439, 63 Stat. 1051 (7 U.S.C. 1441), as amended by sec. 102, Pub. L. 94-214, 90 Stat. 181; Pub. L. 95-156, 91 Stat. 1264 (7 U.S.C. 1307) note.

Signed at Washington, D.C., on April 26, 1978.

[3410-02]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 944—FRUITS; IMPORT REGULATIONS

Procedure for Requesting Inspection and Designating the Agencies to Perform Required Inspection and Certification

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule designates the Federal or Federal-State Inspection Service, Food Safety and Quality Service, United States Department of Agriculture as the agencies to perform required inspection and certification for compliance with regulations applicable to imported avocados, grapefruit, limes, and oranges, and provides instructions for obtaining inspection.

EFFECTIVE DATE: June 15, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-3545.

SUPPLEMENTARY INFORMATION: Section 8e of the Agricultural Marketing Agreement Act of 1937, as amended, requires that whenever specified commodities, including avocados, grapefruit, limes, and oranges are regulated under a Federal marketing order imports of that commodity must meet the same or comparable grade, size, quality or maturity requirements as those in effect for the domestic commodity. Inspection and certification for compliance by imports of such commodities is required. Heretofore, it has been customary to publish the detailed instructions for obtaining inspection in each import regulation. Publication of such procedure separate from the regulation will enable incorporation by reference and avoid the necessity of such publication each time a regulation is issued.

The designations and procedure are as follows:

§ 944.400 Designated inspection services and procedure for obtaining inspection and certification of imported avocados, grapefruit, limes, and oranges regulated under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended.

(a) The Federal or Federal-State Inspection Service, Fruit and Vegetable Quality/Division, Food Safety and Quality Service, United States Department of Agriculture, is hereby designated as the governmental inspection service for the purpose of certifying the grade, size, quality, and maturity of avocados, grapefruit, limes and oranges that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with appropriate evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of the specified fruit, is required on all imports. Such inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 2851) but, since inspectors are not located in the immediate vicinity of some of the small ports of entry, such as those in southern California, importers of avocados, grapefruit, limes, and oranges should make arrangements for inspection, through the applicable one of the following offices, at least the specified number of days prior to the time when the fruit will be imported:

Ports, Office, and Advance Notice

All Texas points; Officer-in-Charge, 1301 West Expressway, Alamo, Tex. 78516, phone—512-787-4091, or Officer-in-Charge, 724 East Overland, El Paso, Tex. 79901, phone—915-543-7723; 1 day.

All New York points; Officer-in-Charge, Room 28A, Hunts Point Market, Bronx, N.Y. 10474, phone—212-991-7668 and 7669, or Officer-in-Charge, 176 Niagara Frontier Food Terminal, Room 8, Buffalo, N.Y. 14206, phone—716-824-1585; 1 day.

All Arizona points; Officer-in-Charge, 3150 Tucson-Nogales Highway, P.O. Box 1485, Nogales, Ariz. 85621, phone—602-287-4783; 1 day.

All Florida points; Officer-in-Charge, 1350 Northwest 12th Avenue, Room 530, Miami, Fla. 33136, phone—305-324-6116, or Officer-in-Charge, 550 Third Street NW., P.O. Box 1232, Winter Haven, Fla. 33880, phone—813-294-3511, extension 33, or Officer-in-Charge, Unit 46, 3335 North Edgewood Avenue, Jacksonville, Fla. 33205, phone—904-354-5983; 1 day.

All California points; Officer-in-Charge, 784 South Central Avenue, Room 266, Los Angeles, Calif. 90021, phone—213-688-2489; 3 days.

All Louisiana points; Officer-in-Charge, 5027 U.S. Postal Service Building, 701 Loyola Avenue, New Orleans, La. 70113, phone—504-589-6741; 1 day.

All other points; Chief, Fresh Products Branch, FVQD, FSQS, USDA, Washington, D.C. 20250, phone—202-447-5870; 3 days.

(b) Inspection certificates shall cover only the quantity of fruit that is being imported at a particular port of entry by a particular importer.

(c) The inspection performed, and certificates issued, by the Federal or Federal-State Inspection Service shall be in accordance with the rules and regulations of the Department governing the inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 2851). The cost of any inspection and certification shall be borne by the applicant therefor.

(d) Each inspection certificate issued with respect to any of the specified fruits to be imported into the United States shall set forth, among other things:

(1) The date and place of inspection;

(2) The name of the shipper, or applicant;

(3) The commodity inspected;

(4) The quantity of the commodity covered by the certificate;

(5) The principal identifying marks on the container;

(6) The railroad car initials and number, the truck and the trailer license number, the name of the vessel, the name of the air carrier, or other identification of the shipment; and

(7) The following statement if the facts warrant: Meets U.S. import requirements under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: May 2, 1978, to become effective June 15, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS: MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 68]

PART 1068—MILK IN THE UPPER MIDWEST MARKETING AREA

Orders Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This order suspends a requirement under the Upper Midwest milk marketing order that handlers make a partial payment to producers by the 25th day of the month for milk received from them during the first 15 days of the month. Handlers indicated that their producers want such payments to be made about 8 days later so that their partial payments and final payments for milk will be spaced about 15 days apart. The proposed suspension would be for the period May 1978 through April 1979.

DATE: Effective upon publication in the FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT:

Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, 202-447-7311.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of proposed suspension-issued March 30, 1978, published April 4, 1978 (43 FR 14025).

This suspension order is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Upper Midwest marketing area.

Notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 14025) concerning a proposed suspension of certain provisions of the order. Interested persons had an opportunity to comment on the proposed suspension in writing. A trade association of proprietary plants, two proprietary handlers and a cooperative association filed comments supporting the suspension. Two producers commented in opposition to the suspension.

After consideration of all relevant material, including the proposal in the notice, the comments received and other available information, it is found and determined that for the months of May 1978 through April 1979 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1068.73(a), subparagraph (4) in its entirety.

STATEMENT OF CONSIDERATION

The Upper Midwest milk order, which became effective June 1, 1976, initially required a partial payment to producers and cooperative associations on the 25th day of the month for milk received during the first 15 days of the month. Final payment was due, and still is, by the 18th day of the following month. These were the dates provided in the prior order for the Minneapolis-St. Paul area.

Many of the producers who were brought under the merged order, particularly those in Wisconsin, had been accustomed to receiving payments 15 days apart. They preferred such payments to being paid on the 18th and 25th of the month. To accommodate this, the pertinent provisions of the order have been suspended since November 1976 (41 FR 51389, 42 FR 22360 and 42 FR 59747). As requested, the suspensions were limited to payments to producers for whom a cooperative was not collecting payments.

A continuation of the suspension through April 1979 is supported by a trade association of proprietary handlers, two proprietary handlers and a cooperative association.

Two producers commented in opposition to the suspension. Their views centered on the need, in their opinion, to provide a partial payment on the 20th of the month for milk received the first 15 days of the month and the final payment on the 5th of the following month. This change cannot be considered in connection with this suspension action, which can apply only to existing provisions for a temporary period. The payment dates preferred by the two producers might be appropriate for consideration at a future amendment hearing.

The suspension should be extended for an additional period of twelve months pending a hearing at which proposals to amend the partial payment provisions may be considered. The suspension will enable handlers to continue to accommodate their producers who request that their payments be spaced about 15 days apart.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that the suspension does not require of persons affected substantial or extensive preparation prior to the effective date and notice of proposed rulemaking was given interested parties and thay were afforded opportunity to file written data, views, or arguments concerning this suspension.

Therefore, good cause exists for making this order effective May 5, 1978.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of May 1978 through April 1979.

(Secs. 1-19, 48 Stat. 31 as amended; (7 U.S.C. 601-674))

Effective date: May 5, 1978.

Signed at Washington, D.C., on May 2, 1978.

P. R. "ROBBY" SMITH,
Assistant Secretary.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—GENERAL REGULATIONS

[FmHA Administration Letter 856(440)]

PART 1811—BONDS AND NOTES FOR INSURED ASSOCIATION AND ORGANIZATION LOANS

Deletion

AGENCY: Farmers Home Administration, USDA.

ACTION: Final Rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations by deleting a regulation previously incorporated into another Part. The intended effect of this action is to eliminate duplicate regulations from the Code of Federal Regulations. This action is taken as a result of an administrative study by the Agency.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. LaVerne Isenberg, telephone: 202-447-2852.

SUPPLEMENTARY INFORMATION: Part 1811 of Subchapter A, Chapter XVIII, title 7 in the Code of Federal Regulations is deleted. The regulations contained in Part 1811 were previously incorporated into Part 1933, Subpart A of this chapter. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 533, with respect to such rules. This amendment however, is not published for proposed rulemaking since the purpose of the change is to remove duplication in the regulations and publication is therefore unnecessary.

Part 1811 is hereby deleted and reserved.

(Delegation of authority by the Secretary of Agriculture (7 CFR 2.23); delegation of authority by the Assistant Secretary for Rural Development (7 CFR 2.70).)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: April 14, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[FR Doc. 78-12292 Filed 5-4-78; 8:45 am]

[3410-07]

SUBCHAPTER J—LOAN AND GRANT PROGRAMS (GROUP)

PART 1933—LOAN AND GRANT PROGRAMS (GROUP)

Subpart A—Community Facility Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Interim rule.

SUMMARY: The Farmers Home Administration amends its regulations regarding easements for cable television. This action is being taken because in some cases an applicant for a loan for a cable television facility cannot get the required easements to insure the security of the loan. The intended effect is to relax the easement requirements and to point out that applicants may hook their cables to poles of an existing utility by signing a joint use agreement with the utility.

EFFECTIVE DATES: May 5, 1978. However, comments must be received on or before June 5, 1978.

ADDRESSES: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Mr. John Bowles, 202-447-7667.

SUPPLEMENTARY INFORMATION: FmHA amends 1933.17(a)(6)(i)(E)(*1*) of Subpart A, Part 1933, Chapter XVIII, Title 7 in the Code of Federal Regulations. Even though § 1933.20 indicates that the guides are not published, this guide is being published in the daily issue, but not codified, entitled "Agreement for Joint Use of Electric System Poles" so that interested parties have an opportunity to review the specific implications of this amendment. There have been situations where an applicant for a loan for a cable television utility could not get the required easements thus placing a burden on the applicant and the agency. This situation will be corrected by relaxing the easement requirements and pointing out that joint use agreements between the applicant and an existing utility are authorized. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This amendment, however, is being published effective on an interim basis. This action is being taken to relax an easement requirement on the public and at the same time permit public participation in the rulemaking process. Any delay in implementing this amendment would be contrary to the public interest because it would prevent certain members of the public from benefitting from this assistance. Comments made pursuant to this notice will be considered in the development of the final rule. Therefore, § 1933.17(a)(6)(i)(E)(*1*) is amended and a guide is published under § 1933.20 only in the daily issue and not codified and read as follows:

(1) Section 1933.17(a)(6)(i)(E)(*1*) is amended as follows:

§ 1933.17 Appendix A—Community facilities.

(a) • • •

(6) *Security.* • • •

(i) • • •

(E) *Public bodies and other than public bodies. (1) Title for right-of-way or easement.* (i) Applicants are responsible for obtaining continuous and adequate rights-of-way and interests in land needed for the construction, operation and maintenance of the facility. When a lien will be taken on a site for structures such as a reservoir or pumping station, and the applicant is able to obtain only a right-of-way or easement on such site rather than a fee simple title, the applicant will furnish a title report thereon by the applicant's attorney showing the ownership of the land and all mortgages or other lien defects, or encumbrances, if any. Consents, releases or subordinations will be obtained from the holders of outstanding liens or mortgages as may be necessary to give FmHA the required security. The applicant will take such title clearance steps as may be necessary or required by FmHA.

(ii) In those instances where it is feasible for Cable Television (CATV) to utilize poles of an existing utility through a joint use agreement this may be done in lieu of § 1933.17(a)(6)(i)(E)(*1*)(i). Such joint use agreement must be for a period not less than the terms of the loan and be approved by FmHA prior to its execution. Such an agreement does not relieve the borrower of its responsibility to assure FmHA that it can construct, operate, and maintain the facilities for which the loan is being sought. Appropriate permits should be obtained from public bodies. In the event difficulties ever arise relating to construction, operation or maintenance of any jointly used facilities the borrower must promptly take the necessary steps to adequately remedy the matter. The borrower's attorney will furnish an opinion that the borrower has fulfilled its responsibility under this paragraph and that any joint use agreement is sufficient and valid for its purpose. Section 1933.20 Guide 23

(available in any FmHA office) would be an acceptable agreement for this purpose.

• • • • •

(2) A guide is published under § 1933.20 only in the daily issue and not codified and reads as follows:

§ 1933.20 Guides—Community facilities.

FmHA Instruction 1733-A

AGREEMENT FOR JOINT USE OF ELECTRIC SYSTEM POLES

PREAMBLE

_____, a corporation organized under the laws of the State of _____, (hereinafter called the "Owner"), and _____, a corporation organized under the laws of the State of _____ (hereinafter called the "Licensee"), desiring to cooperate in the joint use of poles and right-of-way clearing incident thereto, whenever and wherever such use shall, in the estimation of both parties, be compatible with their respective needs, do hereby, in consideration of the premises and the mutual covenants herein contained, covenant and agree for themselves and their respective successors and assigns as follows:

ARTICLE I

SCOPE OF AGREEMENT

(a) This Agreement shall be in effect in the areas in which both of the parties render service in the State(s) of _____, and shall cover all poles of the Owner now existing or hereafter erected when said poles are brought under this Agreement in accordance with the procedure hereinafter provided.

(b) The Owner reserves the right to exclude any of its facilities from joint use.

(c) It is the intention of the parties that adequate _____ service shall be made available to the widest practicable number of rural users in the above areas.

ARTICLE II

SPECIFICATIONS

(a) The joint use of the poles covered by this Agreement shall at all times be in conformity with accepted modern methods, such as those set forth in Edison Electric Institute Publication No. M 12, and shall at all times conform to the requirements of the National Electrical Safety Code, Fifth Edition, and subsequent revisions thereof, except where the lawful requirements of public authorities may be more stringent, in which case the latter will govern.

(b) The strength of poles covered by this Agreement shall be sufficient to withstand the transverse and vertical loads imposed upon them under the storm loadings of the National Electrical Safety Code assumed for the area in which they are located, without exceeding fifty (50%) percent of their ultimate stress. In the case of existing pole lines, the strength of poles shall be assumed to be the same as when new.

ARTICLE III

ESTABLISHING JOINT USE OF POLES

(a) Before the Licensee shall make use of any of the poles of the Owner under this Agreement, it shall request permission therefor in writing on the application form attached hereto and identified as Appendix A, and shall comply with the procedure set forth therein and in this Article III.

(b) If, in the judgment of the Owner, joint use under the circumstances is undesirable, the Owner shall have the right to reject the application. In any event, within ___ ___ days after the receipt of such application the Owner shall notify the Licensee in writing whether the application is approved or rejected.

(c) After receipt of notice from the Owner that the application has been approved, the Licensee shall furnish the Owner detailed construction plans and drawings for each pole line, together with necessary maps, indicating specifically the poles of the Owner to be used jointly, the number and character of the circuits to be placed on such poles, any rearrangement of the Owner's fixtures and equipment necessary for joint use, any relocations or replacements of existing poles, and any additional poles that may be required. The Owner shall, on the basis of such detailed construction plans and drawings, submit to the Licensee within _____ days a cost estimate (including overhead and less salvage value of materials) for all changes that may be required in each such pole line, including an estimated completion date for such changes. Upon written notice by the Licensee to the Owner that the cost estimate is approved, the Owner shall immediately proceed with the necessary changes in the pole line covered by the cost estimate and shall diligently expedite the completion thereof within the time specified in the estimate. Nothing in the foregoing shall preclude the parties hereto from making any mutually agreeable arrangement for contracting for or otherwise accomplishing the necessary changes. Upon completion of all changes, the Licensee shall have the right hereunder to jointly use the poles and to make attachments in accordance with the terms of the application and of this Agreement. The Licensee shall, at its own expense, make attachments in such manner as not to interfere with the service of the Owner, and place guys and anchors to sustain any unbalanced loads caused by its attachments.

(d) Upon completion of all changes in each pole line to be used jointly, the Licensee shall pay to the Owner the actual cost (including overhead and less salvage value of materials) of making such changes but in no event, however, shall the Licensee be required to pay for such changes more than 120% of the cost estimate provided for in Section (c) of this Article. An itemized statement of the actual cost of all such changes shall be submitted by the Owner to the Licensee, in form mutually agreed upon.

(e) Any reclearing of existing rights-of-way and any tree trimming necessary for the establishment of joint use hereunder shall be performed by the parties as may be mutually agreed upon. The cost of any such right-of-way reclearing and trimming shall be borne by the parties as follows: for a right-of-way of up to twenty (20) feet in width, 50% by the Licensee and 50% by the Owner; for a right-of-way in excess of twenty (20) feet the Licensee shall pay the same proportion of the cost as ten (10) feet bears to the width of the right-of-way and the Owner shall pay the balance of the cost.

(f) All poles jointly used under this Agreement shall remain the property of the Owner, and any payments made by the Licensee for changes in pole lines under this Agreement shall not entitle the Licensee to the Ownership of any of said poles.

(g) In order that the parties may effectively coordinate their efforts with respect to joint use of any pole lines to be constructed in the future, the parties shall, insofar as practicable, make known to each other its plans for future construction. If joint use is contemplated with respect to such future construction, the parties shall cooperate in planning such construction so that joint use may be accomplished in a manner mutually satisfactory to the parties within the objectives of this Agreement.

ARTICLE IV

EASEMENTS AND RIGHTS-OF-WAY FOR LICENSEE'S ATTACHMENTS

While the Owner will cooperate as far as may be practicable in obtaining rights-of-way for joint use of poles, the Owner does not warrant or assure to the Licensee any rights-of-way privileges or easements, and if the Licensee shall at any time be prevented from placing or maintaining its attachments on the Owner's poles, no liability on account thereof shall attach to the Owner. Each party shall be responsible for obtaining its own easements and rights-of-way.

The Licensee during the term of this agreement shall have all the necessary rights to construct, operate and maintain its facilities as provided by this agreement.

ARTICLE V

MAINTENANCE OF POLES, ATTACHMENTS AND RIGHT-OF-WAY

(a) The Owner shall, at its own expense, maintain the jointly used poles in a safe and serviceable condition and in accordance with the specifications mentioned in Article II and shall replace, reinforce or repair such of these poles as become defective.

(b) When replacing a jointly used pole carrying terminals of aerial cable or underground connections, the new pole shall be set in the same hole which the replaced pole occupied unless special conditions make it necessary or mutually desirable to set it in a different location.

(c) Whenever right-of-way considerations or public regulations make relocation of a pole, or poles, necessary such relocations shall be made by the Owner at its own expense, except that each party shall bear the cost of transferring its own attachments.

(d) Whenever it is necessary to replace or relocate a jointly used pole, the Owner shall, before making such replacement or relocation, give 20 days notice thereof in writing (except in case of emergency, when verbal notice will be given and subsequently confirmed in writing) to the Licensee, specifying in such notice the time of such proposed replacement or relocation, and the Licensee shall, at the time so specified, transfer its attachments to the new or relocated joint pole. Should the Licensee fail to transfer its attachments to the new or relocated joint pole at the time specified for such transfer of attachments, the Owner may elect to do such work, and the Licensee shall pay the Owner the cost thereof.

(e) Except as otherwise provided in Section (f) of this Article, each party shall at all times maintain all of its attachments in accordance with the specifications mentioned in Article II and shall keep them in safe condition and in thorough repair. All necessary right-of-way maintenance, including tree trimming or cutting, shall be performed by the parties as may be mutually agreed upon and the cost thereof shall be borne by the parties as provided in Article III (e).

(f) Any existing joint use construction of the parties which does not conform to the specifications mentioned in Article II shall be brought into conformity therewith as soon as practicable.

When such existing construction shall have been brought into conformity with said specifications, it shall at all times thereafter be maintained as provided in Sections (a) and (e) of this Article.

ARTICLE VI

PROCEDURE WHEN CHARACTER OF CIRCUITS IS CHANGED

(a) When either party desires to change the character of its circuits, such party shall give _____ days notice to the other party of such contemplated change in the character of its circuits and in the event that the party agrees in writing to joint use with such changed circuits then, subject to the procedure hereinafter provided for in Sections (c) and (d) of this Article, the joint use of poles shall be continued with such changes in construction as may be required to meet the terms of the specifications mentioned in Article II for the character of circuits involved.

(b) In the event, however, that the other party fails within _____ days from receipt of such notice to agree in writing to continue the joint use of such poles with such changed circuits, then both parties shall cooperate in accordance with the following plan:

1. The parties hereto shall determine and agree upon the most practical and economical method of effectively providing for separate lines, either overhead or underground, and the party whose circuits are to be moved shall promptly carry out the necessary work.

2. The net cost involved in re-establishing such circuits in the new location as are necessary to furnish the same service facilities that exist in the joint use at the time such change was decided upon, shall be equitably apportioned between the parties hereto.

(c) If the change in character of circuits requires pole replacements for the sole benefit of the Owner, the pole replacements shall be made by and at the expense of the Owner. Before making such replacements the Owner shall give 20 days notice thereof in writing to the Licensee, specifying in such notice the time of such proposed replacements, and the Licensee shall, at the time so specified, transfer its attachments to the replaced pole or poles. Should the Licensee fail to transfer its attachments to the replaced pole or poles at the time specified for such transfer of attachments, the Owner may elect to do such work, and the Licensee shall pay the Owner the cost thereof.

(d) If the change in character of circuits requires pole replacements for the sole benefit of the Licensee, the Licensee shall, with respect to pole replacements necessitated by a change in the character of its circuits, follow the procedure provided for in Article III - Establishing Joint Use of Poles.

ARTICLE VII

ABANDONMENT OF JOINTLY USED POLES

(a) If the Owner desires at any time to abandon any jointly used pole, it shall give the Licensee notice in writing to that effect at least 60 days prior to the date on which it intends to abandon such pole. If at the expiration of said period the Owner shall have no attachments on such pole but the Licensee shall not have removed all of the attachments therefrom, such pole shall thereupon become the property of the Licensee, and the Licensee shall save harmless the Owner from all obligation, liability, damages, cost, expenses or charges incurred thereafter, and not arising out of anything theretofore occurring, because of, or arising out of, the presence or condition of such pole or of any attachments thereon, and shall pay the Owner for such pole an amount as may be mutually agreeable to the parties, but in no case shall the payment exceed the net salvage value of the pole to the Owner. The Owner shall further evidence transfer to the Licensee of title to the pole by means of a bill of sale.

(b) The Licensee may at any time abandon the use of a joint pole by giving due notice thereof in writing to the Owner and by removing therefrom any and all attachments it may have thereon. The Licensee shall in such case pay to the Owner the full rental for said pole for the then current year.

ARTICLE VIII

RENTALS

(a) On or about _____ of each year the parties acting in cooperation shall tabulate the total of the number of poles in joint use as of the preceding day and the number of poles on which the Licensee removed all of its attachments during the twelve preceding months, which tabulation shall indicate the number of poles on which rentals are to be paid.

(b) The rental per pole due from the Licensee to the Owner shall be $_____ per annum which shall be paid by the Licensee to the Owner for each jointly used pole as shown by the annual tabulation of joint poles provided for herein.

(c) At any time after 5 years from the date of this Agreement and at intervals of not less than 5 years thereafter, upon the written request of either party, the annual rental rate applicable under this Agreement shall be reviewed and, if the parties mutually agree, an adjusted annual rental rate shall be established by an amendment to this Agreement which shall apply starting with the next annual tabulation of poles provided for in Section (a) of this Article. All adjustments of the rental rate shall take into account the cost factors originally involved in all joint use existing at the time of the review.

ARTICLE IX

RIGHTS OF OTHER PARTIES

(a) If the Owner, prior to the execution of this Agreement, has conferred, or hereafter confers, upon others, not parties to this Agreement, by contract or otherwise, rights or privileges to use any poles covered by this Agreement, nothing herein contained shall be construed as affecting such rights or privileges, and the Owner shall have the right, by contract or otherwise, to continue or extend such existing rights or privileges, it being expressly understood, however, that for the purpose of this Agreement, the attachments of any such outside party shall be treated as attachments belonging to the Owner, and the rights, obligations, and liabilities hereunder of the Owner in respect to such attachments shall be the same as if it were the actual owner thereof.

(b) Where municipal regulations require the Owner to allow the use of its poles for street lighting and fire alarm, police, or other like signal systems, such use shall be permitted under the terms of this Article, provided attachments of such parties are placed and maintained in accordance with the specifications mentioned in Article II.

UMI

ARTICLE X

ASSIGNMENT OF RIGHTS

Except as otherwise provided in this Agreement, neither party hereto shall assign or otherwise dispose of this Agreement or any of its rights or interests hereunder, or in any of the jointly used poles, or the attachments or rights-of-way covered by this Agreement, to any firm, corporation or individual, without the written consent of the other party, except to the United States of America or any agency thereof; provided, however, that nothing herein contained shall prevent or limit the right of either party to mortgage any or all of its property, rights, privileges, and franchises, or lease or transfer any of them to another corporation organized for the purpose of conducting a business of the same general character as that of such party, or to enter into any merger or consolidation, and, in case of the foreclosure of such mortgage, or in case of lease, transfer, merger, or consolidation, its rights and obligations hereunder shall pass to, and be acquired and assumed by, the purchaser on foreclosure, the transferee, lessee, assignee, merging or consolidating company, as the case may be.

ARTICLE XI

WAIVER OF TERMS OR CONDITIONS

The failure of either party to enforce or insist upon compliance with any of the terms or conditions of this Agreement shall not constitute a general waiver or relinquishment of any such terms or conditions, but the same shall be and remain at all times in full force and effect.

ARTICLE XII

PAYMENT OF TAXES

Each party shall pay all taxes and assessments lawfully levied on its own property upon said jointly used poles, and the taxes and the assessments which are levied on said joint poles shall be paid by the owner thereof, but any tax, fee, or charge levied on the Owner's poles solely because of their use by the Licensee shall be paid by the Licensee.

ARTICLE XIII

INTEREST AND PAYMENTS

All amounts to be paid by one party to the other under this Agreement shall be due and payable within 30 days after an itemized statement shall have been presented to the party required to make such payment. Any payment not made within 30 days from the due date shall thereafter bear interest at the rate of 6% per annum until paid.

ARTICLE XIV

SERVICE OF NOTICES

Whenever in this Agreement notice is provided to be given by either party hereto to the other, such notice shall be in writing and given by letter mailed, or by personal delivery, to the Owner at its office at _____

_____

_____,

or to the Licensee at its office at _____ _____

_____ as the case may be, or to such other address as either party may from time to time designate in writing for that purpose.

ARTICLE XV

TERM OF AGREEMENT

This Agreement shall remain in effect until terminated at the end of _____ years from the date hereof or thereafter upon the giving of written notice to the other party not less than three years prior to the date of termination.

ARTICLE XVI

EXISTING CONTRACTS

——— * All existing agreements between the parties hereto for the joint use of poles shall remain in full force and effect with respect to those facilities being jointly used by the parties hereto as of the date of this Agreement. From and after the date of this Agreement, future grantings of joint use between the parties shall be governed by and shall be subject to the terms and conditions of this Agreement.

——— * All existing agreements between the parties hereto for the joint use of poles are by mutual consent hereby abrogated and superseded by this Agreement.

Nothing in the foregoing shall preclude the parties to this Agreement from preparing such supplemental operating routines or working practices as they mutually agree to be necessary or desirable to effectively administer the provisions of this Agreement.

ARTICLE XVII

APPROVAL OF ADMINISTRATOR

This Agreement, and any amendment thereof, shall be effective subject to the condition that, during any period in which the Owner or the Licensee is a borrower from the Farmers Home Administration, the Agreement and any amendment thereof shall have the approval in writing of the Administrator of the Farmers Home Administration.

In witness whereof, the parties hereto, have caused these presents to be executed in quadruplicate, and their corporate seals to be affixed thereto by their respective officers thereunto duly authorized, on the _____ day of _____, 19 ____.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 144]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period May 7-13, 1978. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: May 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, and upon other information, it is found that the limitation of handling of lemons, as hereafter provided, will tend to effectuate the declared policy of the act.

The comittee met pm May 2, 1978, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons continues good with all sizes being requested.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.444 Lemon Regulation 144.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period May 7, 1978, through May 13, 1978, is established at 285,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: May 3, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 78—BRUCELLOSIS

Subpart D—Designation of Brucellosis Areas, Specifically Approved Stockyards, and Slaughtering Establishments

BRUCELLOSIS AREAS

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Animal and Plant Health Inspection Service is amending its Brucellosis Regulations. These amendments update the Brucellosis regulations by providing the current status of various counties and States which have been designated Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, or Noncertified Areas for purposes of interstate movement of cattle and bison from such areas. This action is required because of the change in the Brucellosis status of the areas affected.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. A. D. Robb, U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services, Hyattsville, Md., Room 805, 301-436-8713.

SUPPLEMENTARY INFORMATION: The amendments delete the following areas from the list of Noncertified Areas in § 78.22 and add such areas to the list designated as Modified Certified Brucellosis Areas in § 78.21 because it has been determined that they again come within the definition of a Modified Certified Brucellosis Area in § 78.1(m): Barry County in Missouri.

The amendments delete the following areas from the list of Modified Certified Brucellosis Areas in § 78.21 and add such areas to the list designated as Certified Brucellosis-Free Areas in § 78.20 because it has been determined that they now come within the definition of a Certified Brucellosis-Free Area in § 78.1(l): Anderson, Clay, Douglas, Finney, Stevens, and Wyandotte Counties in Kansas; and Banner County in Nebraska.

Accordingly, §§ 78.20, 78.21, and 78.22 of Part 78, Title 9, Code of Federal Regulations, designating Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas and Noncertified Areas, respectively, are amended to read as follows:

§ 78.20 Certified Brucellosis-Free Areas.

The following States, or specified portions thereof, are hereby designated as Certified Brucellosis-Free Areas:

(a) *Entire States.*

Arizona, California, Connecticut, Delaware, Hawaii, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Virginia, Washington, West Virginia, Wisconsin, Virgin Islands.

(b) *Specific counties within States.*

Alabama. Dale, Geneva.

Arkansas. Baxter, Bradley, Carroll, Cleveland, Columbia, Dallas, Drew, Fulton, Garland, Grant, Jefferson, Johnson, Marion, Monroe, Montgomery, Newton, Ouachita, Searcy, Sharp, Stone, Union, Woodruff.

Colorado. Adams, Alamosa, Arapahoe, Archuleta, Baca, Bent, Boulder, Chaffee, Cheyenne, Clear Creek, Conejos, Costilla, Crowley, Custer, Delta, Denver, Dolores, Douglas, Eagle, Elbert, El Paso, Fremont,

Garfield, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jackson, Jefferson, Kiowa, Kit Carson, Lake, La Plata, Larimer, Las Animas, Lincoln, Logan, Mineral, Moffat, Montezuma, Montrose, Morgan, Otero, Ouray, Park, Phillips, Pitkin, Prowers, Pueblo, Rio Blanco, Rio Grande, Routt, Saguache, San Juan, San Miguel, Sedgwick, Summit, Teller, Washington, Weld, Yuma.

Florida. Baker, Bay, Citrus, Dixie, Escambia, Franklin, Holmes, Jackson, Leon, Liberty, Monroe, Okaloosa, Orange, Santa Rosa, Seminole, St. Johns, Taylor, Wakulla, Walton, Washington.

Georgia. Appling, Atkinson, Bacon, Banks, Brantley, Bryan, Bulloch, Burke, Butts, Camden, Candler, Charlton, Chatham, Chattahoochee, Clarke, Clayton, Cook, Crawford, De Kalb, Echols, Effingham, Evans, Fannin, Franklin, Glascock, Glynn, Greene, Habersham, Jeff Davis, Johnson, Lanier, Laurens, Liberty, Long, McIntosh, Monroe, Peach, Rabun, Richmond, Screven, Stephens, Taylor, Toombs, Treutlen, Twiggs, Upson, Ware, Wayne, Wheeler, White, Wilkinson.

Idaho. Ada, Adams, Bear Lake, Benewah, Blaine, Boise, Bonner, Boundary, Butte, Camas, Canyon, Clark, Clearwater, Custer, Gem, Idaho, Kootenai, Latah, Lemhi, Lewis, Minidoka, Nez Perce, Owyhee, Payette, Power, Shoshone, Valley, Washington.

Illinois. Adams, Alexander, Bond, Boone, Brown, Bureau, Calhoun, Carroll, Cass, Champaign, Christian, Clark, Clay, Clinton, Coles, Cook, Crawford, Cumberland, De Kalb, De Witt, Douglas, Du Page, Edgar, Edwards, Effingham, Fayette, Ford, Franklin, Fulton, Gallatin, Greene, Grundy, Hamilton, Hancock, Hardin, Henderson, Henry, Iroquois, Jackson, Jasper, Jefferson, Jersey, Jo Daviess, Johnson, Kane, Kankakee, Kendall, Knox, Lake, La Salle, Lawrence, Lee, Livingston, Logan, Macon, Macoupin, Madison, Marion, Marshall, Mason, McDonough, McHenry, McLean, Menard, Mercer, Monroe, Montgomery, Morgan, Moultrie, Ogle, Peoria, Perry, Piatt, Pike, Pope, Pulaski, Putnam, Randolph, Richland, Rock Island, St. Clair, Saline, Sangamon, Schuyler, Scott, Shelby, Stark, Stephenson, Tazewell, Union, Vermilion, Wabash, Warren, Washington, Wayne, White, Whiteside, Will, Williamson, Winnebago, Woodford.

Iowa. Adair, Allamakee, Audubon, Benton, Black Hawk, Boone, Bremer, Buchanan, Buena Vista, Butler, Calhoun, Carroll, Cass, Cedar, Cerro Gordo, Cherokee, Chickasaw, Clarke, Clay, Clayton, Clinton, Crawford, Dallas, Davis, Decatur, Delaware, Des Moines, Dickinson, Dubuque, Emmet, Fayette, Floyd, Franklin, Fremont, Greene, Grundy, Hamilton, Hancock, Hardin, Harrison, Henry, Howard, Humboldt, Ida, Iowa, Jackson, Jasper, Jefferson, Johnson, Jones, Keokuk, Kossuth, Lee, Linn, Louisa, Lucas, Lyon, Madison, Mahaska, Marion, Marshall, Mills, Mitchell, Monona, Monroe, Montgomery, Muscatine, O'Brien, Osceola, Page, Palo Alto, Pocahontas, Polk, Pottawattamie, Poweshiek, Plymouth, Sac, Scott, Shelby, Sioux, Story, Tama, Taylor, Union, Van Buren, Wapello, Warren, Washington, Webster, Winnebago, Winneshiek, Woodbury, Worth, Wright.

Kansas. Anderson, Barber, Brown, Chase, Cheyenne, Clark, Clay, Comanche, Decatur, Doniphan, Douglas, Edwards, Ellsworth, Finney, Ford, Gove, Graham, Grant, Gray, Greeley, Hamilton, Haskell, Hodgeman, Jewell, Johnson, Kearny, Kingman, Kiowa, Lane, Logan, Marion, Marshall, Meade, Ness, Norton, Pawnee, Phillips, Pottawatomie, Pratt, Rawlins, Republic, Riley, Rooks, Rush, Saline, Scott, Shawnee, Sheridan, Sherman, Smith, Stanton, Stevens, Thomas, Trego, Wallace, Washington, Wichita, Wyandotte.

Kentucky. Bell, Breathitt, Campbell, Clay, Edmonson, Floyd, Harlan, Johnson, Kenton, Knott, Knox, Lawrence, Lee, Leslie, Letcher, Lewis, Magoffin, Martin, McCreary, Menifee, Morgan, Owsley, Pendleton, Perry, Pike, Robertson, Trimble, Whitley, Wolfe.

Mississippi. Alcorn, Hancock, Harrison, Jackson, Stone, Tishomingo.

Missouri. Audrain, Dunklin, Gasconade, Hickory, Lewis, Moniteau, Montgomery, Perry, Platte, Pulaski, St. Louis, Schuyler, Shelby.

Nebraska. Banner, Box Butte, Cheyenne, Dakota, Deuel, Thurston.

New Mexico. Catron, Colfax, Dona Ana, Grant, Harding, Hidalgo, Lincoln, Los Alamos, Luna, McKinley, Otero, Rio Arriba, Sandoval, San Juan, Santa Fe, Sierra, Socorro, Taos, Torrance.

South Dakota. Aurora, Beadle, Bennett, Bon Homme, Brookings, Brown, Brule, Buffalo, Butte, Campbell, Charles Mix, Clark, Clay, Codington, Corson, Custer, Davison, Day, Deuel, Dewey, Douglas, Edmunds, Fall River, Faulk, Grant, Gregory, Haakon, Hamlin, Hand, Hanson, Hughes, Hutchinson, Hyde, Jackson, Jerauld, Kingsbury, Lake, Lawrence, Lincoln, Lyman, Marshall, McCook, McPherson, Meade, Mellette, Miner, Minnehaha, Moody, Pennington, Perkins, Potter, Roberts, Sanborn, Shannon, Spink, Sully, Todd, Tripp, Turner, Union, Walworth, Washabaugh, Yankton, Ziebach.

Tennessee. Anderson, Blount, Campbell, Carter, Claiborne, Davidson, Fentress, Grainger, Greene, Hamblen, Hancock, Jefferson, Johnson, Knox, Lake, Lewis, Meigs, Morgan, Perry, Polk, Roane, Robertson, Scott, Sequatchie, Sevier, Sullivan, Unicoi, Union, Van Buren.

Texas. Armstrong, Borden, Brewster, Childress, Comal, Crane, Culberson, Ector, Gillespie, Glasscock, Gray, Hansford, Hartley, Hemphill, Hudspeth, Hutchinson, Irion, Jeff Davis, Kendall, Kerr, Kimble, Lipscomb, Llano, Loving, Martin, Mason, Menard, Midland, Moore, Newton, Ochiltree, Pecos, Presidio, Reagan, Real, Roberts, Schleicher, Sherman, Sterling, Sutton, Terrell, Val Verde, Ward, Winkler, Yoakum.

Utah. Beaver, Cache, Carbon, Daggett, Davis, Duchesne, Emery, Garfield, Grand, Iron, Juab, Kane, Millard, Morgan, Piute, Rich, Salt Lake, San Juan, Sanpete, Sevier, Summit, Tooele, Uintah, Utah, Wasatch, Washington, Wayne, Weber.

Vermont. Bennington, Caledonia, Essex, Grand Isle, Lamoille, Orange, Rutland, Washington, Windham, Windsor.

Wyoming. Albany, Big Horn, Campbell, Carbon, Converse, Crook, Fremont, Goshen, Hot Springs, Johnson, Laramie, Natrona, Niobrara, Park, Platte, Sheridan, Sublette, Sweetwater, Teton, Uinta, Washakie, Weston.

Puerto Rico. Adjuntas, Aguada, Aguadilla, Aguas Buenas, Aibonito, Anasco, Arroyo, Barceloneta, Barranquitas, Bayamon, Cabo Rojo, Caguas, Canovanas (Loiza), Catano, Cayey, Ceiba, Ciales, Cidra, Coamo, Comerio, Corozal, Culebra, Dorado, Fajardo, Guanica, Guayama, Guaynabo, Guayanilla, Hormigueros, Humacao, Jayuya, Juana Diaz, Juncos, Lajas, Lares, Las Marias, Luquillo, Manati, Maricao, Maunabo, Mayaguez, Moca, Morovis, Naranjito, Orocovis, Patillas, Penuelas, Ponce, Rincon, Rio Grande, Rio Piedras, Sabana Grande, Salinas, San German, San Juan, San Lorenzo, Santa Isabel, Toa Alta, Toa Baja, Trujillo Alto, Utuado, Vega Alta, Vega Baja, Vieques, Villalba, Yabucoa, Yauco.

§ 78.21 Modified Certified Brucellosis Areas.

The following States, or specified portions thereof, are hereby designated as Modified Certified Brucellosis Areas:

(a) *Entire States.*

Alaska, Louisiana, Oklahoma.

(b) *Specific Counties Within States.*

Alabama. Autauga, Baldwin, Barbour, Bibb, Blount, Bullock, Butler, Calhoun, Chambers, Cherokee, Chilton, Choctaw, Clarke, Clay, Cleburne, Coffee, Colbert, Conecuh, Coosa, Covington, Crenshaw, Cullman, Dallas, De Kalb, Elmore, Etowah, Escambia, Fayette, Franklin, Greene, Hale, Henry, Houston, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Lee, Limestone, Lowndes, Macon, Madison, Marengo, Marion, Marshall, Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Pike, Randolph, Russell St. Clair, Shelby, Sumter, Talladega, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, Winston.

Arkansas. Arkansas, Ashley, Benton, Boone, Calhoun, Chicot, Clark, Clay, Cleburne, Conway, Craighead, Crawford, Crittenden, Cross, Desha, Faulkner, Franklin, Greene, Hempstead, Hot Spring, Howard, Independence, Izard, Jackson, Lafayette, Lawrence, Lee, Lincoln, Little River, Logan, Lonoke, Madison, Miller, Mississippi, Nevada, Perry, Phillips, Pike, Poinsett, Polk, Pope, Prairie, Pulaski, Randolph, Saline, Scott, St. Francis, Sebastian, Sevier, Van Buren, Washington, White, Yell.

Colorado. Mesa.

Florida. Alachua, Bradford, Brevard, Broward, Calhoun, Charlotte, Clay, Collier, Columbia, Dade, De Soto, Duval, Flagler, Gadsden, Gilchrist, Glades, Gulf, Hamilton, Hardee, Hendry, Hernando, Highlands, Hillsborough, Indian River, Jefferson, Lafayette, Lake, Lee, Levy, Madison, Manatee, Marion, Martin, Nassau, Osceola, Palm Beach, Pasco, Pinellas, Polk, Putnam, St. Lucie, Sarasota, Sumter, Suwanee, Union, Volusia.

Georgia. Baker, Baldwin, Barrow, Bartow, Ben Hill, Berrien, Bibb, Bleckley, Brooks, Calhoun, Carroll, Catoosa, Chattooga, Cherokee, Clay, Clinch, Cobb, Coffee, Colquitt, Columbia, Coweta, Crisp, Dade, Dawson, Decatur, Dodge, Dooly, Dougherty, Douglas, Early, Elbert, Emanuel, Fayette, Floyd, Forsyth, Fulton, Gilmer, Gordon, Grady, Gwinnett, Hall, Hancock, Haralson, Harris, Hart, Heard, Henry, Houston, Irwin, Jackson, Jasper, Jefferson, Jenkins, Jones, Lamar, Lee, Lincoln, Lowndes, Lumpkin, Macon, Madison, Marion, McDuffie, Meriwether, Miller, Mitchell, Montgomery, Morgan, Murray, Muscogee, Newton, Oconee, Oglethorpe, Paulding, Pickens, Pierce, Pike, Polk, Pulaski, Putnam, Quitman, Randolph, Rockdale, Schley, Seminole, Spalding, Stewart, Sumter, Talbot, Taliaferro, Tattnall, Telfair, Terrell, Thomas, Tift, Towns, Troup, Turner, Union, Walker, Walton, Warren, Washington, Webster, Whitfield, Wilcox, Wilkes, Worth.

Idaho. Bannock, Bingham, Bonneville, Caribou, Cassia, Elmore, Franklin, Fremont,

V 4 3 — 8 8

Gooding, Jefferson, Jerome, Lincoln, Madison, Oneida, Teton, Twin Falls.

Illinois. Massac.

Iowa. Adams, Appanoose, Guthrie, Ringgold, Wayne.

Kansas. Allen, Atchison, Barton, Bourbon, Butler, Chautauqua, Cherokee, Cloud, Coffey, Cowley, Crawford, Dickinson, Elk, Ellis, Franklin, Geary, Greenwood, Harper, Harvey, Jackson, Jefferson, Labette, Leavenworth, Lincoln, Linn, Lyon, McPherson, Miami, Mitchell, Montgomery, Morris, Morton, Nemaha, Neosho, Osage, Osborne, Ottawa, Reno, Rice, Russell, Sedgwick, Seward, Stafford, Sumner, Wabaunsee, Wilson, Woodson.

Kentucky. Adair, Allen, Anderson, Ballard, Barren, Bath, Boone, Bourbon, Boyd, Boyle, Bracken, Breckinridge, Bullitt, Butler, Caldwell, Calloway, Carlisle, Carroll, Carter, Casey, Christian, Clark, Clinton, Crittenden, Cumberland, Daviess, Elliott, Estill, Fayette, Fleming, Franklin, Fulton, Gallatin, Garrard, Grant, Graves, Grayson, Green, Greenup, Hancock, Hardin, Harrison, Hart, Henderson, Henry, Hickman, Hopkins, Jackson, Jefferson, Jessamine, Larue, Laurel, Lincoln, Livingston, Logan, Lyon, Madison, Marion, Marshall, Mason, McCracken, McLean, Meade, Mercer, Metcalfe, Monroe, Montgomery, Muhlenberg, Nelson, Nicholas, Ohio, Oldham, Owen, Powell, Pulaski, Rockcastle, Rowan, Russell, Scott, Shelby, Simpson, Spencer, Taylor, Todd, Trigg, Union, Warren, Washington, Wayne, Webster, Woodford.

Mississippi. Adams, Amite, Attala, Benton, Bolivar, Calhoun, Carroll, Chickasaw, Choctaw, Claiborne, Clarke, Clay, Coahoma, Copiah, Covington, De Soto, Forrest, Franklin, George, Greene, Grenada, Hinds, Holmes, Humphreys, Issaquena, Itawamba, Jasper, Jefferson, Jefferson Davis, Jones, Kemper, Lafayette, Lamar, Lauderdale, Lawrence, Leake, Lee, LeFlore, Lincoln, Lowndes, Madison, Marion, Marshall, Monroe, Montgomery, Neshoba, Newton, Noxubee, Oktibbeha, Panola, Pearl River, Perry, Pike, Pontotoc, Prentiss, Quitman, Rankin, Scott, Sharkey, Simpson, Smith, Sunflower, Tallahatchie, Tate, Tippah, Tunica, Union, Walthall, Warren, Washington, Wayne, Webster, Wilkinson, Winston, Yalobusha, Yazoo.

Missouri. Adair, Andrew, Atchison, Barry, Barton, Bates, Benton, Bollinger, Boone, Buchanan, Butler, Caldwell, Callaway, Camden, Cape Girardeau, Carroll, Carter, Cass, Cedar, Chariton, Christian, Clark, Clay, Clinton, Cole, Cooper, Crawford, Dade, Dallas, Daviess, De Kalb, Dent, Douglas, Franklin, Gentry, Greene, Grundy, Harrison, Henry, Holt, Howard, Howell, Iron, Jackson, Jasper, Jefferson, Johnson, Knox, Laclede, Lafayette, Lawrence, Lincoln, Linn, Livingston, Macon, Madison, Maries, Marion, McDonald, Mercer, Miller, Mississippi, Monroe, Morgan, New Madrid, Nodaway, Oregon, Osage, Ozark, Pemiscot, Pettis, Phelps, Pike, Polk, Putnam, Ralls, Randolph, Ray, Reynolds, Ripley, St. Charles, St. Clair, St. Francois, St. Genevieve, Saline, Scotland, Scott, Shannon, Stoddard, Stone, Sullivan, Taney, Texas, Vernon, Warren, Washington, Wayne, Webster, Worth, Wright.

Nebraska. Adams, Antelope, Arthur, Blaine, Boone, Boyd, Brown, Buffalo, Burt, Butler, Cass, Cedar, Chase, Cherry, Clay, Colfax, Cuming, Custer, Dawes, Dawson, Dixon, Dodge, Douglas, Dundy, Fillmore, Franklin, Frontier, Furnas, Gage, Garden, Garfield, Gosper, Grant, Greeley, Hall, Hamilton, Harlan, Hayes, Hitchcock, Holt, Hooker, Howard, Jefferson, Johnson, Kearney, Keith, Keya Paha, Kimball, Knox, Lancaster, Lincoln, Logan, Loup, Madison, McPherson, Merrick, Morrill, Nance, Nemaha, Nuckolls, Otoe, Pawnee, Perkins, Phelps, Pierce, Platte, Polk, Redwillow, Richardson, Rock, Saline, Sarpy, Saunders, Scotts Bluff, Seward, Sheridan, Sherman, Sioux, Stanton, Thayer, Thomas, Valley, Washington, Wayne, Webster, Wheeler, York.

New Mexico. Bernalillo, Chaves, Curry, De Baca, Eddy, Guadalupe, Lea, Mora, Quay, Roosevelt, San Miguel, Union, Valencia.

South Dakota. Jones, Stanley.

Tennessee. Bedford, Benton, Bledsoe, Bradley, Cannon, Carroll, Cheatham, Chester, Clay, Cocke, Coffee, Crockett, Cumberland, Decatur, DeKalb, Dickson, Dyer, Fayette, Franklin, Gibson, Giles, Grundy, Hamilton, Hardeman, Hardin, Hawkins, Haywood, Henderson, Henry, Hickman, Houston, Humphreys, Jackson, Lauderdale, Lawrence, Lincoln, Loudon, Macon, Madison, Marion, Marshall, Maury, McMinn, McNairy, Monroe, Montgomery, Moore, Obion, Overton, Pickett, Putnam, Rhea, Rutherford, Shelby, Smith, Stewart, Sumner, Tipton, Trousdale, Warren, Washington, Wayne, Weakley, White, Williamson, Wilson.

Texas. Anderson, Andrews, Angelina, Aransas, Archer, Atascosa, Austin, Bailey, Bandera, Bastrop, Baylor, Bee, Bell, Bexar, Blanco, Bosque, Bowie, Brazoria, Brazos, Briscoe, Brooks, Brown, Burleson, Burnet, Caldwell, Calhoun, Callahan, Cameron, Camp, Carson, Cass, Castro, Chambers, Cherokee, Clay, Cochran, Coke, Coleman, Collin, Collingsworth, Colorado, Comanche, Concho, Cooke, Coryell, Cottle, Crockett, Crosby, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, De Witt, Dickens, Dimmitt, Donley, Duval, Eastland, Edwards, Ellis, El Paso, Erath, Falls, Fannin, Fayette, Fisher, Floyd, Foard, Fort Bend, Franklin, Freestone, Frio, Gaines, Galveston, Garza, Goliad, Gonzales, Grayson, Gregg, Grimes, Guadalupe, Hale, Hall, Hamilton, Hardeman, Hardin, Harris, Harrison, Haskell, Hays, Henderson, Hidalgo, Hill, Hockley, Hood, Hopkins, Houston, Howard, Hunt, Jack, Jackson, Jasper, Jefferson, Jim Hogg, Jim Wells, Johnson, Jones, Karnes, Kaufman, Kenedy, Kent, King, Kinney, Kleberg, Knox, Lamar, Lamb, Lampasa, La Salle, Lavaca, Lee, Leon, Liberty, Limestone, Live Oak, Lubbock, Lynn, McCulloch, McLennan, McMullen, Madison, Marion, Matagorda, Maverick, Medina, Milam, Mills, Mitchell, Montague, Montgomery, Morris, Motley, Nacogdoches, Navarro, Nolan, Nueces, Oldham, Orange, Palo Pinto, Panola, Parker, Parmer, Polk, Potter, Rains, Randall, Red River, Reeves, Refugio, Robertson, Rockwall, Runnels, Rusk, Sabine, San Augustine, San Jacinto, San Patricio, San Saba, Scurry, Shackelford, Shelby, Smith, Somervell, Starr, Stephens, Stonewall, Swisher, Tarrant, Taylor, Terry, Throckmorton, Titus, Tom Green, Travis, Trinity, Tyler, Upshur, Upton, Uvalde, Van Zandt, Victoria, Walker, Waller, Washington, Webb, Wharton, Wheeler, Wichita, Wilbarger, Willacy, Williamson, Wilson, Wise, Wood, Young, Zapata, Zavala.

Utah. Box Elder.

Vermont. Addison, Chittenden, Franklin, Orleans.

Wyoming. Lincoln.

Puerto Rico. Arecibo, Camuy, Carolina, Gurabo, Hatillo, Isabela, Las Piedras, Naguabo, Quebradillas, San Sebastian.

§ 78.22 Noncertified areas.

The following States, or specified portions thereof, are hereby designated as Noncertified Brucellosis Areas:

(a) *Entire States.*

Yellowstone National Park.

(b) *Specific Counties Within States.*

Florida. Okeechobee.
Missouri. Newton.
South Dakota. Harding.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; sec. 3, 33 Stat. 1265, as amended; sec. 2, 65 Stat. 693; and secs. 3 and 11, 76 Stat. 130, 132, 21 U.S.C. 111-113, 114a-1, 115, 117, 120, 121, 125, 134b, 134f; 37 FR 28464, 28477; 38 FR 19141, 9 CFR 78.25.)

The amendments impose certain restrictions necessary to prevent the spread of brucellosis in cattle and relieve certain restrictions presently imposed. They should be made effective promptly in order to accomplish their purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 1st day of May 1978.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Deputy Administrator Veterinary Services.

[FR Doc. 78-12295 Filed 5-4-78; 8:45 am]

[3410-34]

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 97—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Commuted Traveltime Allowances

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends administrative instructions prescribing commuted traveltime. This amendment establishes commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which an employee of Veterinary Services performs overtime or holiday duty when such travel is performed solely on account of overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. H. L. Arnold, USDA, APHIS, VS, Federal Building, Room 867, Hyattsville, Md. 20782, 301-436-8684.

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service by § 97.1 of the regulations concerning overtime services relating to imports and exports (9 CFR 97.1), administrative instructions 9 CFR 97.2 (1977 ed.), as amended April 26, 1977 (42 FR 21269), May 27, 1977 (42 FR 27218), July 5, 1977 (42 FR 34276), October 28, 1977 (42 FR 56719), November 15, 1977 (42 FR 59062), and December 20, 1977 (42 FR 63770), prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty, are hereby amended by adding to the respective list therein as follows:

§ 97.2 Administrative instructions prescribing commuted traveltime.

* * * * *

OUTSIDE METROPOLITAN AREA

THREE HOURS

Tarzana, Calif. (served from Lawndale, Calif.).

(84 Stat. 561 (7 U.S.C. 2260).)

It is to the benefit of the public that this instruction be made effective at the earliest practicable date. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and public procedure on this instruction are impracticable, unnecessary, and contrary to the public interest and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 27th day of April 1978.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Deputy Administrator, Veterinary Services.

CHAPTER II—AGRICULTURAL MARKETING SERVICE (PACKERS AND STOCKYARDS), DEPARTMENT OF AGRICULTURE

RULES OF PRACTICE, STATEMENTS OF GENERAL POLICY, AND STATEMENT OF ORGANIZATION AND FUNCTIONS

Conforming Amendments

AGENCY: Agricultural Marketing Service (Packers and Stockyards), United States Department of Agriculture.

ACTION: Final rules, rules of practice, statements of general policy, and statement of organization and functions.

SUMMARY: This document makes conforming amendments to reflect the merger of the Packers and Stockyards Administration into the Agricultural Marketing Service.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

John J. Casey, Attorney, Office of the General Counsel, United States Department of Agriculture, Washington, D.C. 20250, telephone 202-447-7357.

SUPPLEMENTARY INFORMATION: By documents published in the FEDERAL REGISTER on December 30, 1977, 42 FR 65131-2, 65223, the delegations of authority from the Assistant Secretary of Agriculture for Marketing Services were revised to reflect the merger of the Packers and Stockyards Administration into the Agricultural Marketing Service. This document makes conforming amendments to the regulations issued under the Packers and Stockyards Act, the Rules of Practice governing proceedings under that Act, the statements of general policy under that Act, and the statement of organization and functions of the Packers and Stockyards Administration, to reflect that merger.

Accordingly, Chapter II of Title 9 of the Code of Federal Regulations is hereby redesignated, Parts 201, 202, and 203 are hereby amended by adding footnotes to the captions thereof, and § 204.1 is hereby revised, to read as set forth below.

It is hereby found that notice of proposed rulemaking and public procedure on this document are unnecessary, and good cause is found for making these amendments effective less than thirty days after publication, in that this document only conforms various provisions to reflect an action previously taken.

(Section 407, 42 Stat. 169; section 4, 72 Stat. 1750; 77 Stat. 79; section 11, 90 Stat. 1252; 7 U.S.C. 228; 7 CFR 2.17, 2.50; 42 FR 65131-2, 65223.)

Done at Washington, D.C. on April 28, 1978.

CHAS B. JENNINGS,
Acting Deputy Administrator, Packers and Stockyards, Agricultural Marketing Service.

PART 201—REGULATIONS UNDER THE PACKERS AND STOCKYARDS ACT [1]

PART 202—RULES OF PRACTICE GOVERNING PROCEEDINGS UNDER THE PACKERS AND STOCKYARDS ACT [2]

PART 203—STATEMENTS OF GENERAL POLICY UNDER THE PACKERS AND STOCKYARDS ACT [3]

PART 204—ORGANIZATION AND FUNCTIONS

§ 204.1 Introduction.

The Agricultural Marketing Service hereby describes that part of its central and field organization which is

[1] References in these regulations to the Packers and Stockyards Administration shall be deemed to refer to those divisions and offices of the Agricultural Marketing Service which are charged with administration of the Packers and Stockyards Act, and references in these regulations to the Administrator of the Packers and Stockyards Administration shall be deemed to refer to the Deputy Administrator, Packers and Stockyards, Agricultural Marketing Service.

[2] References in these rules to the Packers and Stockyards Administration shall be deemed to refer to those divisions and offices of the Agricultural Marketing Service which are charged with administration of the Packers and Stockyards Act, and references in these rules to the Administrator of the Packers and Stockyards Administration shall be deemed to refer to the Deputy Administrator, Packers and Stockyards, Agricultural Marketing Service.

[3] References in these statements to the Packers and Stockyards Administration shall be deemed to refer to those divisions and offices of the Agricultural Marketing Service which are charged with administration of the Packers and Stockyards Act, and references in these statements to the Administrator of the Packers and Stockyards Administration shall be deemed to refer to the Deputy Administrator, Packers and Stockyards, Agricultural Marketing Service.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Revision 13, Amdt. 20]

PART 121—SMALL BUSINESS SIZE STANDARDS

Definition of Small Business for Purpose of SBA Loans—Radio and Television Broadcasting

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This rule establishes size standards for small radio and television firms to receive SBA financial or loan assistance. It is necessary because there are no size standards for these two industries. This new rule is intended to establish the eligibility criteria for small radio and TV firms for SBA assistance.

EFFECTIVE DATE: May 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Harvey D. Bronstein, 202-653-6373.

SUPPLEMENTARY INFORMATION: On February 10, 1978 (43 FR 5846), the SBA published a proposed rule in the FEDERAL REGISTER to establish small business size standards for radio and television broadcasting firms of, respectively, $2 million and $5 million in annual receipts. Since that time, the Agency has received only one comment. It stated that the proposed standards are too low because they would eliminate the possibility of purchasing broadcasting facilities in major markets. The Agency's response to this comment is that the purpose of size standards is to define small business on an industry-by-industry basis for the country as a whole. A size standard high enough to include broadcasting firms in a major market would include some of the largest broadcasting firms in the nation. This would defeat the purpose of size standards, which is to make distinctions between small and non-small.

Accordingly, Part 121 of Chapter I, Title 13, of the Code of Federal Regulations is amended by:

Revising § 121.3-10 by adding a new paragraph (1) to read as follows, and by deleting paragraph (d)(12):

§ 121.3-10 Definition of small business for SBA loans.

* * * * *

(l) *Communications.* (1) Any firm primarily engaged in radio broadcasting, SIC-4832, is small if its annual receipts do not exceed $2 million.

(2) Any firm primarily engaged in television broadcasting, SIC-4833, is small if its annual receipts do not exceed $5 million.

(3) Any firm primarily engaged in providing cable television service rental to homes is small if its annual receipts do not exceed $3 million is small.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER F—POLICY STATEMENTS

[Regulation PS-76, Amdt. 55]

PART 399—STATEMENTS OF GENERAL POLICY

Role of Staff in Route Proceedings; Amendment of Part

AGENCY: Civil Aeronautics Board.

ACTION: Statement of policy.

SUMMARY: This Policy Statement establishes the role we direct our staff to assume in hearing cases involving the award of route authority. In a recent order issued by the Board (Order 78-4-28, April 6, 1978) the issue arose as to the proper role of staff in route cases. The intent of this policy statement is to establish standards applicable to staff participation in such cases.

DATES: Effective: May 2, 1978. Adopted: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Philip J. Bakes, Jr., General Counsel, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5233.

SUPPLEMENTARY INFORMATION: In several proceedings pending before the Board, administrative law judges have ordered all parties to file prehearing statements of position on the merits. Judge William Dapper dismissed the Bureau of Pricing and Domestic Aviation (BPDA) from the *Transcontinental Low-Fare Route Proceeding,* Docket 30356, for failing to comply with his directive that they file a prehearing statement of position and, in Order 78-4-28, we directed that BPDA be permitted to continue to participate in the traditional way in that important case. We said that we would undertake to consider the important issues raised by Judge Dapper's directive, and review the merits of a change in the traditional role of our staff in route cases.

We were and continue to be sensitive to the problems our staff faces when we are changing our procedures to accelerate our decisions, undertaking extensive revisions of our rules, and considering major departures from past regulatory policy. Although traditionally the staff has not stated its position until after the receipt of all evidence and the close of the hearing, the recent actions of several administrative law judges have focused our attention on the broader question of the proper staff role in a changing policy environment, and we have concluded that a change is in order. Consequently, pursuant to our powers under sections 204 and 1001 of the Act, this policy statement establishes the role we direct our staff to assume in hearing cases involving the award of route authority.

There is no question that the filing of prehearing[1] statements of position on the merits in some types of cases can be an effective trial technique. Such statements of position help define the scope of each party's interest in the case, provide a basis for testing and confining the relevance of cross/examination during the hearing, and suggest the type of evidence germane to the proceeding. All of these benefits can contribute to the efficiency of a hearing and enhance the opportunities for develoment of the most complete trial record. In certain types of cases, in fact, such as enforcement cases, pretrial disclosure of the staff's position may be required in the interest of fairness. The staff role in rate cases by and large follows this pattern. Prehearing statement of the staff's position does not preclude a change of position during or after the hearing should the course of evidence testing suggest it.

[1] That is, before cross/examination but after the submission of evidence.

Our staff, however, has by long practice refrained from taking a preliminary position on how the issues and proposals in a route case should be finally adjudicated, but has instead taken a position at the close of the hearing after the evidence has been tested but before other parties have filed briefs. The staff's role during such hearings has been not to function exactly as every other party, primarily because its role and interest is defined by the broad public interest, not by a particular private or local interest. Rather its role has been to assure that essential evidence is introduced to resolve the public interest issues, that the evidence submitted by the parties is subject to adversary testing, and that the decisional options are developed with the public interest in mind. This is a very valuable function and we believe that it should be continued.

We expect, however, that there will be certain route licensing cases where a prehearing presentation by our staff will contribute to a better trial record, be consistent with the staff's traditional role and notions of fundamental fairness, and better serve the Board's decisionmaking needs and, ultimately, the public interest. We have in mind those route cases that offer the opportunity for developing new policies we are attempting to adapt to the administration of the Federal Aviation Act. In certain of those types of cases, we believe our staff should make a prehearing presentation of the decisional options which they believe are available to the decisionmaker, and describe the type of evidence needed or available to develop each option. If the staff believes that there are certain options for which no probative evidence can be developed or produced, they should identify such options at the outset of the proceeding. Also, the staff need not and should not be required to produce evidence on each option. Identification by our staff at the outset of the alternative ways in which the decisions in an important route case would relate to substantive policies and regulatory objectives will better insure that these alternatives will be well tested on the record; that the types of evidence necessary to evaluate them are introduced into the hearing; and that all parties have the fullest opportunity to examine them.

The Board sees no substantive or procedural need to require as a general practice that the staff advocate the adoption of one of the decisional options at the outset of the case. We expect the staff, after close of a case and before briefs, however, to advocate a position based on one or more of the decisional options identified earlier in its prehearing presentation, or upon such other options as the trial of the case may develop. We will require our staff to participate in these kinds of route hearing cases in the fashion we have just outlined. To the extent possible, we will identify the cases we believe offer such new policy opportunities in our instituting orders.

We believe the kind of participation in route certification proceedings we have outlined here for our staff is consistent with both its more traditional role as a public interest advocate and also the needs of the Board of insuring that all of the evidence essential to the adjudication of issues and the requirements of law is introduced into the record and subject to full testing. We would expect in these cases that this would more than suffice to provide the judge and the parties with ample opportunity to explore staff positions.

In those routine cases where the staff participates,[2] we see no compelling reason to require nor do we desire it to participate in a manner different from its traditional participation, particularly where the presence of competing applicants in those cases may assure adequate identification and examination of issues and testing of evidence. In those cases where the staff participates but the Board has not imposed a requirement for presenting decisional options at the outset, the staff shall present a prehearing presentation of decisional options if the administrative law judge finds that there exists unusual policy or evidentiary issues which clearly require such a presentation.

Since we are resolving here the general issues raised in Order 78-4-28 we want to emphasize that neither that Order nor this policy statement should be read in any way as an effort generally to circumscribe the permissible and legitimate independence and discretion of administrative law judges in their role as presiding officers in hearing cases. We did not intend any language in Order 78-4-28 to be so interpreted. Order 78-4-28 was the product of highly expedited action by the Board to maintain the historical status quo in a case that, in the Board's firm view, required staff participation. We will not dwell on this issue except to say that the independence accorded administrative law judges under the Administrative Procedure Act (see section 556(c)) is something we will continue to protect and maintain. We intend to monitor closely the effect of this Policy Statement on our proceedings.

[2] Board policy on staff participation in Board proceedings is set forth in § 543.2 of the Civil Aeronautics Board Manual.

O'MELIA, MEMBER, CONCURRING STATEMENT

The adoption of this policy statement is an effort to resolve an issue which is considered to be of great importance and significance by both the Bureau of Administrative Law Judges and the operating bureaus of the Board. The statement does not fully satisfy either side's view of the institutional priorities nor of what determination can best contribute to achievement of the agency's objectives without causing damage to the integrity of the agency's procedures. However, it is an effort to satisfy the legitimate concerns of each interested Bureau, and, more importantly an effort to satisfy those concerns in a framework that also takes into consideration the Board's decisionmaking responsibility. I personally would prefer to see a solution that all elements of the Board could endorse without reservation, and perhaps further reflection will help produce such a solution. Nevertheless, in the meantime, in order to provide guidance in a number of pending proceedings in which a similar issue may arise, I concur to its issuance, but with the following observations and qualifications.

I am not satisfied that a less hurried study of this problem would not furnish the Board with a better understanding of the issues. While there is apparently no question (1) that an agency is free to promulgate its own procedural rules in whatever manner best permits the fair and orderly adjudication of cases before it, and (2) that Constitutional due process requirements do not demand any particular technique or procedure, and (3) that the Board has the power to prescribe how its staff is to participate in route cases, and (4) that it can properly limit the delegation of authority to its judges, it must do so in a manner that ensures that its procedures are fair to the parties in the proceeding and allow development of a full record. Thus, the Board's promulgated procedural rules must, on the one hand, permit the administrative law judge to exercise the necessary control over the case in which he is presiding, but, on the other hand, must protect its staff resources.

The answer to this problem, I believe, is more to be drawn from policy considerations, than from legal precepts that are fairly well established. The Board is clearly entering a period—if not already fairly deeply into it—in which novel and complex cases will arise, perhaps requiring novel proposals, or a number of alternative solutions, to be advanced and explored. The Board's rules must afford its operating bureaus participating in particular cases opportunity to defer definitive commitments to any single course until a factual predicate has been developed, and must therefore make it possible for them to outline decisional alternatives, to assist in developing an evidentiary record on which a proper selection can be made, and, at an appropriate time, to define its recommendations to the judge on the basis of the evidence brought forth in the hearing. The proposed policy statement attempts to do this without prejudicing those prerogatives of the administrative law judge necessary for proper control of the proceeding and to accord the administrative process a full measure of respect. I am less sure that in an attempt to create a privileged position for our staff, we have not gone too far in

V 4 3 1 8 8

creating an unfair situation for the other parties.

We cannot be absolutely certain that this policy statement will properly accomplish our procedural and policy objectives, as we see them, and will not lead us to other now unforseen problems. In concurring that we should now adopt this formulation, I propose that the Board continue to follow closely the effect of this policy directive. Should our experience under this policy declaration be found, after a suitable period of time, to be detracting in any way from the high standards of fairness and effectiveness that we want to maintain in the Board's administrative proceedings, I would then urge the Board to reconsider its policy and make the necessary modifications. I am confident that my colleagues on the Board would, in such circumstances, be equally ready to review the present decision.

(S) RICHARD J. O'MELIA.

In light of the foregoing, a new § 399.63 is made to 14 CFR Part 399, Statements of General Policy:

1. Amend the table of contents by adding § 399.63 to the table to read as follows:

399.63 Role of staff in route proceedings.

2. Amend subpart E of part 399 by adding a new section 399.63 to read as follows:

§ 399.63 Role of staff in route proceedings.

(a) *General.* This policy statement establishes the standards applicable to staff participation in oral hearing cases involving award of route authority.

(b) *Standards.* The staff's role during such hearings, primarily because it acts in the broad public interest, and not for a particular private or local interest, is to assure that essential evidence is introduced to resolve the public interest issues; that the evidence submitted by the parties is subject to adversary testing, and that decisional options are developed with the public interest in mind. In route cases designated by the Board that offer the opportunity for developing new policies to adapt to the administration of the Federal Aviation Act or that raise unusual evidentiary issues, a prehearing presentation by staff of decisional options will contribute to a better trial record, be consistent with traditional notions of fundamental fairness, better serve the Board's decisionmaking needs and ultimately serve the public interest. In any route case where the Board has not required the staff to participate by making a prehearing presentation, the staff shall present a prehearing presentation of decisional options if the administrative law judge finds that there exists unusual policy or evidentiary issues which clearly require such a presentation. We believe it is not desirable for the staff to advocate the adoption of a single decisional option at the outset of a case. Accordingly,

(1) In route cases designated by the Board that offer the opportunity for developing new policies, the staff shall make a prehearing presentation of the decisional options available, and describe the kinds of evidence needed or available to develop each option. The staff need not and should not be required to develop evidence on each option. In every case, after the close of the hearing, however, the staff shall advocate a position based upon one or more of the decisional options identified in its prehearing presentation or developed at trial.

(2) In any route case in which the administrative law judge finds that there exists unusual policy or evidentiary issues clearly requiring a prehearing presentation, the staff shall submit a prehearing statement of the decisional options available.

(3) To the extent possible, the Board, in its instituting orders, will identify or designate the cases which involve the development of new policies or unusual evidentiary issues that will require the type of staff participation described in § 399.63(b)(1).

(Secs. 204 and 1001 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 and 788, 49 U.S.C. 1324 and 1481.)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL ENERGY REGULATORY COMMISSION DEPARTMENT OF ENERGY

[Docket No. RM77-21; Order No. 6]

PART 141—STATEMENTS AND REPORTS (SCHEDULES)

PART 201—UNIFORM SYSTEM OF ACCOUNTS FOR NATURAL GAS COMPANIES (CLASS A AND CLASS B)

PART 216—UNITS OF PROPERTY FOR USE IN ACCOUNTING FOR ADDITIONS TO AND RETIREMENTS OF GAS PLANT

PART 260—STATEMENTS AND REPORTS (SCHEDULES)

Order Amending the Uniform Systems of Accounts for Natural Gas Companies and Related Regulations To Provide for Base Load Liquefied Natural Gas Facilities

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: By this order, the Commission is adopting amendments to its regulations necessary to provide for the recognition of base load liquefied natural gas facilities. Amendments are also ordered for related report forms. The amendments are being ordered to provide accounting and reporting classifications for base load liquefied natural gas facilities for which no such appropriate classifications existed prior to this order.

EFFECTIVE DATE: January 1, 1978.

FOR FURTHER INFORMATION CONTACT:

M. Wayne McDanal, Office of Chief Accountant, 202-275-4052.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565, approved August 4, 1977 and Executive Order No. 12009, dated September 13, 1977 (42 FR 46267, September 15, 1977), the Federal Power Commission (FPC) ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent Commission within the Department of Energy, was activated on October 1, 1977.[1]

Before Commissioners: Charles B. Curtis, Chairman; Don S. Smith, Georgiana Sheldon, and Matthew Holden, Jr., and George R. Hall.

Revisions to uniform system of accounts for natural gas companies to provide accounts for base load liquefied natural gas terminaling and processing facilities; order adopting amendments to uniform system of accounts for natural gas companies (Docket No. RM77-21, Order No. 6).

APRIL 28, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565, approved August 4, 1977 and Executive Order No. 12009, dated September 13, 1977 (42 FR 46267, September 15, 1977), the Federal Power Commission (FPC) ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent Commission within the De-

[1]The term "Commission" when used in the context of an action taken prior to Oct. 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

partment of Energy, was activated on October 1, 1977.[1]

Section 0.4(h) of part 0 of chapter I, title 18 of the Code of Federal Regulations, which was promulgated by the FERC's order No. 1, docket No. RM78-1, issued October 6, 1977 (42 FR 55450, October 17, 1977), provides that all persons or jurisdictional entities required to file periodic or other reports with any agency or commission whose functions were transferred under the DOE Act to the FERC shall file such reports relating to the transferred functions with the Secretary of the FERC and provides further that the FERC affirms, adopts and continues in effect all previously approved forms as amended herein, for making periodic or other reports.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary of Energy and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the Federal Energy Regulatory Commission," 10 CFR part 1000, provided that this proceeding would be continued before the FERC.[2] The FERC takes action in this proceeding in accordance with the above-mentioned authorities.

Pursuant to the notice of proposed rulemaking issued in this docket, the Commission is hereby adopting amendments to its Uniform System of Accounts for Natural Gas Companies (Class A and Class B) to accommodate the accounting for base load liquefied natural gas facilities. The amendments include the adoption of a number of new accounts including a liquefied natural gas inventory account, plant accounts and the necessary operation and maintenance expense accounts. In addition thereto, two new definitions prompted by this proceeding are being added. The appropriate annual report form changes have also been made.

On June 8, 1977, the Commission issued a notice of proposed rulemaking in docket No. RM77-21 (42 FR 30846, June 17, 1977). This rulemaking proposed to establish a separate accounting classification for base load liquefied natural gas (LNG) terminaling and processing facilities and to make revisions to FPC form No. 2, Annual Report for Natural Gas Companies, in order to reflect the amended accounting classification.

Comments were invited from interested persons no later than August 8, 1977. In response to the rulemaking notice, the Commission received comments from 11 respondents.[3] In general, the responses to the proposed rulemaking were favorable with several of the respondents suggesting modifications to the rulemaking as follows:

The use of five digit account numbers, instead of four digit account numbers presently being used, was objected to by several respondents on the ground that this change would require the reprogramming of existing computer systems entailing significant outlays of funds. The Commission recognizes the respondents' position and has amended the proposal and certain existing account numbers in order to retain the four digit system.

Several respondents suggested that Account 804.2, Liquefied Natural Gas Held for Processing—Net, be repositioned and classified with deliveries and withdrawals from storage. We have adopted this reclassification believing it to be more meaningful, and have divided the account into delivery and withdrawal accounts.

Based upon suggestions from three respondents, we have also added provisions for liquefaction equipment to recognize the possibility of base load liquefaction operations. Numerous other minor revisions also have been incorporated into the accounts and schedules.

Pursuant to the request in the notice in this proceeding, suggested retirement units for the properties classified in the LNG plant accounts were received and have been incorporated in the Units of Property for Use in Accounting for Additions to and Retirements of Gas Plant under part 216 of the Commission's regulations. Comparable lists have also been added for the existing LNG peaking plant accounts.

The Commission is also amending the schedule of the FPC form No. 1 regarding the distribution of salaries and wages. Although prior notice was not provided with respect to the amendment, the change is minor and concerns a schedule which FPC form No. 1 has in common with FPC form No. 2 with respect to which notice was given. The amendment is minor and technical in nature consistent with the purpose of the rulemaking and does not impose additional requirements on reporting entities. Therefore, the Commission believes that prior notice and public procedures are unnecessary.

The Commission finds: (1) The notice and opportunity to participate in this rulemaking proceeding with respect to the matters presently before this Commission; through the submission in writing of data, views, comments, and suggestions; are consistent and in accordance with the procedural requirements prescribed by 5 U.S.C. 553.

(2) The amendments are necessary and appropriate for the administration of the Natural Gas Act.

(3) Because the amendments ordered herein, which were not included in the notice of this proceeding, are consistent with the prime purpose of the proposed rulemaking, further notice thereof and opportunity for comment thereon are unnecessary.

(4) Good cause exists for making the amendments to the Uniform System of Accounts for Natural Gas Companies and to the Units of Property for Use in Accounting for Additions to and Retirements of Gas Plant which are ordered herein effective on January 1, 1978, and the amendments to FPC form No. 1 and form No. 2 which are ordered herein to become effective for the 1978 reporting year.

The Commission orders:[4] (1) Effective January 1, 1978, part 201, the Uniform System of Accounts Prescribed for Natural Gas Companies (Class A and Class B), and part 216, Units of Property for Use in Accounting for Additions to and Retirements of Gas Plant, of subchapter F, chapter I, title 18 of the Code of Federal Regulations are amended to establish separate ac-

[2]10 CFR 1000.1(d). The joint regulation was published in the FEDERAL REGISTER on Oct. 17, 1977 (42 FR 55534).

[3]Interstate Natural Gas Association of America (INGAA), Public Service Electric & Gas Co., San Diego Gas & Electric Co., Columbia LNG Corp. (late filing), Consolidated Natural Gas Service Co., Michigan Wisconsin Pipe Line Co., Northwest Pipeline Corp., Southern Natural Gas Co., (late filing), Tennessee Gas Pipeline Co., Western LNG Terminal Co., et al., and Public Service Commission of the State of New York.

[4]The Commission is acting under authority, pursuant to the provisions of the Federal Power Act as amended, particularly secs. 301, 302, 304, 309, and 311; (49 Stat. 838, 854, 855, 858, 859; 16 U.S.C. 798, 825, 825a, 825c, 825h, and 825j) and the provisions of the Natural Gas Act, as amended, particularly secs. 8, 9, 10, and 16 (52 Stat. 825-826, 1830, 15 U.S.C. 717g, 717h, 717i and 717o).

counting classifications and retirement units for base load liquefied natural gas plant, all as set forth in the attachment A hereto, which is an integral part of this order.

(2) Effective for the reporting year 1978, applicable schedule pages of FPC form No. 2, Annual Report for Natural Gas Companies (Class A and Class B), prescribed by § 260.1 of part 260, subchapter G, chapter I, title 18 of the Code of Federal Regulations and the applicable schedule page of FPC form No. 1, Annual Report for Electric Utilities and Licensees (Class A and Class B), prescribed by § 141.1 part 141, subchapter D, chapter I, title 18 of the Code of Federal Regulations are amended, all as set forth in attachment B hereto, which is an integral part of this order.

(3) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

(4) The Secretary shall cause copies of the schedules, as modified by this order, to be transmitted to the Director of the Office of Management and Budget.

By direction of the Commission.

LOIS D. CASHELL,
Acting Secretary.

PART 201—UNIFORM SYSTEM OF ACCOUNTS FOR NATURAL GAS COMPANIES (CLASS A AND CLASS B)

AMENDMENTS TO THE REGULATIONS UNDER THE NATURAL GAS ACT, 18 CFR, PURSUANT TO ORDER NO. 6

(A) Part 201—Uniform System of Accounts Prescribed for Natural Gas Companies Subject to the Provisions of the Natural Gas Act (Class A and Class B) of Subchapter F, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

(1) The gas plant instructions are amended by adding new subparagraphs 20 and 21 under instruction "3. Components of Construction Cost" entitled "(20) Line Pack" and "(21) LNG Heel Gas."

As amended, this portion of the gas plant instructions reads:

Gas Plant Instructions

* * * * *

3. *Components of construction cost.*

* * * * *

(20) "Line pack gas." Line pack includes the first cost of that quantity of gas introduced into the utility's system necessary to bring the system up to its designed operating capacity or increases therein and which must be maintained in the system in order to sustain such design operating capacity.

(21) LNG "heel" is the first cost of that minimum quantity of liquefied natural gas necessary to be retained in holding tanks and other facilities for purposes of temperature and/or pressure maintenance.

* * * * * *

(2) The balance sheet chart of accounts is amended by adding new "Account 164.3, Liquefied Natural Gas Held for Processing" immediately following "Account 164.2, Liquefied Natural Gas Stored."

As amended, the balance sheet chart of accounts reads:

Balance Sheet Chart of Accounts

* * * * *

ASSETS AND OTHER DEBITS

* * * * *

3. CURRENT AND ACCRUED ASSETS

* * * * *

164.3 Liquefied natural gas held for processing.

* * * * *

(3) The text of the balance sheet accounts is amended as follows:

(a) The second sentence of paragraph C of "Account 108, Accumulated Provision for Depreciation of Gas Utility Plant," and "Account 111, Accumulated Provision for Amortization and Depletion of Gas Utility Plant" is amended, by adding new classification "(6) Base Load LNG Terminaling and Processing Plant" and renumbering present functions 6 through 8 as 7 through 9.

(b) Amend paragraph C of "Account 164.2, Liquefied Natural Gas Stored" by changing account numbers 809 and 808 mentioned therein to 808.2 and 808.1 respectively.

(c) Add new "Account 164.3, Liquefied Natural Gas Held for Processing" immediately following "Account 164.2, Liquefied Natural Gas Stored."

As amended, this portion of the balance sheet accounts reads:

Balance Sheet Accounts

* * * * *

ASSETS AND OTHER DEBITS

1. UTILITY PLANT

* * * * *

108 Accumulated provision for depreciation of gas utility plant.

* * * * *

C. * * * For purposes of analysis, however, each utility shall maintain subsidiary records in which this account is segregating according to the following functional classification for gas plant: (1) Production—manufactured gas, (2) production and gathering—natural gas, (3) products extraction—natural gas, (4) underground gas storage, (5) other storage, (6) base load LNG terminaling and processing plant, (7) transmission, (8) distribution, and (9) general. * * *

* * * * *

111 Accumulated provision for amortization and depletion of gas utility plant.

* * * * *

C. * * * For purposes of analysis, however, each utility shall maintain subsidiary records in which this account is segregated according to the following functional classification for gas plant: (1) Production—manufactured gas, (2) production and gathering—natural gas, (3) products extraction—natural gas, (4) underground gas storage, (5) other storage, (6) base load LNG terminaling and processing plant, (7) transmission, (8) distribution, and (9) general. * * *

* * * * *

3. CURRENT AND ACCRUED ASSETS

* * * * *

164.2 Liquefied natural gas storage.

* * * * *

C. Amounts debited to this account for natural gas placed in stored shall be credited to account 808.2, Gas Delivered to Storage—Credit. Amounts credited to this account for gas withdrawn from storage shall be debited to account 808.1, Gas Withdrawn from Storage—Debit.

* * * * *

164.3. Liquefied natural gas held for processing.

* * * * *

A. This account shall include the cost of base load liquefied natural gas available for vaporization and injection into the utility's natural gas system.

B. Natural gas purchased in a liquefied form shall be priced at the cost of such gas to the utility.

C. Amounts debited to this account for liquefied natural gas purchased for processing shall be credited to account 809.2, Deliveries of Natural Gas for Processing—Credit. Amounts credited for liquefied natural gas processed shall be debited to account 809.1, Withdrawals of Liquefied Natural Gas Held for Processing—Debit.

D. Withdrawals of gas held for vaporization may be priced according to the first-in-first-out, last-in-first-out or weighted average cost method provided the method adopted by the utility is used consistently from year to year and inventory records are maintained in accordance therewith. Commission approval must be obtained for any other pricing method or for any change from the pricing method adopted by the utility. Separate records shall be maintained for Mcf (or Btu) of gas purchased for processing, processed, and remaining for processing.

E. Adjustments for inventory losses shall be charged to account 846.1, Gas Losses.

* * * * *

(4) The gas plant chart of accounts is amended by changing the title of subsection "3. Natural Gas Storage Plant" and by adding immediately following account 363.5, Other Equipment, a new subsection "C. Base Load Liquefied Natural Gas Terminaling and Processing Plant" and related accounts thereunder.

As amended, this portion of the gas plant chart of accounts reads:

Gas Plant Chart of Accounts

* * * * *

3. NATURAL GAS STORAGE AND PROCESSING PLANT

* * * * *

C. BASE LOAD LIQUEFIED NATURAL GAS TERMINALING AND PROCESSING PLANT

364.1 Land and land rights.
364.2 Structures and improvements.
364.3 LNG processing terminal equipment.
364.4 LNG transportation equipment.
364.5 Measuring and regulating equipment.
364.6 Compressor station equipment.
364.7 Communication equipment.
364.8 Other equipment.

* * * * *

(5) In the text of the gas plant accounts:

(a) The title and instruction thereto of subsection "3. Natural Gas Storage Plant" is amended.

(b) Add new subsection "C. Base Load Liquefied Natural Gas Terminaling and Processing Plant" and related accounts immediately following "Account 363.5, Other Equipment."

As amended, this portion of the text of the gas plant accounts reads:

Gas Plant Accounts

* * * * *

3. NATURAL GAS STORAGE AND PROCESSING PLANT

The accounts under subsections A and B hereunder are to be used by the transmission and distribution companies for the classification of storage facilities used for peak shaving operations. The accounts shall be subdivided to classify the peak shaving storage facilities according to the transmission or distribution function, if the utility operates both transmission and distribution systems. Only base load liquefied natural gas terminaling and processing facilities are to be classified under subsection C, Base Load Liquefied Natural Gas Terminaling and Processing Plant.

* * * * *

C. BASE LOAD LIQUEFIED NATURAL GAS TERMINALING AND PROCESSING PLANT

364.1 Land and land rights.

A. This account shall include the cost of land and land rights used in connection with liquefied natural gas terminaling and processing operations. (See gas plant instruction 7.)

364.2 Structures and improvements.

A. This account shall include the cost in place of structures and improvements used in connection with liquefied natural gas terminaling and processing operations. (See gas plant instruction 8.)

B. This account shall be subdivided as follows:

1. Docking and harbor facilities.
2. LNG processing terminal structures.
3. Measuring and regulating structures.
4. Compressor station structures.
5. Other structures.

364.3 LNG processing terminal equipment.

This account shall include the cost installed of equipment used to receive, hold, and regasify liquefied natural gas for delivery into the utility's transmission or distribution system.

ITEMS

1. Aftercoolers.
2. Air compressors.
3. Air coolers.
4. Alarm systems.
5. Blowers.
6. Cold box, condensers.
7. Controls and control apparatus.
8. Dikes.
9. Drums.
10. Electrical power and ignition circuits including wiring and conduits.
11. Emission control equipment.
12. Fire control devices and equipment.
13. Foundations.
14. Generators.
15. Heat exchangers.
16. Heaters and reheaters.
17. Instrumentation.
18. Intercoolers.
19. Liquefaction compressors.
20. Liquefied gas holders and storage tanks.
21. Nitrogen system equipment.
22. Plant piping including pipe supports.
23. Pollution control facilities.
24. Pumps and driving units.
25. Stacks.
26. Tanks, other than LNG storage tanks (including ladders, stairs, walkways, and lighting).
27. Unloading and loading arms, and appurtenant equipment.
28. Valves.
29. Vaporizers.
30. Waste heat recovery units.
31. Water craft not to include LNG tankers and barges.
32. Miscellaneous other equipment.

364.4 LNG transportation equipment.

This account shall include the cost of vehicles used for the transportation of liquefied natural gas.

ITEMS

1. LNG barges.
2. LNG maritime tankers.
3. LNG tank trucks.
4. Other LNG transportation equipment.

364.5 Measuring and regulating equipment.

This account shall include the cost installed of meters, gauges and other equipment used in base load LNG operations for measuring or regulating natural gas prior to its entrance into the utility's transmission or distribution system.

ITEMS

1. Automatic control equipment.
2. Boilers, heaters, etc.
3. Foundation, pits, etc.
4. Gas analyzer equipment.
5. Gas cleaners, scrubbers, separators, dehydrators, etc.
6. Gauges and instruments, including piping, fittings, wiring, etc., and panel boards.
7. Headers.
8. Meters, orifice or positive, including piping and connections.
9. Oil fogging equipment.
10. Odorizing equipment.
11. Regulators or governors, including controls and instruments.
12. Stabilization equipment.
13. Structures of a minor or portable type.
14. Other equipment.

364.6 Compressor station equipment.

This account shall include the cost installed of compressor station equipment and associated appliances used in connection with liquefied natural gas operations prior to entrance of vaporized gas into the utility's transmission or distribution system.

ITEMS

1. Boiler plant, coal handling, and ash handling equipment for steam powered compressor station.
2. Compressed air system equipment.
3. Compressor equipment and driving units, including auxiliaries, foundations, guard rails, and enclosures, etc.
4. Electric system equipment, including generating equipment and driving units, power wiring, transformers, regulators, battery equipment, switchboard, etc.
5. Fire fighting equipment.
6. Gas lines and equipment, including fuel supply lines, cooling tower and pond and as-

V 43 — 88 MY 5 78 UMI

sociated equipment, dehydrators, fuel gas mixers, special pipebends and connections, and associated scrubbers, separators, tanks, gauges, and instruments.
7. Laboratory and testing equipment.
8. Lubricating oil system, including centrifuge, filter, tanks, purifier, and lubricating oil piping, etc.
9. Office furniture and fixtures and general equipment such as steel lockers, first-aid equipment, gasoline dispensing equipment, lawn mowers, incinerators, etc.
10. Shop tools and equipment.
11. Water supply and circulation system, including water well, tank, water pipeline, cooling tower, spray fence, and water treatment equipment, etc., but not including water system equipment used solely for domestic and general use.
12. Other equipment.

364.7 Communication equipment.

This account shall include the cost installed of radio, telephone, microwave, and other equipment used wholly or predominantly in connection with the operation and maintenance of the liquefied natural gas system. (See also accounts 370 and 397, Communication Equipment.)

ITEMS

1. Carrier terminal equipment including repeaters, power supply equipment, transmitting and receiving sets.
2. Microwave equipment, including power supply equipment, transmitters, amplifiers, paraboloids, towers, reflectors, receiving equipment, etc.
3. Radio equipment, fixed and mobile, including antenna, power equipment, transmitter units.
4. Telephone equipment including switchboards, power and testing equipment, conductors, pole lines, etc.
5. Other equipment.§

364.8 Other equipment.

This account shall include the cost installed of equipment used in liquefied natural gas operations, when not assignable to any of the foregoing accounts.

ITEMS

1. Garage and service equipment.
2. General tools, including power operated equipment.
3. Laboratory equipment.
4. Materials handling equipment.
5. Office furniture and equipment.
6. Power generation equipment.
7. Shop equipment.
8. Tools, other than small hand tools.
9. Other equipment.

• • • • •

(6) The operation and maintenance expense chart of accounts is amended as follows:

(a) New account "804.1, Liquefied Natural Gas Purchased" is added immediately following account "804, Natural Gas City Gate Purchases."

(b) Accounts "808, Gas Withdrawn from Storage—Debit" and "809, Gas Delivered to Storage—Credit" are renumbered as accounts "808.1, Gas Withdrawn from Storage—Debit" and "808.2, Gas delivered to Storage—Credit."

(c) New accounts "809.1, Withdrawals of Liquefied Natural Gas Held for Processing—Debit" and "809.2, Deliveries of Natural Gas for Processing—Credit" are added immediately following account "808.2, Gas Delivered to Storage—Credit."

(d) Expense function title "2. Natural Gas Storage Expenses" is amended to read "2. Natuaral Gas Storage, Terminaling and Processing Expenses."

(e) Accounts 843 through 848.3 are renumbered 843.1 through 843.9.

(f) New expense subsection "C. Liquefied Natural Gas Terminaling and Processing Expenses" and related accounts are added immediately following account "843.9, Maintenance of Other Equipment."

As amended, the operation and maintenance expense chart of accounts reads:

Operation and Maintenance Expense Chart of Accounts

• • • • •

1. PRODUCTION EXPENSES

• • • • •

D. OTHER GAS SUPPLY EXPENSES

• • • • •

804.1 Liquefied natural gas purchased.

• • • • •

808.1 Gas withdrawn from storage—Debit.
808.2 Gas delivered to storage—Credit.
809.1 Withdrawals of liquefied natural gas held for processing—Debit.
809.2 Deliveries of natural gas for processing—Credit.

• • • • •

2. NATURAL GAS STORAGE, TERMINALING, AND PROCESSING EXPENSES

• • • • •

B. OTHER STORAGE EXPENSES

• • • • •

Maintenance

843.1 Maintenance supervision and engineering.
843.2 Maintenance of structures and improvements.
843.3 Maintenance of gas holders.
843.4 Maintenance of purification equipment.
843.5 Maintenance of liquefaction equipment.
843.6 Maintenance of vaporizing equipment.
843.7 Maintenance of compressor equipment.
843.8 Maintenance of measuring and regulating equipment.
843.9 Maintenance of other equipment.

• • • • •

C. LIQUEFIED NATURAL GAS TERMINALING AND PROCESSING EXPENSES

OPERATION

844.1 Operation supervision and engineering.
844.2 LNG processing terminal labor and expenses.
844.3 Liquefaction processing labor and expenses.
844.4 LNG transportation labor and expenses.
844.5 Measuring and regulating labor and expenses.
844.6 Compressor station labor and expenses.
844.7 Communication system expenses.
844.8 System control and load dispatching.
845.1 Fuel.
845.2 Power.
845.3 Rents.
845.4 Demurrage charges.
845.5 Wharfage receipts—credit.
845.6 Processing liquefied or vaporized gas by others.
846.1 Gas losses.
846.2 Other expenses.

MAINTENANCE

847.1 Maintenance supervision and engineering.
847.2 Maintenance of structures and improvements.
847.3 Maintenance of LNG processing terminal equipment.
847.4 Maintenance of LNG transportation equipment.
847.5 Maintenance of measuring and regulating equipment.
847.6 Maintenance of compressor station equipment.
847.7 Maintenance of communication equipment.
847.8 Maintenance of other equipment.

• • • • •

(7) The text of the Operation and Maintenance Expense Accounts is amended as follows:

(a) New account "804.1, Liquefied Natural Gas Purchases" is added immediately following account "804, Natural Gas City Gate Purchases."

(b) Accounts "808, Gas Withdrawn from Storage—Debit" and "809 Gas Delivered to Storage—Credit" are renumbered as account "808.1, Gas Withdrawn from Storage—Debit" and "808.2, Gas Delivered to Storage—Credit," and the parenthetical note in paragraph B of each account is amended.

(c) New accounts "809.1, Withdrawals of Liquefied Natural Gas Held for Processing—Debit." and "809.2, Deliveries of Natural Gas for Processing—Credit" are added immediately following account "808.2, Gas Delivered to Storage—Credit."

(d) Expense function title "2. Natural Gas Storage, Terminaling and Processing Expenses."

(e) Accounts 843 through 848.3 are renumbered 843.1 through 843.9.

(f) New expense subsection to the expense function "2. Natural Gas Storage, Terminaling and Processing Expenses," entitled "C. Liquefied Natural Gas Terminaling and Processing Expenses," and related accounts are added immediately following account "843.9, Maintenance of Other Equipment."

As amended, the text of the Operation and Maintenance Expense Accounts reads:

Operation and Maintenance Expense Accounts

PRODUCTION EXPENSES

• • • • •

D. OTHER GAS SUPPLY EXPENSES

• • • • •

804.1 Liquefied natural gas purchases.

A. This account shall include the cost, including transportation, at point of receipt by the utility, of liquefied natural gas purchased for the purpose of vaporization and injection into the utility's transmission or distribution system for resale.

B. The records supporting this account shall be so maintained that there shall be readily available for each vendor and point of receipt, the quantity of liquefied natural gas purchased, basis of charges, the amount paid for the liquefied gas, and transportation charges incurred up to the point of receipt of the liquefied gas.

• • • • •

808.1 Gas withdrawn from storage—Debit.

• • • • •

B. • • • (See Account 808.2)

808.2 Gas delivered to storage—Credit.

• • • • •

B. • • • (See Account 808.1)

809.1 Withdrawals of liquefied natural gas held for processing—Debit.

A. This account shall include debits for the cost of liquefied gas withdrawn during the year. Contra credits for entries to this account shall be made to account 164.3, Liquefied Natural Gas Held for Processing.

B. Withdrawals of liquefied natural gas held for processing shall not be netted against deliveries. (See account 809.2).

NOTE.—Adjustments for gas inventory losses due to cumulative inaccuracies in gas measurement, or from other causes, shall be entered in account 846.1, Gas Losses, in the month determined, if, however, any adjustment is substantial, the utility may, with approval of the Commission, amortize the amount of the adjustment to account 846.1 over future operating periods.

809.2 Deliveries of natural gas for processing—Credit.

A. This account shall include credits for the cost of gas delivered for processing during the year. Contra debits for entries to this account shall be made to account 164.3, Liquefied Natural Gas Held for Processing.

B. Deliveries of natural gas for processing shall not be netted against withdrawals from processing. (See account 809.1).

• • • • •

2. NATURAL GAS STORAGE, TERMINALING AND PROCESSING EXPENSES

• • • • •

B. OTHER STORAGE EXPENSES

Maintenance

843.1 Maintenance supervision and engineering.

• • • • •

843.2 Maintenance of structure and improvements.

• • • • •

843.3 Maintenance of gas holders.

• • • • •

843.4 Maintenance of purification equipment.

• • • • •

843.5 Maintenance of liquefaction equipment.

• • • • •

843.6 Maintenance of vaporizing equipment.

• • • • •

843.7 Maintenance of compressor equipment.

• • • • •

843.8 Maintenance of measuring and regulating equipment.

• • • • •

843.9 Maintenance of other equipment.

• • • • •

C. LIQUEFIED NATURAL GAS TERMINALING AND PROCESSING EXPENSES

Operation

844.1 Operations supervision and engineering.

This account shall include the cost of labor and expenses incurred in the general supervision and direction of operations of liquefied natural gas facilities. Direct supervision of specific activities shall be charged to the appropriate operations accounts.

844.2 LNG processing terminal labor and expenses.

This account shall include the cost of labor, materials used and expenses incurred in operating liquefied natural gas processing equipment.

ITEMS

Labor

1. Supervising.
2. Operating, checking, lubricating, cleaning, and polishing equipment, machinery, valves, instruments, and other processing equipment.
3. Reading meters, gauges and other instruments, changing charts, preparing operating reports, etc.
4. Inspecting and testing equipment when not specifically for repairs or replacement of parts.
5. Cleaning structures housing equipment, cutting grass and weeds, and doing minor grading work around structures and equipment.
6. Cleaning and repairing hand tools used for operations, etc.
7. Operating offshore facilities such as piers, docks, loading and unloading arms, water craft, etc.

Materials and expenses

8. Charts for pressure gauges and meters, printed forms, office supplies, etc.
9. Lubricants, wiping rags, cleaning materials, etc.
10. Janitor and washroom supplies, landscaping supplies, etc.
11. Employee travel and transportation expenses.
12. Freight, express, parcel post, trucking, and other transportation.
13. Utility services: light, water, and telephone.
14. Chemicals.
15. Refrigerants.
16. Small hand tools.

844.3 Liquefaction processing labor and expenses.

This account shall include the cost of labor, materials used and expenses incurred in operating natural gas liquefaction equipment.

ITEMS

Labor

1. Supervising.
2. Operating, checking, lubricating, cleaning, and polishing equipment, machinery, valves, instruments, and other processing equipment.
3. Reading meters, gauges and other instruments, changing charts, preparing operating reports, etc.

V 43 | 88 MY 5 78 UMI

4. Inspecting and testing equipment when not specifically for repairs or replacement of parts.
5. Cleaning structures housing equipment, cutting grass and weeds, and doing minor grading work around structures and equipment.
6. Cleaning and repairing hand tools used for operations, etc.
7. Operating offshore facilities such as piers, docks, loading and unloading arms, water craft, etc.

Materials and expenses

8. Charts for pressure gauges and meters, printed forms, office supplies, etc.
9. Lubricants, wiping rags, cleaning materials, etc.
10. Janitor and washroom supplies, landscaping supplies, etc.
11. Employee travel and transportation expenses.
12. Freight, express, parcel post, trucking, and other transportation.
13. Utility services: light, water, and telephone.
14. Chemicals.
15. Refrigerants.
16. Small hand tools.

844.4 LNG transportation labor and expenses.

This account shall include the cost of labor, materials used and expenses incurred in operating LNG transportation equipment.

ITEMS

Labor

1. Supervision.
2. Operating LNG maritime tankers, LNG barges, LNG tank trucks and other LNG transportation equipment.
3. Cleaning and lubricating equipment.
4. Inspecting and testing equipment.

Materials and expenses

5. Charts, printed forms, office supplies, etc.
6. Dry dock charges.
7. Lubricants, wiping rags, cleaning materials, etc.
8. Employee's transportation travel and temporary housing expenses.

844.5 Measuring and regulating labor and expenses.

This account shall include the cost of labor, materials used and expenses incurred in operating, measuring and regulating stations in connection with liquefied natural gas operations.

ITEMS

Labor

1. Supervising.
2. Recording pressures and changing charts, reading meters, etc.
3. Estimating lost meter registrations, etc., except gas purchases and sales.
4. Calculating gas volumes from meter charts, except gas purchases and sales.
5. Adjusting and calibrating measuring equipment, changing meters, orifice plates, gauges, clocks, etc., not in connection with construction or maintenance.
6. Testing gas samples, determining specific gravity and Btu content of gas.
7. Inspecting and testing equipment not specifically to determine necessity for repairs including pulsation tests.
8. Cleaning and lubricating equipment.
9. Keeping log and other operating records, preparing records of operations, etc.
10. Attending boilers and operating other accessory equipment.
11. Installing and removing district gauges for pressure survey.
12. Thawing freeze in gauge pipe.
13. Inspecting and pumping drips, dewatering manholes and pits, inspecting sumps, cleaning pits, blowing meter drips, etc.
14. Moving equipment, minor structures, etc., not in connection with maintenance or construction.

Materials and expenses

15. Charts and printed forms.
16. Lubricants, wiping rags, waste.
17. Employees' transportation and travel expense.
18. Freight, express, parcel post, trucking and other transportation.
19. Utility services: light, water, telephone.

844.6 Compressor station labor and expenses.

This account shall include the cost of labor, materials used and expenses incurred, including fuel and power, in operating compressor stations in connection with liquefied natural gas operations.

ITEMS

Labor

1. Supervising.
2. Operating and checking engines, equipment valves, machinery, gauges, and other instruments, including cleaning, wiping, polishing, and lubricating.
3. Operating boilers and boiler accessory equipment, including fuel handling, recording fuel used, etc.
4. Repacking valves and replacing gauge glasses, etc.
5. Recording pressures, replacing charts, keeping logs, and preparing reports of station operations.
6. Pumping drips at the station.
7. Taking dew point readings.
8. Testing water.
9. Cleaning structures housing equipment, cutting grass and weeds, and minor grading around station.
10. Cleaning and repairing hand tools used in operations.
11. Driving trucks.
12. Watching during shutdowns.
13. Clerical work at station.

Materials and expenses

14. Scrubber oil.
15. Lubricants, wiping rags, waste.
16. Charts and printed forms, etc.
17. Gauge glasses.
18. Chemicals to treat water.
19. Water tests and treatment by other than employees.
20. Janitor and washroom supplies, first aid supplies, landscaping supplies, etc.
21. Employees' transportation and travel expenses.
22. Freight, express, parcel post, trucking, and other transportation.
23. Utility services: light, water, telephone.

844.7 Communication system expenses.

This account shall include the cost of labor, materials used and expenses incurred in connection with the operation of liquefied natural gas communications facilities, such as radio, telephone, microwave and other communication systems, including payments to others for communications services.

ITEMS

Labor

1. Supervising.
2. Operating switchboards, radio equipment, power generators, microwave equipment, etc. (except general office switchboards).
3. Tagging telephone poles.
4. Testing and replacing telephone batteries, radio tubes, etc.
5. Cutting weeds and grass along telephone rights-of-way and around structures and equipment.
6. Changing radio frequencies.
7. Securing FCC authorization to change frequencies.
8. Taking FCC radio operator tests.
9. Transferring mobile radios between vehicles and/or vessels.
10. Changing locations of telephones and other communications equipment not in connection with maintenance or construction.
11. Inspecting and testing not specifically to determine necessity for repairs.
12. Cleaning and lubricating equipment.
13. Cleaning structures housing equipment.

Materials and expenses

14. Payments to others for communications services.
15. Telephone batteries, radio tubes and other electronic components.
16. Radio crystals and other materials used in changing radio frequencies.
17. Lubricants, wiping rags, and waste.
18. Employees' transportation and travel expenses.
19. Freight, express, parcel post, trucking and other transportation.

844.8 System control and load dispatching.

This account shall include the cost of labor and expenses incurred in dispatching and controlling the supply and flow of liquefied gas and vaporized gas prior to introduction of such vaporized gas into the utility's transmission or distribution system.

ITEMS

Labor

1. Supervising.
2. Analysis of pressures for irregularities, as received.
3. Collecting pressures by telephone and radio.
4. Controlling mixture of various gases to maintain proper Btu content.
5. Correspondence and records, typing and maintaining files.
6. Controlling inputs and withdrawals of liquefied gas for processing.
7. Instructing field men to increase or decrease pressures at regulators.
8. Maintaining pressures at compressor stations, key line junctions and regulating stations to divide the available gas during heavy demand periods.
9. Maintaining pressure log sheets.
10. Maintaining proper compression ratios at compressor stations, consistent with economical operations.
11. Maintaining lowest necessary line pressures consistent with satisfactory service.

12. Requesting pressure changes at compressor stations, regulating stations, and key line junctions.
13. Rerouting gas during emergencies and planned shutdowns.

Materials and expenses

14. Consultants' fees and expenses.
15. Meals, traveling and incidental expenses in connection with system load dispatching.
16. Office supplies, stationery and printed forms.
17. Transportation: company and rental vehicles.
18. Utility services: light, water, telephone.

845.1 Fuel.

A. This account shall include the cost of gas or other fuel used for the operation of liquefied natural gas terminaling and processing facilities, except compressor station fuel.

B. Concurrent credits offsetting charges to this account for natural gas used for fuel shall be made to account 812, Gas Used for Other Utility Operations—Credit.

845.2 Power.

This account shall include the cost of purchased power used in operation of liquefied natural gas processing facilities, except compressor station power.

845.3 Rents.

This account shall include rents for property of others used, occupied or operated in connection with liquefied natural gas processing operations. (See operating expense instruction 3.)

845.4 Demurrage charges.

This account shall include demurrage charges incurred by the utility relative to LNG shipments received or processed by the utility.

845.5 Wharfage receipts—Credit.

This account shall include wharfage receipts received or receivable from LNG shippers or other parties relative to LNG shipments received or processed by the utility.

845.6 Processing of liquefied or vaporized gas by others.

A. This account shall include amounts paid to others for the processing of liquefied or vaporized gas of the utility.

B. Records supporting this account shall be so maintained that there shall be readily available for each agreement, the name of the other party, Mcf or Btu, as appropriate, of gas delivered to the other party for processing and the Mcf or Btu, as appropriate, of gas received back by the utility after processing, points of delivery to and receipt of gas from the other party, amount and basis of charges for the processing service.

NOTE.—If in connection with any gas delivered to another for processing such other party also processes the gas for extraction of gasoline or other salable products, credits attributable to the products so extracted shall be made to account 491, Revenues from Natural Gas Processed by Others, to the end that amounts recorded in this account shall only be charges for processing other than for extraction of salable products.

846.1 Gas losses.

This account shall include the amounts of inventory adjustments representing the cost of gas lost or unaccounted for in liquefied natural gas operations due to cumulative inaccuracies of gas measurements or other causes. (See paragraph E of account 164.3, Liquefied Natural Gas Held for Processing.) If, however, any adjustment is substantial, the utility may, with approval of the Commission, amortize the amount of the adjustment to this account over future operating periods.

846.2 Other expenses.

This account shall include the cost of labor, materials used, and expenses incurred in operating liquefied natural gas plant not includible elsewhere.

Maintenance

847.1 Maintenance supervision and engineering.

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of liquefied natural gas terminaling and processing facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance accounts. (See operating expense instruction 1.)

847.2 Maintenance of structures and improvements.

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of structures and improvements, the book cost of which is included in account 364.2, Structures and Improvements. (See operating expense instruction 2.)

847.3 Maintenance of LNG processing terminal equipment.

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of LNG terminal processing equipment, the book cost of which is included in account 364.3, LNG Processing Terminal Equipment. (See operating expense instruction 2.)

847.4 Maintenance of LNG transportation equipment.

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of transportation equipment, the book cost of which is included in account 364.4, LNG Transportation Equipment. (See operating expense instruction 2.)

847.5 Maintenance of measuring and regulating equipment.

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of measuring and regulating equipment, the book cost of which is included in account 364.5, Measuring and Regulating Equipment. (See operating expense instruction 2.)

847.6 Maintenance of compressor station equipment.

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of compressor station equipment, the book cost of which is included in account 364.6, Compressor Station Equipment. (See operating expense instruction 2.)

847.7 Maintenance of communication equipment.

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of communication equipment, the book cost of which is included in account 364.7, Communication Equipment. (See operating expense instruction 2.)

847.8 Maintenance of other equipment.

This account shall include the cost of labor, materials used and expenses incurred in the maintenance of equipment, the book cost of which is included in account 364.8, Other Equipment. (See operating expense instruction 2.)

• • • • •

PART 216—UNITS OF PROPERTY FOR USE IN ACCOUNTING FOR ADDITIONS TO AND RETIREMENTS OF GAS PLANT

(B) Part 216—Units of Property for Use in Accounting for Additions to and Retirements of Gas Plant, Subchapter F, Chapter I, Title 18 of the Code of Federal Regulations, is amended as follows:

(1) Subheading "3. Storage Plant" is amended to read "3. Natural Gas Storage Plant."

(2) Subheading "B. Local Storage Plant" is amended to read "B. Other Storage Plant."

(3) Account "362, Gas Holder" is amended to read "362, Gas Holders" and Account "363, Other Equipment" is deleted.

(4) New accounts "363, Purification Equipment," "363.3, Liquefaction Equipment," "363.2, Vaporizing Equipment," "363.3, Compressor Equipment," "363.4, Measuring and Regulating Equipment," and "363.5, Other Equipment" and lists of retirement units under each are added immediately following account "362, Gas Holders."

(5) A new subsection entitled "C. Base Load Liquefied Natural Gas Ter-

V 43 — 88 MY 5 78

minaling and Processing Plant" and accounts thereunder are added immediately following account "363.5, Other Equipment."

As amended, this portion of the Units of Property for Use in Accounting for Additions to and Retirements of Gas Plant reads:

• • • • •

LIST OF RETIREMENT UNITS

• • • • •

3. NATURAL GAS STORAGE PLANT

• • • • •

B. OTHER STORAGE PLANT

• • • • •

362 Gas Holders.

• • • • •

363 Purification equipment.

(See Acct. 336—Natural Gas Production Purification Equipment for applicable retirement units of property.)

363.1 Liquefaction equipment.

1. Cold box.
2. Heat exchanger.
3. Compressors.
4. Condensers.
5. Instrumentation.
6. Pumps.
7. Separators.
8. Tanks.

363.2 Vaporizing equipment.

1. Compressors.
2. Instrumentation.
3. Piping.
4. Pumps.
5. Valves.
6. Vaporizers.

363.3 Compressor equipment.

(See Acct. 368—Compressor Station Equipment for applicable retirement units of property.)

363.4 Measuring and regulating equipment.

(See Acct. 369—Transmission Measuring and Regulating Station Equipment for applicable retirement units of property.)

363.5 Other equipment.

(See Acct. 371—Transmission Other Equipment for applicable retirement units of property.)

C. BASE LOAD LIQUEFIED NATURAL GAS TERMINALING AND PROCESSING PLANT

364.2 Structures and improvements.

1. Air conditioning system, ventilating system, heating system, or any combination thereof.
2. Bin or bunker (when part of structure framework).
3. Bridge, trestle, etc.
4. Bulkhead, retaining wall, etc.
5. Canal or dam.
6. Dock, pier, platform or wharf.
7. Drainage and sewerage system.
8. Elevator, crane, hoist, etc., complete with operating mechanism.
9. Fence complete with gates.
10. Fire escape system, nonmarine.
11. Fire protection system.
12. Foundation (equipment) when includible in structure.
13. Light and power system complete.
14. Plumbing system.
15. Railroad or track system, including culverts, etc.
16. Roof, with or without supporting members. (A structure of irregular shape having more than one roof level may have several isolated roofs, each of which shall be considered an entire roof. In the case of structures to which lateral extensions have been made, even though having but one roof level, that part of the roof covering an entire section built at one time shall be considered an entire roof.)
17. Structure complete, with or without stack or chimney.
18. Tunnel, pipe line.
19. Tunnel, marine.
20. Vacuum cleaning system.
21. Water basin or reservoir.
22. Water supply system, including well.
23. Yard drainage system.
24. Yard lighting system.

364.3 LNG processing terminal equipment.

Liquefaction processing equipment

1. Cooling units.
2. Heat exchanger.
3. Compressor.
4. Condensor.
5. Instrumentation.
6. Pumps.
7. Separators.
8. Tanks.

Transfer system

1. Holders.
2. Blowers.
3. Instrumentation.
4. Piping.
5. Pumps.
6. Unloading arms.
7. Valves.

Storage facilities

1. Berm or Dike.
2. Holders (Tanks).
3. Instrumentation.
4. Piping.
5. Valves.

Vaporization system

1. Compressors.
2. Instrumentation.
3. Piping.
4. Pumps.
5. Valves.
6. Vaporizers.

BTU stabilization equipment

1. Compressors.
2. Heat exchangers.
3. Instrumentation.
4. Piping.
5. Pumps.
6. Valves.

Electric system

1. Battery.
2. Generator.
3. Switchgear.
4. Motor control center.

Nitrogen system

1. Compressor.
2. Holders (Tanks).
3. Instrumentation.
4. Piping.
5. Pumps.
6. Valves.

Truck loading system

1. Loading racks.
2. Piping.
3. Pumps.
4. Tanks.
5. Other equipment.

Marine facilities

1. Capstran.
2. Control power/pulpit.
3. Evacuation Systems.
4. Unloading arms.

364.4 LNG transportation equipment.

1. LNG barge.
2. LNG maritime tankers.
3. LNG tank truck.
4. Other LNG transportation equipment.

364.5 Measuring and regulating equipment.

(See Acct. 369—Transmission Measuring and Regulating Station Equipment for applicable retirement units of property.)

364.6 Compressor station equipment.

(See Acct. 368—Transmission Compressor Station Equipment for applicable retirement units of property.)

364.7 Communication equipment.

(See Acct. 397—General Communication Equipment for applicable retirement units of property.)

364.8 Other equipment.

(See Acct. 371—Transmission Other Equipment for applicable retirement units of property.)

UMI

Annual report of ..... Year ended December 31, 19....

GAS STORED (Account 117, 164.1, 164.2 and 164.3)

1 Report below the information called for concerning inventories of gas stored.

2 The Uniform System of Accounts provides that inventory cost records be maintained on a consolidated basis for all storage projects with separate records showing the Mcf of inputs and withdrawals and balance for each project except under certain specified circumstances. If the respondent's inventory cost records are not maintained on a consolidated basis for all storage projects, furnish an explanation of the accounting followed and reason for any deviation from the general basis provided by the Uniform System of Accounts. Separate schedules on this schedule form should be furnished for each group of storage projects for which separate inventory cost records are maintained.

3 If during the year adjustment was made of the stored gas inventory such as to correct for cumulative inaccuracies of gas measurements furnish an explanation of the reason for the adjustment, the Mcf and dollar amount of adjustment and account charged or credited.

4 Give a concise statement of the facts and the accounting performed with respect to any encroachment of withdrawals during the year, or restoration of previous encroachment, upon *native* gas constituting the "gas cushion" of any storage reservoir.

5 If the respondent uses a "base stock" in connection with its inventory accounting, give a concise statement of the basis of establishing such "base stock" and the inventory basis and of the accounting performed with respect to any encroachment of withdrawals upon "base stock," or restoration of previous encroachment, including brief particulars of any such accounting during the year.

6 If respondent has provided accumulated provision for stored gas which may not eventually be fully recovered from any storage project furnish a statement showing (a) date of Commission authorization of such accumulated provision (b) explanation of circumstances requiring such provision (c) basis of provision and factors of calculation (d) estimated ultimate balance of accumulated provision and entries during year.

7. Pressure base of gas volumes reported in this schedule is 14.73 psia at 60° F.

Line No	Description	Noncurrent (Account 117) (a)	Current (Account 164.1) (b)	LNG (Account 164.2) (c)	LNG (Account 164.3) (d)	Total (e)

Annual report of ..... Year ended December 31, 19....

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Amounts originally chargerd to clearing accounts should be segregaterd as to *Utility Departments, Construction, Plant Removals, and Other Accounts*, and shown in the appropriate lines and spaces provided for such amounts on pages 355 and 356. In determining this segregation of salaries and wages originally chargerd to clearing accounts a method of approximation giving substantially correct results may be used.

ACCUMULATED PROVISION FOR DEPRECIATION OF GAS UTILITY PLANT (Account 108)

1. Report below the information called for concerning provision for depreciation of gas utility plant.
2. Explain any important adjustments during year.
3. Explain any difference between the amount for book cost of plant retired, line 11, column (c), and that reported in the schedule for gas plant in service, pages 501-504, column (d) exclusive of retirements of nondepreciable property.
4. The provisions of account 108 in the Uniform System of Accounts contemplate that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, preliminary closing entries should be made to tentively functionalize the book cost of the plant retired. In addition, all costs included in retirement work in progress at year end should be included in the appropriate functional classifications.
5. Show separately interest credits under a sinking fund or similar method of depreciation accounting.
6. In section B show the amounts applicable to prescribed functional classifications.

NUMBER OF GAS DEPARTMENT EMPLOYEES

Number of gas department employees, payroll period ended _____

1. Total regular full-time employees _____
2. Total part-time and temporary employees _____
3. Total employees _____

The data on number of employees should be reported for the payroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31.

If the respondent's payrolls for the reported period include any special construction forces include such employees as part-time and temporary employees and show the number of such special construction employees so included.

The number of employees assignable to the gas department from joint functions of combination utilities may be determined by estimate, on the basis of employee equivalents. Show the estimated number of equivalent employees attributed to the gas department from joint functions.

Attachment B, Page 13 of 21

Annual report of ...FPC Form No. 2.....RM77-21..... Year ended December 31, 19...

DEPRECIATION, DEPLETION, AND AMORTIZATION OF GAS PLANT (Accounts 403, 404.1, 404.2, 404.3, 405)

(Except Amortization of Acquisition Adjustments)

1. Report in Section A for the year the amounts of depreciation expense, depletion and amortization for the accounts indicated, classified according to the plant functional groups shown.

2. Report in Section B the bases and rates used by the respondent to determine charges for depletion and amortization of gas plant for the year for accounts 404.1, 404.2, 404.3 and 405 and whether any changes have been made in the bases or rates from those used for the preceding year.

3. Complete reporting of all available information called for in columns (a) through (g) of Section C shall be made for report year 1971, thereafter report only annual changes to columns (c) through (g). Complete reporting is again required for report year 1974 and every fifth year thereafter with only annual changes to columns(c) through (g) to be shown in the intervals between complete reporting.

Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any subaccounts used. In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional classifications and showing a composite total. Indicate at the bottom of Section C the manner in which column (b) balances are obtained. If average balances, state the method of averaging used. For columns (c), (d) and (e) report available information for each plant subaccount, account or functional classification listed in column (a). Identify those accrual periods shown in column (c) which are based upon the life of associated gas reserves or gas supply contracts. If mortality studies are prepared to assist in estimating service lives or to develop remaining life rates, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g) the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis. Where the unit-of-production method is used to determine depreciation charges, show at the bottom of Section C any revisions made to estimated gas reserves.

4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of Section C the amounts and nature of the provisions and the plant items to which related.

GAS ACCOUNT—NATURAL GAS

1. The purpose of this schedule is to account for the quantity of natural gas received and delivered by the respondent taking into consideration differences in pressure bases used in measuring Mcf of natural gas received and delivered.

2. Natural gas means either natural gas unmixed or any mixture of natural and manufactured gas.

3 Enter in column (c) the Mcf as reported to the schedules indicated for the respective items of receipts and deliveries.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Amounts originally charged to clearing accounts should be segregated as to *Utility Departments, Construction, Plant Removals, and Other Accounts*, and shown in the appropriate lines and spaces provided for such amounts on pages 355 and 356. In determining this segregation of salaries and wages originally charged to clearing accounts a method of approximation giving substantially correct results may be used.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 76P-0500]

PART 135—FROZEN DESSERTS

Standards of Identity for Frozen Desserts; Stay of Revocation of Certain Stayed Provisions; Reinstatement of Previous Stay

AGENCY: Food and Drug Administration.

ACTION: Stay of revocation.

SUMMARY: Requests for hearing have been received on the revocation of the provisions concerning the use of safe and suitable milk-derived ingredients in the revised standards of identity for frozen desserts. This document stays the revocation of those provisions pending a determination of the need for a hearing. This stay has the effect of reinstating the July 8, 1977 stay of those provisions concerning the use of safe and suitable milk-derived ingredients. This document does not change the currently effective requirements for frozen desserts; thus the use of safe and suitable milk-derived ingredients in frozen desserts, other than those specified in the currently effective regulations, is not permitted. A notice specifying any issues on which a hearing is justified and other pertinent information will be published in the FEDERAL REGISTER at a later date.

DATES: The stay of the revocation is effective May 3, 1978. The effective dates of other provisions are stated in the "Supplementary Information" of this document.

FOR FURTHER INFORMATION CONTACT:

Eugene T. McGarrahan, Bureau of Foods (HFF-415), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-1155.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs issued a final regulation, published in the FEDERAL REGISTER of April 12, 1977 (42 FR 19127), to amend the standards of identity for frozen desserts that, among other changes, would have provided for replacing the long-standing use of a nonfat milk solids minimum with a milk protein minimum. The change would have permitted the use of safe and suitable milk-derived ingredients to meet the milk protein minimum. Written objections and requests for hearing were received. As a result of these objections, the Commissioner issued in the FEDERAL REGISTER of July 8, 1977 (42 FR 35152) a document staying portions of the standards of identity for ice cream, frozen custard, ice milk, and sherbet pending the receipt and review of information considered necessary to make a final decision on the merits of granting requests for hearing. The stay related primarily to the provisions concerning the milk protein minimum and the use of safe and suitable milk-derived ingredients. The same document confirmed the effective date of other provisions of the regulation, to which no objections were received.

In the FEDERAL REGISTER of February 3, 1978 (43 FR 4596), the Commissioner revoked the provisions of the final regulation that had been published in the FEDERAL REGISTER of April 12, 1977 (42 FR 19127) and stayed in the FEDERAL REGISTER of July 8, 1977 (42 FR 35152). The agency stated that it had reviewed the data submitted and had in addition conducted its own studies which indicated that under the revoked provisions some ice cream formulations could have lesser amounts of some nutrients than under the current standard. The agency also determined that no hearing was justified on the objections concerning bulky flavors in ice milk and confirmed the effectiveness of these provisions.

OBJECTIONS TO REVOCATION AND REQUESTS FOR HEARING

Three objections and requests for hearing and two petitions for reconsideration were received in response to the February 3, 1978 order revoking the stayed provisions that provided for the use of safe and suitable milk-derived ingredients subject to a milk protein minimum requirement. The petitions for reconsideration are presently being reviewed and will be acted upon separately. The basis for the objections is that the revoked provisions, if in effect, would not cause a decrease in the nutritional value of frozen desserts.

The objections and requests for hearings related to revocation of the following provisions:

1. Sections 135.110(a)(1) (21 CFR 135.110(a)(1)) and 135.140(a)(1) (21 CFR 135.140(a)(1)) to the extent that these provisions would have permitted the use of safe and suitable milk-derived ingredients not specifically listed as permitted in former § 135.30 (c) and (e) (21 CFR 135.30 (c) and (e));

2. Sections 135.110(a) (2) and (3) (21 CFR 135.110(a) (2) and (3)) and 135.120(a)(2) (21 CFR 135.120(a)(2)) to the extent that these provisions would have established minimum milk protein requirements;

3. Section 135.110(b) (2) and (3) (21 CFR 135.110(b) (2) and (3)), which would have specified the method of analysis for milk protein and PER; and

4. Section 135.140(a)(2) (21 CFR 135.140(a)(2)) with respect to the provisions for "nonfat milk-derived solids" and "milk-derived solids."

STAY OF REVOCATION OF CERTAIN PROVISIONS

Under section 701(e) of the act (21 U.S.C. 371(e)) and § 12.26 of the Code of Federal Regulations (21 CFR 12.26), the Commissioner hereby announces a stay of the revocation of the provisions to which objections and requests for hearing were received pending further review of the objections and requests for hearing under § 12.24 (21 CFR 12.24). If a hearing is determined to be justified on any issues, a notice of hearing under § 12.35 (21 CFR 12.35) will be published in the FEDERAL REGISTER. If a determination is made that a hearing is not justified in whole or in part, a notice of such determination under § 12.28 (21 CFR 12.28) will be published in the FEDERAL REGISTER.

This stay has the effect of reinstating the July 8, 1977 stay of the provisions concerning the use of safe and suitable milk-derived ingredients, pending a determination of whether a public hearing is necessary to resolve the issues raised by objections concerning safe and suitable ingredients.

The Commissioner emphasizes that the currently effective standards of identity for ice cream and other frozen desserts will remain in effect. After July 1, 1979, full ingredient labeling will be required and a reduction of milk solids will be permited when bulky flavors are added to ice milk. Both the currently effective regulations and the regulation to become effective on July 1, 1979, require a minimum amount of nonfat milk solids in the finished food, limit the use of cheese whey to a maximum of 25 percent of the nonfat milk solids present in the food, and permit the use of casein and caseinates only after the minimum requirement for nonfat milk solids has been met. Thus, the use in frozen desserts of safe and suitable milk-derived ingredients other than those specified in the currently effective regulations is not permitted. Any notices concerning the objections and requests for hearing regarding the use of safe and suitable milk-derived ingredients will be published in the FEDERAL REGISTER.

The final regulations published in the February 3, 1978 FEDERAL REGISTER are an edited and recodified form of the existing standard of identity incorporating the revisions which will go into effect on July 1, 1979 concerning ingredient labeling, bulky flavors in ice milk, and certain other provisions to which no objections requiring a hearing were received. These final regulations will go into effect in accordance with the effective dates already announced and restated below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046 as amended, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to him (21 CFR 5.1), the Commissioner gives notice that objections under section 701(e) were received, and, pending a determination of whether a hearing has been justified, the revocation is stayed and the July 8, 1977 stay of all the provisions concerning the use of safe and suitable milk-derived ingredients is reinstated.

Effective dates. This stay of revocation shall become effective on May 3, 1978. Compliance with the final regulations for the standards of identity for frozen desserts published in the FEDERAL REGISTER of February 3, 1978, including any required labeling changes, may have begun on June 13, 1977, and all products initially introduced into interstate commerce on or after July 1, 1979, shall fully comply.

(Secs. 401, 701(e), 52 Stat. 1046 as amended, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e)).)

Dated: May 2, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

[Docket No. 77N-0392]

SULFAMETHAZINE-CONTAINING DRUGS: REVISED WITHDRAWAL PERIOD

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the regulations regarding sulfonamide-containing drugs for animals to reflect current labeling for sulfamethazine products for use in swine feed or drinking water. The revised labeling provides that treated animals are not to be slaughtered for food within 15 days of the last treatment.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

David N. Scarr, Bureau of Veterinary Medicine (HFV-210), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3183.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of December 9, 1977 (42 FR 62211), the Commissioner of Food and Drugs announced that all firms marketing sulfamethazine-containing products for use in swine feed or drinking water had been requested by letter to submit labeling providing that such products bear a 15-day withdrawal period prior to slaughtering treated animals for food.

Currently, approximately 57 such products may be marketed by approximately 27 firms under interim provisions pursuant to 21 CFR 510.450 or on the basis of published approvals provided for in 21 CFR Parts 546 and 558. The firms were requested to submit copies of revised labeling in supplemental applications for products that are the subject of approved new animal drug applications or in amendments to pending applications if the products are marketed under the interim provisions of 21 CFR 510.450. Each of the firms has submitted supplemental applications or amendments.

Amendment of the regulations to reflect this change does not constitute a reaffirmation of the drug's safety and effectiveness.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 5.1), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

PART 510—NEW ANIMAL DRUGS

1. Section 510.450 is amended by redesignating paragraph (e) as paragraph (f) and adding a new paragraph (e) to read as follows:

§ 510.450 Sulfonamide-containing drugs for oral, injectable, intramammary, or intrauterine use in food-producing animals.

• • • • • •

(e) To assure that edible products from treated swine are safe for human consumption, the labeling of preparations which contain sulfamethazine intended for use in swine feed or drinking water shall, in lieu of the labeling requirement set forth in paragraph (a) of this section, bear a statement that the use of the drug must be discontinued 15 days before treated animals are slaughtered for food.

• • • • • •

PART 546—TETRACYCLINE ANTIBIOTIC DRUGS FOR ANIMAL USE

§ 546.113b [Amended]

2. Section 546.113b *Chlortetracycline bisulfate-sulfamethazine bisulfate soluble powder* is amended in paragraph (c)(6)(iii) by deleting the number "7" and inserting the number "15."

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

§ 558.145 [Amended]

3. Section 558.145 *Chlortetracycline, procaine penicillin, and sulfamethazine* is amended in paragraph (f)(2) by deleting the number "7" and inserting the number "15."

§ 558.630 [Amended]

4. Section 558.630 *Tylosin and sulfamethazine* is amended in paragraph (f)(3) by deleting the number "5" and inserting the number "15."

Effective date. These regulations are effective May 5, 1978.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: April 28, 1978.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER C—CIVIL RIGHTS

PART 230—EXTERNAL PROGRAMS

Amendments Concerning Reporting Requirements for EEO Employment and Training Reports

AGENCY: Federal Highway Administration, DOT.

ACTION: Final rule.

SUMMARY: The Federal Highway Administration (FHWA) provides public notice of amendments concerning reporting requirements for EEO employment and training reports required on Federal and Federal-aid construction contracts, and minority business enterprise reports required on Federal-aid construction contracts.

EFFECTIVE DATE: May 8, 1978.

FOR FURTHER INFORMATION CONTACT:

K. L. Ziems, Chief, Contract Admin-

M Y 5 7 8 UMI

V 43 — 88 MY 5 78 UMI

istration Branch, Construction and Maintenance Division, Office of Highway Operations, 202-426-4847; Wilbert Baccus, Office of the Chief Counsel, 202-426-0786, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.t. Monday through Friday.

SUPPLEMENTARY INFORMATION: The amendments either reduce the reporting frequency or eliminate employment and training reports which were required on a rather frequent basis during the implementation stages of the FHWA EEO Program when the need for such information was much greater than it is now. Since the issuance of these reporting requirements, FHWA has obtained a substantial amount of EEO data and the proposed deletion or revisions will permit an adequate amount of data to be gathered to meet current needs.

The benefit to be achieved by this change in the regulations will be to cut red tape and relieve highway construction contractors, State highway agencies and FHWA of unnecessary costly reporting requirements.

These regulation amendments were not issued in proposed form, and no comments were solicited, as the matters affected relate to grants, benefits, or contracts within the purview of 5 U.S.C. 553(a)(2), thus general notice of proposed rulemaking was not required.

NOTE.—The Federal highway Administration has determined that this document does not contain a major proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044.

Issued on: April 24, 1978.

KARL S. BOWERS,
Deputy Administrator.

In consideration of the foregoing, the Federal Highway Administration is amending Chapter I of Title 23, Code of Federal Regulations as follows:

(1) The Table of Sections of Part 230 is amended by:

(a) Deleting the word "Monthly" in the Appendix C caption and inserting in lieu thereof the word "Annual".

(b) Deleting the word "Quarterly" in the Appendix E caption and inserting in lieu thereof the word "Semiannual".

(c) Deleting the word "Quarterly" in the Appendix F caption and inserting in lieu thereof the word "Semiannual".

§ 230.121 [Amended]

(2) Section 230.121 *Reports* of Subpart A is amended by:

(a) Deleting the word "monthly" in the first sentence of paragraph "(a)(1)" and inserting in lieu thereof the word "Annual."

(b) Deleting the words "directive for the first three months after construction begins and" in the first sentence of paragraph "(a)(2)" and inserting in lieu thereof the word "part."

(c) Deleting the word "quarterly" in the second sentence of paragraph "(d)(1)" each time it appears and inserting in lieu thereof the word "semiannual."

(d) Revising the fourth sentence of paragraph "(d)(1)" to read as follows: "The contractor is to submit the semiannual reports by the 20th of each July and January."

(e) Deleting the word "quarterly" in the first sentence of paragraph "(d)(2)" each time it appears and inserting in lieu thereof the word "semiannual."

(f) Deleting the word "quarter" in the second sentence of paragraph "(d)(2)" and inserting in lieu thereof the words "reporting period".

(g) Rescinding paragraph (e) of § 230.121 in its entirety and redesignating the present paragraph (f) to read "(e)".

APPENDIX A [AMENDED]

(3) The first sentence of paragraph "10.c." of Appendix A "Special Provisions" of Part 230, Subpart B, is amended to read as follows: "The contractors will submit an annual report to the State highway agency each July for the duration of the project, indicating the number of minority, women, and non-minority group employees currently engaged in each work classification required by the contract work."

APPENDIX C [AMENDED]

(4) Appendix C of Part 230, Subpart B, is amended by deleting "Form PR-1391 (Rev. 8-73)" and inserting in lieu thereof "Form PR-1391 (Rev. 9-77)." [See attached form.]

APPENDIX E [AMENDED]

(5) Appendix E of Part 230, Subpart B, is amended by deleting "Form FHWA-1409 (Rev. 11-74)" and inserting in lieu thereof "Form FHWA-1409 (Rev. 1-78)." [See attached form.]

APPENDIX F [AMENDED]

(6) Appendix F of Part 230, of Subpart B, is amended by deleting "Form FHWA-1410 (Rev. 12-74)" and inserting in lieu thereof "Form FHWA-1410 (Rev. 1-78)." [See attached form.]

(23 U.S.C. § 315; 49 CFR 1.48(b).)

FEDERAL-AID HIGHWAY CONSTRUCTION CONTRACTORS ANNUAL EEO REPORT

REPORT FOR JULY _____ 19____

INSTRUCTIONS

This report should be submitted to the State Highway Agency by each contractor and covered subcontractor for the Month of July. Subcontractors should report contract and employment data pertaining to their subcontract work only. The staffing figures to be reported under employment data should represent the project work force on board in whole or in part for the last payroll period preceding the end of the month.

The staffing figures to be reported in Table A should include journey-level men and women, apprentices, and on the job trainees. Staffing figures to be reported in Tables B and C should only include apprentices and on the job trainees as indicated

1. CHECK APPROPRIATE BLOCK ☐ CONTRACTOR ☐ SUBCONTRACTOR	2. NAME AND ADDRESS OF FIRM		3. FEDERAL-AID PROJECT NUMBER

[FHWA Docket No. 78-2]

SUBCHAPTER H—RIGHT-OF-WAY AND ENVIRONMENT

PART 752—LANDSCAPE AND ROADSIDE DEVELOPMENT

PART 753—ACQUISITION PROCEDURES FOR LANDSCAPING AND SCENIC ENHANCEMENT

Interim Regulations

AGENCY: Federal Highway Administration, DOT.

ACTION: Interim Regulation.

SUMMARY: These interim regulations establish procedures by which States may participate in landscape and roadside development including the development of information centers and systems. These procedures are necessitated by the enactment of, and are intended to implement the Federal-Aid Highway Act of 1976. Also, this document makes certain other editorial and technical changes to clarify and simplify procedures governing scenic enhancement.

DATES: Comments must be received on or before July 5, 1978. Effective date: May 5, 1978.

ADDRESS: Comments should be addressed to FHWA Docket No. 78-2, Federal Highway Administration, Room 4230, 400 7th Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. Kenneth A. Rickerson, Chief, Landscape Branch, Room 3124, Office of Engineering, 202-426-0314; Edward V. Kussy, Office of the Chief Counsel, 202-426-0791, Federal Highway Administration, 400 7th Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.t. Monday through Friday.

SUPPLEMENTAL INFORMATION: Section 122(c) of the Federal-Aid Highway Act of 1976, Pub. L. 94-280, May 5, 1976, 90 Stat. 425, amended 23 U.S.C. 131(i) to permit the establishment of information systems located within the highway right-of-way to complement information facilities located at safety rest areas. Section 136 of the 1976 Highway Act amended 23 U.S.C. 319 by eliminating the separate funding category of landscaping and scenic enhancement and permitting expenditures for this purpose out of normal construction costs.

In order to implement these statutory amendments and to clarify existing procedures, the Federal Highway Administration is issuing interim regulations, pursuant to which States may proceed with landscape and roadside development. The most significant changes are as follows:

Expenditures for landscaping and scenic enhancement may be made from normal construction funds. The separate funding category for these purposes has been eliminated. The Federal share provided will be in accordance with that provided for the highway project involved.

In addition to constructing and operating or leasing the construction and/or operation of information facilities at safety rest areas, States may also establish or permit, subject to Federal Highway Administration approval, information systems within the right-of-way of federally funded highways. Such systems may not visually intrude upon the main-traveled way of the highway.

Where plant survival is extremely critical as in junkyard screening and urban landscaping, plant establishment periods may be extended to a maximum of 3 years.

Those desiring to comment on these interim regulations are asked to submit their views, data, and arguments in writing. Communications should identify the docket number (FHWA Docket No. 78-2). Comments will be available both before and after the closing date at the above address. It is the intention of the Federal Highway Administration to issue final rules in this matter after the program under the interim rules has been reviewed and comments received pursuant to this notice have been analyzed.

The material in these regulations relates only to a grant program of the Federal Highway Administration. The relevant provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of rulemaking, opportunity for public participation, and delay in effective date are inapplicable.

The Federal Highway Administration has determined that this document does not contain a major proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044.

Issued on: April 26, 1978.

KARL S. BOWERS,
Deputy Administrator.

Chapter I of Title 23 of the Code of Federal Regulations is amended by combining Parts 752 and 753 into a revised Part 752, as follows: (Part 752 codifies material contained in Volume 6, Chapter 2, section 5, Subsection 1, of the Federal Aid Highway Program Manual):

Sec.
752.1 Purpose.
752.2 Policy.
752.3 Definitions.
752.4 Landscape development.
752.5 Safety rest areas.
752.6 Scenic overlooks.
752.7 Information centers and systems.
752.8 Privately operated information centers and systems.
752.9 Scenic lands.
752.10 Abandoned vehicles.
752.11 Federal participation.

AUTHORITY: 23 U.S.C. 131, 315, 319; 42 U.S.C. 4321 *et seq.*; 49 CFR 1.48(b).

§ 752.1 Purpose.

The purpose of this Part is to furnish guidelines and prescribe policies regarding (a) landscaping and scenic enhancement programs under 23 U.S.C. 319 and the National Environmental Policy Act, 42 U.S.C. 4321, et sec.; (b) safety rest areas and scenic overlooks under 23 U.S.C. 319, and (c) information centers and systems under 23 U.S.C. 131(i).

§ 752.2 Policy.

(a) Highway esthetics is a most important consideration in the Federal-aid highway program. Highways must not only blend with our natural social, and cultural environment, but also provide pleasure and satisfaction in their use.

(b) The FHWA will cooperate with State and local agencies and organizations to provide opportunities for the display of original works of art within the highway rights-of-way.

(c) The development of the roadside to include landscape development, safety rest areas, and the preservation of valuable adjacent scenic lands is a necessary component of highway development. Planning and development of the roadside should be concurrent with or closely follow that of the highway. Further, the development of travel information centers and systems is encouraged as an effective method of providing necessary information to the traveling public.

§ 752.3 Definitions.

(a) *Safety rest area.* A roadside facility safely removed from the traveled way with parking and such facilities for the motorist deemed necessary for his rest, relaxation, comfort and information needs. The term is synonymous with "rest and recreation areas."

(b) *Scenic overlook.* A roadside improvement for parking and other facilities to provide the motorist with a safe opportunity to stop and enjoy a view.

(c) *Information centers.* Facilities located at safety rest areas which provide information of interest to the traveling public.

(d) *Information systems.* Facilities located within the right-of-way which provide information of interest to the traveling public. An information system is not a sign, display or device otherwise permitted under 23 U.S.C. 131 or prohibited by any local, State or Federal law or regulation.

§ 752.4 Landscape development.

(a) Landscape development within the right-of-way of all federally funded highways or on adjoining scenic lands shall be in general conformity with accepted concepts and principles of highway landscaping and environmental design.

(b) Highway planting programs should have provisions for plant establishment periods of a duration sufficient for expected survival in the highway environment. Normal 1-year plant establishment periods may be extended to 3-year periods where survival is considered essential to their function, such as junkyard screening or urban landscaping projects.

(c) In urban areas new and major reconstructed highways and completed Interstate and expressway sections are to be landscaped as appropriate for the adjacent existing or planned environment.

(d) In rural areas new and major reconstructed highways should be landscaped as appropriate for the adjacent environment. Planning should include the opportunity for natural regeneration of native growth and the management of that growth.

§ 752.5 Safety rest areas.

(a) Safety rest areas should provide facilities reasonably necessary for the comfort, convenience, relaxation, and information needs of the motorist. Caretakers' quarters may be provided in conjunction with a safety rest area at such locations where accommodations are deemed necessary. All facilities within the rest area are to provide full consideration and accommodation for the handicapped.

(b) Access from the safety rest areas to adjacent publicly owned conservation and recreation areas may be permitted if access to these areas is only available through the rest area and if these areas or their usage does not adversely affect the facilities of the safety rest area.

(c) The scenic quality of the site, its accessibility and adaptability, and the availability of utilities are the prime considerations in the selection of rest area sites. A statewide safety rest area system plan should be maintained. This plan should include development priorities to ensure safety rest areas will be constructed first at locations most needed by the motorist. Proposals for safety rest areas or similar facilities on Federal-aid highways in suburban or urban areas shall be special case and must be fully justified before being authorized by the FHWA Regional Administrator.

(d) Facilities within newly constructed safety rest areas should meet the forecast needs of the design year. Expansion and modernization of older existing rest areas that do not provide adequate service should be considered.

(e) No charge to the public may be made for goods and services at safety rest areas, except telephone.

§ 752.6 Scenic overlooks.

Scenic overlooks shall be located and designed as appropriate to the site and the scenic view with consideration for safety, access, and convenience of the motorist. Scenic overlooks may provide facilities equivalent to those provided in safety rest area.

§ 752.7 Information centers and systems.

(a) The State may establish at existing or new safety rest areas information centers for the purpose of providing specific information to the motorist as to services, as to places of interest within the State and such other information as the State may consider desirable.

(b) The State may construct and operate the facilities, may construct and lease the operation of information facilities, or may lease the construction and operation of information facilities.

(c) Where the information center or system includes an enclosed building, the identification of the operator and all advertising must be restricted to the interior of the building. Where a facility is in the nature of a bulletin board or partial enclosure, none of the advertising, including the trade name, logo, or symbol of the operator shall be legible from the main traveled way.

(d) Subject to FHWA approval, States may establish or permit information systems within the right-of-way of federally funded highways which provide information of specific interest to the traveling public which do not visually intrude upon the main-traveled way of the highway in a manner violating 23 U.S.C. 131 and other applicable local, State, and Federal laws, rules, and regulations.

§ 752.8 Privately operated information centers and systems.

(a) Subject to the FHWA Regional Administrator's approval of the lease or agreement, the State may permit privately operated information centers and systems which conform with the standards of this directive.

(b) There shall be no violations of control of access, and no adverse effect on traffic in the main traveled way.

(c) The agreement between the State and the private operator shall provide that:

(1) The State shall have title to the information center or system upon completion of construction or termination of the lease.

(2) Advertising must be limited to matters relating to and of interest to the traveling public.

(3) Equal access must be provided at reasonable rates to all advertisers considered qualified by the State.

(4) Forty percent or more of all display areas and audible communications shall be devoted free of charge to providing information to the traveling public and public service announcements.

(5) No charge to the public may be made for goods or services except telephone.

(6) Nondiscrimination provisions must be included in accordance with the State assurance with regard to 42 U.S.C. 2000d-2000d-5 (Civil Rights Act of 1964). The private operator may not permit advertising from advertisers who do not provide their services without regard to race, color, or national origin.

(7) The center or system shall be adequately maintained and kept clean and sanitary.

(8) The State may promulgate reasonable rules and regulations on the conduct of the information center or system in the interests of the public.

(9) The State may terminate the lease or agreement for violation of its terms or for other cause.

§ 752.9 Scenic Lands.

(a) Acquisition of interests in and improvement of strips of land or water areas adjacent to Federal-aid highways may be made as necessary for restoration, preservation, and enhancement of scenic beauty.

(b) Scenic strip interests may be acquired in urban or rural areas, combined in one or more projects, authorized separately whether or not there is or has been a Federal-aid project on the adjoining Federal-aid highway.

(c) Approval of acquisition and development of scenic strips on completed Interstate should be conditioned on a showing that the acquisition of scenic strips was considered under the Highway Beautification Program for that particular section of Interstate.

§ 752.10 Abandoned Vehicles.

(a) Abandoned motor vehicles may be removed from the right-of-way and from private lands adjacent to Federal-aid highways for the restoration, preservation, or enhancement of scenic beauty as seen from the traveled way of the highway as a landscape or roadside development project.

(b) The State shall obtain permission or sufficient legal authority to go on private land to carry out this program. Where feasible, an agreement should be made with the owner that he will not in the future place junk, or allow junk to be placed, on his land so as to create an eyesore to the traveling public. The permission or authority and the agreement may be informal.

(c) The collection of abandoned motor vehicles from within the right-of-way must be a development project and not a maintenance operation. Once a State completes a development project for the removal of abandoned motor vehicles from within the high-

V 4 3 1 8 8

way right-of-way, it is obligated to continue the removal of future abandoned motor vehicles from within the development project limits without further participation.

§ 752.11 Federal Participation.

(a) Federal-aid highway funds are available for landscape development, the acquisition and development of safety rest areas, scenic overlooks, and scenic lands, for the development of information centers and systems, and for the removal of abandoned motor vehicles.

(b) Federal-aid participation may be made in plant establishment periods in or associated with landscaping projects and in the planting of flowering materials supplied by garden clubs and other organizations or individuals.

(c) Federal-aid Interstate funds may participate in necessary rest area expansion to accommodate the probable usage which can now be expected during the design year of the original rest area construction, for any rest area project authorized prior to January 1, 1970. In addition, on any project where basic safety rest area Federal-aid construction was authorized prior to January 1, 1964, deficient safety rest areas may be expanded or improved with Federal Interstate participation to accommodate usage as a result of 1976 traffic.

(d) Federal-aid Interstate funds may participate in facilities for new or enlarged information centers or systems within existing rest areas regardless of the year basic rest area construction was authorized. Federal-aid funds may not be used for the assemblage, printing, or distribution of informational materials. Federal-aid funds may not be used for temporary or portable information facilities.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7543; LR-1810]

PART 1—INCOME TAX: TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Abatement of Income Taxes of Certain Members of the Armed Forces of the United States Upon Death

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulaltions.

SUMMARY: This document provides final regulations relating to the abatement of income taxes of members of the Armed Forces of the United States who die while serving in a combat zone or as a result of wounds, disease, or injury incurred while serving in a combat zone. The document conforms the regulations to the per curiam decision of the Supreme Court in *Marcelle* v. *Estate of Lupia*, 348 U.S. 956 (1955), which held the abatement extends to income received by the individual's estate during any remaining portion of the twelve-month period corresponding to the individual's final taxable year. The amendment affects those survivors of a serviceman who receives income that would have been received by the serviceman during the balance of his taxable year had he lived.

DATES: The regulations are effective for taxable years ending after June 24, 1950.

FOR FURTHER INFORMATION CONTACT:

Fred E. Grundeman of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention CC:LR:T, 202-566-3737, not a toll-free number.

SUPPLEMENTAL INFORMATION:

Background

On December 19, 1977, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 692 of the Internal Revenue Code of 1954. The amendments were proposed to conform the regulations to the per curiam decision of the Supreme Court in *Marcelle* v. *Estate of Lupia*, 348 U.S. 956 (1955), affirming 214 F. 2d 942 (2d., Cir. 1954). As no comments from the public were received, this document adopts the proposed amendments without change.

Provisions of the Regulations

Under section 692(a), if an individual dies while serving as an active member of the Armed Forces of the United States in a combat zone, no income tax is imposed for the taxable year containing the date of his death. Also, no income tax is imposed for any previous taxable year during which he served in a combat zone. Section 1.692-1(a)(1) of the existing regulations provides that the tax liability cancelled under section 692(a) consists of the liability for the taxable year (generally a short taxable year of less than 365 days) ending on the date of a serviceman's death and for any prior taxable year during which he served in a combat zone. That position was based on the general rule that the last taxable year of an individual ends on the date he dies. In *Estate of Lupia*, the Supreme Court held that the phrase "taxable year in which falls the date of his death" means the entire taxable year in which death occurs, that is, the 12-month period beginning on the first day of the decedent's taxable year in which falls the date of his death. The amendment contained in this document conforms the regulations to that decision.

The amendment also removes all references to service "during an induction period" because that language was retroactively removed from the statute by the Act of January 2, 1975 (Pub. L. 93-597, 88 Stat. 1953), to reflect the expiration on June 30, 1973, of the Military Selective Service Act of 1967 (the draft law).

Drafting Information

The principal author of these proposed amendments was Fred E. Grundeman of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the amended regulation, both on matters of substance and style.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

Paragraph 1. Section 1.692 is deleted.

Par. 2. Paragraph (a) of § 1.692-1 is amended to read as follows:

§ 1.692-1 Abatement of income taxes of certain members of the Armed Forces of the United States upon death.

(a) (1) This section applies if—

(i) An individual dies while in active service as a member of the Armed Forces of the United States, and

(ii) His death occurs while he is serving in a combat zone (as determined under section 112), or at any place as a result of wounds, disease, or injury incurred while he was serving in a combat zone.

(2) If an individual dies as described in paragraph (a)(1), the following liabilities for tax, under subtitle A of the Internal Revenue Code of 1954 or under chapter 1 of the Internal Revenue Code of 1939, are canceled:

(i) The liability of the deceased individual, for his last taxable year, ending on the date of his death, and for any prior taxable year ending on or after the first day he served in a combat zone in active service as a member of the U.S. Armed Forces after June 24, 1950, and

(ii) The liability of any other person to the extent the liability is attributable to an amount received after the individual's death (including income in respect of a decedent under section 691) which would have been includible in the individual's gross income for his taxable year in which the date of his death falls (determined as if he had survived).

If the tax (including interest, additions to the tax, and additional amounts) is assessed, the assessment will be abated. If the amount of the tax is collected (regardless of the date of collection), the amount so collected will be credited or refunded as an overpayment.

(3) If an individual dies as described in paragraph (a)(1), there will not be assessed any amount of tax of the individual for taxable years preceding the years specified in paragraph (a)(2), under subtitle A of the Internal Revenue Code of 1954, chapter 1 of the Internal Revenue Code of 1939, or corresponding provisions of prior revenue laws, remaining unpaid as of the date of death. If any such unpaid tax (including interest, additions to the tax, and additional amounts) has been assessed, the assessments will be abated. If the amount of any such unpaid tax is collected after the date of death, the amount so collected will be credited or refunded as an overpayment.

(4) As to what constitutes active service as a member of the Armed Forces, service in a combat zone, and wounds, disease, or injury incurred while serving in a combat zone, see section 112. As to who are members of the Armed Forces, see section 7701(a)(15). As to the period of time within which any claim for refund must be filed, see sections 6511(a) and 7508(a)(1)(E).

* * * * *

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S. 7805).

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: April 3, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

[4510-30]

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY

PREFERENCE IN GOVERNMENT PROCUREMENT TO COMPANIES IN HIGH UNEMPLOYMENT AREAS

Revocation of Rules

AGENCY: Department of Labor.

ACTION: Deletion of rules.

SUMMARY: The Department of Labor is deleting its obsolete regulations governing preference in Government procurement to companies in high unemployment areas. These have been superseded by new regulations implementing the successor Defense Manpower Policy DMP-4A. The Department is also deleting certain parts which had provided for the limited application of certain Work Incentive Program regulations past the date of their recision. Since there is no further adjudication pending (nor has any been pending for some time) as to which the former regulations would apply, these savings clauses are no longer necessary.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Davis A. Portner, Office of Policy and Planning, 601 D Street NW., Room 9420, Washington, D.C. 20213, 202-376-6274.

SUPPLEMENTARY INFORMATION:

Defense Manpower Policy No. 4

On August 4, 1977, the President signed into law the Small Business Act Amendments of 1977 (Pub. L. 95-89). In pertinent part these amendments modified Defense Manpower Policy No. 4 (DMP-4), the labor surplus procurement program implemented by the Federal Preparedness Agency of the General Services Administration (GSA) through regulations at 32A CFR Part 134.

On November 3, 1977, GSA issued new regulations implementing Defense Manpower Policy No. 4A (DMP-4A) to reflect the changes wrought by Pub. L. 95-89. The regulations were made effective retroactive to October 27, 1977. (42 FR 57457.)

Under the former DMP-4 program the Department of Labor was responsible for identification and classification of eligible labor surplus areas, the establishment of an order of preference among such areas, and the certification of eligible employing establishments. In contrast, the new DMP-4A program specifies the order of preference among employers in labor surplus areas and eliminates the certification requirement formerly imposed on employing establishments. The Department is still responsible, however, for classifying labor surplus areas.

These changes in the Department's responsibilities were carried out through the adoption of a new set of regulations at 20 CFR Part 654. The regulations were first published as proposed rulemaking on December 16, 1977, at 42 FR 63428. While proposing new regulations, the Department explained that it would continue to follow its existing regulations under DMP-4 at 29 CFR Part 8 to the extent necessary to implement the revised DMP-4A labor surplus program. The Department gave notice, however, that:

> Those sections [of 29 CFR Part 8] pertaining to order of preference among employers in labor surplus areas and certification of eligible employers, which sections are abrogated by DMP-4A, have lost their legal effect. (42 FR 63429.)

These provisions of 29 CFR Part 8 were technically void as of October 27, 1977, the effective date of the GSA regulations implementing DMP-4A.

The final regulations at 29 CFR Part 654 were adopted on March 3, 1978, effective immediately (43 FR 9102). Since the new regulations supersede the former rules at 29 CFR Part 8, the latter set of rules is no longer necessary. The Department is therefore rescinding 29 CFR Part 8 in its entirety.

The Work Incentive Program Regulations

On September 18, 1975, at 40 FR 43170 the Department rescinded its regulations at 29 CFR Parts 57 and 58 concerning administrative hearings and appeals, and rules of practice of the National Review Panel under the Work Incentive Program. Headings for the two parts have been retained in the Code of Federal Regulations at Title 29, however, with an explanation that the rescinded regulations would continue to apply to all adjudication under them commenced prior to November 1, 1975. Since there is no further adjudication pending (nor has any been pending for some time) as to which the former regulations would apply, these savings clauses are no longer necessary. The Department is therefore deleting in their entirety both Parts 57 and 58 of Title 29.

Accordingly, 29 CFR Subtitle A is amended as follows:

1. Part 8, *Preference in Federal Procurement under Defense Manpower Policy No. 4 and Executive Order 10582*, is removed in its entirety.

2. Part 57, *Administrative Hearings and Appeals under the Work Incentive Program*, is removed in its entirety.

3. Part 58, *Rules of Practice of the National Review Panel, Work Incentive Program*, is removed in its entirety.

Signed this 27th day of April 1978.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Title 45—Public Welfare

CHAPTER X—COMMUNITY SERVICES ADMINISTRATION

[CSA Instruction 6802-5a, Ch. 1]

PART 1068—GRANTEE FINANCIAL MANAGEMENT

Subpart—Non-Federal Share Contribution; Eligibility for Waiver of Increase for Fiscal Year 1978 Grants

AGENCY: Community Services Administration.

ACTION: Final rule.

SUMMARY: The Community Services Administration is filing its final rule notifying all grantees that the non-Federal share waiver criteria promulgated under 45 CFR 1068.22 (CSA Instruction 6802-5a) has been extended to cover fiscal year 1978 grants. This rule will enable grantees to apply for waivers where conditions so warrant.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Maryann J. Fair, Community Services Administration, 1200 19th Street NW., Washington, D.C. 20506, telephone, 202-254-5047.

SUPPLEMENTARY INFORMATION: On January 4, 1975, the Economic Opportunity Act was amended by the Community Services Act. The new legislation mandated an increase in the percentage of non-Federal share contributions for certain Title II programs beginning with funds granted in fiscal year 1976 with an additional increase for grants made with fiscal year 1977 funds and for each succeeding year. One of the objectives of this increase was to encourage more State and local cooperation.

In April 1977, the Acting Director of CSA exercised his authority under Section 225(c) of the Economic Opportunity Act to develop additional objective criteria under which part or all of the additional non-Federal share could be waived. These criteria were published under 45 CFR 1068.22 (CSA Instruction 6802-5a). Since many communities remain in difficult financial situations the Director of CSA has choosen to continue the waiver provisions promulgated under this subpart (CSA Instruction 6802-5a) and is hereby notifying grantees of this decision.

This regulation is effective immediately since there is no policy change and it is in the best interest of grantees.

AUTHORITY: Sec. 602, 78 Stat. 530; 42 U.S.C. 2942.

GRACIELA (GRACE) OLIVAREZ,
Director.

45 CFR 1068.22 is amended to add a new subpart as follows:

Subpart—Non-Federal Share Contribution; Eligibility for Waiver of Increase for Fiscal Year 1978 Grants

Sec.
1068.22-6 Policy Re: Fiscal year 1978 grants.

Subpart—Non-Federal Share Contribution; Eligibility for Waiver of Increase for Fiscal Year 1978 Grants

§ 1068.22-6 Policy Re: Fiscal year 1978 grants.

This subpart will cover all fiscal year 1978 grants made from October 1, 1977 and is retroactive for all fiscal year 1978 grants.

[FR Doc. 78-12317 Filed 5-4-78; 8:45 am]

Title 46—Shipping

CHAPTER IV—FEDERAL MARITIME COMMISSION

SUBCHAPTER A—GENERAL PROVISIONS

[General Order 16, Amdt. 23, Docket No. 77-59]

PART 502—RULES OF PRACTICE AND PROCEDURE

Conduct of Rulemaking Proceedings

AGENCY: Federal Maritime Commission.

ACTION: Final rules.

SUMMARY: The Rules of Practice and Procedure are amended to provide for a single round of comments in rulemaking proceedings unless particular circumstances warrant the filing of replies to comments and to provide for the participation of the Bureau of Hearing Counsel. Multiple rounds of comments and participation of Hearing Counsel have proven unnecessary in some instances. The new procedure provides desirable flexibility.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, 1100 L Street NW., Washington, D.C. 20573, 202-523-5725.

SUPPLEMENTARY INFORMATION: The Commission instituted this proceeding by Notice of Proposed Rulemaking published in the FEDERAL REGISTER on December 14, 1977, (42 FR 62939) to amend Rules 42 and 53 of the Commission's Rules of Practice and Procedure, 46 CFR 502.42 and 502.53. The purpose of the proposed amendments was to simplify the conduct of rulemaking proceedings by limiting them to a single round of comments unless there are particular circumstances in which this format would hinder the Commission's ability to formulate a just and reasonable rule. Specifically, Rule 42 would be amended to provide that the Director, Bureau of Hearing Counsel would be party to a rulemaking proceeding only by designation of the Commission. Rule 53 would be amended to provide that no replies to comments would be allowed unless the Commission determined that the nature of the proceeding warranted replies in order to fashion an adequate rule.

In response to the notice, comments were submitted by the Maritime Administrative Bar Association (MABA), the law firm of Lillick, McHose, and Charles (Lillick), Sea-Land Service, Inc. (Sea-Land), and Wade S. Hooker, Jr. (Hooker), an attorney who practices before the Commission. We have considered these comments carefully and have determined to publish the rules in final form as originally proposed. An analysis of the comments follows.

1. Rule 42. MABA takes no position with respect to the participation of Hearing Counsel although some of its members believe that Hearing Counsel should be permitted to request leave of the Commission to participate. Lillick similarly has no comment on this proposal while submitting that Hearing Counsel's participation is often beneficial. Sea-Land supports the proposal. Hooker has no comment but believes a second round of comments is essential.

As indicated, no commenter opposes this revision. The Bureau of Hearing Counsel always has the power to request an opportunity to participate and, of course, the proposal itself contemplates the Commission's designation of their participation.

2. Rule 53. MABA opposes this proposal on several grounds. First, no criteria are established to determine which proceedings are considered by the Commission to warrant a reply round. Second, the parties would be denied the views of others and the opportunity to comment on alternate recommendations made in response to the notice of proposed rulemaking. Third, MABA is of the opinion that a reply round serves to narrow the controverted issues. Last, some members suggest that the Commission require that all comments be served on all other commentators to facilitate the filing of meaningful replies.

Lillick urges retention of the current system, expressing concern that the use of one round of comments would not afford a fair opportunity to be heard. Lillick also criticizes the lack of criteria for determining which proceedings will be limited to one round of comments.

Similarly, Sea-Land would have us definitively set forth which proceedings will be limited to one round of comments.

Hooker also expresses concern that the proposals would limit participation in formulation of a rule, urging that the Commission supplement the proposed changes herein to the effect that, should the Commission make substantial amendments to a proposal, another opportunity should be given for comment.

The instant proposals are designed to give the Commission flexibility in the type of rulemaking proceedings it conducts. In this context, we feel that the concerns expressed by the commentators are unfounded. As indicated in the notice instituting this proceeding, the one-round procedure would not be followed in proceedings involving factual disputes or complex issues. Moreover, the determinations as to what type of proceeding will be employed will not be made necessarily in the initial proposal. It may well be that we will determine to have further submissions after seeing the initial comments. Similarly, the Commission would not make substantive changes to a proposal and finalize without further opportunity for comment; such a procedure would not be permitted by the Administrative Procedure Act.

In summary, we reiterate that the single-round proceeding will not be employed where complex or factual issues are involved. We are therefore adopting the rules as proposed.[1]

Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 553), and section 43 of the Shipping Act, 1916 (46 U.S.C. 841a), Part 502 of Title 46, Code of Federal Regulations, is amended as set forth below:

§ 502.42 [Amended]

1. Section 502.42 is amended by changing all references to "he" and "his" to "the Director" and "the Director's" and by changing the period at the end of the first sentence to a comma and adding the following: • • • and in rulemaking proceedings the Director may become a party by designation if the Commission determines that the circumstances of the proceeding warrant such participation. • • •

§ 502.53 [Amended]

2. Section 502.53 is amended by changing the colon appearing after the word "manner" in the first sentence to a period and adding the following: • • • No replies to the written submissions will be allowed unless, because of the nature of the proceeding, the Commission indicates that replies would be necessary or desirable for the formulation of a just and reasonable rule:

• • • • •

Effective date: Inasmuch as the expeditious adoption of these rules is desirable and inasmuch as they are procedural in nature, they shall be effective May 5, 1978.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[FR Doc. 78-12302 Filed 5-4-78; 8:45 am]

[1] Gender specific references in the existing and proposed rules have been eliminated.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1324]

PART 1033—CAR SERVICE

Chicago, Rock Island and Pacific Railroad Company Authorized To Operate Over Tracks of Burlington Northern Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order Service Order No. 1324.

SUMMARY: The line of the Chicago, Rock Island and Pacific Railroad between Eldon, Iowa, and Keokuk, Iowa, has become inoperable because of track conditions. An alternative route between Keokuk and other stations on the Chicago, Rock Island and Pacific exists by use of the tracks of the Burlington Northern between Keokuk and Burlington, Iowa. Service Order No. 1324 authorizes the Chicago, Rock Island and Pacific to operate over these tracks of the Burlington Northern in order to provide continued railroad service to shippers served by the Chicago, Rock Island and Pacific at Keokuk.

DATES: Effective 12:01 a.m., May 2, 1978. Expires 11:59 p.m., September 30, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The Order is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 28th day of April 1978.

The line of the Chicago, Rock Island and Pacific Railroad (RI) between Eldon, Iowa and Keokuk, Iowa, is inoperable because of track conditions. Shippers served by this line at Keokuk, Iowa, require the continued services of the RI in order to conduct their operations. An alternate route between Keokuk and other lines of the RI is available via the Burlington Northern Inc. (BN) between Keokuk and Burlington, Iowa. Use of this route by the RI would enable the RI to continue to provide needed rail service to shippers located adjacent to its tracks in Keokuk. The BN has consented to use of its tracks by the RI.

It is the opinion of the Commission that an emergency exists requiring operation of RI trains over these tracks of the BN in the interest of the public; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than 30 days' notice.

It is ordered, That:

§ 1033.1324 Service Order 1324.

(a) *Chicago, Rock Island and Pacific Railroad Company authorized to operate over tracks of Burlington Northern Inc.* The Chicago, Rock Island and Pacific Railroad Company (RI) is authorized to operate over tracks of the Burlington Northern Inc. (BN) between Keokuk, Iowa, and Burlington, Iowa, a distance of approximately 43.08 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the RI over tracks of the BN is deemed to be due to carrier's disability, the rates applicable to traffic moved by the RI over the tracks of the BN shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) *Effective date.* This order shall become effective at 12:01 a.m., May 2, 1978.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., September 30, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the

V 4 3 1 8 8

Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Service Order No. 1325]

PART 1033—CAR SERVICE

The Atchison, Topeka and Santa Fe Railway Company Authorized To Operate Unit-Grain Train Comprised of 60 Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order Service Order No. 1325.

SUMMARY: There is a severe shortage of both covered hopper cars and locomotives on the Atchison, Topeka and Santa Fe Railroad (ATSF) for transporting shipments of grain and related commodities. Service Order No. 1325 authorizes the ATSF to waive certain tariff requirements requiring the shipment of 75 carloads of grain in a single train and to apply in lieu thereof a minimum weight of 5,700 net tons per shipment in not to exceed 60 cars from ATSF origins in rate zone F and west to California destinations. The reduced train size will enable the ATSF to make a more equitable distribution of its covered hopper cars and to secure more efficient utilization of its locomotives.

DATES: Effective 12:01 a.m., May 2, 1978. Expires 11:59 p.m., August 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The Order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 1st day of May 1978.

An acute shortage of covered hopper cars and of locomotives for transporting trainload shipments of grain, grain products, soybeans or soybean meal exists on the line of the Atchison, Topeka and Santa Fe Railway Company (ATSF). That line has published certain rates in Transcontinental Freight Bureau Tariff 29-P, ICC 1958 which require the use of seventy-five (75) covered hopper cars to transport 7,125 net tons of these commodities for movement from all origins on the ATSF in rate zone F and west to points in California. Because of the heavy demands for covered hopper cars from shippers served by it the ATSF is unable to assemble and furnish seventy-five (75) such cars to a single shipper without serious adverse effects on other shippers also having need for such cars. The operation of seventy-five (75) car grain trains over the mountainous terrain between the origin points and the California destinations requires the use of additional locomotive units over the entire route. A reduction in train size to sixty (60) cars will enable the ATSF to make more effective use of its motive power and a more equitable distribution if its covered hopper cars.

It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than 30 days' notice.

It is ordered, That:

§ 1033.1325 Service Order No. 1325.

(a) *The Atchison, Topeka and Santa Fe Railway Company authorized to operate unit-grain train comprised of 60 cars.* The Atchison, Topeka and Santa Fe Railway Company is authorized to waive the seventy-five (75) car requirement provided in Item 2502 of Transcontinental Freight Bureau Tariff 29-P, I.C.C. 1958 for application of Column 7 rates and to apply in lieu thereof a minimum weight of 5,700 net tons to be loaded into not more than sixty (60) covered hopper cars for shipments of grain or related items from origins on the ATSF in rate zone F and west to points in California. All other provisions of that tariff shall remain in effect.

(b) *Rules and Regulations Suspended.* The operation of all other tariff provisions or of other rules and regulations insofar as they conflict with the provisions of this order, is hereby suspended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(d) *Effective date.* This order shall become effective at 12:01 a.m., May 2, 1978.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., August 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the FEDERAL REGISTER.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Joel E. Burns not participating.

H. G. HOMME, Jr.,
Acting Secretary.

Title 50—Wildlife and Fisheries

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 652—ATLANTIC SURF CLAM AND OCEAN QUAHOG FISHERIES

Correction

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Errata sheet.

SUMMARY: This errata sheet corrects the amendment to the final regulations published on Friday, March 31, 1978, (43 FR 13582) which specified the effort restrictions for fishing for surf clams in the fishery conservation zone.

EFFECTIVE DATE: These corrections are effective immediately.

FOR FURTHER INFORMATION CONTACT:

Richard Schaefer, Chief, Fisheries Management Operations, Division 31, National Marine Fisheries Service, Washington, D.C. 20235, telephone: 202-634-7454.

SUPPLEMENTARY INFORMATION: On February 17, 1978, final regulations were published implementing the Atlantic surf clam and ocean quahog fishery management plan (see 50 CFR Part 652, 43 FR 6953). This plan was prepared by the Mid-Atlantic Fishery Management Council and approved by the Secretary of Commerce pursuant to the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended.

On March 31, 1978, amendments to the final regulations were published (50 CFR 652.7(a)(1), 43 FR 13582) revising fishing effort restrictions. Due to a typographical error § 652.7(a) was amended, rather than § 652.7(a)(1), as intended. This errata sheet corrects that mistake so that only § 652.7(a)(1) was amended on March 31, 1978, as intended. The remainder of § 652.7(a) remains in effect as originally published on February 17, 1978.

Signed at Washington, D.C., this 2d day of May 1978.

JACK W. GEHRINGER,
Deputy Director, National Marine Fisheries Service.

[FR Doc. 78-12342 Filed 5-4-78; 8:45 am]

[3510-22]

PART 652—ATLANTIC SURF CLAM AND OCEAN QUAHOG FISHERIES

Reduction of Fishing Hours

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Notice of reduction of fishing hours.

SUMMARY: This notice specifies new effort restrictions under the Fishery Conservation and Management Act of 1976, for fishing for surf clams in the fishery conservation zone by reducing the present 48-hour fishing period to 24 hours.

EFFECTIVE DATE: 0001 hours, May 8, 1978, through June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. William G. Gordon, Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Mass. 01930, telephone 617-281-3600.

SUPPLEMENTARY INFORMATION: Section 652.7(a)(3) provides that when 50 percent of a quarterly quota of surf clams is caught the Regional Director shall determine the appropriate action necessary, such as closure or a reduction in fishing time, and he shall publish notice of such determination in the FEDERAL REGISTER. Catch statistics through April 21, 1978, indicate that 50 percent of the adjusted quarterly quota of 529,107 bushels will be caught by April 27, 1978. The Regional Director has estimated if the catch and effort continues at the present rate, the entire quarterly quota may be caught as soon as May 25, 1978. This would necessitate a closure of the fishery for five weeks. At the hearings held jointly by the National Oceanic and Atmospheric Administration, and the Mid-Atlantic Fishery Management Council in February concerning fishing day selection, a number of individuals indicated that a 2- to 3-week closure of the fishery was acceptable. However, a 5-week closure would cause a far greater hardship to the industry than a 2- to 3-week closure. The Assistant Administrator for Fisheries has determined that the reduction in the fishing period from 48 to 24 hours specified in this notice will cause the least amount of hardship and is consistent with the public comments received in February. Therefore, at 0001 hours, May 8, 1978 the present 48-hour fishing period will be reduced to 24 hours. This notice will be effective from May 8, through June 30, 1978, at which time the new quarter will begin and the fishery will revert back to a 48-hour week.

Signed at Washington, D.C., this 2d day of May 1978.

JACK W. GEHRINGER,
Deputy Director, National Marine Fisheries Service.

[Docket Nos. AO-267-A9 and AO-254-A8]

LIMES GROWN IN FLORIDA AND AVOCADOS GROWN IN SOUTH FLORIDA

Decision on Proposed Further Amendment of the Marketing Agreements and Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision would amend the Federal marketing agreements and orders for fresh limes and avocados grown in Florida. Growers of these fruits will vote in a referendum to determine if they favor the proposed changes in the order. The principal changes would: Authorize addition of a public member to each committee; allow an assessment rate exceeding 20 cents per bushel when recommended by a specified majority of the committee; change the financial reserve provision to permit the carryover of up to three years' expenses; authorize regulations for export shipments that are different from regulations for shipments to domestic markets; delete the provision allowing compensation to committee members for performing program duties; and, for limes, exclude export shipments from volume control and handler prorate base calculations.

DATES: Grower referenda—June 21 through June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing—Issued January 12, 1978; published January 17, 1978 (43 FR 2401); Notice of Recommended Decision—Issued March 23, 1978; published March 29, 1978 (43 FR 13067).

PRELIMINARY STATEMENT

A public hearing was held upon proposed further amendment of the marketing agreements and orders (7 CFR Parts 911 and 915) (hereinafter referred to collectively as the "orders"), regulating, respectively, the handling of limes grown in Florida and avocados grown in South Florida. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Homestead, Fla., on February 7, 1978, pursuant to notice thereof issued on January 12, 1978.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Marketing Program Operations, on March 23, 1978, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto. No exceptions were filed.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision published Wednesday, March 29, 1978, in the FEDERAL REGISTER (43 FR 13067), are hereby incorporated herein and made a part hereof, subject to correction of inadvertent, grammatical or obvious errors.

Marketing Agreements and Orders. Annexed hereto and made a part hereof are four documents entitled, respectively, "Order Amending the Order, as Amended, Regulating the Handling of Limes Grown in Florida" and "Marketing Agreement, as Further Amended, Regulating the Handling of Limes Grown in Florida", "Order Amending the Order, as Amended, Regulating the Handling of Avocados Grown in South Florida" and "Marketing Agreement, as Further Amended, Regulating the Handling of Avocados Grown in South Florida", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the two annexed marketing agreements, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreements are identical with those contained in the orders as hereby proposed to be amended by the annexed orders which are published with this decision.

Referendum Order. It is hereby directed that referenda be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 et seq.), to determine whether the issuance of the annexed orders, as amended and as hereby proposed to be amended, regulating the handling of limes grown in Florida and the handling of avocados grown in South Florida, respectively, are approved or favored by producers, as defined under the terms of the orders, who during the representative period were engaged in the production of the regulated commodity for market.

The representative period for the conduct of such referenda is hereby determined to be April 1, 1976, through March 31, 1977.

The agents of the Secretary to conduct such referenda, jointly or severally, are hereby designated to be William C. Knope and John R. Toth, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, P.O. Box 9, Lakeland, Fla. 33802.

Signed at Washington, D.C., on May 2, 1978.

P. R. "BOBBY" SMITH,
Assistant Secretary.

ORDER[1] AMENDING THE ORDER, AS AMENDED, REGULATING THE HANDLING OF LIMES GROWN IN FLORIDA

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911), regulating the handling of limes grown in Florida.

Upon the basis of the record it is found that:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of limes grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of limes grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of limes grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof the handling of limes shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the recommended decision issued by the Deputy Administrator, Marketing Program Operations, on March 23, 1978, and published in the FEDERAL REGISTER on March 29, 1978 (43 FR 13067; FR Doc. 78-8207), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

1. Add a new § 911.12 *Export* as follows:

§ 911.12 Export.

"Export" means to ship limes to any destination which is not within the 48 contiguous States or the District of Columbia of the United States or Canada.

* * * * *

Revise § 911.48 by adding a new paragraph (a)(7). As amended, § 911.48 reads as follows:

§ 911.48 Issuance of regulations.

(a) * * *

(7) Prescribe requirements, as provided in this paragraph, applicable to exports of any variety of limes which are different from those applicable to the handling of the same variety to other destinations.

* * * * *

2. Revise § 911.20 by designating the first paragraph as paragraph (a) and by adding a new paragraph (b). As amended, § 911.20 reads as follows:

§ 911.20 Establishment and membership.

* * * * *

(b) The committee may be increased by one public member and alternate. Persons for the public member positions would be nominated by the committee and selected by the Secretary. The committee, with the approval of the Secretary, shall prescribe qualifications, term of office, and the procedure for nominating the public member and alternate.

Revise paragraph (a) of § 911.30 and add a new paragraph (d) to such section. As amended, § 911.30 reads as follows:

§ 911.30 Procedure.

(a) Except as provided in paragraphs (c) and (d), of this section, six members of the committee, including alternates acting for members, shall constitute a quorum and any decision, recommendation or other action of the committee shall require not less than five concurring votes, including one by a handler, or an alternate acting as such: *Provided,* That if the committee is increased by one, the quorum requirement shall be increased to seven and any decision, recommendation or other action of the committee shall require not less than six concurring votes, including one by a handler or an alternate acting as such.

* * * * *

(d) For any recommendation of the committee for an assessment rate exceeding $0.20 per bushel to be applied pursuant to § 911.41, the quorum requirement shall be eight members or alternates acting for members and eight concurring votes shall be required.

3. Revise paragraph (b) of § 911.41 to read as follows:

§ 911.41 Assessments.

* * * * *

(b) The Secretary shall fix the rate of assessment per 55-pounds of fruit or equivalent in any container or in bulk, to be paid by each such handler. At any time during or after a fiscal year, the Secretary may increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expenses which may be incurred. Such increase shall be applied to all fruit handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part, the committee may accept the payment of assessments in advance.

4. Revise § 911.31 to read as follows:

§ 911.31 Expenses.

The members of the committee and their respective alternates when performing duties at the direction of the committee, shall be reimbursed for expenses necessarily incurred by them in the performance of their duties under this part.

5. Revise paragraph (a)(2) of § 911.42. As amended § 911.42 reads as follows:

§ 911.911.42 Accounting.

(a) * * *

(2) The secretary, upon recommendation of the committee, may determine that it is appropriate for the maintenance and functioning of the committee that the funds remaining at the end of a fiscal year which are in excess of the expenses necessary for committee operation during such a year may be carried over into following years as a reserve. Such reserve may be established at an amount not to exceed approximately 3 fiscal years' operational expenses. Funds in the reserve may be used to cover the necessary expenses of liquidation, in the event of termination of this part, to cover the expenses incurred for the maintenance and functioning of the committee during any fiscal year when there is crop failure, or during any period of suspension of any or all the provisions of this part. Such reserve may also be used by the committee to finance its operations during any fiscal year prior to the time that assessment income is sufficient to cover such expenses and to cover deficits incurred during any fiscal year when income is less than expenses. Upon termination of this part any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate: *Provided,* That to the extent practical, such funds shall be returned pro rata to the persons from whom such funds were collected.

* * * * *

6. Revise paragraph (a) of § 911.53. so that after revision such paragraph reads as follows:

§ 911.53 Recommendation for volume regulation.

(a) The committee may, during any week, recommend to the Secretary the total quantity of limes which it deems

MY 5 78
UMI

V 43 — 88 MY 5 78 UMI

advisable to be handled to destinations within the forty-eight contiguous States of the United States, the District of Columbia and Canada during the next succeeding week: *Provided,* That such volume regulations shall not be recommended for any week except during the 18-week regulatory period beginning with the week preceding the first full week in May: *Provided, further,* That no such regulation shall be recommended after such regulations have been in effect for an aggregate of eight (8) weeks during the aforesaid period.

. . . . . .

Revise § 911.54 to read as follows:

§ 911.54 Issuance of volume regulations.

Whenever the Secretary finds from the recommendation and information submitted by the committee, or from other available information, that to limit the quantity of lines which may be handled to destinations within the 48 contiguous States of the United States, the District of Columbia and Canada during a specified week of a regulatory period will tend to effectuate the declared policy of the act, he shall fix such quantity: *Provided,* That such regulations during a regulatory period shall not in the aggregate limit the volume of lime shipments for more than eight (8) weeks. The quantity so fixed for any week may be increased by the Secretary at any time during such week. Such regulations may, as authorized by the act, be made effective irrespective of whether the season average price of limes is in excess of the parity price. The Secretary may, upon the recommendation of the committee, or upon other available information, terminate or suspend any regulation pursuant to this section at any time.

. . . . . .

Revise paragraph (d) of § 911.55 to read as follows:

§ 911.55 Prorate bases.

. . . . . .

(d) Each week during the regulatory period when volume regulation is likely to be recommended for the following week, the committee shall compute a prorate base for each handler who has made application in accordance with the provisions of the section. The prorate base for each such handler shall be computed by adding together the handler's shipments of limes in the current season and his shipments in the immediately preceding seasons, if any, within the representative period in which he shipped limes and dividing such total by a divisor computed by adding together the number of weeks elapsed in the current season and the eighteen weeks for each of such immediately preceding seasons within the representative period in which the handler shipped limes. For purposes of this section "shipments" shall include only those limes which were shipped to destinations within the forty-eight contiguous States of the United States, the District of Columbia and Canada; "representative period" means the two preceding seasons together with the current season; the term "season" means the eighteen-week period beginning with the week preceding the first full week in May of any fiscal year; and the term "current season" means the period beginning with the week preceding the first full week in May of the current fiscal year through the fourth full week preceding the week of regulation: *Provided,* That when official shipping records are available to the committee the said "current season" shall extend through the third full week preceding the week of regulation.

7. Section 911.110 contains erroneous references to § 911.54. The correct reference is § 911.50. As corrected, § 911.110 reads as follows:

Subpart—Rules and Regulations

§ 911.110 Exemption certificates.

Exemption certificates under § 911.50 shall be issued by the Florida Lime Administrative Committee pursuant to the following rules and regulations:

. . . . . .

(c) Approval of the application shall be evidenced by the issuance to the applicant, by the Manager of the Florida Lime Administrative Committee on its behalf, of one or more exemption certificates which shall authorize the handling of such quantity of the applicant's limes as may be necessary to accomplish the purposes of § 911.50.

. . . . . .

Section § 911.130(a) contains erroneous references to §§ 911.52 and 911.55. The correct references are §§ 911.48, 911.54 and 911.55. Paragraph (b) contains erroneous referneces to §§ 911.52 and 911.55. The correct references are 911.48 and 911.51. Paragraph (c) contains an incorrect reference to § 911.56. The correct reference is § 911.52. As corrected, § 911.130 reads as follows:

§ 911.130 Limes not subject to regulation.

(a) *Minimum quantity.* During any one day any handler may handle not to exceed 55 pounds total of limes exempt from the provisions of §§ 911.41, 911.48, 911.51 and 911.54, and the regulations issued thereunder: • • •

(b) *Gift shipments.* Any handler may, exempt from the provisions of §§ 911.41, 911.48, and 911.51, and the regulations issued thereunder, • • •

(c) *Commercial processing into products.* The term "commercial processing into products," as used in § 911.52(c) means the manufacture of any lime product which has been preserved by any recognized commercial process, • • •

In § 911.311(a)(2) change the word "marketing" which appears in the proviso to "marking". As corrected, the proviso reads as follows:

Subpart—Pack Regulation

§ 911.311 Lime Regulation 9.

(a) (1) • • •

(2) • • • *Provided,* That in lieu of such marking requirement, any handler may affix to the container a label, brand, or trademark, registered with the Florida Lime Administrative Committee in accordance with the following, which appropriately identifies the grade:

. . . . . .

ORDER[1] AMENDING THE ORDER, AS AMENDED, REGULATING THE HANDLING OF AVOCADOS GROWN IN SOUTH FLORIDA

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et. seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

[1]This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

(2) The order, as amended, and as hereby further amended, regulates the handling of avocados grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commerical and industrial activity specifed in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production areas as are necessary to give due recognition to the difference in the production and marketing of avocados grown in the production area; and

(5) All handling of avocados grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof the handling of avocados shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the recommended decision issued by the Deputy Administrator, Marketing Program Operations, on March 23, 1978, and published in the FEDERAL REGISTER on March 29, 1978 (43 FR 13067; FR Doc. 78-8207), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

1. Add a new § 915.12 Export as follows:

§ 915.12 Export.

"Export" means to ship avocados to any destination which is not within the 48 continuous States or the District of Columbia of the United States or Canada.

. . . . . .

Amend § 915.51(a) by adding a new subparagraph (7). As amended, § 915.51 reads as follows:

§ 915.51 Issuance of regulations.

(a) • • •

(7) Prescribe requirements, as provided in this paragraph, applicable to exports of any variety of avocados which are different from those applicable to the handling of the same variety to other destinations.

. . . . . .

2. Revise § 915.20 by designating the first paragraph as paragraph (a) and by adding a new paragraph (b). As amended, § 915.20 reads as follows:

§ 915.20 Establishment and membership.

. . . . . .

(b) The committee may be increased by one public member and an alternate. Persons for the public member positions would be nominated by the committee and selected by the Secretary. The committee, with the approval of the Secretary, shall prescribe qualifications, term of office and the procedure for nominating the public member and alternate.

Revise paragraph (a) of § 915.30 and add a new paragraph (c) to such section. As amended, § 915.30 reads as follows:

§ 915.30 Procedure.

(a) Except as provided in paragraph (c) of this section, six members of the committee, including alternates acting for members, shall constitute a quorum and any decision, recommendation or other action of the committee shall require not less than five concurring votes including one by a handler, or an alternate acting as such; *Provided,* That if the committee is increased by one, the quorum requirement shall be increased to seven and any decision, recommendation or other action of the committee shall require not less than six concurring votes including one by a handler, or an alternate acting as such.

. . . . . .

(c) For any recommendation of the committee for an assessment rate exceeding $0.20 per bushel to be applied pursuant to § 915.41, the quorum requirement shall be eight members or alternates acting for members and eight concurring votes shall be required.

3. Revise paragraph (b) of § 915.41 to read as follows:

§ 915.41 Assessments.

. . . . . .

(b) The Secretary shall fix the rate of assessment per 55-pounds of fruit or equivalent in any container or in bulk, to be paid by each such handler. At any time during or after a fiscal year, the Secretary may increase the rate of assessment, in order to secure sufficient funds to cover any later finding by the Secretary relative to the expense which may be incurred. Such increase shall be applied to all fruit handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part, the committee may accept the payment of assessments in advance.

4. Revise § 915.31 to read as follows:

§ 915.31 Expenses.

The members of the committee and their respective alternates when performing duties at the direction of the committee, shall be reimbursed for expenses necessarily incurred by them in the performance of their duties under this part.

5. Revise paragraph (a)(2) of § 915.42. As amended § 915.42 reads as follows:

§ 915.42 Accounting.

(a) • • •

(2) The Secretary, upon recommendation of the committee, may determine that it is appropriate for the maintenance and functioning of the committee that the funds remaining at the end of a fiscal year which are in excess of the expenses necessary for committee operations during such year may be carried over into following years as a reserve. Such reserve may be established at an amount not to exceed approximately 3 fiscal years' operational expenses. Funds in the reserve may be used to cover the necessary expenses of liquidation, in the event of termination of this part, and to cover the expenses incurred for the maintenance and functioning of the committee during any fiscal year when there is crop failure, or during any period of suspension of any or all of the provisions of this part. Such reserve may also be used by the committee to finance its operations during any fiscal year prior to the time that assessment income is sufficient to cover such expenses and to cover deficits incurred during any fiscal year when income is less than expenses. Upon termination of this part, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate: *Provided,* That to the extent practical, such funds shall be returned pro rata to the persons from whom such funds were collected.

. . . . . .

7. Section 915.205(a) refers to a reserve fund not to exceed the amount of "$10,000". Amendment 5 would increase the authorized reserve to an amount not to exceed approximately 3 fiscal years' operational expenses. Accordingly, § 915.205 should be revised. As revised, § 915.205 reads as follows:

Subpart—Budget of Expenses, Rate of Assessment and Carryover of Unexpended Funds

§ 915.205 Reserve fund.

(a) The establishment of a reserve fund at an amount not to exceed ap-

V 43 1 88 MY 5 78 UMI

proximately 3 fiscal years' operational expenses is appropriate and necessary to the maintenance and functioning of the Avocado Administrative Committee. Such reserve, including funds carried forward from prior fiscal years, shall be used to provide for the maintenance and functioning of the committee in accordance with the provisions of the marketing agreement, as amended, and this part.

(b) Terms used in this section shall have the same meaning as when used in said marketing agreement and order.

Animal and Plant Health Inspection Service

[9 CFR Part 51]

ANIMALS DESTROYED BECAUSE OF BRUCELLOSIS

Proposed Brucellosis Indemnity for Cattle

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed Rule.

SUMMARY: This document proposes to amend regulations for the payment of indemnity for cattle destroyed because of brucellosis. This action is needed to bring indemnities paid for such animals closer in line with fair market values. The effect of this action will be to encourage and ensure closer cooperation by livestock owners with the Brucellosis Eradication Program.

DATE: Comments on or before July 5, 1978.

ADDRESS: Comments to Deputy Administrator, USDA, APHIS, VS, Federal Building, Room 805, Hyattsville, Md. 20782.

FOR FURTHER INFORMATION CONTACT:

Dr. A. D. Robb, USDA, APHIS, VS, Federal Building, Room 805, Hyattsville, Md. 20782, 301-436-8711.

SUPPLEMENTARY INFORMATION: The elimination of diseased and exposed animals from the livestock population is an essential part of the National Brucellosis Eradication Program. As a part of that program, indemnities are paid to owners of livestock whose animals are destroyed because of brucellosis. Heretofore, generally there has been a wide spread between the amount of indemnities paid for cattle plus their salvage value and their replacement or true market value. As a result, owners in some instances, have been reluctant to cooperate with the eradication program, and efforts to eradicate the disease have been seriously hampered. This proposal would amend the rate presently in effect for cattle to reflect a change in the fair market value for cattle which has occurred subsequent to the publication of the present rates. Further, a separate rate of indemnity for nonregistered dairy cattle is proposed to reflect the present market situation in which the fair market value for nonregistered dairy cattle substantially differs from other nonregistered cattle. A separate rate has not been established for nonregistered dairy cattle in Alaska, Hawaii, Puerto Rico, and the Virgin Islands because it is believed that the proposed rate for nonregistered cattle also reflects the fair market value for nonregistered dairy cattle in such jurisdictions.

Additionally, a separate indemnity rate is proposed for exposed female calves because such animals constitute a threat to disseminate burcellosis, and therefore they should be disposed of by the owner in cooperation with the Department. It should be noted that a separate rate is not proposed for exposed male calves because such calves are not carriers of brucellosis, and therefore they do not represent a threat to disseminate the disease. The proposed indemnity rate of $25 for the disposal of such animals appears to reflect the fair market value for such animals throughout the United States.

It is anticipated that by reducing the financial losses incurred by livestock owners whose animals are destroyed, cooperation as well as herd management practices will be greatly improved and eradication efforts will be expedited.

Definitions of the terms "dairy cattle" and "exposed female calves" would be added to the regulations to further clarify the classes of cattle which would be subject to a particular rate of indemnity.

Accordingly, Part 51, Title 9, Code of Federal Regulations, would be amended in the following respects:

1. Section 51.1 is amended by adding the new paragraphs (z) and (aa) to read as follows:

. . . . . .

(z) *Dairy cattle.* A female bovince of a recognized dairy breed over 20 months of age, which has calved or is within 90 days of parturation, and which is a member of a dairy herd used to produce milk for commercial use.

(aa) *Exposed female calf.* A female bovine less than 6 months of age which is nursed by a brucellosis reactor at the time such reactor is condemned.

2. Paragraph (a) of § 51.3 is revised to read as follows:

§ 51.3 Payment to owners for animals destroyed.

(a) *Cattle.*—(1) *Brucellosis reactor cattle.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to owners whose cattle are destroyed as brucellosis reactors. The indemnity shall not exceed $250 for any registered cattle or $50 for any nonregistered cattle, except that, for nonregistered dairy cattle the indemnity shall not exceed $150, and except that, in Alaska, Hawaii, Puerto Rico, and the Virgin Islands indemnity shall not exceed $250 for any registered cattle or $150 for any nonregistered cattle. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(2) *Herd depopulations.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to any owner whose herd of cattle is destroyed because of brucellosis. The indemnity shall not exceed $250 for any registered cattle or $50 for any nonregistered cattle, except that, for nonregistered dairy cattle the indemnity shall not exceed $150, and except that, in Alaska, Hawaii, Puerto Rico, and the Virgin Islands indemnity shall not exceed $250 for any registered cattle or $150 for any nonregistered cattle. Indemnity payment shall only be made for brucellosis exposed cattle or for cattle from a herd known to be affected, and only when the Deputy Administrator determines that the destruction of all cattle in the herd will contribute to the Brucellosis Eradication Program. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(3) *Exposed cattle.* Except as provided in subparagraph (4) of this paragraph, the Deputy Administrator may authorize the payment of Federal indemnity by the Department to any owner whose cattle are destroyed because of exposure to brucellosis. The indemnity shall not exceed $250 for any registered cattle or $50 for any nonregistered cattle, except that, for dairy cattle the indemnity shall not exceed $150, and except that, in Alaska, Hawaii, Puerto Rico, and the Virgin Islands indemnity shall not exceed $250 for any registered cattle or $150 for any nonregistered cattle. Indemnity payment shall be made only for brucellosis exposed cattle and only when the Deputy Administrator determines that the destruction of such cattle will contribute to the Brucellosis Eradication Program. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(4) *Exposed female calves.* The Deputy Administrator may authorize the payment of Federal indemnity to any owner whose exposed female calf or calves are destroyed because of brucellosis. The indemnity for such animals shall not exceed $25 per head. Indemnity payment shall be made only for exposed female calves and only when the Deputy Administrator determines that the destruction of such calves will contribute to the Brucellosis Eradication Program. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

. . . . . .

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 805, Hyattsville, Md., during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 5th day of May 1978.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

NATIONAL CREDIT UNION ADMINISTRATION

[12 CFR Part 701]

ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

Real Estate Lending; Extension of Comment Period

AGENCY: National Credit Union Administration.

ACTION: Extension of comment period.

SUMMARY: In conjunction with its recently issued final rule on real estate lending (43 FR 14924), the National Credit Union Administration published proposed amendments to the rule (43 FR 14929) which would (i) prohibit origination fees and (ii) require notification to the borrower if early payment might require a refund or adjustment in order to bring the true interest rate within the one per cent per month limitation of the Federal Credit Union Act. The comment period on that proposal was to expire May 8, 1978. In response to public request, the comment period is hereby extended to June 7, 1978.

DATES: Comments must be received on or before June 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Either Joseph Bellenghi, Assistant Administrator, Office of Examination and Insurance, or Steve Bisker, Attorney-Advisor, office of General Counsel, at 2025 M Street NW., Washington D.C. 20456, telephone 202-254-8760 (Mr. Bellenghi) or 202-632-4878 (Mr. Bisker).

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and sec. 209, 84 Stat. 1104 (12 U.S.C. 1789).)

LORENA C. MATTHEWS,
Acting Administrator.

CIVIL AERONAUTICS BOARD

[14 CFR Part 302]

[PDR-54 Docket 32466; Dated: April 18, 1978]

RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

Expedited Procedures for Licensing and Rates Cases

AGENCY: Civil Aeronautics Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice, undertaken on the Board's own initiative to reduce regulatory delay, invites comments from the public on proposed rules to establish expedited hearing procedures for (a) processing applications for new or modified route authority by U.S. and foreign carriers and (b) ratemaking cases. Basically, the new procedures would require the submission of all evidence in written form and would dispense with an oral hearing and an initial or recommended decision by an administrative law judge. The Board would, instead, receive and review the evidence itself and issue an agency decision. Whether, and to what extent, the Board would proceed under these expedited procedures in any particular case will be within the Board's discretion.

DATES: Comments by June 5, 1978. Reply comments by June 20, 1978. Comments and other relevant information received after these dates will be considered by the Board only to the extent practicable.

ADDRESSES: Twenty copies of comments should be sent to Docket 32466, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Gary J. Edles, Deputy General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5234.

SUPPLEMENTARY INFORMATION:

THE NEED FOR NEW PROCEDURES

We propose to amend part 302 of the Board's procedural regulations to provide for a documentary hearing procedure to be used in some licensing and ratemaking cases. Current Board procedures and practice by and large contemplate, first, that the Board institute most investigations under the power conferred by sections 204 and 1002 of the Act after examining applications filed by interested carriers under section 401 or tariffs submitted under section 403. Departures from this approach include Subpart M and N cases and the consideration of applications by foreign air carriers, where the Board simply adjudicates applications presented to it by interested parties. Second, hearings have traditionally meant the full panoply of trial procedures, including two rounds of decisions, one by a presiding judge and another by the Board itself. Orders to Show Cause, where the Board tentatively indicates the scope of relief it will grant and does away with all procedural steps short of final decision, have been employed in noncontroversial cases, where there is no objection, or where the interest at stake is small—but we have been reluctant to expand its use. See *Application of Western Air Lines*, Order 77-11-74, November 17, 1977, pp. 6-9 and concurring statement of Chairman Kahn.

Conventional Board procedures are both expensive and time-consuming. The Board's Procedural Reform Committee surveyed all hearing cases decided between 1970 and 1972 and two facts clearly emerged. First, in an absolute sense, cases take many months, even years, to process under current procedures. Second, the trend was toward an increase, rather than a decrease, in the time required to process all applications and complete all categories of cases.[1] Recent efforts have speeded up the decisional process. Nonetheless, weeks or months routinely go by between the time an application is filed and the time it is set for hearing, and an internal survey of cases closed during the twenty-seven months ended September 30, 1977 indicates that an average of 568 days is required even between the time a domestic licensing case is set for hearing and the time it is decided by the Board. Rate cases take even longer—almost three years. Even foreign air carrier cases, which are relatively simple, take 356 days—almost a year—

[1] See Report of the CAB Advisory Committee on Procedural Reform, filed December 31, 1975.

V 43 | 88

to process. In our judgment, employment of conventional processes in all cases is simply no longer acceptable. This agency has a responsibility to the public, the industry it regulates, and the Congress to take responsible steps to reduce regulatory delay.

The Board's increasing workload, moreover, makes it imperative that we now explore new methods for processing cases. Applications for new certificates, or changes in existing certificates—which constitute the most significant area of increasing work—increased from 153 filings in 1975 to 193 filings in 1976 to 240 filings in 1977. Further increases can be anticipated. During the fiscal year ended September 30, 1976, the Board's administrative law judges, who preside at all hearings, disposed of seventy-eight cases; of these, twenty-two involved route awards. During the following fiscal year ended September 30, 1977, the judges disposed of ninety-nine cases, a more than 25 percent increase, including thirty-one routes matters. Despite this impressive increase in output, 117 cases were nonetheless on hand at the end of fiscal year 1977, and current projections call for the institution of 45–60 new routes cases alone—or nearly twice the current number—in fiscal year 1978 and fiscal year 1979. While further improvements in productivity can be expected, backlogs cannot be reduced and increasing case levels cannot be accommodated under conventional budget and staffing increases. On the contrary, a continuation of current practices can lead only to increasing backlogs and delays.

Of equal concern is the Board's inability to entertain this increasing number of applications and other requests because it simply lacks the staff to process all these applications and requests in a timely fashion under conventional procedures. To be sure, we have the legal authority to dismiss applications which, in our judgment, do not merit consideration given the Board's other statutory responsibilities and current resources. See, for example, *City of San Antonio* v. *CAB*, 374 F.2d 326 (D.C. Cir. 1967). But the fact that we may, in our discretion, dismiss less important matters does not mean that we should dismiss them if means could be found for giving deserving applicants an opportunity to be heard.

The need for expedited procedures in licensing cases is particularly important because the length of time and complexity of the current hearing process works to discourage applications by imposing the substantial likelihood of delay; it also increases the risk that even if an application wins approval, the economic conditions giving rise to the filing will have changed, thus frustrating the Board's attempt to meet constantly changing consumer demands. We also fear that the procedural delays and the expense associated with our existing procedures are increasingly becoming an all but insurmountable bar to entry into the air transportation system by small entrepreneurs seeking to provide new services, without Federal subsidy, on a relatively limited scale or tailored to specific needs.

Despite our emphasis on routes cases, we solicit comments from the public on employment of expedited, documentary hearing procedures in foreign air carrier and ratemaking cases as well. We want to emphasize, in this connection, that the expeditious handling for foreign carrier permit cases has become an important bilateral issue for foreign governments and that our ability to process these cases promptly increases our credibility and bargaining power. We are already moving to speed up the processing of foreign carrier applications—notably through the use of self-executing Show Cause orders—and nothing in this rule would bar continued use of those procedures.

New Procedures

We are proposing to amend Part 302 of the Board's Procedural Regulations to establish a separate track for documentary hearing cases. We will order the submission of all evidence directly to the Board in written form. We plan to eliminate the delay now connected with the scoping of investigations and the ordering of priorities and will, instead, simply move forward to consider a carrier's application much as we now do with Subpart M or N cases or foreign carrier cases. Furthermore, we plan to eliminate an oral hearing and the initial or recommended decision of the administrative law judge where these steps are not necessary to permit a valid decision in a given case. The Board will review the evidence itself and issue an agency decision. Whether the Board will proceed under these expedited procedures in any particular case will be within its discretion.

Applications involving a single market, and cases with fewer parties, would seem to lend themselves more readily to the use of our proposed documentary procedures. Cases which involve simply an application of established policies to a new set of circumstances would likewise seem candidates for expedited processing. But the mere fact that issues are of special importance, novelty, or complexity need not alone justify elaborate scoping procedures, a trial, or an initial or recommended decision, see *Virgin Islands Hotel Ass'n* v. *Virgin Island Water and Power Authority*, 476 F.2d 1263 (3d Cir.), *cert. denied* 414 U.S. 1067 (1973), although such issues may, at times, warrant Board consideration at a pre-trial stage, ventilation at a trial, or initial consideration by an administrative law judge. Cf: *American Airlines, Inc.* v. *CAB*, 359 F.2d 624 (D.C. Cir.), *cert. denied* 385 U.S. 843 (1966).

Our procedures contemplate that in licensing cases applicants will take the initiative in seeking expedited processing. Once an application is received, we will give notice of it in the FEDERAL REGISTER; interested persons will have 10 days from FEDERAL REGISTER publication date to advise the Board, in general terms, why a particular application should not move forward expeditiously. We will dispose of these preliminary objections within 20 days. As in cases processed under Subparts M and N of the Board's Regulations, this threshold procedure is designed to avoid substantial work by interested persons by allowing the Board summarily to dismiss or stay proceedings where the application appears on its face to be ill-suited to expedited procedures. Once an application passes this threshold step, interested persons will have approximately one month more—or a total of 60 days from the FEDERAL REGISTER publication date—to prepare their substantive answers in support, or in opposition. Requests to consolidate competing applications will also be received during this period. Applicants will have 15 days to reply to answers to their applications but interested persons will have 30 days to file answers where new applications have been offered for consolidation. Once all materials are received, the Board will decide whether or not to employ its documentary procedures to decide the case on the merits.

Rates cases will follow a somewhat different track. Ordinarily, following the institution of an investigation in response to a tariff filing, the Board will issue an order proposing to employ expedited procedures, soliciting comments, and requesting evidence. Although the rules does not so specify, we expect to allow the evidence and initial comments to come in within 45 days and provide interested persons an additional 45 days for rebuttal, with a view toward bringing the case before the Board in about 90 days from the date or our order proposing to use expedited procedures.

We have successfully employed documentary procedures in the past and see no reason why they could not be successful in a larger category of cases in the future. The proposed rule more or less codifies the procedures employed in the *Service to Crossville Case*, Orders 73-6-45, June 13, 1973 and 74-4-61, April 10, 1974; they are similar to the procedures used on remand in the *Service to Saipan Case*, Orders 75-11-59, November 17, 1975 and 76-6-171, May 7, 1976, and the *Service to Richmond Case*, Orders 76-11-131, November 24, 1976, and 77-4-29, April 6, 1977, and now being employed in the *Miami-Los Angeles Competitive Nonstop Case*, 78-1-35, January 11, 1978. We also emphasize that the Board routinely decides important regulatory matters—including those requiring the resolution of disputed facts—without either an oral hearing or an initial or recommended decision. Our entire charter liberalization program, for example, which affects millions of travelers and the fortunes of the entire industry, has been established through the use of the notice and comment procedures of 5 U.S.C. 553. The ability to reach reasonable decisions in those cases gives us confidence that we can do so in an expanding category of cases. Similarly, our success with Subpart M and N procedures, where applications proceed to hearing without substantial Board intervention, gives us confidence that we can reduce the delay now associated with the pre-hearing period.

We do not suggest that the scoping phase can be eradicated with respect to all applications or that expedited procedures are suitable to all licensing or rates matters. In particular, we cannot minimize the contribution of an experienced administrative law judge to the distillation of the evidence, the development of the record, and the evolution of a decision. Judges will continue to play an important role in complicated cases. We are also not insensitive to the value of the discipline exerted on parties by the knowledge that their submissions will be tested by cross-examination by experienced counsel, and appreciate that an oral presentation can be very useful to the decision-making process in some cases. The Board will therefore retain the option of ordering an oral presentation—*i.e.*, a conventional trial-type hearing with cross-examination; oral argument; or an informal conference-type hearing which it has not, by and large, used in the past—where desirable. Frankly, we hope to experiment with different kinds of oral presentations. We likewise retain the option of ordering the preparation of an initial or recommended decision, upon our own initiative or upon the request of a party.

Conclusion

The regulatory process at the CAB as well as other administrative agencies has come under increasing scrutiny and criticism. Regulatory delay in particular has been the subject of criticism. See, for example, Gellhorn and Robertson, *Summary Judgment in Administrative Adjudication*, 84 Harv. L. Rev. 612 (1971), and items cited in that article. In 1976, the Senate Subcommittee on Administrative Practice and Procedure issued a detailed report on the CAB's procedures and recommended, among other things, substantial procedural reform to speed the decisional process. See U.S. Senate Committee on the Judiciary, Subcommittee on Administrative Practice and Procedure, 94th Cong., 20 Sess. (1976). Quite recently, the Senate Committee on Governmental Affairs, as part of its two year study of the regulatory process, issued a report noting that undue delay is the most frequently cited problem of Federal regulation; the Committee recommended that agencies reduce their emphasis on traditional adjudication procedures by adopting a modified process eliminating the need for formal trials in some cases. See, U.S. Senate Committee on Governmental Affairs, *Study on Federal Regulation*, Volume IV *"Delay in the Regulatory Process"*, 95th Cong. 1st Session (1977). The courts have increasingly recognized that administrative agencies need latitude in determining which procedures are best suited to resolving given issues, see *Mobil Oil Corp.* v. *FPC*, 483 F.2d 1238, 1249 (D.C. Cir. 1973) and *Bell Telephone Co.* v. *FCC*, 503 F.2d 1250 (3d Cir. 1974), *Marine Space Enclosures, Inc.* v. *FMC*, 420 F.2d 577 (D.C. Cir. 1969), and *Air Line Pilots' Ass'n* v. *CAB*, 494 F.2d 118 (D.C. Cir. 1974), and the Interstate Commerce Commission's use of procedures similar to those we are proposing in order to reduce costs and expedite decision-making in proper cases is judicially well established. See *Yellow Forwarding Co.* v. *ICC*, 369 F. Supp. 1040 (D. Kan. 1973).

We believe that the demands now placed on the Board and the needs of the traveling public imperatively and unavoidably require an alternative for the processing of some cases, notably cases involving domestic route applications. We are moving on a number of fronts to improve and update our decisional process. We believe that the basic goal of the administrative process—and the thrust of the Administrative Procedure Act—is to allow conflicting contentions to be presented to an agency for decision in a full and fair manner likely to produce sensible, accurate and informed decisions. Our proposal furthers that basic goal and comports with the legal requirements of the APA and the Federal Aviation Act. We wish interested persons to call to our attention any legal infirmities they see in our approach and we welcome comments on how we can improve our proposal consistently with that basic goal.[2]

[2]To give interested persons more background on the issues presented by our notice of rulemaking, and to sharpen the focus of the comments, we are attaching memoranda prepared by the Office of the General Counsel and the Chief Administrative Law Judge during the course of developing the proposed rules. The Board decided at its own meeting on this item to release the memoranda which would, in any case, form a part of the public reading file and be made freely available to any interested person under our current Freedom of Information policies. Publication is intended to ensure greater convenience and a broader audience.

O'MELIA, MEMBER, SEPARATE STATEMENT

The Board Members have agreed to give notice of a proposed rule, on which interested parties may comment, designed to bring about very substantial changes in the Board's traditional and established method of processing route and rate cases. This rulemaking is being undertaken for the declared purpose of avoiding backlogs and regulatory delay, of reducing the expense and time consumed by conventional procedures, and of enabling the Board, presumably without an extraordinary increase in agency costs, to cope with the Board's ever-mounting workload. To accomplish this, the proposed rule would, basically, dispense with an oral hearing and an initial or recommended decision by an administrative law judge, and would replace them with "documentary hearings" and with agency decisions at Board level. Under the new rules, to be entitled Subpart Q, the Board would have almost unlimited discretion with respect to the extent to which the expedited procedures would be used. We are advised by the proponents of the rule that the draft procedures comport with the legal requirements of the Administrative Procedure Act, and that with these changes processing time would be substantially reduced—for example, it has been suggested that many domestic route proceedings which now take an average of 1 to 2 years might be cut down to 180 days.

I could not endorse more fully the objectives of reducing delay, costs, and administrative burdens. If it were determined, after further due study and consideration, that these or suitably modified rules would indeed result in time and cost savings without infringing the rights of the parties, offending our legal institutions, or debasing the quality of our regulatory oversight, I would, of course, give any such changes my full support. It is laudable that our procedures are being reviewed, and I do not object to the issuance of the proposed innovations for public comment. However, my acquiescence in giving public notice of the contemplated procedures is not to be construed as definitive nor tentative support of any particular set of rules. I am not confident that the draft rules set before the Board in the last two weeks for its consideration, relying heavily on the suppression of the oral hearing and on the shift of functions from the Administrative Law Judges to the Board Members, would in fact give us a net improvement in regulatory practice without simultaneously spawning a host of other more damaging problems.

My colleagues and I feel that this is a landmark opportunity for the Board to seek the widest possible comments on the objectives and the workings of this new Subpart Q. It should invite the attention of other government agencies and legal scholars, welcome the expressions of the practitioners in the aviation bar, and pay heed to the concerns that may be articulated by both the regulated entities and the consuming public. For this purpose, it is important to place before the public explanatory materials

MAY 5 1978
UMI

V 43 | 88 MAY 5 78 UMI

that will profile as clearly as possible the legal and practical dangers that may result from these changes, so that the comments received can be properly focused on the real issues of the proceeding. The statement of *Supplementary Information* prefacing the proposed rules, as is perhaps normally done, tends to set forth in an optimistic view the potential benefits and predictions of success for the new rules, and does not, in my opinion, dwell sufficiently on the risks that they entail. However, the Board agreed in principle to make available to the public the underlying staff memoranda on these proposed rules, which were thought to be of particular importance in making known the possible pitfalls.

As has been made evident to the public through the Board's open discussion in a "sunshine" meeting, the Board's staff has not ignored in its study and research the problems that such changes might create. The Office of the General Counsel in developing this bold proposal concludes that, although there are legal risks associated with it, the proposal is legally sound. The Bureau of Administrative Law Judges, on the other hand, drawing upon its long experience and intimate knowledge of oral hearing procedures, has sought with considerable effort to sound warnings against novel and untried procedures that, in its view, do not conform to recognized proper due process standards in American administrative law.

With the concurrence of my colleagues on the Board, I am attaching to this Separate Statement a Memorandum of April 5, 1978, to the Board in which Chief Administrative Law Judge Nahum Litt outlines the three principal problems foreseen by his Bureau should the Board finally adopt the draft rules presented to it by the General Counsel's Office. I am also attaching a copy of a Memorandum of April 3, 1978, from the Office of the General Counsel which addresses these issues. The purpose of circulating these memoranda is to enable interested parties more readily to understand the issues raised by this project, and, I hope, to sharpen the focus and relevance of their comments. Let me say that I am not by this act disclosing confidential materials. The Board decided at its "sunshine" meeting to release the memoranda, which would, in any case, form a part of the Board's public reading file, and would be made freely available to any interested party upon request under our Freedom of Information Act policies. Their publication here is offered only to ensure greater convenience and a broader audience.[3]

Judge Litt's Memorandum attaches several appendices that should be particularly useful to individuals concerned with this rulemaking. I want to draw special attention to the Legal Memorandum set forth as Appendix C, and to Appendix B, an alternative draft for the new Subpart Q advanced by Judge Litt. The latter document will enable those commenting to contrast its provisions with the OGC draft tentatively adopted by the other Members of the Board. I want to point out that Judge Litt is not opposing the adoption of rules meant to expedite and alleviate the Board's caseload, but rather takes the position that such procedures could be useful in only a limited number of cases—specifically, where there are no substantial issues of material facts in dispute. The rules set forth in the NPRM, in contrast, would authorize the Board, in its discretion, to apply the expedited procedures where justified by "staffing and workload" considerations. In addition to excluding rate cases, because of their great complexity, from the purview of the proposed rules, Judge Litt would have the rules prescribe that cases where there are material facts at issue "shall" be set for hearing under the ordinary provisions of Subparts A or E albeit possibly under expedited procedures. These, I think, are the principal differences between the two draft rules.

I will not presume to add to the legal analyses made by either the General Counsel's Office nor the Bureau of Administrative Law Judges in the various memoranda addressing the proposed Subpart Q.[4] Rather, I trust that this appeal will, by evoking public comment of a critical and incisive nature, make the issues of whether documentary hearing will suffice, whether staff separation of functions remains essential in today's environment, and whether initial or tentative decisions as provided for under current rules continue to serve a purpose, the subject of the liveliest and most substantial dialogue possible. However, in closing, I would raise two issues of a practical, nonlegal nature, the first dealing with the prospect of time and cost savings, and the second questioning the seeming trend toward expedience in agency actions.

With respect to the first, are we really going to save any time and expense, for us and for the regulated, by adopting these homogenized rules? To answer this pragmatic question, we must first examine the risks. Does the Board's option of calling for an "oral presentation" in any given case successfully preclude charges of lack of due process? Does the praise-worthy objective of coping more expeditiously with a heavy administrative workload justify dealing with adjudicatory cases where material facts are at issue without an oral, adversarial hearing with the right of confrontation?[5] Will the proposition that route cases may be "initial licensing" matters, insulate the Board from attacks that in the new rules the separation of functions principles of the Administrative Procedure Act have been breached? Would a prolonged court battle over the basic constitutionality of the proposed rules delay or impede the Board's processes? The obvious difficulty in answering these and similar perplexities compells me to ask if the Board's present workload really demands the adoption of rules that cause us to ask ourselves these questions?

The second issue is more personal, and is, in part, aroused by the proposition in the new rules, tentatively adopted by the majority, that henceforth evidence will be submitted "directly to the Board", thus eliminating the allegedly time-wasteful elements of oral hearing, confrontation of evidence, administrative law judge decisions, etc. Does the Board, in its hunger and eagerness to get the job done, really want to be the initial recipient and reviewer of evidence in all route and rate cases? I realize that I will not be standing at the counter to stamp in exhibits, but how far can you carry a fiction? Will the routine procedures tentatively adopted in this NPRM meet the APA's requirement that the Board, a Board Member, or an administrative law judge will "preside at the taking of evidence"? Will the Board Members be required to certify that they have personally reviewed the evidence? Or, do these rules mean, that the Board's established procedures, including the rather human experience of fighting before an administrative law judge in an oral hearing on the tenth floor of Universal North, will be replaced with what I can only visualize as a shiny, new sausage machine?

My apprehension is caused by the overwhelming emphasis being given to expedited procedures. I am concerned that under an expedited, homogenized, automated, computerized system, involving a vastly—or even markedly—increase in the flow of cases, the real decisions would be made by nameless, faceless, non-accountable cogs in the machine, and that the Board Members would become no more than the final counter-rotating gears at the end of the machine through which the sausage links would be ground out. I am not suggesting that my fellow Members and I would not perform their duties conscientiously and with a dedicated effort. The real anxiety is that institutional pressures and priorities would insidiously limit the personal and intellectual immersion of the Members in the cases they must decide. I would, accordingly, urge my colleagues and the interested public to guard against the danger that under the aegis of regulatory reform, we might convert our regulatory agency into a slap-dash, corner-cutting, rubber-stamping production line.

I hope that the comments we receive will relieve the fears that I have revealed in raising these two issues.

RICHARD J. O'MELIA.

[3] After the preparation and circulation of this *Separate Statement*, it was decided by the Board that the Memoranda of OGC and BALJ should be physically attached to the NPRM, rather than to this Separate Statement.

[4] I do, however, invite comment on whether the proposed rule, which invests the Board with a broad discretion to dispense with oral hearings, is sufficiently precise.

[5] The Board is shortly going to have to confront the issue of the right of parties to a hearing in United Air Lines Application for Cleveland-San Diego Nonstop Authority Pursuant to Subpart N, Docket 30236. American Airlines in a document filed on April 17, 1978, has objected to the Board's decision in Order 78-3-77 to grant United's request by show cause procedures, arguing that their opposition entitles them to a hearing as a matter of right. Also at stake is the propriety of using show cause procedures where material facts are in issue. I mention this to underscore the fact that any expedited non-hearing procedures that may be eventually enacted will have to be reconciled with existing regulations dealing with expedition and hearings.

PROPOSED RULE

It is proposed to adopt a new Subpart Q of Part 302 as follows:

1. Amend the table of contents of Part 302 by adding a new Subpart Q, the title of which reads:

Subpart Q—Expedited Procedures for Processing Licensing and Rates Cases

2. Amend Part 302 by adding a new Subpart Q which reads:

Sec.
302.1701 Applicability.
302.1702 Subparts A and E govern.
302.1703 Filing of applications.
302.1704 Contents of applications.
302.1705 Service of application and answer.
302.1706 Preliminary procedures for dismissal or stay.
302.1707 Answers to applications.
302.1708 Investigations with respect to rates, fares, and charges.
302.1709 Intervention.
302.1710 Motions to consolidate.
302.1711 Reply to answers.
302.1712 Verification.
302.1713 Joint pleadings.
302.1714 Oral presentation or initial or recommended decision.
302.1715 Disposition of the application or investigation.
302.1716 Criteria for use of expedited procedures.
302.1717 Decision by the Board.

Subpart Q—Expedited Procedures for Processing Licensing and Rates Cases

§ 302.1701 Applicability.

This subpart sets forth the special rules applicable to expedited procedures for processing (a) applications for certificates of public convenience and necessity and renewals or amendments of certificates, (b) applications for foreign air carrier permits and renewals or amendments of permits, and (c) investigations of the lawfulness of rates, fares, charges and related tariff rules.

§ 302.1702 Subparts A and E govern.

Except as otherwise provided below, the provisions of Subparts A and E are applicable.

§ 302.1703 Filing of applications.

Any person may file an application for the issuance of an initial certificate or foreign air carrier permit, or a renewal or amendment of its certificate or permit, as described in § 302.1701. If the applicant desires the Board to process the application by the expedited procedure described in this subpart, the application should clearly indicate that desire on its face. The Board shall promptly publish notice of the application in the FEDERAL REGISTER.

§ 302.1704 Contents of applications.

An application under §§ 302.1701 and 302.1703 shall include a statement of economic data or other matters which the movant desires the Board to notice officially, and affidavits establishing such facts as it wants the Board to rely upon, including the facts upon which the applicant relies to show that the public convenience and necessity or public interest require the relief sought. Applications shall contain the economic and operating data required by § 302.18. For information as to other information that may be included in applications, reference should be made to Subpart A of this Part, to the Federal Aviation Act, to the substantive rules (see Parts 201 and 211 of the Economic Regulations) and policy statements Part 399.60 of the Policy Statements), and orders of the Board. The applicant shall furnish sufficient detail in the form of footnotes or otherwise so that, without further clarification, final results may be obtained from the basic data. Sources, bases and methodology used in constructing exhibits, including any estimates or judgment employed, shall be provided.

§ 302.1705 Service of application and answer.

(a) *Persons to be served.* A notice of the filing of the application shall be served on:

(1) Any certificated air carrier which is authorized to engage in the type of air transportation (i.e., scheduled or supplemental) at one or both of the points with respect to which the applicant seeks nonstop authority;

(2) The chief executive of any State of the United States in which any point which is involved in the application is located: *Provided, however,* That if there be a State commission or agency having jurisdiction over transportation by air, the application shall be served on such commission or agency rather than on the chief executive of the State;

(3) The chief executive of the city, town, or other unit of local government at each of the points located in the United States, between which the applicant seeks authority, as well as each certificated point intermediate thereto; and

(4) The Board, commission, manager, or other body or individual having direct supervision over and responsibility for the management of the airport located in the United States and which is being used to serve such point at the time the application is filed.

(b) *Additional service of notice.* The Board may, in its discretion, order additional service on such person or persons as the facts of the situation warrant. Applicants are encouraged to serve copies of their actual application where feasible.

§ 302.1706 Preliminary procedures for dismissal or stay.

(a) On or before the 10th day following publication of notice of the application in the FEDERAL REGISTER, any person may file a motion to dismiss the application.

(b) On or before the 30th day following publication of the notice of the application in the FEDERAL REGISTER the Board may, in its discretion (1) dismiss an application without prejudice to the refiling under the normal procedures if it finds that the application is not in compliance with, or is unsuitable for processing under, the provisions of this subpart, or (2) stay further procedural steps with respect to such application until a further order of the Board.

§ 302.1707 Answers to application.

Any interested person may file with the Docket Section, and serve upon the applicant an answer in opposition to, or in support of, an application. Answers shall set forth the economic data and other facts upon which the party relies to support its position. Answers shall be filed no later than 60 days after the date of publication of the notice of the application in the FEDERAL REGISTER. Answers shall include sufficient detail in the form of footnotes or otherwise so that, without further clarification, final results may be obtained from the basic data. Sources, bases and methodology used in constructing exhibits, including any estimates or judgment employed, shall be provided.

§ 302.1708 Investigations with respect to rates, fares, and charges.

(a) This paragraph sets forth the special rules applicable to expedited investigations with respect to rates, fares, and charges. Except as otherwise provided by the Board, the provisions of this Subpart are applicable.

(b) The Board, on its own initiative or if it is of the opinion that the facts stated in a petition or complaint warrant, may issue a notice indicating that it intends to process the investigation by the expedited procedure described in this Subpart. That notice shall be published in the FEDERAL REGISTER and shall (1) specify the issues to which the investigation will be limited, (2) indicate the evidence which must be submitted by interested persons to assure a fair examination of the issues, and (3) fix any necessary procedural steps.

§ 302.1709 Intervention.

(a) Any interested person shall file with the Docket Section and serve upon the applicant, a petition for intervention, including the economic data and other facts upon which the person relies to support its position concerning the merits of the application. Petitions for intervention shall be filed within the time limits specified by § 302.1707 for the filing of answers.

(b) Answers to petitions to intervene shall be filed with the Docket Section, and served on the petitioner, within 15 days after the due date for the filing of petitions to intervene. Such answers shall set forth the basis of the support of or opposition to the petition to intervene, and, with respect to the merits of, or opposition to, any application or change in a rate, fare or charge, set forth the type of data required by § 1704, § 1707, or § 1708. No replies to the answers are permitted.

(c) Petitions for intervention and answers to petitions shall include sufficient detail in the form of footnotes or otherwise so that, without further clarification, final results may be obtained from the basic data. Sources, bases and methodology used in con-

V 43 5 88

structing exhibits, including any estimates or judgment employed, shall be provided.

§ 302.1710 Motions to consolidate.

(a) Motions to consolidate an application with an application filed under § 302.1703, or modify the issues to be decided, may be filed within the time limits specified by § 302.1707 for the filing of answers. Motions shall include economic data and other facts in support of both the motion and any application sought to be consolidated. Data in support of any application sought to be consolidated shall conform, to the extent possible, to the provisions of § 302.1704 with respect to original applications. Subsequently filed competing applications and rebuttal evidence shall conform to the base year and forecast year used by the applicant under § 302.1704.

(b) Answers to motions to consolidate or modify the issues shall be filed with the Docket Section, and served on the movant, within 30 days after the due date for the filing of motions. Such answers shall (1) set forth the basis of the support of or opposition to the motion, and (2) with respect to the merits of the application for new authority, set forth the type of data required by § 302.1707 for answers to an original application.

§ 302.1711 Reply to answers.

Replies to answers may be filed with the Docket Section, and served upon any person filing the answer to which the reply is responsive, 15 days after the due date for the filing of the answer. Replies shall include sufficient detail in the form of footnotes or otherwise so that, without further clarification, final results may be obtained from the basic data. Sources, bases and methodology used in constructing exhibits, including any estimates or judgment employed, shall be provided. No further pleading may be made by any person except by permission of the Board.

§ 302.1712 Verification.

The facts asserted in any pleading filed under the expedited procedures established by this Subpart must be sworn to by persons having knowledge thereof, and this fact must affirmatively appear in an affidavit in support of the pleading. Such persons should be those who would appear as witnesses to orally substantiate the facts asserted should oral hearing become necessary. The original of any pleading filed under the expedited procedures must show the signature and capacity of the person administering the oath and the date administered.

§ 302.1713 Joint pleadings.

Parties having common interests, to the extent practicable, shall arrange for the joint preparation of pleadings.

§ 302.1714 Oral presentation or initial or recommended decision.

(a) Applications or investigations assigned to procedures under this Subpart will be decided on the basis of the written submissions unless the Board has granted a petition for oral presentation or a petition for an initial or recommended decision, or otherwise determines that an oral presentation or an initial or recommended decision is required by the public interest.

(b) Any petition under § 302.1714(a) shall be supported by a detailed explanation as to (1) why the evidence or argument to be presented cannot be submitted in the form of affidavits or briefs and shall set forth an estimate of the time required for such presentation, and the number of witnesses which would be presented by the petitioner, or (2) which issues should be examined by an administrative law judge and why such issues should not be presented directly to the Board for decision.

(c) If cross-examination of any witness is desired the name of the witness, the subject matter of the desired cross-examination, and an estimate of the time needed for the cross-examination shall be submitted to the Board.

(d) Petitions for oral presentation or an initial or recommended decision made under subsection (c) and (d) may be filed at the same time as any answer, reply, motion, or petition.

(e) Where stipulation of disputed facts would eliminate the need for an oral presentation, parties may include in their petition an offer to withdraw the request should the stipulation be made.

§ 302.1715 Disposition of the application or investigation.

As promptly as feasible after the filing of all pleadings, the Board shall (a) assign the application or investigation for consideration under the expedited procedures of this Subpart, (b) set the matter for hearing under the ordinary provisions of Subparts A or E, (c) dismiss an application without prejudice to refiling, or (d) take other necessary action. The Board shall also dispose of any pending motions or requests.

§ 302.1716 Criteria for use of expedited procedures.

The Board may, in its discretion, assign an application made under § 302.1703, or sought to be consolidated under § 302.1710, or an investigation under § 302.1708, for consideration under the expedited procedures of this Subpart and order the record presented directly to the Board for decision where it appears that:

(a) All issues of material fact may be resolved by means of written materials and the efficient disposition of the proceeding can be made without oral presentation and without an initial or recommended decision; or

(b) Significant public benefit will result from use of expedited procedures, as where staffing and workload considerations would result in unreasonable delay before consideration of the application or investigation, or dismissal of the application if expedited procedures are not used.

§ 302.1717 Decision by the Board.

The Board will dispose of the issues presented by entering an order which will include a statement of the reasons for its findings and conclusions. Such orders will be deemed "final orders" for purposes of filing Petitions for Reconsideration.

(Secs. 204, 1001, Federal Aviation Act of 1958, as amended, 72 Stat. 743, 788; 49 U.S.C. 1324, 1481, Administrative Procedure Act, 5 U.S.C. 551 et seq.)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

ATTACHMENT 1

CIVIL AERONAUTICS BOARD,
April 3, 1978.

MEMORANDUM

To: The Board.
From: Deputy General Counsel.
Subject: Procedures for Processing Certain Licensing and Rate Cases.

There is attached for adoption by the Board a notice of rulemaking proposing to establish expedited, non-oral hearing procedures to be used to process certain licensing and ratemaking cases. It should be mentioned that the rule is principally tailored to domestic licensing cases, which represent the area of the Board's work most in need of relief. We nonetheless decided to draft the rule to cover foreign carrier cases and ratemaking cases as well on the theory that these cases could be lawfully included, that the availability of a formal procedural mechanism for expedited processing would be useful, and that the agency may benefit from receiving public comment on these categories of cases.

The procedures were developed over the past few months after consultation between this Office and other components of the staff. This memorandum discusses two principal points—first, how the rule works, and, second, the legal and policy considerations which lead to the drafting of the rule presented by this memorandum.

1. HOW THE RULE WORKS

Adoption of these procedures should offer the Board a degree of procedural flexibility not now available. Under conventional procedures, most matters presented to the Board for evidentiary disposition must follow a single track through BPDA, the Bureau of Administrative Law Judges, and the Office of the General Counsel irrespective of size or complexity of a case, or the issues presented. As long as the resources of these components remain finite, the number of matters which can be processed can merely be increased at a modest rate dependent upon improvements in productivity or staff increases. The new procedures contemplate two tracks—one for conventional hearing cases, the other for the new non-oral, or documentary, hearing cases—with the documentary hearing cases processed largely by lawyers and analysts currently participating as parties in conventional hearing cases. We foresee a cooperative effort among bureaus to assure that cases are assigned to one track or the other in a fashion that will, on the one hand, carefully tailor the procedures to the issues to be decided and, on the other, maximize the number of total cases that can be decided by the Board.[1]

The draft rule contemplates that applications found generally suitable for processing under expedited procedures would be processed more or less immediately; BPDA analytical time currently devoted to "queuing" such applications would be devoted to an analysis of the merits of the application itself (the rule provides for a threshold analysis of an application by the staff and the Board to insure that cases clearly ill-suited for expedited process would be weeded out promptly; such a procedure is now used in Subpart M cases). The rule also eliminates the preparation of an initial or recommended decision by one of the Board's administrative law judges and the filing of petitions for review and answers. Finally, at the Board decisional level, we contemplate that lawyers from OGC, BPDA, BIA and, perhaps, other bureaus can be assigned to process cases to the Board and prepare Board opinions under the new procedures; in essence, we can double or perhaps treble the Board's opinion-writing staff.

The proposed rules generally provide for the submission of all evidence and argument, including requests to expand a case from the scope established by the initiating application, within an expedited (90 day) period. As noted above, the rules pretty much dispense with the "queuing" phase entirely, shorten the scoping phase, eliminate the oral hearing and the initial or recommended decision by the judge, and allow the matter to be submitted directly to the Board for decision by an expanded group of review attorneys.

The rules require the Board to act at three critical stages. First, opponents of an application have a threshold opportunity as described above to persuade the Board that an application is simply ill-suited to expedited documentary processing. The rules contemplate that the Board will make this threshold decision within 30 days of the FEDERAL REGISTER publication of an application. We propose as an internal matter that recommendations to dismiss or process at this stage be made by the principal action bureau (BPDA or BIA), with coordination by OGC.

Second, the Board would make its principal decision on whether or not to utilize expedited procedures after applications, answers, requests for consolidation or intervention, and any replies have been filed. Under the time table established in the rule, this screening can begin about 90 days after the filing of the original application. A decision as to whether (i) to proceed by expedited procedures, (ii) to dismiss the application entirely, or (iii) to assign the matter for oral hearing before an administrative law judge, would be made by the Board on a joint recommendation by the action bureau, the Office of the General Counsel, and the Chief Administrative Law Judge. The key questions for the Board to decide at this stage are whether non-trial procedures would be lawful under the circumstances of a particular case and whether or not it would be desirable to eliminate various procedures, including an initial or recommended decision by the judge. Nothing would prevent the Board, however, from simply dispensing with a trial but nonetheless having a judge prepare an initial or recommended decision; similarly, the Board could order key issues set for trial but nonetheless decide the case itself.

Third, the Board, of course, would decide the case on the merits based upon a joint recommendation from the action bureau, OGC and OEA (if the application were set for oral hearing or a judge's decision at phase 2, the Board would dispose of the case following an initial or recommended decision under more or less current procedures).

Domestic route applications now take anywhere from 1 to 2 years on average to be processed. Under the proposed expedited procedures simple contested cases (e.g. Subpart M cases) could be processed in as little as about 120 days.[2] Many cases could be disposed of, we believe, in approximately 180 days. We must emphasize two related factors in this connection. First, the Board is necessarily giving up both the participation of its bureau on the record and the expertise of an administrative law judge in those cases processed under documentary procedures in the interest of expedition and the need to process an increasing volume of applications. Second, any anticipation of improved processing of cases requires a commitment of BPDA/BIA lawyers and analysts to the evaluation of applications on the merits and the preparation of recommendations to, and draft decisions for, the Board. The simple promulgation of new procedures will not, standing alone, bring about any improvement in the handling of the Board's caseload. We nonetheless believe that establishment of two decisional tracks, coupled with the improvements in the processing of cases now going on in both BALJ and OGC, can lead to a major increase in the number of cases handled by the Board.

2. LEGAL AND POLICY CONSIDERATIONS

Apart from the need for greater expedition in administrative decision-making, we believe the Board should explore whether conventional trial-type procedures are best suited to the examination of some issues, notwithstanding the Board's historic reliance on such procedures and the ability of the traditional hearing process to resolve such issues. Trial-type hearings are useful—and, indeed, necessary—where there are disputed issues of material fact which (1) must be resolved to permit a decision, and which (2) can only be resolved through cross-examination. Cross-examination, however, is not required and may not be desirable simply to explore peripheral matters not material to the decision, *Citizens for Allegan County* v. *FPC*, 414 F. 2d 1125 (D.C. Cir. 1969), to resolve issues of law, policy, or discretion, *Storer Broadcasting* v. *United States*, 351 U.S. 192 (1956), to resolve so-called "legislative" fact issues, *American Airlines* v. *CAB*, 359 F. 2d 264 (D.C. Cir.), cert. denied, 385 U.S. 843 (1966), or to draw inferences from established facts, *B'nai B'rith* v. *FCC*, 403 F. 2d 169 (D.C. Cir. 1968), cert denied, 394 U.S. 930 (1969). By the same token, we believe that the collection and examination of data through a trial may be less efficient in certain circumstances than other methods which could be used. Many of the factual determinations made in evidentiary cases could be developed either through the Board's internal data-gathering systems—which have improved markedly in recent years—or through specific requests made to carriers or other parties involved in matters before the Board. It seems clear to us that as the Board re-defines the substantive ground rules for decision, the type of procedures chosen must be carefully related to the kinds of issues to be examined; the potential for obstruction and delay by parties seeking to frustrate change must also be minimized.

We have examined the court cases, relevant statutes, and articles by respected legal authorities in determining the legality of the proposed procedures. As a threshold matter this Office believes that the rulemaking itself is not likely to be successfully challenged since it does little more than announce a Board methodology for processing some cases. It is far more likely, in our judgment, that a disappointed party will challenge the rule in the context of a specific case where documentary procedures were employed; we must carefully examine which cases should or should not be processed by the new procedures.

The rule—insofar as it provides for the use of expedited procedures where there are no material facts at issue—tracks procedures at other agencies which have been approved by the courts in a long line of cases. Aside from some questions raised by the Bureau of Administrative Law Judges as to how the decisional process will work within the agency, as discussed below, the staff agrees that the rules are acceptable and legally sufficient to determine cases where no material facts are in issue.

The Bureau of Administrative Law Judges believes that the rule should be confined to cases traditionally approved by the courts, i.e., where no material issues of fact are presented. This Office recommends that the Board go beyond the traditional approach and utilize expedited documentary procedures even where material facts may be in issue. The draft rule reflects our recommendation. While our proposal goes beyond any existing agency practice, we believe that such new direction is warranted and will be supported by the courts. The issues raised

[1] We expect, for example, that some cases will simply be ill-suited, because of size or complexity, to the use of documentary procedures; we likewise believe that the Board will in some cases want the input of its bureaus on the record and the expert analysis of issues by an administrative law judge. By and large, however, we expect that additional cases could be assigned to expedited procedures where the judges' docket was full but that the judges would process additional cases where those cases could be accommodated without disrupting the processing of their existing caseload or unduly burdening OGC.

[2] Application is filed on day 1. Board declines to stay the procedures, no competing applications are received, and an answer comes in from the incumbent on day 60. Applicant waives a right of reply and the procedural issue is ready for decision. Staff recommends expedited processing and sends recommendation to the Board in 14 days. Board issues order calling for any further evidence in 7 days and briefs 10 days later. After briefs are filed, staff makes recommendation within 21 days and Board acts a week later.

M Y 5 7 8 UMI

V 43 MY 5 78 UMI

by the Bureau of Administrative Law Judges are now discussed.

(a) *Use of Documentary Procedures to Decide Factual Issues.* BALJ is concerned that no court has expressly and unambiguously approved a denial of an oral hearing in an adjudication where material facts were in issue.[2] Our view is that there has been substantial judicial and academic encouragement for a new approach, however, and our recommended procedures are well within the bounds of the emerging legal doctrine. In *Shell Oil Co.* v. *FPC*, 520 F. 2d 1061, 1974 (5th Cir. 1975), a ratemaking case, the court concluded that procedures which excluded an adversarial trial and oral cross-examination satisfied the adjudicatory standards of sections 556 and 557 of the APA, even though the FPC was required to "resolve many disputed issues of 'pure fact', assign values to rate components based on a combination of fact and policy considerations, and make policy decisions regarding which components to include, where to include them, and how they should be included • • •." Id at 1067. Judge Henry Friendly, a Federal circuit court judge, in a leading article entitled Some Kind of Hearing, 123 U. of Pa. L. Rev. 1267, 1268 (1975), argues that "• • • [C]ommon sense dictates that we must do with less than full trial-type hearings even on what are clearly adjudicative issues." Professor Ernest Gellhorn similarly argues that:

"[A]gencies can limit the hearing to written presentations where credibility is not in issue. Shortened trial procedures limiting oral testimony are used most successfully in rate or price control proceedings, where economic and expert analysis rather than sensorily perceived phenomena provide the bulk of the evidence. It is also becoming clear that agencies can experiment with other approaches such as legislative type hearings (i.e., the information being supplied by oral and written argument), a conference approach (i.e., discussion by the parties with sworn testimony where needed) and other devices shortening the hearing and dispensing with some of the attributes of a judicial trial • • •." Gellhorn, Administrative Law and Process in a Nutshell, 158 (1972).

And courts have often suggested that procedures may be lawfully tailored to the exigencies of a particluar situation. See, e.g., *Air Line Pilots Ass'n.* v. *CAB*, 494 F. 2d 118 (D.C. Cir. 1974), and *Marine Space Enclosures, Inc.* v. *FMC*, 420 F. 2d 577 (D.C. Cir. 1969).

When the Administrative Procedure Act was enacted, one of the principal evils which was addressed was the combination of functions in the same person of investigator or prosecutor on the one hand, and trier of fact or decision-maker on the other. One of the reforms which the Congress believed would eliminate the process by which agencies denied a fair hearing was to require that rulemaking proceedings be undertaken only after notice and opportunity to comment and that adjudication be held by independent personnel or the agency itself. A "hearing" was generally thought of as an administrative analogue to the judicial trial. The main idea of the traditional approach was for each agency to determine whether or not a matter was "rulemaking" or "adjudication;" if it were the latter, a hearing had to be held. If a hearing was required, a full trial—including cross-examination and decision by the presiding officer—was contemplated.

But the distinctions of three decades ago are being modified by the Federal Courts. The Supreme Court in a recent decision—*United States* v. *Florida East Coast Railroad*, 410 U.S. 224 (1973)—has expounded on the theory that an opportunity to submit written material is sufficient to satisfy statutory hearing requirements, at least in a rulemaking case required to be decided on a record. See also *Shell Oil Co.* v. *FPC*, *supra*. Several other recent cases have held that cross-examination is not required by due process in all circumstances.

The Board should be aware that a contrary trend has emerged in recent court cases. In certain circumstances, where relevant facts are at issue, some courts have required an oral hearing even where statutes provide that matters can be handled by rulemaking or do not expressly provide for a hearing on the record. See, *United States* v. *CAB*, 411 F. 2d 1315 (D.C. Cir. 1975), setting aside the Board's approval of capacity limitation agreements. See also *Natural Resources Defense Council* v. *NRC*, 547 F. 2d 633 (D.C. Cir. 1976), (pending on appeal; now believed moot due to compliance by NRC with lower court remand), and *U.S. Steel Corp.* v. *Train*, 556 F. 2d 822 (7th Cir. 1977). These cases represent an expanded judicial appreciation that where facts are genuinely at issue the trier of fact must have a basis for his decision on a record which has afforded the parties an adequate opportunity to test the validity of the controverted facts. Utilization of innovative procedures which the courts may accept, therefore, must be tempered with the understanding of the reluctance of the courts to adopt procedures which are not likely to allow a proper resolution of the issues. While this office has a reasonable degree of confidence in the ability to sustain new procedures in the right cases—i.e., where the Board's result is reasonable and the procedures, although novel, fair to all concerned—the Board must be aware that court review is likely.

Professor Kenneth Davis has summed up the trend in the law as follows:

"The main idea of the new law, represented by Eldridge and Goss,* is that each agency for each function must work out procedures that will be both efficient and fair—procedures that may include some of the elements of a trial and not others • • •. On these new foundations, studies are now needed throughout the government to determine for each class of cases what elements of a trial that are now provided can be dispensed with, and what elements of a trial not now provided should be added • • •" Davis, *Administrative Law of the Seventies*, Cumulative Supplement issued July 1977, pp. 88-90.

A judicial reflection of this trend is set forth in Judge Wilkey's excellent analysis in the *Mobile Oil* case of the need for flexibility in fitting administrative procedures to particular functions. Because he says it better than we can, his descussion is set out in full as Appendix A to this memorandum.

We are convinced that establishment of the proposed documentary hearing procedures will require at least three prerequisites. First, the Board must establish as persuasively as possible that continuation of current procedures is not adequate for current regulatory purposes. We attempt to do this in the policy statement accompanying the rule. We believe it is particularly important in this connection to demonstrate that the maintenance of the status quo means that some meritorious applications may not be heard at all—in short, due process for applicants requires at least some process.[4] Second, we must be careful that the employment of the new procedures is likely to lead to reasonable and accurate results and we touch on this matter as well in the notice of rulemaking.[5] Third, and perhaps most important, we must insure that the new procedures are as fair to applicants and opponents as current procedures. Courts may impose additional procedures, even where not expressly required by statute, where they believe an agency's decision is clearly wrong or the processes have been unfair. On the other hand, they will sanction less conventional procedures where an agency's result is reasonable and its methods demonstrably fair.

(b) *Separation of functions.* BALJ is concerned that the proposed documentary procedures violate the spirit—and perhaps the letter—of the separation of functions concept since the Board's "action" bureau will have a major role in making recommendations to the Board in individual cases. Both the language of the APA and the comments in the Attorney General's Manual on the Administrative Procedure Act (1947) support the proposition that CAB route cases are exempt as initial licensing from the separation of functions requirement. This key area governing our cases, however, has never been subject to court interpretation. (Rate cases are clearly exempt, and the courts have so held.) The applicability of the APA's "initial licensing" exemption to the Board's typical route proceeding, therefore, is not crystal clear, although the Attorney General's Manual reasoned that the exemption would apply to the Board's route cases. Moreover, the bureau will not participate as a party of record and an advisor in

[2] We put aside, for the moment, both the issue of what constitutes a "material issue of fact" and the possibility that the Congress will change the Federal Aviation Act or the Administrative Procedure Act to provide an express statutory authorization for the use of non-oral hearing procedures. As to the first point, certain issues historically resolved by the Board through oral adjudicatory hearings—e.g., policy issues—may not in any event require "evidentiary" exploration. Further, the "materiality" of certain admittedly factual matters may be eroded by a change in the Board's substantive policies.

* *Mathews* v. *Eldridge*, 424 U.S. 319 (1976) and *Goss* v. *Lopez*, 419 U.S. 565 (1975).

[4] In the *Eldridge* case, which involved termination of disability benefits without a prior hearing, but with the right to a subsequent hearing, the Court observed that the fiscal and administrative burden which would be presented by reliance on conventional procedures was a valid consideration in determining to use abbreviated procedures. As we understand the matter, the ICC has also been successful in persuading the courts to approve its use of "Modified Procedures" by explaining that there is no administrative alternative to handling the 8,000-10,000 applications which the Commission receives annually.

[5] The *Eldridge* court concluded that one factor to be evaluated in employing less traditional hearing procedures was the risk of an erroneous result via the procedures employed and the probable value of additional or substitute procedures.

the same proceeding. The concern, therefore, is that there are fairness problems when an action bureau which is an active litigant in some cases is also a key staff advisor in other cases. Despite the express terms of the APA that there is no separation of functions problem, if a court considers our procedures unfair, BALJ is concerned that it might read into the procedures a requirement for a separation of functions.[6]

Sensitive to this concern, our proposal provides that all determinations will be made by the Board—i.e., a bureau is not the decisionmaker. Also, all key recommendations will be made by three bureaus jointly. At the critical stage when the Board decides whether or not to employ expedited documentary procedures, it will receive a joint recommendation from the principal line bureau (BPDA or BIA), its Chief Administrative Law Judge, and the General Counsel; alternate recommendations will, of course, be available. A recommendation later made on the merits of a case will be made jointly by the principal line bureau, OGC, and the Office of Economic Analysis. We believe that such a procedure will be fair both in actuality and in appearance.

(c) *Presiding and receiving evidence.* Section 556(b) of the APA requires that "There shall preside at the taking of evidence: (1) The agency; (2) one or more members of the body which comprises the agency; or (3) one or more hearing examiners appointed under section 3105 of this title." We believe that the Board would be presiding at the reception of evidence despite its lack of physical presence when the evidence comes in since the Board will exercise all the powers of the presiding officer. See generally *Quon Quon Poy* v. *Johnson*, 273 U.S. 352 (1927) and *Sisto* v. *CAB*, 179 F. 2d 47 (D.C. Cir. 1949). We realize, however, that a question could be raised as to who receives evidence in a documentary hearing case and whether the party who does "receive" evidence is in fact deciding the case. A court might find that the concept of "presiding" entails more than what we contemplate under the rules—i.e., that each Board member must go through all the evidence and not reply on staff analyses, even where those analyses point the Board to the raw record. While the Attorney General's Munual specifically refers to the agency's power to use reports prepared by a staff of specialists as a subsitute for a judge's decision, and to use the services of agency employees as assistants for analysis and drafting, no court, to our knowledge, has directly addressed the issue, and our sister transportation agency—the ICC—uses an elaborate system of employee boards who "preside" as delegate of the Commission at the reception of evidence, with review to the Commission.

(d) *Public hearing.* A "hearing" is required by sections 401(g), 402(f), and 1002(d) of the act, but sections 401(c) and 402(d) call for a "public hearing." We have been unable to find any legislative history of these latter words in the Act but note that Professor Davis contrasts a "public" or open hearing with a private or closed hearing. See Davis, Administrative Law Text, section 8.07 (1972). Clearly a documentary hearing would be "public" in this context. On the other hand, one court has suggested that a "public hearing" evinces a Congressional intent to have an oral presentation, at least in the special factual context presented to the court. See *International Harvester Co.* v. *Ruckelshaus*, 478, F. 2d 615 (D.C. Cir. 1973). In making its recommendation on administrative reform, the Senate Governmental Affairs Committee report recommended that a legislative-type oral hearing be conducted in all cases where some form of documentary procedure is employed. We raise this matter to alert the Board to a possible problem with our proposed rule and to suggest that oral presentations of some kind be considered in some cases processed under the rules.

Conclusion. In sum, we believe that the demands now placed on the Board and the needs of the traveling public require an alternative for the processing of some cases, notably cases involving domestic route applications. The Board is moving on a number of fronts to improve and modernize its decisional process. We believe that the basic goal of the administrative process—and the thrust of the Administrative Procedure Act—is to allow conflicting contentions to be presented to an agency for decision in a full and fair manner likely to produce sensible, accurate and informed decisions. Our proposal furthers that basic goal and comports with the legal requirements of the APA and the Federal Aviation Act.

Regardless of whether the Board is inclined at this point to accept our proposal that the rules be expanded to include the broader run of cases, we believe that a proposed rule should nonetheless be published, giving all persons an opportunity to respond to these proposals. We see nothing lost by publishing rules and permitting a response; much could be gained if the responses indicate that there will be general acceptance of the expanded rules which will permit the Board to better handle its docket.

GARY J. EDLES.

APPENDIX A

Appendix A is not reprinted since it is widely available. *Mobil Oil Corp.* v. *FPC*, 483 F. 2d 1238 (D.C. Cir. 1973). Before Leventhal and Wilkey, Circuit Judges, and Jameson, Senior District Judge for the District of Montana, opinion by Judge Wilkey, pp. 1249-1254.

ATTACHMENT II.—CIVIL AERONAUTICS BOARD

MEMORANDUM

APRIL 5, 1978.

To: The Board.
From: Judge Litt.
Subject: BALJ's memorandum regarding Office of General Counsel's memorandum on procedures for processing certain licensing and rate cases (reference CM 7884).

BALJ's principal difficulty with the General Counsel's memorandum is our different appraisal of the legal and practical problems that are likely to confront the Board if the proposed procedures are extended much beyond the limited class of cases where no material facts are in issue. These are our major problem areas:

1. *Application of the procedures to route cases (adjudications) where there are material and important issues of fact in issue.* CAB route cases are adjudications (not rulemaking) under the APA, and under the FAA and the APA are to be decided on the basis of a hearing. We know of no holding by any court that the rights arising under a required adjudicatory hearing may be dispensed with where there are substantial issues of fact in dispute. All the cases cited in the General Counsel's memorandum authorizing limited hearing procedures involve rulemaking.[1]

We see nothing in the law that permits dispensing with the right to a proper hearing in an adjuciation because of the staff's workload. And even where courts have permitted abbreviated procedures in rulemaking requirements, the factual basis—thousands of cases or the legal deadline of effective rates—can hardly be claimed for CAB's route cases.[2]

2. *Separation of functions.* The APA provides that in adjudicatory cases staff members who perform investigative[3] functions in a proceeding shall not participate in or advise the Board in its decision on that case (except as witness or counsel in a public proceeding). Under the proposed procedures, and realistically, a staff member of BPDA will analyze the merits of the filings of the parties to a proceeding and prepare a draft decision, which will be reviewed by BPDA, OGC, and OEA, who will jointly recommend a decision to the Board.[4] Thus there will be no separation of functions between the staff who process, analyze, investigate, and advise by recommending a decision to the Board.[5] And with whom will the Board consult if it has questions about the staff opinion that has been submitted to it?

The APA provides an exception to the requirement that in adjudications the same staff members shall not process and advise the Board: initial licensing; and the Attorney Generals Manual in 1947 argued that the exemption applied to all route cases. However, since the APA the Board has by practice and rule separated the staff that processes route proceedings from the staff that participates in advising it and recommending decisions to it.[6] We know of no

[1] At least one is an interim decision with a right to complete hearing at a later stage, *Matthews* v. *Eldridge*, 424 U.S. 319 (1976). *Mobil Oil Corp.* v. *F.P.C.*, 483 F. 2d 1238 (D.C. Cir. 1973) was a rulemaking case, in fact informal rulemaking, and its statements referring to adjudications are dicta, not decisions. Moreover, *Mobil* found that confrontations are required even under rulemaking.

[2] A factual analysis of the Board's docket will not support claims of huge backlog.

[3] "Investigative" is not confined to prosecutorial functions. See Legislative History of Public Law 404, Chapter 324, 79th Congress (Administrative Procedure Act) (G.P.O., 1946) at 262-63.

[4] The recommendation to the Board whether to use the proposed procedures will have been previously made jointly by BPDA, OGC, and the Chief ALJ.

[5] We wonder about the efficiency of a procedure that will involve the collaboration of the Bureaus, if they give serious attention to these cases.

[6] The Board has followed the same practice in rate proceedings (rulemaking).

[6] In other areas of procedure, the courts have liberally construed the APA so as to insure adequate procedural fairness even in areas where the APA does not call for specific procedures, as the District of Columbia Circuit Court of Appeals has recognized. *Action for Children's Television* v. *FCC*, 564 F. 2d 458, 470 n. 19 (1977). For example, Board decisions based on an analysis on which the parties had no chance to comment—even an on-the-record analysis—are generally vulnerable to judicial challenges. See, e.g., *Delta Air Lines* v. *CAB*, 561 F. 2d 293, 312 (D.C. Cir. 1977); *Delta Air Lines* v. *CAB*, 442 F. 2d 730 (D.C. Cir. 1970).

V 43 M 5 1978

other major regulatory agency that takes a different position. We suggest that the reason there are no court interpretations relevant to the initial licensing exception is that the Board and other agencies have avoided the challenge by prohibiting the commingling of functions.

3. Is the Board presiding at the hearing? Under the APA (section 556) and the FAA[1] either the Board, a member, or an administrative law judge must preside at the hearing where the evidence in the proceeding is taken. Where the Board presides it may make a final decision directly. But where the Board does not preside at the taking of the evidence, either a tentative, a recommended or an initial decision[2] must first be issued to which the parties may except, and the Board must rule on these exceptions in its final decision.

These procedures were adopted to insure that the Board's decisions were made by a Board cognizant of what it was doing; the abuses of the decisional process by decisions made by staffs and rubber stamped by commissions were a major reason for adopting the APA. We wonder whether and to what extent under the proposed procedures the fiction can be maintained that the Board itself is presiding at a hearing and deciding on the basis of what it learned from the evidence it took while presiding.[3]

SUMMARY

The BALJ believes that the proposed procedures can be useful in a limited class of cases where there are no important issues and material facts in dispute. We question whether it can successfully be used as a panacea to dispose of large numbers of seriously controverted cases. BALJ is confident it can—with the cooperative participation of the other Bureaus—handle the present and reasonable foreeable case load the Board wishes to set for hearing. As to rate cases, the rule proposed by the General Counsel is unrealistic and unsupportable from a point of timing. There is no reason to include rates in this rule at this time. (See Appendix C.)

The blurring of functions, in the aggregate, is an attack on the entire fabric of what up to now has encompassed a fair hearing. There is a point where one may be tempted to pull out all the stops for some great perceived public benefit, but that point is not reached with a minimal case load which appears to be quite manageable and where acceptable non-oral hearing procedures are more than adequate for the foreseeable future. It is just not helpful to have the Board tell the world that there is merit in the idea of making the administrative system work by proposing procedures that do not show a sufficient sensitivity to the Board's quasi-judicial function.

Attached as Appendix B is an appropriate prefatory statement and proposed rule circulated by me in early March. The Board must still address the problem of who presides and the issuance of a decision, although as should be noted, the last paragraph of the prefatory statement to the proposed rule resolves these issues. The rule also deletes any reference to rates at this time. Some elaboration and details of the legal issues are discussed in more legal terminology in the attached Appendix C.

APPENDIX A

Note on *Mobil* Case and Reprint of *Mobil* Case

This appendix is the full text of the *Mobil* case cited by General Counsel's office of the new directions being taken in administrative law, a portion of which is attached to the General Counsel memorandum. While I do not believe that it is usually helpful to forward parts of involved legal decisions to a Board, even where a Board may be comprised solely of lawyers, since the General Counsel attached a portion, I am attaching the whole case. Significantly, I believe the case stands for the opposite conclusions which the General Counsel draws and shows that even in rulemaking cases the courts have maintained high standards of procedural due process, have expended great effort in discussing the detailed provisions of the APA, and have refused to limit the requirement for a full and complete hearing, including the right of confrontation, even where the statute does not so require.

Judge Wilkey, as the Board may see from the excerpt below, dispenses with the distinction between "formal" and "informal" rulemaking and focuses instead on the need to create a sufficient basis for judicial review. He concluded for the court that "the 'substantial evidence' requirement[1] necessitates some sort of adversary, adjudicative-type procedures,"[2] stating:

> Informal comments simply cannot create a record that satisfies the substantial evidence test. Even if controverting information is submitted in the form of comments by adverse parties, the procedure employed cannot be relied upon as adequate. A "whole record" * * * does not consist merely of the raw data introduced by the parties. It includes the process of testing and illumination ordinarily associated with adversary, adjudicative procedures. Without this critical element, informal comments, even by adverse parties, are two halves that do not make a whole. Thus, it is adversary procedural devices which permit testing and elucidation that raise information from the level of mere inconsistent data to evidence "substantial" enough to support rates.[3]

Thus, this case is a good example of how the courts, even in rulemaking cases, will adhere to and require a high degree of procedural due process.

Decision omitted from appendix.

APPENDIX B

The attached explanatory statement and rule tracks procedures at other agencies and reflects a rule which has been approved by the courts in a long line of cases (cf. *National Trailer Convoy, Inc.* v. *U.S. and I.C.C.*, 227 F. Supp. 730 (1964), appeal after remand, 293 F. Supp. 630 (N.D. Okla. 1968), aff'd 394 U.S. 849 (1969)). All Bureaus basically agree that the attached rules are acceptable and legally sufficient, although BPDA and OGC wish to expand the rule.

CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

PART 302—EXPEDITED PROCEDURES FOR LICENSING AND RATES CASES

Notice of Proposed Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice, undertaken on the Board's own initiative, invites comments from the public on proposed rules to establish expedited hearing procedures for processing applications for new or modified route authority by United States and foreign carriers. Basically, the new procedures would require the submission of all evidence in written form and would dispense with an oral hearing and an initial or recommended decision by an administrative law judge. The Board would, instead, receive and review the evidence itself and issue an agency decision. Whether, and to what extent, the Board would proceed under these expedited procedures in any particular case will be within the Board's discretion.

DATES: Comments by: Reply comments by:

ADDRESSES: Comments should be sent to Docket , Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Gary J. Edles, Deputy General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5234.

EXPLANATORY STATEMENT

We propose to amend part 302 of the Board's procedural regulations to provide for a non-oral hearing procedure to be used in some licensing cases. Current Board procedures and practice by and large contemplate, first, that the board institute most investigations under the power conferred by sections 204 and 1002 of the Act after examining applications filed by interested carriers under section 401. Departures from this approach include subpart M and N cases and the consideration of applications by foreign air carriers where the Board simply adjudicates applications presented to it by interested parties. Second, hearings have traditionally meant the full panoply of trial procedures, including two rounds of decisions, one by a presiding judge and another by the board itself. Orders to show cause, where the Board tentatively indicates the scope of relief it will grant and does away with all procedural steps short of final decision, have been employed in noncontroversial cases, where there is no objection, or where the interest at stake is small—but we have been reluctant to expand its use. See *Application of Western Air Lines*, Order 77-11-74, November 17, 1977, pp. 6-9 and concurring statement of Chairman Kahn.

This Agency has a responsibility to the public, the industry it regulates, and the Congress to take responsible steps to reduce regulatory delay. To this end, we recognize the need to improve our procedures while at the same time providing the parties to our proceedings with the procedural due process rights guaranteed to them by the Constitution, the Administrative Procedure Act and the Federal Aviation Act.

The proposed amendments will permit the board to eliminate an oral hearing and the initial or recommended decision of the Administrative Law Judge in certain instances where there are no substantial issues of material fact. Basically, the new procedures would require the submission of all evidence directly to the board in written form. The Board would then review the evidence itself and issue an Agency decision. Whether the Board will proceed under these expedited procedures in any particular case will be within the Board's discretion. Cases with fewer parties and cases which involve simply an application of established policies to a new set of circumstances are the types of cases which we have in mind for the use of our proposed new procedures.

We cannot minimize the contribution of an experienced administrative law judge to the distillation of the evidence, the development of the record, and the evolution of a meaningful decision in the proper case.

We are also not insensitive to the discipline which occurs when parties know that their submissions will be tested by cross-examination by experienced counsel, and appreciate that an oral presentation can be very useful to the decisionmaking process in some cases. The Board, therefore, will retain its option of ordering a conventional trial-type of hearing with cross-examination. We contemplate that in most instances the more highly complex and controversial cases will continue to be processed via the oral hearing process. Applications involving a single market, and cases with fewer parties, would seem to lend themselves more readily to the use of our proposed documentary procedures. Cases which involve simply an application of established policies to a new set of circumstances would likewise seem candidates for expedited processing.

Our procedures contemplate that in licensing cases applicants will take the initiative in seeking expedited processing. Once an application is received, we will give notice of that application in the FEDERAL REGISTER; interested persons will have 10 days to advise the Board, in general terms, why a particular application should not move forward expeditiously. We will dispose of these preliminary objections within 10 days. As in cases processed under subparts M and N of the Board's procedural regulations, this threshold procedure is designed to avoid substantial work by interested persons by allowing the Board to summarily dismiss or stay proceedings where the application appears on its face to be ill-suited to expedited procedures. Once an application passes this threshold step, interested persons will have approximately 1 month more—or a total of 50 days from the FEDERAL REGISTER publication date—to prepare their substantive answers in support of, or in opposition to, the application. Requests to consolidate competing applications will also be received during this period. Applicants will have 15 days to reply to answers to their applications but interested persons will have 30 days to file answers where new applications have been offered for consolidation. Once all materials are received, the Board will decide whether or not to employ its non-oral procedures to decide the case on the merits.

The Board intends to have an initial, recommended, or tentative decision issued in any non-oral hearing proceeding where the Board has not presided at the taking of evidence.

PROPOSED RULE

It is proposed to adopt a new subpart Q of part 302 as follows:

1. Amend the table of contents of part 302 by adding a new paragraph Q, the title of which reads:

SUBPART Q: EXPEDITED PROCEDURES FOR PROCESSING LICENSING AND RATES CASES

Sec.
302.1701 Applicability.
302.1702 Subparts A and E govern.
302.1703 Filing of applications.
302.1704 Contents of applications.
302.1705 Service of application and answer.
302.1706 Preliminary procedures for dismissal or stay.
302.1707 Answer to application.
302.1708 Intervention.
302.1709 Motions to consolidate.
302.1710 Reply to answers.
302.1711 Verification.
302.1712 Joint pleadings.
302.1713 Oral presentation or initial or recommended decision.
302.1714 Disposition of the application or investigation.

302.1701 *Applicability.*

This subpart sets forth the special rules applicable to expedited procedures for processing (a) applications for certificates of public convenience and necessity and renewals or amendments of certificates, and 9b) applications for foreign air carrier permits and renewals or amendments of permits.

302.1702 *Subparts A and E govern.*

Except as otherwise provided below, the provisions of subparts A and E are applicable.

302.1703 *Filing of applications.*

Any person may file an application for the issuance of an initial certificate or foreign air carrier permit, or a renewal or amendment of its certificate or permit, as described in § 302.1701. If the applicant desires the Board to process the application by the expedited procedure described in this subpart, the application should clearly indicate that desire on its face. The Board shall promptly publish notice of the application in the FEDERAL REGISTER.

302.1704 *Contents of applications.*

An application under §§ 302.1701 and 302.1703 shall include a statement of economic data or other matters which the movant desires the Board to notice officially, and affidavits establishing such facts as it wants the Board to rely upon, including the facts upon which the applicant relies to show that the public convenience and necessity or public interest require the relief sought. Applications shall contain the economic and operating data required by § 302.18. For information as to other information that may be included in applications, reference should be made to subpart A of this part, to the Federal Aviation Act, to the substantive rules (see parts 201 and 211 of the Economic Regulations) and policy statements (see part 399.60 of the policy statements), and orders of the Board. The applicant shall furnish sufficient detail in the form of footnotes or otherwise so that, without further clarification, final results may be obtained from the basic data. Sources, bases and methodology used in constructing exhibits, including any estimates or judgment employed, shall be provided.

302.1705 *Service of application and answer.*

(a) *Persons to be served.* A notice of the filing of the application shall be served on:

(1) Any certificated air carrier which is authorized to engage in the type of air transportation (i.e., scheduled or supplemental) at one or both of the points with respect to which the applicant seeks nonstop authority;

(2) The chief executive of any State of the United States in which any point which is involved in the application is located: *Provided, however,* That if there be a State commission or agency having jurisdiction over transportation by air, the application shall be served on such commission or agency rather than on the chief executive of the State;

(3) The chief executive of the city, town, or other unit of local government at each of the points located in the United States, between which the applicant seeks authority, as well as each certificated point intermediate thereto; and

(4) The Board, commission, manager, or other body or individual having direct supervision over and responsibility for the management of the airport located in the United States and which is being used to serve such point at the time the application is filed.

(b) *Additional service of notice.* The Board may, in its discretion, order additional service on such person or persons as the facts of the situation warrant. Applicants are encouraged to serve copies of their actual application where feasible.

302.1706 *Preliminary procedures for dismissal or stay.*

(a) On or before the 10th day following publication of notice of the application in the FEDERAL REGISTER, any person may file a motion to dismiss the application.

(b) On or before the 30th day following publication of the notice of the application in the FEDERAL REGISTER, the Board may, in its discretion (1) dismiss an application without prejudice to the refiling under the normal procedures if it finds that the application is not in compliance with, or is unsuitable for processing under, the provisions of this subpart, or (2) stay further procedural steps with respect to such application until a further order of the Board.

302.1707 *Answers to application.*

Any interested person may file with the Docket Section, and serve upon the applicant an answer in opposition to, or in support of, an application. Answers shall set forth the economic data and other facts upon which the party relies to support its position. Answers shall be filed no later than 60 days after the date of publication of the notice of the application in the FEDERAL REGISTER.

302.1708 *Intervention.*

(a) Any interested person shall file with the Docket Section and serve upon the applicant, a petition for intervention, including the economic data and other facts upon which the person relies to support its position concerning the merits of the application. Petitions for intervention shall be filed within the time limits specified by § 302.1707 for the filing of answers.

(b) Answers to petitions to intervene shall be filed with the Docket Section, and served

---

[1]The FAA read literally limits presiding to a member or a judge, though, by implication, the Board itself could undoubtedly preside.

[2]Except in an emergency situation so found on the record.

[3]The ICC procedures are based on employee Board authorized by statute from whose decisions exceptions may be taken to the Commission.

[1]Section 1006(e) of the Federal Aviation Act includes a similar type of requirement.

[2]*Mobil Oil Corp.* v. *Federal Power Commission*, 483 F. 2d 1238, 1259 (D.C. Cir. 1973).

[3] *Mobil Oil Corp.*, id., at 1260.

V 43 | 88

on the petitioner, within 15 days after the due date for the filing of petitions to intervene. Such answers shall set forth the basis of the support of or opposition to the petition to intervene. No replies to the answers are permitted.

302.1709 *Motions to consolidate.*

(a) Motions to consolidate an application with an application filed under § 302.1703, or modify the issues to be decided, may be filed within the time limits specified by § 302.1707 for the filing of answers. Motions shall include economic data and other facts in support of both the motion and any application sought to be consolidated. Data in support of any application sought to be consolidated shall conform, to the extent possible, to the provisions of § 302.1704 with respect to original applications. Subsequently filed competing applications and rebuttal evidence shall conform to the base year and forecast year used by the applicant under § 302.1704.

(b) Answers to motions to consolidate or modify the issues shall be filed with the Docket Section, and served on the movant, within 30 days after the due date for the filing of motions. Such answers shall (1) set forth the basis of the support of or opposition to the motion, and (2) with respect to the merits of the application for new authority, set forth the type of data required by § 302.1707 for answers to an original application.

302.1710 *Reply to answers.*

Replies to answers may be filed with the Docket Section, and served upon any person filing the answer to which the reply is responsive, 15 days after the due date for the filing of the answer. No further pleading may be made by any person except by permission of the Board.

302.1711 *Verification.*

The facts asserted in any pleading filed under the expedited procedures established by this subpart must be sworn to by persons having knowledge thereof, and this fact must affirmatively appear in an affidavit in support of the pleading. Such persons should be those who would appear as witnesses to orally substantiate the facts asserted should hearing become necessary. The original of any pleading filed under the expedited procedures must show the signature and capacity of the person administering the oath and the date thereof.

302.1712 *Joint pleadings.*

Parties having common interests, to the extent practicable, shall arrange for the joint preparation of pleadings.

302.1713 *Oral presentation or initial or recommended decision.*

Application assigned to procedures under this subpart will be decided on the basis of the written submissions unless the Board has granted a petition for oral presentation or a petition for an initial or recommended decision, or otherwise determines that an oral presentation or an initial or recommended decision is required by the public interest.

302.1714 *Disposition of the application or investigation.*

As promptly as feasible after the filing of all pleadings, the Board shall (1) assign the application for consideration under the expedited procedures of this subpart, (2) set the matter for hearing under the ordinary provisions of subparts A or E where material facts are at issue, (3) dismiss an application without prejudice to refiling, or (4) take other necessary action. The Board shall also dispose of any pending motions or requests.

APPENDIX C—LEGAL MEMORANDUM ON NON-ORAL HEARING PROCEDURE

This memorandum is addressed to three different aspects of the General Counsel's memorandum: [1]

1. The proposal to expand the non-oral hearing procedure to embrace adjudicatory cases where there are material facts at issue;

2. The determination that it is legal and fair to have an operating bureau participate in cases required to be heard under the Federal Aviation Act, as investigator, preparer of the instituting order, the movant, trier of fact, and decision writer;

3. The issues of (a) who will preside at the taking of evidence, and (b) the clear need under the APA for an initial decision, recommendation to the Board, or tentative decision of a Board member.

1. *Expanding the non-oral hearing procedure to embrace proceedings where there are material facts at issue.*

a. *Preliminary thoughts.* As a preliminary thought on this issue, there is no reason for the Civil Aeronautics Board to embark on what in all likelihood will be a major legal entanglement of its new rules. Bluntly, the basic concept of due process as well as the APA has accepted as a given the proposition that all parties to an adjudicatory proceeding are entitled to an adequate opportunity to test at an oral hearing the validity of controverted facts. As the General Counsel's memorandum recognizes, these rights would be denied in some cases under its proposed procedures on the basis that the Board's workload and staff resources should allow less. [2] No court has supported this proposition in any adjudication case, and recent court cases indicate that once any oral or non-oral hearing is held, a dilution of the rights of the parties is not acceptable. Cf. *U.S. Steel Corp.* v. *Train*, 556 F. 2d 882 (7th Cir. 1977). Every case cited by the General Counsel is a rulemaking case and despite continued and strong efforts to have reliance on these cases deleted from his prefatory statement, no change has occurred. [3]

My own evaluation is that court review of the expanded procedures is certain, a view which I believe is shared by the General Counsel, and that there is the strong likelihood of an adverse decision, a view which he may not share. Of course, no one can predict with certainty how any court—particularly the Supreme Court—would finally decide the matter. Suffice it to say that, in my opinion, novel procedures seeking to overturn a couple of hundred years of Anglo-American jurisprudence of what a fair hearing is as well as 30 years of codification of this understanding under the APA, are prime candidates for reversal. [4]

b. *Legal considerations.* The provisions of section 556 and 557 of the APA which govern separation of functions and the writing of decisions apply only to proceedings governed by section 554, and the provisions of section 554 apply to every case of adjudication required by statute to be determined after opportunity for an agency hearing. The determination of applications for airline route awards, i.e., licensing, is "adjudication" as defined under sections 551(6) and 551(7) of the APA. See also *Riss and Co.* v. *United States*, 95 F. Supp. 452 (W.D. Mo. 1951), reversed in 341 U.S. 907. The General Counsel's memorandum properly sets out the difficulties with relying on the initial licensing exception to the separation of functions prohibition in section 554(d) of the APA. [5] My own evaluation is that even in the right case the courts may find problems with having the senior staff participate in both the trial and decisions of a route case before the Board. But the Board's "right" case is unlikely to be the case which goes to court.

---

[1] The memorandum circulated to BALJ was in the name of the Deputy General Counsel. I refer to it as the General Counsel's memorandum because I assume that the Deputy General Counsel speaks for the General Counsel.

Each of these issues could be, and probably should be, treated in separate legal memoranda if for no other reason than to give the Board members time to reflect on what may amount to amendments to the APA.

[2] It is assumed that any non-oral hearing order would specify which of the bases it proceeded upon. Otherwise, every case would have to be treated by the courts as having material facts at issue. This should be clarified by the General Counsel.

[3] The General Counsel cites rulemaking cases. *In the United States* v. *Florida East Coast Railroad*, 410 US 224 (1973), the issue was whether the proceeding was properly classified under the rulemaking clause of the APA (553) so as to avoid the requirements of section 556 and 557 applicable to adjudications. That case stands for the proposition that certain written submissions were permissible because it was rulemaking. See also *Permian Basin Rate Cases*, 390 US 747 (1968); *Shell Oil Co.* v. *F.P.C.* 520 F. 2d 1061 (5th Cir. 1975) (*Nationwide Rate Case*), both rulemaking proceedings. The latter in fact is particularly inappropriate despite the court's dicta on section 556 and 557. There, the spectre of upward of 10,000 underlying producer rate cases was before the court, and the court, mindful of 20 years worth of prior litigation on the subject, was writing its final chapter on a dialogue that extended for a lifetime. See also *Mobil*, Appendix A to the principal memorandum.

[4] The fact of the matter is that other sister agencies are affirming the right to oral hearings. See Docket RP 72-6, *El Paso Natural Gas, Ignition Fuel and Flame Stabilization*, issued March 9, 1978) where on page 2 of the slip decision, the Federal Energy Regulatory Commission states:

"• • • The right to full cross examination and administrative adjudicatory hearing is a constitutional right which is surely recognized in section 7(c) of the APA."

"A party is entitled to present a defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such examination as may be required for full and true disclosure of the facts." (Emphasis added.)

[5] While the 1947 Attorney General Manual suggests that the initial licensing exemption applies to all route cases, it should be noted that at least one portion of the legislative history of the APA suggests a contrary position, i.e., that original licenses are to be "contradistinguished from renewals or amendments of existing licenses". Legislative History of Public Law 404, Chapter 324, 79th Congress (Administrative Procedure Act) 226 (Government Printing Office 1946).

MY 5 78 UMI

Further, where a consolidation of competing applications might occur or where there is a denial of an application, it would be very difficult to maintain that the proceeding had neither become complex nor adversarial so as to fall within the exception to the exception contemplated in the *Legislative History of the APA*. [6] A growing body of cases clearly has emerged, involving various licensed trades and occupations, which develops that a denial cannot be made without according full separation of functions even in initial licensing. Thus, even if considered initial licenses, it is doubtful that route applications at the CAB could be denied without affording the applicant an opportunity for cross examination in an adjudicatory hearing. These matters are not addressed by the General Counsel's memorandum and time has not permitted me to address these issues more fully.

2. *Lack of fairness of the internal procedures.* In addition to the legal infirmities, both BPDA and OGC propose a method by which the key power to decide cases within the Board will be shifted in substance from the Board members and their principal legal counsel (OGC) to BPDA with OGC being BPDA's "legal advisor". The alleged justification for the proposal is twofold: (1) the prior method of handling cases has been cumbersome and too time-consuming, and (2) the Board's workload and backlog, which, parenthetically, does not appear really to exist, is very large and expanding rapidly. As a corrolary is a presumption that any bifurcation of responsibility for decision making is not efficient. The facts, at least as of now, do not show that any of the identified problems of delay or backlog require anything more than putting in place better tools to handle some cases. The General Counsel addresses these issues and resolves that since the Board will pass upon the actions recommended by its staff, there will be Board control of these cases.

a. *Non-oral hearings are hearings.* First, there is a blurring of differences between the function of hearing cases and the function of deciding cases. The procedures for non-oral hearing cases, as far as the hearing is concerned, are simple and do not require a great deal of analysis. What they entail is a determination that there are no material facts at issue, or that even if some small contested issues exist, they are not so significant that a court will reverse the findings on the basis of manifest unfairness. Other than that finding and a curtailment of the oral hearing process (the cross-examination of witnesses to determine the truth and validity of contested testimony and exhibits so as to permit rational findings of fact), it is a hearing in every sense of the word and is entitled to the respect and every protection afforded by due process, the statutes, and regulations governing hearings. The term "non-oral hearings" is not a buzz word for the avoidance or dispensation of the hearing protection.

No case has been cited, nor can one be cited to this Board, where any court has sustained an agency action in an adjudicatory proceeding on the basis that a non-oral hearing procedure permits any less a degree of due process than required by the underlying statute. Moreover, in many cases the courts are moving to greater reliance on oral hearings. [7] See *Mobil* (App. A) and *U.S. Steel Corp.* v. *Train*, *supra*. In the latter, even though the magic words "on the record" did not appear in the enabling statute, a hearing was required nonetheless. The point clearly to be drawn from these cases is that an attempt to ignore the hearing process in the cases where material facts are in issue will not warm the reviewing court's heart and can result in a remand.

BPDA and the OGC have proposed that "all administrative line responsibilities" remain in BPDA. What this means is that in a proceeding in which it is preliminarily decided that there are no material facts at issue, the entire matter will be handled by BPDA from the time the case is filed until a completed decision is laid before the Board to be adopted. Thus, BPDA, which is a forcing or action body and potential litigant, will participate in a determination of whether there are facts at issue, what facts are at issue, and whether a hearing is required. If it should determine that a hearing is required, it would participate at the hearing and then write the Board's decision. BPDA is not now, of course, an opinion writing body in either oral or non-oral hearing cases. Admittedly there are areas where it writes the Board's decision, such as exemptions and realignments, but that is a far cry from changing its curent role from a technical and developmental body with an advocate's role in heard cases to advocate, judge and first line opinion writer in other heard cases. [8] Since BPDA controls its own workload already by picking cases to institute, "queue", or ignore, the additional internal authority will make a most complete bureaucratic institution.

Any belief that a non-oral hearing can be handled with "all administrative line responsibility" in BPDA and still provide a hearing in the manner envisioned by the statute or the APA (or is being provided today by the CAB) would be uninformed. What will have occurred is that BPDA will determine in the first and last instance which cases come to the Board and will style the case in a manner best designed to avoid Board interference. The OGC first objected to this procedure, since I assume it too recognized that the only meaningful role on a de facto basis would be that played by BPDA. After considerable discussion however, the OGC and BPDA worked out a compromise which principally will have the BPDA and OGC cooperate and coordinate those cases—a euphemism for having any policy decision embrace the views of both BPDA and OGC before being forwarded to the Board for approval. The result of this "cooperation" is that there may be no hearing as contemplated by the APA.

b. *Opinion writing.* The loss to the Board of its ability to control the decisional process and the loss of its General Counsel's office as an independent advisor to the Board also causes me great concern. A proceeding coming to the Board from its staff represents, under the best circumstances, BPDA in an advocate role, a judge rendering an initial decision on a mixed basis of fact and law, and the Office of General Counsel as the chief advisor to the Board. This is somewhat inefficient because the give and take of analyzing different ideas, as well as the necessary independent review and analysis preparatory to writing an opinion, takes time. But, what is gained in such a formulation is (1) a built-in institutional check and balance as the case is developed which will apprise the Board and the public more fully of the Board's options (e.g., on procedure cases such as *Colonial* and *TXI Baltimore-Houston*), and (2) an independent review by the Board's Office of General Counsel which has not taken positions earlier in the decisional process.

The only effective method to protect the Board members, given the Board's present setup, is to have the opinion writing continue to be performed in the General Counsel's office so that a detailed analysis of a proceeding leads to an informed judgment. If the General Counsel has collaborated with BPDA throughout the process and his review is on an opinion written in collaboration with BPDA, it will be difficult for him to render an independent and objective final opinion.

c. *No need for expanded procedures due to existing or unexpected workload.* Nor do I believe that the procedures suggested will expedite many cases. First, I have not yet been able to determine which route cases in the past year BPDA believes would have lent itself to its new decisionmaking role. My own analysis is that few of the present breed of cases could be so handled legitimately, although if the Board goes to small point-to-point cases the number would surely increase. Obviously, if the Congress or the courts should countenance a significant modification in entry criteria, that number could be stimulated further. But, absent some significant change in existing law, as well as a great upswell of carrier interest in expanding service which has yet to become evident, there does not appear to be any great number of cases which will lend themselves to that procedure. The fact is that the Board only handles 200 cases a year and no one has yet made any inventory showing that any large number of these cases lend themselves to the procedures.

And another fact is that there is no evidence that use of non-oral hearing procedures in most cases where there is adversarial action will result in reduced cost of entry or substantial savings in time. I have addressed a number of these issues in memoranda of February 14 and March 6, and will not repeat them here. At the ICC, nonorally heard cases were given expeditious treatment but, until very recently when 40 positions were filled temporarily to clean up the backlog, these "expedited" cases took longer to handle than orally heard ones. A cost of entry study at the ICC seeking to show cost savings was abandoned, I am told, when the analysis showed the hypothesis was questionable.

---

[6] The report of the Senate Judiciary Committee is quite clear in stating that the initial licensing exemption was not meant to be utilized where there are material issues of fact in dispute. In the committee's language,

There are, however, some instances of either kind of case [initial licensing or rulemaking] which tend to be accusatory in form and involved sharply controverted factual issues. Agencies should not apply the exception to such cases, because they are not to be interpreted as precluding fair procedure where it is required. Legislative History, supra, at 204.

[7] This follows the APA requirement, as set forth in the legislative history and the Attorney General's Manual, that cases which are complex or are adversarial should be orally heard.

[8] It is a total red herring to suppose that, because BPDA would not be challenged in non-controversial cases if it acted in this role, that it is therefore proper to have BPDA play this role in cases where there is controversy.

V 43 1 88 MY 5 78 UMI

As far as delay is concerned at the Board, this was addressed by the BALJ in the recent memorandum asking that 12 cases which were wending their way through BPDA simply be set for hearing. The fact is that some Subpart A or M cases can be disposed of in 4 or 5 months after an answer is filed to a motion to expedite.[9] Moreover, a judge at a prehearing conference can structure a case in a way not possible through the non-oral hearing procedures. Secondly, the judge's initial decision is usually of great value, often can be adopted if the Board's policy has been followed or it likes a new policy uncovered, and most importantly, is possibly the only fair shake in the system a party often believes he receives.

In sum, permitting a bureau to have the role of investigator, action office, trier of fact, and decision maker, even if not proscribed by the APA (which I believe is not the case), would be unfair. And having one's General Counsel, who is the Board's lawyer, collaborating in the process destroys the internal review which has heretofore been considered necessary by the institutional body to protect itself.

3. *"Presiding" and issuance of initial or tentative decisions.*

Who will preside at these cases is not an easy determination and does not speak to whether an initial or tentative decision must be issued. Under the APA, the Board, a member of the Board, or an administrative law judge must preside over the reception of evidence. An analysis of how to resolve who presides at the Board therefore must begin with a determination as to both practical and legal issues. Assuming that there is no desire by either BPDA or the General Counsel to have a judge preside over non-oral hearing procedures,[10] the Board or a member must preside.[11] This cannot be delegated. Legally there is no question that the case could be individually docketed to a Board member and that member could then issue a recommended decision. If a Board member presides he would be required literally to review the evidence and be prepared to state that he had done so. It is possible that others working under his directions could review the evidence for him but, he would still have to have available the record, the materials relied upon and their recommendations. There is no question that under the APA that he still must prepare a decision, to which exceptions will lie, before the Board can decide the matter.

The General Counsel in his memorandum seeks to avoid the writing of either an initial decision, a recommendation to the Board, or a tentative decision by creating a fiction that the Board "presides." This would avoid the requirement that the parties be able to file exceptions to the matter which comes to the Board for decision. The legal basis for the General Counsel's position is two-fold: (1) that the ICC Review Boards in fact are performing this function under delegation today and therefore the Civil Aeronautics Board may also use this procedure; and (2) there are a number of cases which support permitting the board to "preside" in this manner. As to the first, the ICC Boards preside on the basis of specific statutory delegation under the Interstate Commerce Act (49 U.S.C. 17). They sift evidence and the decision they issue is appealable by law to the agency before any administrative finality attaches. Whether this procedure of the Review board presiding is legal, moreover, has never been litigated and I am informed by personnel at the ICC that hopefully, from this point of view, it will not be. Nonetheless, to suggest that a statutorily approved procedure whereby those receiving the evidence and acting as the agency, review the evidence, bears no relationship to what is being suggested is appropriate at the CAB.

The General Counsel, at page 10 of his memorandum, cites three cases to support the proposition that the Board would preside over the reception of evidence "despite its lack of physical presence." All are inapposite and one is actually irrelevant to the issue. The first case, *Quon Quon Poy* v. *Johnson*, 273 U.S. 352 (1927), involved the introduction of the substantial equivalent of depositions without objection and with waiver of cross-examination by the adversely affected party—two decades prior to passage of the APA. The second case, *United States* v. *Dawson*, 3P&F 43d.21-1 (U.S. Dept. Int. 1944), also preceding the APA, was an *ex parte* agency proceeding conducted by a regional law officer after the Commissioner absented himself when the defendant refused to appear in compliance with regulation.[12] Finally, the case involving the Board, *Sisto* v. *C.A.B.*, 179 F.2d 47 (D.C. Cir. 1949), stands for the principle that the Board may choose to hear argument on exceptions to an examiner's initial decision either orally or by written materials and is not compelled to use a particular method under the organic statute. As it turns out, there are very few cases and very little law as to how the term "preside" should be interpreted under either the organic statutes of administrative agencies or the APA. The reason for this, of course, is that to my knowledge no one has suggested systematic methods for avoiding the clear requirements of the APA which, simply stated, is that he who presides should decide and that the parties should have an opportunity to address the decision maker and to appeal his ruling. In *Smith* v. *People*, 47 N.Y. 330, 334, a definition is given that: "When a judge 'holds' court he directs, controls, and governs it as the chief officer and this is the extent of the meaning of the word 'preside' • • •." See also *Koval* v. *Industrial Comm'n*, 532 P.2d 549, 551 (Arizona 1975), which held that "presiding" in a 1973 statute referred to the hearing officer who physically presided over the hearing, not to the "chief" hearing officer.

I think one must be cognizant that the courts are unlikely to accept both (1) a decision maker not physically taking the evidence, and (2) his issuing a decision, having not taken the evidence, which is not appealable by the filing of exceptions by any aggrieved party to the entire body charged with making the decision. This leads me to conclude that it is unlikely that the Board would be sustained in a procedure whereby its staff handled all the matters and the Board issued a final decision.

The solution to these problems appear unacceptable to BPDA and the OGC because they lead to the writing of interim decisions which are appealable. Unquestionably this will require some additional time—probably three weeks for exceptions to be filed and another week or two for the Board to subsequently decide the matter. Again, time has not permitted a full analysis of this issue, but it should be resolved before proposed rules ignoring these requirements of the APA and creating a thin and inconvincing fiction, as suggested by BPDA and OGC, are issued. The attached Appendix B resolves this matter for the present by providing for intermediate decisions.

4. *Additional matters.*

a. *Rates.* One other matter requires comment. The rule proposed by the General Counsel also seems to be particularly ill-advised for *individual* rate cases since they almost invariably involve factual issues.[13] Those factual issues ordinarily can be resolved faster by an oral hearing, with little or no time being saved under the proposed procedures in the disposition of the overall cases. Moreover, the applicability of the proposed rule to rates seem to be more "window dressing" than reality. From a practical standpoint, instituting orders are normally entered in these cases to preserve the Board's jurisdiction to act and are done so because the Board's staff has not had a adequate opportunity either to resolve its position or prepare what will be its rebuttal case. The carriers, having had months to think about the filing and having presumably prepared their basic case before coming to the Board, are unlikely to comment that additional time will be necessary. It is the staff which will be injured.

The mechanics of the handling of the individual rate cases at the Board at this time also requires some comment. Instituting orders are issued frequently where there is no desire by the staff for quick resolution. The practice now is that, at the staff's request, the office of BALJ does not set rate cases for hearing—sometimes many months have elapsed while settlement negotiations are under way—until the Board's rate bureau is able to mount a full scale rate case in opposition to rate increases. Unless BPDA chooses to ignore this rule for the most part, the rule will increase its workload. Further, under the proposed procedures adopted in a case, the BPDA could be in a position where it was unable to do more than take pot-shots at those few items its quick analysis could uncover and, at best, prepare alternatives for a few cost areas. This piecemeal approach to ratemaking would not be consistent with reaching careful decisions for lawfulness of proposed rates. At this juncture, it appears that the new rule, as applicable to rate cases, would be no more than a hollow shell since no one has identified those cases which would benefit, and, therefore, this category of proceedings should not be placed under that rule. I think, moreover, that there is almost no rationale given which explores these matters and my own conclusion, so far, is that there is no reason to include rate cases until some showing can be made that it will benefit the Board rather than those seeking rate increases.

[9] If a case is not to be heard because it does not fit the Board's calendar, the Board should say so immediately and not have it either clog the system or be used to affect workload statistics.

[10] This is often done at the ICC.

[11] Section 1004 of the Federal Aviation Act appears more restrictive and limits "presiding" to a member of the agency or a judge. It also uses "hold" and not preside.

[12] This case appeared in the "final" memorandum sent to this office for comment, but apparently was deleted in the notation copy sent to the Board.

[13] Individual rulemaking is more of an adjudicatory process and therefore has different standards than general rulemaking. This aspect of ratemaking has not been discussed in any of the memoranda.

b. *Presentation of evidence.* Much of the language used throughout the various discussions in the OGC memorandum has centered on the term "documentary evidence." This is highly unfortunate since under the APA, section 556, that term has an extremely limited meaning. As stated in the Attorney General's Manual (p. 77):

> . . . As here used "documentary evidence" does not mean affidavits and written evidence of any kind. Such a construction would flood agency proceedings with hearsay evidence. In the last sentence of the subsection, there appears the phrase "evidence in written form," thus indicating that the Congress distinguished between "written evidence" and "documentary evidence." See also section 203(c) of the Emergency Price Control Act. Again, the subsection expressly states the right to adequate cross-examination. Against this background, it is clear that the "right to present his case or defense by oral or documentary evidence" does not extend to presenting evidence in affidavit or other written form so as to deprive the agency or opposing parties of opportunity for cross-examination, nor so as to force them to assume that expense of calling the affiants for cross-examination. See *Powhatan Mining* Co. v. *Ickes*, 118 F. 2d 105, 109 (C.C.A. 6, 1941).

Great care clearly must be used in the terminology so as to avoid confusing the written evidence of parties, which are entitled to cross examination, with the use of "documentay evidence" as a word of art under the Administrative Procedure Act.

c. *Responsible employees.* While the issuance of recommendations to the Board by "responsible employees" is no longer central to the proposed rules as suggested in the General Counsel's memorandum, some consideration must be given as to who would be the responsible officer in the event that the agency chooses to issue a tentative decision or a recommendation. An earlier proposal by the General Counsel, now apparently abandoned, was to employ the phrase "due and timely execution of its functions imperatively and unavoidably (so) requires" to allow the omission of any intermediate decision. (See, e.g., General Counsel memorandum of March 20.)[14] While this has not been developed at length in this memorandum, several of the suggestions previously made, if they should re-emerge, would require a detailed analysis of this aspect of decision making.

Many of the problems here would not require fine-tuned resolution if the matters to be resolved by the agency were limited to those types of non-oral hearings used by other agencies and already approved by the courts. There would be little controversy and therefore little risk of court review. It is principally the determination to create what amounts to an amendment to the APA which requires seminal thinking in order to overcome previously poorly worked out arrangements. As the risk goes up of significant court review, the need also goes up to make sure that the procedures are precise and lawful. The procedures set forth in Appendix B to the present memorandum avoid these problems. They should be adopted because they are consistent with (1) existing law and other agency practice; and (2) are more than adequate to handle the existing or anticipated caseload.

[14] If consideration is given in the future of going to a procedure where responsible employees make recommendations to the Board, it should be kept in mind that the APA would not permit junior and inexperience staff members to perform this function.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 4]

VESSELS IN FOREIGN AND DOMESTIC TRADES

Extension of Time for Comments Concerning Proposed Amendments Relating to Foreign Repairs to, and Equipment Purchased for, American Vessels

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of extension of time for comments.

SUMMARY: This notice extends the period of time permitted for the submission of comments in response to the recent proposal by the Customs Service to modify its substantive and procedural requirements relating to entries for foreign repairs and equipment purchases by American vessels. This extension will permit the preparation and submission of more detailed comments by interested members of the public.

DATES: Comments must be received on or before June 2, 1978.

ADDRESS: Comments should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Jerry C. Laderberg; Carriers Rulings Branch, Carriers, Drawback and Bonds Division, U.S. Customs Service, Washington, D.C. 20229, 202-566-5706.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On April 4, 1978, the Customs Service published in the FEDERAL REGISTER (43 FR 14060) notice of proposed amendments to §§ 4.7(d)(1) and 4.14 of the Customs Regulations (19 CFR 4.7(d)(1) and 4.14) to modify its substantive and procedural requirements relating to entries for foreign repairs and equipment purchases by American vessels. The proposed amendments would establish procedures for handling each aspect of a vessel repair entry and are intended to reduce the amount of time needed to process the entry.

COMMENTS

Comments concerning the proposed amendments were to have been received on or before May 4, 1978. A request on behalf of a number of American-flag vessel operators has been received to extend the period of time for the submission of comments. Therefore, Customs is extending the period of time to comment to June 2, 1978.

LEONARD LEHMAN,
Assistant Commissioner, Regulations and Rulings.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 50]

[Docket No. 78N-0049]

PROTECTION OF HUMAN SUBJECTS

Proposed Establishment of Regulations

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing a regulation to provide protection for prisoners involved in those research activities which fall within the jurisdiction of FDA. This proposal is issued in compliance with the directive of the Secretary of the Department of Health, Education, and Welfare (DHEW), is in line with the regulations proposed by DHEW, and implements the recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research on research involving prisoners. This proposal is intended to assure adequate protection of the rights and safety of prisoners who are subjects in clinical investigations subject to requirements for prior submission to FDA, or conducted in support of applications for permission to conduct further research or to market regulated products.

DATES: Written comments by July 5, 1978. The proposed effective date of the final rule is 12 months after the date of its publication in the FEDERAL REGISTER.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Roger W. Barnes, Office of Medical Affairs (HFM-1), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fish-

V 43 — 88

ers Lane, Rockville, Md. 20857, 301-443-1177.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of January 5, 1978 (43 FR 1050), DHEW proposed regulations governing research conducted or supported by DHEW which involves prisoners. The proposed DHEW regulations implement the recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research on research involving prisoners and provide additional protection for prisoners involved in such research activities. As noted in the proposal:

> The proposed regulations set forth below cover only research conducted or supported by DHEW. They do not cover the non-DHEW supported research which is submitted to the Food and Drug Administration to satisfy its regulatory requirements. The Secretary's rulemaking authority with respect to FDA activities has been delegated to the Commissioner of FDA. The Secretary has directed the Commissioner to issue, as soon as possible, regulations that apply the standards set out in these regulations to research that the FDA accepts to satisfy its regulatory requirements. (43 FR 1051)

In order to comply with the Secretary's directive, and in order to set forth a uniform Departmental policy regarding research involving prisoners, the Commissioner of Food and Drugs is proposing regulations which will apply the principles set forth in the proposed DHEW regulations to all prisoner research that is subject to FDA jurisdiction. The Commissioner adopts the findings of both the Commission and the Secretary regarding the inherently coercive nature of the prison environment and the need for special protections for prisoners involved as subjects in clinical research. The Commissioner also believes that, wherever possible, FDA's regulations should be compatible with, if not identical to, those of the Department. A multiplicity of dissimilar and inconsistent Federal requirements is burdensome to institutions, Institutional Review Boards (IRB's), and the process of clinical investigation. The proposed Part 50, "Protection of Human Subjects," will contain regulations which apply to all clinical investigations which are subject to requirements for prior submission under section 505(i), 507(d), or 520(g) (21 U.S.C. 355(i), 357(d), or 360j(g) of the Federal Food, Drug, and Cosmetic Act, or which support or are intended to support an application for a research or marketing permit for a product regulated by the agency. While only Subparts A and C of Part 50 are being proposed at this time, the Commissioner intends, in the near future, to revise and update existing agency regulations to incorporate appropriate Departmental standards and other relevant materials on informed consent. Regulations regarding informed consent will be proposed as Subpart B of Part 50. This proposal is part of a major effort of FDA to improve its regulations on clinical investigations. Applying the principles set forth in this proposal to research that is subject to FDA jurisdiction will result in nonacceptance of research not conducted in conformity with this proposal.

CLINICAL INVESTIGATIONS INVOLVING PRISONERS

The proposed regulation conforms to the requirements proposed by the Department insofar as they involve biomedical research and extends those requirements to research submitted to the agency to satisfy its regulatory requirements. The Commissioner has considered the report of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (published in the FEDERAL REGISTER of January 14, 1977 (42 FR 3076), as well as the comments set forth in the preamble to the January 5, 1978 DHEW proposal, and incorporates those documents as part of the discussion presented here. The Commissioner emphasizes that proposed Subpart C prohibits the use of prisoners as subjects in research subject to FDA jurisdiction if the research is not intended to improve the health of the individual prisoners. This means that no prisoner may serve as a placebo control

DEFINITIONS

Proposed § 50.3 defines a number of terms used in proposed Part 50. Many of the proposed definitions pertain to terms that can be variably or imprecisely interpreted by persons affected by the proposed regulation. These definitions are to provide a common basis of understanding for the agency, the regulated industry, and the general public regarding the terms used in Part 50. In proposed § 50.3(a), the term "act" is limited to the Federal Food, Drug, and Cosmetic Act, as amended. This is consistent with definitions appearing elsewhere in the agency's regulations. Other statutes, when used, will be mentioned by name, e.g., the Public Health Service Act.

The decision to make this proposal agency-wide in scope required a term that would include all the various requirements for submission of scientific data and information to the agency under its regulatory jurisdiction, even though in certain cases no permission is technically required from FDA for the conduct of a proposed activity with a particular product, i.e., carrying out research or continuing marketing of a product. The term chosen, "application for research or marketing permit," is intended solely as a shorthand way of referring to at least 21 separate categories of data and information that are now, or in the near future will become, subject to requirements for submission to the agency; the term is defined in proposed § 50.3(b).

Other proposed definitions include terms to describe the persons who initiate and carry out clinical investigations: "sponsor," "investigator," and "sponsor-investigator." The term "sponsor" is currently defined in §§ 310.3(j) and 510.3(k) (21 CFR 310.3(j) and 510.3(k), but the Commissioner believes this definition is unsatisfactory because it fails to distinguish the other commonly used term "investigator," which is not defined. Although these terms are widely understood, their precise meanings are difficult to express. The key distinctions seem to lie in who initiates the project (the sponsor) and who actually conducts the study (the investigator). These distinctions have been incorporated in the definitions proposed in § 50.3 (d) and (f), together with a further distinction: investigators must be individuals, while sponsors can be individuals, corporations, institutions, or other legal entities. (The term "person" is defined in paragraph (e) to include an individual, partnership, corporation, association, scientific or academic establishment, government agency or organizational unit thereof, and any other legal entity.) The Commissioner believes that these distinctions will clarify the participants' respective roles and duties.

Many studies (approximately 45 percent of the investigational new drug applications in the Bureau of Drugs, for example) are initiated and actually conducted by the same individual; this investigator may carry out the study alone or with other investigators responsible to the initiator. The Commissioner considers it important to identify the hybrid role of the "sponsor-investigator" and, where appropriate, to allow special provisions for that role. Thus, this term is defined in proposed § 50.3(g); unlike the term "sponsor," the "sponsor-investigator" is limited to individuals.

Proposed § 50.3(h) defines "subject" as a human who is or becomes a participant in a clinical investigation, either as the recipient of the test article or as a control. The term may also, where appropriate, include either a person in normal health or a patient to whom the test article might offer a therapeutic benefit or provide diagnostic information.

The terms "institution" and "institutional review board" are defined in proposed § 50.3(i) and (j), respectively. Although since 1971 FDA has had a requirement that clinical drug investigations involving institutionalized subjects be reviewed and monitored by an institutional review committee or board, no guidelines defining the outer limits of these concepts have been issued. The Commissioner proposes that the definition of "institution" include any corporation, scientific or academic establishment, or government agency that engages in the conduct of research on human subjects or in the delivery of medical services to individuals: a hospital, a university that performs research with students, a retirement home that primarily provides housing and personal care to the elderly but also cares for health needs of residents, a manufacturer that uses its employees as subjects in the course of product development, or a prison. Although this proposal deals only with prisoners, Part 50, when completed, will deal with the broader subject of protection of all subjects of biomedical research subject to FDA jurisdiction.

The term "institutional review board" is defined in this proposal to mean any board, committee, or other formally organized group created to review research involving human subjects, approve the initiation of such research, monitor its conduct, and when necessary, suspend or terminate the research. The Commissioner notes that the use of the word "board" reflects terminology of the National Research Act of 1975 (Pub. L. 93-348), DHEW regulations (45 CFR Part 46), and discussions of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research. However, the Commissioner also recognizes that existing FDA regulations, e.g., 21 CFR 312.1, use the term "committee" as does section 520(g) of the act. The Commissioner believes there is no practical difference between the two words and has elected to follow Departmental terminology.

An "institutionalized subject," as defined in proposed § 50.3(k), includes two categories: First, any individual who is voluntarily confined on the premises of, and in the care of, an institution for more than 1 day; outpatients are excluded from the definition in keeping with existing FDA policy. Second, any individual involuntarily confined for any period of time in an institution such as a penal facility or a hospital by civil commitment.

"Prisoner," as defined in proposed § 50.3(l), follows the definition proposed by DHEW and means any individual involuntarily confined or detained in a penal institution. In scope, the term encompasses individuals sentenced to such an institution under a criminal or civil statute, individuals detained in other facilities by virtue of statutes or commitment procedures which provide alternatives to criminal prosecution or incarceration in a penal institution, and individuals detained pending arraignment, trial, or sentencing. To some extent, the terms "institutionalized subject" and "prisoner" overlap. The term "prisoner," however, does not include either those persons voluntarily confined or those persons subject to a civil commitment procedure which is not an alternative to criminal prosecution; the term "prisoner" will be used throughout Subpart C.

The Commissioner is proposing that the final rule take effect 12 months after its date of publication in the FEDERAL REGISTER. Ongoing clinical investigations involving prisoners as subjects shall be completed by the effective date, discontinued, or brought into conformity with the requirements of the regulation. In those cases in which all phases of a clinical investigation except statistical evaluations are completed by the effective date, statistical evaluations completed after the effective date will be accepted.

LEGAL AUTHORITY

The results of literally hundreds of clinical investigations are submitted to FDA each year by persons seeking regulatory action by the agency. To obtain a marketing license, clinical research data are offered to support the safety and effectiveness or functionality of a product, e.g., a food or color additive, a drug or biologic for human use, or a medical device for human use. Even where a license is not required or already has been issued, such data may be relied upon to demonstrate the bioavailability of a marketed drug, the general recognition of safety of a product, or the absence of any need for premarket approval or a product standard for a device. In evaluating the enormous volume of clinical investigations filed with FDA, many types of scientific and regulatory review must be devoted to these studies apart from determining their ethical and scientific acceptability and their basic validity, e.g., to interpret the results and to evaluate the status of the affected products in light of the results. Given the limited resources within the agency, the Commissioner believes that FDA must have standards to screen out those clinical investigations that are likely to be unacceptable and thus should not be authorized by FDA or warrant little further evaluation in support of a product application. The promulgation of this regulation provides one process for making this judgment. Moreover, the regulation reflects principles recognized by the scientific community as essential to sound research involving human subjects. Thus, this regulation will assist FDA in identifying those investigations that cannot be permitted to be carried out or considered in support of an application for a research or marketing permit.

Under section 701(a) of the act (21 U.S.C. 371(a)), the Commissioner is empowered to promulgate regulations for the efficient enforcement of the act. Previously, the Commissioner has issued regulations (21 CFR 314.111(a)(5)) for determining whether a clinical investigation of a drug intended for human use, among other things, was scientifically reliable and valid, in the words of the act: "adequate and well-controlled," to support approval of a new drug. These regulations were issued under sections 505 and 701(a) of the act and have been upheld by the Supreme Court (see *Weinberger* v. *Hynson, Westcott & Dunning, Inc.*, 412 U.S. 609 (1973); see also *Upjohn Co.* v. *Finch*, 422 F.2d 944 (6th Cir. 1970) and *Pharmaceutical Manufacturers Association* v. *Richardson*, 318 F. Supp. 301 (D. Del. 1970)).

Furthermore, sections 505(i), 507(d), and 520(g) of the act, regarding clinical investigations that require prior FDA authorization, direct the Commissioner to promulgate regulations to protect the public health in the course of those investigations. The proposed regulation is intended to fulfill these mandates.

The Commissioner concludes that legal authority to promulgate this regulation exists under sections 505(i), 507(d), 520(g), and 701(a) of the act, as essential to protection of the public health and safety and to enforcement of the agency's responsibilities under sections 406, 409, 502, 503, 505, 506, 507, 510, 513, 514, 515, 516, 518, 519, 520, 601, 706, and 801 of the act, as well as the responsibilities of FDA under sections 351 and 354 to 360F of the Public Health Service Act.

The Commissioner will promulgate conforming amendments in other FDA regulations if appropriate to execute the policy set forth in this regulation.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 406, 409, 502, 503, 505, 506, 507, 510, 513-516, 518-520, 601, 701(a), 706, and 801, 52 Stat. 1049-1054 as amended, 1055, 1058 as amended, 55 Stat. 851 as amended, 59 Stat. 463 as amended, 72 Stat. 1785-1788 as amended, 74 Stat. 399-407 as amended, 76 Stat. 794-795 as amended, 90 Stat. 540-560, 562-574 (21 U.S.C. 346, 348, 352, 353, 355, 356, 357, 360, 360c-360f, 360h-360j, 361, 371(a), 376, and 381)) and the Public Health Service Act (secs. 215, 351, 354-360F, 58 Stat. 690, 702 as amended, 82 Stat. 1173-1186 as amended (42 U.S.C. 216, 262, 263b-263n)) and under authority

MY 5 78 UMI

V 43 | 88 MAY 5 78 UMI

delegated to him (21 CFR 5.1), the Commissioner proposes that Chapter I of Title 21 of the Code of Federal Regulations be amended by adding new Part 50 to read as follows:

PART 50—PROTECTION OF HUMAN SUBJECTS

Subpart A—General Provisions

Sec.
50.1 Scope.
50.3 Definitions.

Subpart B—[Reserved]

Subpart C—Protections Pertaining to Clinical Investigations Involving Prisoners as Subjects

50.40 Applicability.
50.42 Purpose.
50.44 Permitted clinical investigations involving prisoners.
50.46 Composition of institutional review boards where prisoners are involved.
50.48 Additional duties of the institutional review boards where prisoners are involved.

AUTHORITY: Secs. 406, 409, 502, 503, 505, 506, 507, 510, 513-516, 518-520, 601, 701(a), 706, and 801, Pub. L. 717, 52 Stat. 1049-1054 as amended, 1055, 1058 as amended, 55 Stat. 851 as amended, 59 Stat. 463 as amended, 72 Stat. 1785-1788 as amended, 74 Stat. 399-407 as amended, 76 Stat. 794-795 as amended, 90 Stat. 540-560, 562-574 (21 U.S.C. 346, 348, 352, 353, 355, 356, 357, 360, 360c-360f, 360h-360j, 361, 371(a), 376, and 381); secs. 215, 351, 354-360F, Pub. L. 410, 58 Stat. 690, 702 as amended, 82 Stat. 1173-1186 as amended (42 U.S.C. 216, 262, 263b-263n).

Subpart A—General Provisions

§ 50.1 Scope.

This part applies to all clinical investigations regulated by the Food and Drug Administration under sections 505(i), 507(d), and 520(g) of the act, as well as clinical investigations that support applications for research or marketing permits for products regulated by the Food and Drug Administration, including food and color additives, cosmetics, drugs for human use, medical devices for human use, biological products for human use, and electronic products. Additional specific obligations and commitments of, and standards of conduct for, persons who sponsor and/or monitor clinical investigations involving particular test articles may also be found in other parts (e.g., Parts 312 and 812) of this chapter. Compliance with these parts is intended to protect the rights and safety of subjects involved in investigations filed with the FDA pursuant to sections 406, 409, 502, 503, 505, 506, 507, 510, 513-516, 518-520, 601, 706, and 801 of the act and sections 351 and 354-360F of the Public Health Service Act.

§ 50.3 Definitions.

As used in this part:

(a) "Act" means the Federal Food, Drug, and Cosmetic Act, as amended (secs. 201-902, 52 Stat. 1040 et seq., as amended (21 U.S.C. 321-392)).

(b) "Application for research or marketing permit" includes:

(1) A color additive petition, described in Part 71 of this chapter.

(2) A food additive petition, described in Part 171 of this chapter.

(3) Data and information regarding a substance submitted as part of the procedures for establishing that a substance is generally recognized as safe for use that results or may reasonably be expected to result, directly or indirectly, in its becoming a component or otherwise affecting the characteristics of any food, described in §§ 170.30 and 570.30 of this chapter.

(4) Data and information regarding a food additive submitted as part of the procedures regarding food additives permitted to be used on an interim basis pending addtional study, described in § 180.1 of this chapter.

(5) Data and information regarding a substance submitted as part of the procedures for establishing a tolerance for unavoidable contaminants in food and food-packaging materials, described in section 406 of the act.

(6) A "Notice of Claimed Investigational Exemption for a New Drug," described in Part 312 of this chapter.

(7) A new drug application, described in Part 314 of this chapter.

(8) Data and information regarding the bioavailability or bioequivalence of drugs for human use submitted as part of the procedures for issuing, amending, or repealing a bioequivalence requirement, described in Part 320 of this chapter.

(9) Data and information regarding an over-the-counter drug for human use submitted as part of the procedures for classifying such drugs as generally recognized as safe and effective and not misbranded, described in Part 330 of this chapter.

(10) Data and information regarding a prescription drug for human use submitted as part of the procedures for classifying such drugs as generally recognized as safe and effective and not misbranded, to be described in this chapter.

(11) Data and information regarding an antibiotic drug submitted as Part of the procedures for issuing, amending, or repealing regulations for such drugs, described in Part 430 of this chapter.

(12) An application for a biological product license, described in Part 601 of this chapter.

(13) Data and information regarding a biological product submitted as part of the procedures for determining that licensed biological products are safe and effective and not misbranded, described in Part 601 of this chapter.

(14) An "Application for an Investigational Device Exemption," described in Part 812 of this chapter.

(15) Data and information regarding a medical device for human use submitted as part of the procedures for classifying such devices, described in section 513 of the act.

(16) Data and information regarding a medical device for human use submitted as part of the procedures for establishing, amending, or repealing a standard for such devices, described in section 514 of the act.

(17) An application for premarket approval of a medical device for human use, described in section 515 of the act.

(18) A product development protocol for a medical device for human use, described in section 515 of the act.

(19) Data and information regarding an electronic product submitted as part of the procedures for establishing, amending, or repealing a standard for such products, described in section 358 of the Public Health Service Act.

(20) Data and information regarding an electronic product submitted as part of the procedures for obtaining a variance from any electronic product performance standard, as described in § 1010.4 of this chapter.

(21) Data and information regarding an electronic product submitted as part of the procedures for granting, amending, or extending an exemption from a radiation safety performance standard, as described in § 1010.5 of this chapter.

(22) Data and information regarding an electronic product submitted as part of the procedures for obtaining an exemption from notification of a radiation safety defect or failure of compliance with a radiation safety performance standard, described in Subpart D of Part 1003 of this chapter.

(c) "Clinical investigation" means any experiment involving a test article, which experiment is either subject to requirements for prior submission to the Food and Drug Adminsitration under section 505(i), 507(d), or 520(g) of the act, or which experiment is not subject to requirements for prior submission to the Food and Drug Administration under these sections of the act, but the results of which are intended to be later submitted to, or held for inspection by, the Food and Drug Administration as part of an application for a research or marketing permit. The term does not include experiments that are subject to the provisions of Part 58 of this chapter, which governs nonclinical laboratory studies.

(d) "Investigator" means an individual who actually conducts a clinical investigation, i.e., under whose immediate direction the test article is administered or dispensed to, or used involving, a subject.

(e) "Person" includes an individual, partnership, corporation, association, scientific or academic establishment, government agency or organizational unit thereof, and any other legal entity.

(f) "Sponsor" means a person who initiates a clinical investigation, but who does not actually conduct the investigation, i.e., the test article is administered or dispensed to, or used involving, a subject under the immediate direction of another individual. A person other than an individual (e.g., corporation or agency) that uses one or more of its own employees to conduct a clinical investigation it has initiated is considered to be a sponsor (not a sponsor-investigator), and the employees are considered to be investigators.

(g) "Sponsor-investigator" means an individual who both initiates and actually conducts, alone or with others, a clinical investigation, i.e., under whose immediate direction the test article is administered or dispensed to, or used involving, a subject. The term does not include any person other than an individual, e.g., corporation or agency.

(h) "Subject" means a human who is or becomes a participant in a clinical investigation, either as a recipient of the test article or as a control. A subject may be either a person in normal health or a patient to whom the test article might offer a therapeutic benefit or provide diagnostic information.

(i) "Institution" means a person, other than an individual, who engages in research on human subjects or in the delivery of medical services to individuals, as a primary activity or as an adjunct to providing residential or custodial care to humans. The term includes, for example, a hospital, retirement home, prison, academic establishment, and pharmaceutical or device manufacturer. "Facility" as used in section 520(g) of the act is deemed to be synonymous with the term "institution" for purposes of this part.

(j) "Institutional review board" means any board, committee, or other group formally designated by an institution for the purposes of reviewing clinical investigations or other types of biomedical research involving humans as subjects, approving the initiation of such investigations or research, overseeing the conduct of such investigations or research, and/or terminating or suspending such investigations or research when necessary for the protection of the subjects. The term has the same meaning as the phrase "institutional review committee" as used in section 520(g) of the act.

(k) "Institutionalized subject" means:

(1) A subject who is voluntarily confined for a period of more than 24 continuous hours on the premises of, and in the care of, an institution (e.g., a hospital in-patient or a retirement home resident), whether or not that institution is a sponsor of the clinical investigation; and

(2) A subject who is involuntarily confined for any period of time in a penal institution (e.g., jail, workhouse, house of detention, or prison), or another institution (e.g., a hospital) by virtue of a sentence under a criminal or civil statute, or awaiting arraignment, commitment, trial, or sentencing under such a statute, or by virtue of statutes or commitment procedures which provide alternatives to criminal prosecution or incarceration in a penal facility.

(l) "Prisoner" means any individual involuntarily confined or detained in a penal institution. The term is intended to encompass individuals sentenced to such an institution under a criminal or civil statute, individuals detained in other facilities by virtue of statutes or commitment procedures which provide alternatives to criminal prosecution or incarceration in a penal institution, and individuals detained pending arraignment, trial, or sentencing.

(m) "Test article" means any drug (including a biological product for human use), medical device for human use, human food additive, color additive, cosmetic, electronic product, or any other article subject to regulation under the act or under sections 351 and 354-360F of the Public Health Service Act.

Subpart B—[Reserved]

Subpart C—Protections Pertaining to Clinical Investigations Involving Prisoners as Subjects

§ 50.40 Applicability.

(a) The regulations in this subpart are applicable to all clinical investigations involving prisoners as subjects, subject to requirements for prior submission to the Food and Drug Administration under section 505(i), 507(d), or 520(g) of the act, or conducted in support of an application for a research or marketing permit for a product regulated by the agency.

(b) Nothing in this subpart shall be construed as indicating that compliance with the procedures set forth herein will authorize research involving prisoners as subjects, to the extent such research is limited or barred by applicable State or local law.

§ 50.42 Purpose.
